Seeds.—The seed trade rules firm for all varieties, and a fair business has transpired during the week.

Tobacco.—Our market continues without change. Home trade buyers have operated but sparingly in North American tobacco. For exportation there has been more inquiry; transactions, however, have been but limited, arising from the small stock on sale. For other growths there has been a great inquiry, but some considerable sales have been effected at full prices.

Leather.—The leather trade has been rather dull during the past week, and with a good supply of fresh leather at Leadenhall on Tuesday, there was not any commensurate increase in the demand. The articles most scarce and in request are light crop hides, light English butts, calf skins of nearly all weights, kips of good quality, and English horse hides. No alteration can be quoted in prices.

Metals.—There is mostly a continued inactivity in our market. Copper in slow of sale, but not materially changed in quotations. Tin has not been very much dealt in, but prices have become firmer in consequence of the price realised at the sale of Banca, in Holland, on 30th instant, when 80,000 slabs were sold at prices equal to 130/ 10s, delivered here. Spelter is rather firmer in price. Lead is well maintained. Tinplates steady.

Tallow.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	3	1
Yellow Russian ditto	45	0
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

Monday, March 27.—The total imports of foreign stock into London last week amounted to 12,311 head. In the corresponding week in 1870, we received 8,187; in 1869, 7,944; in 1868, 5,345; and in 1867, 7,923 head.

The cattle trade has been in a quiet state. The heaviness in the dead meat market and the stoppage of rather large supplies at the waterside—upwards of 11,000 sheep, in addition to about 600 beasts, being detained there—have had a depressing effect, and prices have given way. As regards beasts the arrivals from our own grazing districts have been good, both as regards number and quality. The demand has been heavy, and prices have fallen 2d to 4d per 8 lbs. The best Scots and crosses have occasionally made 5s 6d, but 5s 4d per 8 lbs has been the general top quotation. Moderate supplies of sheep have been in the pens. The demand has been heavy, and a decline of 2d per 8 lbs has taken place. The best Downs and half-breds in the wool selling at 6s 2d to 6s 4d, out of the wool at 5s 4d to 5s 6d per 8 lbs. Lambs have been disposed of at 7s 6d to 8s per 8 lbs. Calves have been quiet and the demand for pigs has been inactive.

Supplies on Sale

	March 28, 1870.	March 27, 1871.
Beasts	3,339	2,800
Sheep and lambs	23,835	14,800
Calves	36	66
Pigs	70	50

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

	s	d		s	d		s	d		s	d

Prime small ditto	5	0		5	2	Large pork	3	4		4	0
Veal	5	0		5	4	Small pork	4	4		5	0

Lamb, 7s 0d to 8s 0d.

HOP MARKET.

BOROUGH, Friday, March 31.—Much quietness is apparent in this market. The inquiry for all descriptions continues inactive, and the tendency of values is unfavourable. Mid and East Kent, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, March 31.—Fair average supplies of potatoes have been on sale. The trade has been quiet, at our quotations:—English shaws, 70s to 100s; English regents, 60s to 95s; Scotch regents, 60s to 95s, Scotch rocks, 60s to 80s.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 31.—The public sales of sundry foreign descriptions, held here on Tuesday and Wednesday last, have gone off with unusual good spirit; of the 6,157 bales offered 4,200 bales having passed the hammer at very satisfactory prices. Peru, Lima, Georgian, Egyptian, Morocco, and some unwashed River Plate realised some advance; other kinds fully maintained their late value, and only Turkey and Angora were neglected, and consequently withdrawn; but some were sold by private contract after the auctions.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, March 31.—There has been an improved tone at this market to-day. Wheat closes with a good trade at 1d dearer. Flour quiet. Indian corn the turn better. Barley slow sale. Beans quiet. Peas very scarce, 44s to 44s 6d. Oats quiet. Oatmeal dull.

WAKEFIELD, Friday, March 31.—At this market to-day wheat is in scanty supply, and prices are 1s dearer than last Friday; but owing to the state of the flour trade, millers do not pay the advance freely. Little English barley on offer, but of Danish there is a fair show, and trade is steady at late rates. English beans are dearer.

The Gazette.

TUESDAY, March 28.

BANKRUPTS.

Charles Birks and Henry George Stap, Winchester court, City, commission agents.
Charles George Crawford, Leadenhall street, merchant.
Alfred Paxman, Seven Sisters' road, Holloway, licensed victualler
Alexander Werner, Bishopsgate street, restaurant proprietor.
Charles Gregory, Birmingham, coal merchant.
George Greaves, Wetherby, Yorkshire, tailor.
Richard Harris, Liverpool, draper.
John Draper Hemsley, Nottingham, colliery proprietor.
James Rutherford Lumley, Northampton, major.
Francis Newbould, Clifton, Yorkshire, farmer.
William Peel, Leeds, baker.
George Phillips, Manchester, and Gorton, near Manchester, currier.
Amelia Radcliffe, Bywell St Peter, Northumberland, spinister.
William Smith, Littletown, Yorkshire, cardmaker.
Susannah Vernon, Thomas Vernon, James Walter Holden, and Samuel Bullas, Dudley Port, Staffordshire, ironmasters.
John Peter Willmot, Plymouth, chemist.

SCOTCH SEQUESTRATIONS

William Ritchie Scott, Glasgow, clerk.
John M'Farlane, Coatbridge, spirit dealer.
George Thomson and Alexander Thomson, Arbroath, grocers.
Hugh Drummond, Crossgates, Fifeshire, contractor.
John Rattray, Dundee, late clothier.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

Michael Kenny, Bedford place, Commercial road East, pianoforte and music seller.
J. W. Young, Savage gardens, Tower hill, general merchant.
Frederick Keene, Walworth road, builder.
Henry Bryant, North street, Whitechapel road, horsemeat salesman.
William Henry Mitchell, Chippenham road, Harrow road, builder.
James Arthur Abbott, Saint Paul's road, Highbury, contractor.
Matthew Woolcock, James street, Devonport, travelling draper.
John Travis, Rochdale road, Oldham, innkeeper.
Robert Pyne, Stapleton road, Bristol, baker.
William Grice, Parliament street, York, tailor and outfitter.
William Smith, High street, Chepstow.
Markham Deverill Hoe, Long Clawson, farmer.
George Sidey, the Promenade, Ealing, builder.

SCOTCH SEQUESTRATIONS.

William Fell, Perth, rag and china merchant.
James Gilmour, Elderslie street, Glasgow, provision dealer.
George Lambie, Main street, Anderston, Glasgow, grocer and wine merchant.
William Campbell, jun., Causeyside street, Paisley, manufacturer.
John William Powell, Edinburgh, photographer.

PERRY DAVIS' VEGETABLE

PAIN KILLER.

FOR INTERNAL AND EXTERNAL USE.

DEPOT—17 SOUTHAMPTON ROW, W.C. Price 1s 1½d, 2s 9d, 4s 6d, and 11s per bottle. Inhaler, 2s 6d each.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

FOR GENTLEMEN.—H. J. NICOLL'S SPRING OVERCOATS, of waterproof Tweed Cloths, 20s; do., with Silk lapels, 21s; of waterproof Melton cloths, 42s; of waterproof Cheviot cloths, with silk facings, 52s 6d.

H. J. NICOLL'S SPRING CHEVIOT TROUSERS, 14s; do., Negligé Suits, 42s.

FOR LEVEES AND DRAWING ROOMS.—H. J. NICOLL'S SUPER CLOTH SUITS, with rich appointments, complete, £20 5s; also Deputy-Lieutenants' Uniforms, of the finest and richest description, £36. Estimates supplied for naval and military uniforms.

FOR BOYS.—H. J. NICOLL'S KNICKERBOCKER SUITS, from 21s. Morning Suits, from 25s; Evening Dress Suits, from 55s; Highland Suits, from 33s; Spring Overcoats in tweed cloths, from 14s; in Melton cloths, from 21s.

FOR LADIES.—H. J. NICOLL'S RIDING HABITS, in various coloured tweed, melton, and superfine cloths, from £3 3s to £8 8s; Pantaloons, 31s 6d; hats, with lace falls, 21s; waterproof Tweed Cloaks, from 21s; do. Costumes, from 63s.

SERVANTS' LIVERIES — THE best, at moderate prices.

H. J. NICOLL, MERCHANT Clothier to the Queen, the Royal Family, and the Courts of Europe, Army, Navy, and Civil Outfitter, 114 116, 118, 120 Regent street, and 22 Cornhill, London; 10 Mosley street, Manchester; 50 Bold street, Liverpool; and 39 New street, Birmingham.

OXYGENATED WATER HOLDS IN Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.
Laboratory, 36 Long Acre, and all Druggists.

TEETH.—MR WEBB (MANY years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S extraordinary improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 562, improved Jan., 1871, afford the following advantages:—

1stly. EXTREME LIGHTNESS (being completely self-supporting), combined with great efficiency, durability, and comfort, thus avoiding the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth.

2ndly. MODERATE CHARGES, accounted for by their extreme simplicity of construction, while the highest class of mechanism and materials only are employed, combined with an experience of half-a-century in their adaptation.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the compressed NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, ensuring this desideratum with an absolute certainty, the laughing gas being not only absolutely free from danger but positively pleasant.

4thly. So successful an imitation of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,
64 LUDGATE HILL, CITY, and 56 HARLEY ST., CAVENDISH SQ., London.

MESSRS GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.
Price 1s 6d and 5s.

JANE HARRISON, CITY, GLAZIER.

WILLIAM HARRISON AND SON, CONTRACTORS for REPAIRS, DECORATORS, &c. 133 Upper Thames street, E.C., and 26 Change alley (Lombard street and Cornhill). Drawings, Specifications, and Estimates made for Repairs and Alterations in London and the country.

W. HARRISON AND SON are now booking orders for Office Cleaning, Whitewashing, &c., for Thursday Evening, Good Friday, Saturday, and Easter week.

TO SHIPPERS AND EXPORTERS.

MILNERS' STRONG HOLDFAST AND FIRE-RESISTING SAFES, CHESTS STRONG ROOMS AND DOORS, with all their Latest Improvements.—The strongest and (quality considered) the cheapest safe-guards against fire and the modern burglar. Wanted wherever cash and books are used. In quantities at wholesale prices. Milners Phœnix Safe Works, Liverpool, the most extensive and complete in the world. Depots: Liverpool, Manchester, Sheffield, Leeds, Hull; London depot, 47A Moorgate street, City, near the Bank of England. Circulars free by post.

HOLLOWAY'S OINTMENT AND PILLS.—In angry or indolent sores, and all skin diseases, originating in impure or weak blood or depraved secretions, the joint agency of Holloway's ointment and pills is perfectly irresistible. It is of little consequence how long these disorders may have lasted, or how sluggish, obstinate, or malignant they may seem, the daily application of the ointment to the parts affected and a course of these matchless pills will most certainly effect a cure, not temporary or superficial, but permanent and complete. Both the ointment and pills are composed of rare balsams and unmixed with mercury or any other deleterious substances. They are accordingly as mild and safe as they are powerful and efficacious.

BRINDISI OVERLAND ROUTE TO THE EAST.—The Mails to and from Egypt, India, China, Japan, Australia, &c., are now forwarded via Dover, Ostend, Brussels, Cologne, Mayence, Aschaffenburg, Munich, Innsbruck, the Brenner Pass, Verona, Padova, Bologna, Ancona, Brindisi, and Alexandria.

A weekly Express Train leaving London from S. E. and L. C. and D. Stations every Friday—1st class service, 8.35 p.m.; 2nd class service, 7.40 a.m.

The PENINSULAR and ORIENTAL COMPANY'S Steamers leave Brindisi every Tuesday, at 4 a.m., and arrive at Alexandria on the following Friday, performing the passage in 75 hours (actual time).

Beyrouth, Jaffa, and Cairo regularly, viâ Brindisi and Alexandria.

The AUSTRIAN LLOYD'S Steamers leave Brindisi every Friday for Corfu, Syra, Athens (Piræe), Smyrna, Constantinople, and the Black Sea, and every second Friday from the 10th March for Salonica, viâ Syra.

The shortest and quickest route to Naples, viâ Foggia, and Rome, viâ Falconara, is viâ Bologna and Ancona, by the SOUTH ITALIAN RAILWAY.

The Great East India First-class Hotel, at Brindisi, is now open.

For further information apply to the South Italian Railway Company's Sole Agents, Lebeau and Co., 6 Billiter street, London, E.C.

OVERLAND ROUTE viâ MARSEILLES.—COMPAGNIE DES MESSAGERIES MARITIMES DE FRANCE.—French Mail Steam Packets leave Marseilles as follows:—

Every four weeks from March 19. For { Port Said, Ismailia, Aden, Suez, Mauritius, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Batavia, Saigon, Hong Kong, Shanghae, and Yokohama (Japan).

To ALEXANDRIA fortnightly from December 8.

For passage, freight, and information apply to the Agents, 97 Cannon street, London; G. H. FLETCHER and CO., Liverpool; at the offices of the Compagnie des Messageries Maritimes de France in Paris, Lyons, Bordeaux, and Marseilles; or to Smith and Co., Rotterdam.

* Passengers Eastward of Suez, securing their berths in London, are entitled to the conveyance of their luggage free to Marseilles.

NOTICE.—THE PACKETS OF THE UNION STEAMSHIP COMPANY will NOT in future CALL at PLYMOUTH.

CAPE OF GOOD HOPE, ALGOA BAY, and NATAL.—The UNION STEAMSHIP COMPANY'S ROYAL MAIL PACKETS SAIL from SOUTHAMPTON on the 11th and 25th of each month, calling at Madeira. A surgeon and stewardess in each ship.

RATES OF PASSAGE MONEY.

	First Class.	Second Class.
To Cape Town and St Helena..	30 guineas	20 guineas
To Algoa Bay and Mossel Bay	33 guineas	22 guineas
To Natal and East London ...	37 guineas	25 guineas

Including a free pass by rail from London to Southampton for passengers and baggage, also dock and agents' charges.

N.B.—The packet leaving Southampton on the 11th calls at St Helena; the packet leaving on the 25th corresponds with Natal.

Apply to Falconer and Mercer, 23 Leadenhall street, London; or Thomas Hill, Southampton.

OVERLAND ROUTE.—The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels by their Steamers for—

	From Southampton.	From Brindisi.
GIBRALTAR ... MALTA	Every Saturday, at 2 p.m.	—
ALEXANDRIA.. ADEN ..... BOMBAY	Every Saturday, at 2 p.m.	Every Tuesday, at 2 a.m.
GALLE..... MADRAS..... CALCUTTA ... PENANG ..... SINGAPORE ... CHINA..... JAPAN.....	Saturday, Apr. 1, 2 p.m. And every alternate Saturday thereafter.	Tuesday, Apr. 11, at 2 a.m. And every alternate Tuesday thereafter.
AUSTRALIA ... NEW ZEALND.	Saturday, Apr. 15, 2 p.m. And every fourth Saturday thereafter.	Tuesday, Apr. 25, at 2 a.m. And every fourth Tuesday thereafter.

And all Ports touched at by the Steamers of the British India and the Netherlands India Steam Navigation Companies.

An abatement of 20 per cent. from the charge for the Return Voyage is made to Passengers to or from ports eastward of Suez reimbarking within six months of their arrival, and 10 per cent. to those reimbarking within twelve months.

For Rates of Passage Money and Freight, WHICH HAVE BEEN MUCH REDUCED, and all other information, apply at the Company's Offices, 122 Leadenhall street, London, or Oriental place, Southampton.

PROSPECTUS.

The "Realm Marine Insurance Company" is established for the purpose of supplying Merchants with additional facilities for effecting Marine Insurances.

The completion of the Suez Canal, and the establishment of Telegraphic communication with the East, have given a new and powerful stimulus to European trade with India, China, Japan, and Australia.

The chief ship-builders of the United Kingdom are at present turning out, every three months, upwards of 250,000 tons of steam-shipping suitable for the Canal.

British commerce in the East during the last 30 years has advanced in annual value from 17 to upwards of 200 millions sterling, and is steadily increasing. The trade of Egypt, India, China, and Australia, with Great Britain, is, however, still in its infancy.

Guarantees for the protection, by Insurance, of this immense and advancing trade have not increased in corresponding proportions.

The Realm Marine Insurance Company will, therefore, in addition to general business give special attention and provide adequate means for the protection at sea of Indian and Chinese commerce.

The large profits which the leading Marine Insurance Companies realise are expressed in the prices of their shares.

The—	Amount of Share. £	Amount paid. £ s d	Present Market Value. £ s
Indemnity	100	5 13 6	115 0xd
Marine	100	15 0 0	85 0
Ocean	25	5 0 0	19 0xd
Thames and Mersey	20	2 0 0	5 10xd
Universal	20	5 0 0	11 5xd
British and Foreign	20	4 0 0	8 0xd
Union	50	5 0 0	10 5xd

The "Thames and Mersey," at the close of 1869, after paying all office expenses out of interest on investments, declared for distribution a net profit of £135,000. Shares in the Thetis, established last April, on which £5 was paid, are already quoted at £4 premium, or at an advance of 80 per cent. on the amount paid.

The Realm Marine Insurance Company, in providing increased facilities for Insurance, will render service to trade, and afford favourable opportunities for the investment of money.

The services of Henry Woodfall, Esq., the well-known Underwriter and Average Adjuster, have been secured as Underwriter to the Company.

A copy of the Memorandum and Articles of Association may be seen at the Offices of Messrs Newman, Dale, and Stretton, Solicitors to the Company, 75 Cornhill.

Applications for shares addressed to the Directors in the accompanying form may be made to the Bankers and Secretary of the Company, at the Temporary Offices, No. 2 Austin friars, London, E.C., and to all Stock Brokers in the United Kingdom; but no application will be considered unless a deposit of £1 for each share applied for shall have been previously made with the Bankers of the Company. Should a smaller number of shares than that applied for be allotted, the balance of the sum deposited with the Bankers will be appropriated towards the payment of the £3 per share, or in the event of no allotment being made, the whole of the deposit will be returned.

An Agreement dated 1st March 1871, made between William Preston Willink, as Agent for and on behalf of the Realm Marine Insurance Company (Limited) of the one part, and Henry Woodfall, of London, of the other part, has been entered into, engaging Mr Woodfall as Underwriter.

FORM OF APPLICATION FOR SHARES.
To be Retained by the Bankers.

No. ——

To the Directors of the Realm Marine Insurance Company.

Gentlemen,—Having paid to your Bankers the sum of , being a Deposit of £1 per share, I hereby request that you will allot me shares of £20 each in the Realm Marine Insurance Company (Limited), and I hereby agree to accept such shares, or any smaller number that may be allotted to me, and also agree to become a shareholder in the Company.—I am, Gentlemen, yours obediently,

Usual signature .....
Name in full .....
Address in full .....
Date .....

ISSUE of £552,000 PRUSSIAN RAILWAY PREFERENCE SHARES, being 18,400 Shares of 200 Thalers, or about £30 each, of the POMERANIAN CENTRAL RAILWAY COMPANY, constituting the entire Preference Capital of the Company. The ordinary Shares, 18,400 in number, have been subscribed for in Germany, and are being duly paid upon in accordance with the statutes. Price of issue £24 per £30 Share of Nominal Capital. £2 payable on application, £3 upon allotment, £8 on 31st May, 1871, and the remainder by instalments of not more than £20 per cent. of the nominal amount, at intervals of not less than three months. The Shares bear interest at £5 per cent. per annum upon the whole nominal amount from the 1st January, 1871, up to the completion of the works. After that time a dividend will be payable of £5 per cent., in priority to that payable upon Ordinary Shares, yielding to the investor 6¾ per cent. per annum. After satisfying the £5 per cent. as aforesaid and the Ordinary Share Dividend, the remaining profit (estimated by the calculations hereunder to produce an additional dividend of over £5 per cent. on the whole Capital, or, with the Preference Dividend, upwards of £11 per cent. for the Preference Capital), will be divisible rateably between the Preference and Ordinary Shareholders. Any deficit in the Dividends on the Preference Shares in any one year is chargeable in priority on the earnings of future years, and no further Preference or Debenture Capital can be issued. The completion of the Railway within three years from the 5th July, 1870, is guaranteed to the German Government by a deposit of 304,700 Thalers, or about £45,705 sterling, which has been made at the Royal State Treasury in Berlin, in State and Municipal Bonds payable to bearer, and the interest payable during construction will be secured by an investment in Consols of sufficient amount in the names of Trustees. The Contractors are bound by their Contract with the Directors to complete the Railway within two years from the 5th July, 1870, and the works are now in progress.

POMERANIAN CENTRAL
RAILWAY.
Concession dated July 5, 1870.

Capital 7,360,000 Thalers, about £1,104,000, divided into 18,400 Preference Shares of 200 Thalers, about £30 each, equal to £552,000.

Length of Railway about 19½ German miles, or about 91 English miles.

DIRECTORS.

PRESIDENT—H. F. W. Wagener, Privy and Chief Counsellor of the Government, Presiding Councillor in the Ministry of State, Knight P.P., and Member of the Reichstag, Berlin.
H. Schuster, Knight P.P., Bank Director and Landed Proprietor, Berlin.
Gustav Oder, Director and Banker, Berlin.
Baron Von Arnim Heinrichsdorf, of Heinrichsdorf Castle, Pomerania, Knight P.P., Member of the Reichstag and Chamber of Deputies.
Baron Von Mellenthin, Major A.D. Knight P.P., Member of the Chamber of Deputies, Falkenburg Castle, Pomerania.
Baron Von Owen, President of the District, Member of Chamber of Deputies, Knight P.P., Ossowska, Pomerania.
Baron Von Bonin-Wulfslatzke, Knight P.P., Wulfslatzke, Pomerania

SOLICITORS IN LONDON—J. and R. Gole, 49 Lime street.
BANKERS—The London and County Bank, London.

AGENTS.
Blyth and Co., 17 Gracechurch street, London.
DOMICILE OF THE COMPANY—No. 5 Leipsic place, Berlin.

Applications are invited for 18,400 Preference Shares of 200 Thalers each of the Pomeranian Central Railway.

All the Ordinary Shares have been taken up and subscribed for in Germany.

Interest on the Preference Shares at £5 per cent. per annum will accrue from the 1st January, 1871, until the completion of the railway, which is fixed by the statutes to take place within three years from the 5th July, 1870, and will be payable on the whole nominal amount of the Share.

From the expiration of the half-year after the completion of the railway, the net balance of receipts is to be divided half-yearly in the following proportions:—viz., £5 per cent. (charged also upon the profits of subsequent years by way of additional security) on the nominal amount of the Preference Shares. Subject to this payment, a dividend of 6 2-3 per cent. on the nominal amount of the Ordinary Shares will be payable to the holders. The remaining balance will be apportioned at the end of each year between the holders of Preference and Ordinary Shares, according to the amounts which they hold. The priority of the above dividend of £5 per cent. over the dividends on ordinary shares is further secured by a charge prospectively on the profits of future years.

The Preference Shareholders also have a charge for the amount of their Shares upon the corpus of the undertaking in priority to Ordinary Shareholders.

The interest will be payable half-yearly at the London and County Bank, London.

The price of the Shares now offered is £24 per Share of the nominal amount of £30.

The Pomeranian Central Railway Company, marked on the map accompanying this prospectus, is incorporated by a Statute which received the sanction of the King of Prussia on the 5th of July, 1870. It is about 91 English miles in length, and, passing through a country unequalled in agricultural resources, forms the most direct route from the north-east of Germany (including the important towns of Konitzberg and Dantzig) to the west (including Stettin and Hamburg with their increasing trade). It is being constructed as a first-class railway, and is intended to form a link between the Eastern Railway of Prussia and the Berlin, Stettin, and Stargard Railway, its position being most advantageous for the through corn and other traffic passing from east to west.

The remunerative character of railway enterprise in Prussia is well known, and the following facts afford reliable data for the probable returns for this line. The receipts of the Eastern Railway of Prussia (121 German, or 566 English, miles in length) average £46 9s 10½d per English mile per week, while the receipts of the Berlin, Stettin, and Stargard Railway (29 7/10th German, or 139 English, miles in length) average £46 15s 4d per English mile per week. There is not only every reason for believing that the proposed line will be equally profitable, but that as a connecting link between these two important railways, it should, by stimulating their traffic, yield results in excess of the calculation below: assuming that the receipts are an average of the other lines at the present time, this would give £46 12s 7d per English mile per week, or for the entire mileage £220,649 4s 4d per annum. And after deducting working expenses to the amount of (say) 50 per cent. would leave a net income of—

	£	s	d
	110,324	12	2
For preference dividend, £5 per cent. £27,600	0	0	
Ordinary shares) Dividend of £6 13s 4d per cent.) 38,800	0	0	
Yearly sum required by statutes to be reserved 1,747	16	0	
	66,147	16	0
Leaving	44,176	16	2

to be divided rateably between the Preference and Ordinary Shares, giving a further dividend of over £5 per cent. per annum on the investment at the price of issue. It may be observed, however, that on Prussian lines of a similar character the working expenses do not exceed £40 per cent. of the gross receipts.

The Preference Shares now offered for subscription form a first charge upon the Company's net assets, after deducting working expenses and the necessary payments for creating a reserve fund and renewal fund, as the statutes confer no borrowing powers.

The liability of the shareholders is limited to the amount subscribed for.

The sum of 304,700 thalers, about £45,705, has been deposited at the Royal General State Treasury in Berlin, in state and municipal bonds, for guaranteeing the completion of the line within the specified time, and the interest on the Preference Shares during construction will be secured by an investment in Consols of a sufficient amount in the names of Trustees.

Provisional Certificates to bearer will be issued in exchange for the bankers' receipt, to be replaced when fully paid up by Share Certificates of the Company, payable to bearer, distinguished by a number and free of duty.

The share capital of the Company is 7,360,000 thalers, equal at par to £1,104,000 sterling, divided into—

	£
(a) 18,400 Ordinary Shares of 200 thalers, equal to £30 each	3,680,000 thalers, equal to 552,000
(b) 18,400 Preference Shares of 200 thalers, equal to £30 each	3,680,000 thalers, equal to 552,000
Total	7,360,000 thalers 1,104,000

Copies of the Company's Statutes, and of the Certificates of Deposit of Bonds, and List of Ordinary Shareholders, can be seen at the offices of the Solicitors, Messrs J. and R. Gole, 49 Lime street, London.

Prospectuses may be had at the London and County Bank and its branches, and at the offices of the Agents, 17 Gracechurch street, London.

SUBSCRIPTION FOR 18,400 PREFERENCE SHARES OF 200 THALERS EACH OF THE POMERANIAN CENTRAL RAILWAY COMPANY.

FORM OF APPLICATION.
(To be retained by the Bankers.)

To Messrs Blyth and Co., 17 Gracechurch street, London, E.C.

Gentlemen,—Having paid to the London and County Bank to a joint account of the Pomeranian Central Railway Company and Messrs Blyth and Co., the sum of £ being £2 per share on my application for shares of 200 thalers each of the Pomeranian Central Railway Company, I request you to have transferred to me that or any less number of the said shares, and I hereby agree to accept such transfer, and to pay the balance in respect of such shares according to the terms of the prospectus.

Dated , 1871.

Name in full.....
Address .....
Profession (if any) .....
Date .....
Signature .....

POMERANIAN CENTRAL RAILWAY.—PREFERENCE SHARES.

The SUBSCRIPTION LIST for the above will CLOSE on TUESDAY NEXT, the 4th April, at 4 p.m.

31st March, 1871.

On April 1 was Published, No. III., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for March, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to March 29.

Advertisements for next Number, to be published on April 29, must be sent to insure insertion on or before April 27.

OFFICE—340 Strand.

LOCAL BURDENS.

Mr Goschen's Report on Local Taxation is in the highest degree excellent; but it is also to those not much accustomed to statistics somewhat difficult. The information is so minute, the tables so many, and often at first sight so like one another, that an unpractised reader is sometimes puzzled. We have therefore extracted the principal tables—all, we think, which most men of business will care for, and put them at the end of this article. And we now propose to show how this old subject—one which to many of our readers will recall the memory of Mr Cobden and the Anti-Corn League—looks after considering this new information. Whatever opinions may be formed on other points, there can be but one as to the singular value of the figures Mr Goschen places before us, and as to the very great thought and labour he must have given to obtain and digest them. Figures collected without an object, tables without an idea, are very common; but large bodies of figures like this, steadily organised with a distinct object, are very rare, very difficult, and require a most unusual stress of persistent attention.

At the very threshold of the subject there is something new. No one till now had any exact notion of the local expenditure of the country, though this is plainly the real local burden—the aggregate of capital thus diverted from productive uses and directed to political uses. This primary fact we know to be as follows:—

	£
Expenditure on general objects directed by Parliament for England and Wales	22,117,000
New works	4,247,000
Interest on debt	2,109,000
	28,473,000

This was the entire cost of our Local Government and of the advantages which it procures to us, and the charge was thus defrayed:—

	£
Rates	16,223,000
Dues, Tolls, Fees, &c.	4,363,000
Grants from Imperial Government	1,225,000
Receipts from property, whether by rent or sale	1,335,000
Loans, after deducting repayments of debt	3,689,000
Miscellaneous receipts	1,539,000
	28,374,000

—the slight difference between that and the expenditure being defrayed out of balances in the hands of the various expenders. These figures look simple as they stand, and ought to be easily obtainable, but an infinite deal of labour has been really necessary to compute them. The number of spending bodies in the country is immense; they make up their accounts under different heads, on discordant principles, and very often not for the same period of time. In consequence of the difficulty of putting the accounts together, they never were put together until now.

Now that we have the real figures, we see that a considerable part of the local revenues is not derived from direct taxation on local property. The 4,300,000*l* derived from dues, tolls, and fees, are a kind of indirect taxation on the miscellaneous public; the receipts from property and the miscellaneous receipts do not come out of the pockets of the ratepayer; and as a considerable part of the loans are for purposes which will directly augment local income, they will increase the means of the local taxpayer, and themselves provide a fund out of which they will be repaid. Local taxation is only one of the elements of local income, and one among the modes of providing for local expenditure, and not, as is often believed, the sole and only mode.

Only a little more than 16,000,000*l*, as we see, of local revenue is raised by direct local taxation, and before going into the details it will in the end save time if we pull ourselves up and ask why there should be any such local taxation? The Imperial Government, as we see, already makes large grants for local purposes: why should it not grant all that is wanted? why, in his next Budget, should not Mr Lowe have to provide for the "Home Department Estimates" as well as for the Naval and Military Estimates? The reply is that though he has the wealth of the nation at his disposal

he would scarcely be able to provide for them. The case would be this: A large number of scattered administrators all through the country would be pressed on to benefit the district in which they live. At every Board of Guardians, at every Quarter Sessions, there would be a demand for expenditure which would make the applicants happy and grateful, and the demand would be made on the applicants' neighbours, who would like his happiness, and who would enjoy his gratitude. Unless there is a counteracting motive, the administrative body will have an invincible inclination to make things pleasant, and the way to make things pleasant is to spend money. At present there *is* a most powerful counteracting motive; for they and their district will have to find the money which they grant. But if the local administrators had only to draw a cheque on London, they would soon draw large cheques with great rapidity. The only possible restraint would be to abolish Local Government, and to make some kind of despotic *prefet* determine in each district what should be done, and what should be spent. But no evil would be so great in Englishmen's eyes as this: they value the privilege of settling as they please the local affairs which concern themselves so much, and which concern others so little. They would submit to anything rather than have county and parish business settled by a "Jack in office" from London, to whom it would be constantly necessary to bow and cringe. And unpleasant as would be the remedy of administrative despotism, it would likewise be ineffectual too. We should soon hear from country gentlemen that the Home Office expenditure was as great a "muddle" as that of the War Office, and that it augmented as rapidly and as unintelligibly.

And this inevitable local taxation—this taxation which must be local if it is not to be intolerable—is of three kinds, which are most strongly contrasted. There is, first, that which is levied for national purposes—that is, from considerations of national policy; and, second, that which is levied for really local purposes, and for which, sooner or later, if they manage well, local bodies may expect to see their money's worth. Of the first kind is the Poor rate: obviously the relief of the poor is a duty undertaken by the country for the sake of the poor, and not for the sake of the district in which they live; in many cases it does not benefit that district perceptibly, in others perhaps it injures it. Of the second kind are the Drainage rates and the rates levied in all large towns for local improvements. These represent outlay which, if it be well chosen and well executed, is sure to augment the value of local property. And there is besides an intermediate class of rates, such as the Police rate, the charges under the Vaccination Act and the Assessment Acts, which are applied to expenditure that benefits the locality and the nation too. These we may call mixed rates because they are levied to defray expenditure which has been decided on for reasons both local and Imperial. If we adopt this division of rates, throwing into the mixed class everything dubious, the result is this:—

	£	£
PURELY NATIONAL RATE—		
Poor Law Relief		7,500,000
MIXED RATES—	£	
Expenses incurred under Vaccination Acts.....		
— — Registration Acts.....	300,000	
— — Assessment Acts.....		
* County, Hundred, Borough, and Police rate...	3,000,000	
		3,300,000
LOCAL RATES—		
Highway rate	1,500,000	
Lighting and Watching rate	100,000	
Improvement Commissioners	400,000	
General District rates	1,700,000	
General and Lighting rates in the Metropolis...	1,000,000	
Sewers, including Embankment rates	700,000	
Other rates, such as Burial Boards, and Fire Brigades	400,000	
		5,800,000
		16,600,000

* Much of the County rate if analysed is local, but for simplicity we class it as mixed.

—showing that the national burden of the Poor rate is almost one-half of the whole, the mixed rates about one-third, and the purely local rates the remainder.

And the course historically of these burdens has been that the purely local rates have greatly increased; in fact they belong almost exclusively to the "age of great cities," and to the modern disposition to miscellaneous improvement. Nor is there much record of the comparatively small sum which was thus collected in time past. It was collected under local Acts, of which the passing was little regarded except by the affected locality, and no one can now make any statistical history of them. We know generally that they are mainly the creation of recent times, and we cannot really be said to know any more: any minute figures would entirely be conjectural, might be erroneous, and would in a main aspect be delusive, because they would convey an impression that accurate knowledge existed, when in fact it is wholly absent.

We need not indeed much regret this ignorance. As to purely local matters we may fairly hope that localities gain by what they spend on themselves and assess from themselves; at any rate it is scarcely for any one else to have to meddle much with it. But as to the main matter, the two really interesting classes of rates—the national and the mixed—we have ample and most satisfactory information. It is as certain as figures can make it that the great national burden of the Poor rate is diminishing rapidly—diminishing, that is, proportionately and in comparison with our means of meeting and paying it. The rate in the £ for Poor Law relief *only* was in the following years respectively:—

	s	d
1803	3	4¼
1813–15	2	4¼
1827	2	5¾
1841	1	6¼
1856	1	8
1866	1	4½
1868	1	6

—being a diminution of more than 50 per cent. since the beginning of the century. And as this is by far the greatest single burden—and in one respect by far the most remarkable and peculiar burden, because it is that which the Imperial Parliament imposes on the locality for exclusively national reasons—its rapid and continuous decline is a singular benefit and a sure ground of abundant congratulation to the localities.

As to the next group which we have called the "mixed rates," there is not the same precise information. The way in which our local taxation has been imposed and collected is anything but favourable to scientific classification. But for practical purposes the returns give us ample information. There is a great group of rates commonly, though not always, collected with the Poor rate, and comprising the County rate, the Borough, and Highway rate, of which we can have the precise history. And it is this—

Rate per Pound of Total POOR RATES, including COUNTY, BOROUGH, and POLICE RATES, levied both separately and with the POOR RATE, and also CHURCH and HIGHWAY RATES.

	Rateable Value.	Amount Levied.	Rate per Pound.
	£	£	s d
1803	...	5,348,000	4 5¼
Average of 1813-14-15	...	8,164,497	3 1¾
1817	...	10,107,000	3 10¾
1827	...	9,489,687	3 8
1841	62,540,000	8,026,828	2 7
1852	67,700,000	8,700,000	2 7
1868	100,668,698	12,689,000	2 6¼

And this might be roughly described as the diminution in national and mixed rates, though in reality it is much more, because Highways—a very growing item—are local objects if anything is. And some of the augmenting parts of the County rate are local too. But even weighting the "national" and mixed" rates with these inappropriate and disadvantageous accompaniments, their diminution has been steady. And we are able to say, on the best and most perfect evidence, in respect of all expenditure save that which in the most narrow sense is local, and which is expended by local authorities for exclusively local purposes, that the diminution in the pressure has been remarkably great, steady, and continuous.

It is true that if we take *all* the rates, new and old, into the reckoning, the contrast is not so favourable. The immense new expenditure for the improvement of the Metropolis and of the great towns greatly augments the present burden; and, as we have said, we have no reliable account of the old miscellaneous improvements, small as they were. But the average total for all rates over the entire country is only 3s 4d, and we have just seen that at the beginning of the century the average of the recorded rates only was 4s 5¼d, and at that time these new improvement rates hardly existed. Partly the necessity did not exist; the great towns were then few; the now almost urban counties of Middlesex and Lancaster and the West Riding of Yorkshire were then in comparison agricultural; the immense expenses caused by the close collocation of great numbers of human beings had scarcely then begun. And even when that collocation existed people were

far less than now disposed to spend money on it. At the beginning of this century philanthropy was still weak; national sympathy was not much directed to urban suffering, and in consequence evils and vices were then endured easily and silently which would now excite the loudest and gravest indignation. Nothing can be better than to find that though we have great local evils to cure which our grandfathers had not—though we are infinitely more sensitive than we were to those sort of evils—though we spend immense sums in curing them which they certainly did not spend, and which perhaps they would not have thought it necessary to spend, yet, on the whole, aggregate local taxation is far less oppressive now than it was sixty or seventy years ago in their time.

But it will be said, granting that this is satisfactory, granting that the burdens on landed property have rateably diminished, yet still a great burden exists, and monied property does not bear that burden. Should this contrast exist? and how can such a difference be fair?

The first answer is that such a difference is involved in the idea of local taxation. Of course, for the local improvement rates it is quite right that local property should pay, and money has no locality; sovereigns, bank-notes, and interest-bearing securities—the most important part of monied property—are in one place to-day and miles off the next. It would be unjust to tax them, to improve the locality at which they happened to be found on the collecting day or the assessment day. And as to stock in trade, which used to be assessed to the relief of the poor, nothing could be more monstrous than to assess it equally with property. The attempt had to be given up, not because the assessors were particularly favourable to commercial wealth—on the contrary, rural assessors have always, like every one in English counties, had a partiality the other way, and set an undue value on agricultural property—but because the thing was unjust. Take the commonest case—that of a small shopkeeper in a country town; if you rate him on the goods in his shop, what do you do? You tax him on an amount many times greater than his real property. He owes—he has acceptances running to pay for—probably five-sixths of those goods. He has bought them on credit of the wholesale dealer, but he has not paid cash for them, and could not pay it; he carries on his trade by what Americans would call a chronic indebtedness. If you neglect a small trader's debts and tax him on his stock, you will, in these days of great credit, impose the most oppressive tax ever known, and you will risk the ruin of a large percentage of the class. If, on the other hand, you deduct a man's debts, and tax only the sum to his credit in his balance-sheet, you would have what is equivalent to a local income tax; and no country has ever yet borne such an institution. In America it has been tried, but it has been largely evaded, and rendered nugatory by false swearing. No body of small traders will ever let their competitor over the way know how much they are making; and yet secrecy is impossible if local rates are assessed on local profits. In a small town the amount of each man could not be concealed. And to be fair would involve an almost ludicrous result—ludicrous at least to those who are conversant with our rural districts. The farmers would have to be assessed on their farming profits, and it would be known by what each man paid to the poor rate exactly what each man made. The English farmers have in our day had many things forced on them which they did not like, and some by their professed friends, but they never yet had anything so disagreeable as the logical consequence of what some of their advocates now ask—the notoriety of their yearly profits at the Boards of Guardians and the Church vestry.

But if even these really insuperable objections to a local income tax could be overcome another even more insuperable would still remain. A local income tax cannot be made fair. In what parish are Baron Rothschild and Lord Overstone to be charged on their great monied wealth? They have houses and estates, suppose, each in ten parishes. In which of those ten are they to pay? Is it to be where the rates are highest or where their estates are largest? Their money is in none of them. And the effect would be that capitalists would never hold more land than they required, since if they did they would be exposed to a rate not only on that land but on all the rest of their wealth. If an astute enemy of the landed interest wanted to lower the value of land he would propose nothing so effectual as to enact that a millionaire who bought 5,000*l* of land should pay rates not only on that 5,000*l*, but on 995,000*l* he keeps in money. It would be a differential duty on rich buyers, and a bounty on a pauper proprietary.

But an objector may rejoin, "These arguments of yours only "prove that a local tax on personal property is impracticable. "Not that it would not be just. Granted that upon "grounds of necessity landed property must pay the local "charges, it ought to be exempted from some other charges. "Personal property ought to be exclusively charged with "some other burden; an equivalent ought to be given us." The reply is that landed property is and has always been held to be in this country of a different nature from other property. On principle, and as a scientific economist views it, the ownership of land is a monopoly given by the State for the purposes of cultivation, just as the concession of a railway is a monopoly given for the purpose of locomotion. In both cases a privileged opportunity is given by the State which one person enjoys and other persons do not—which is the source of profit and enjoyment to the possessor, a profit and an enjoyment from which all others are excluded. As a principle of political philosophy, no monopoly ought ever to be conceded by the State, except upon the condition for services to be performed, and with a right of supervision reserved. Mankind in general have not been philosophers, but they have in most cases rudely recognised the most obvious truths of philosophy. They have done so here. Almost everywhere in the world, the monopoly of land-ownership has been burdened with some conditions; hardly anywhere, if anywhere, is there a "separate ownership" of land such as we now naturally think of it (though historically the very idea is recent and of yesterday) to be found, except subject to certain duties, charged with certain responsibilities. In England least of all has it ever been so. In the middle ages, when the beginnings of our real property law were laid, the land was subject to very formidable burdens; it was the basis and foundation of our entire military system. It paid the "army estimates," as we should now speak. Gradually this condition of the privilege was evaded by the possessors of the privilege. The land now pays no more for our army than the funds; a long history has taken it from them. But the same history has brought other duties. For nearly three centuries the land has been liable for the relief of the poor. The owners of land have been burdened with that duty to the nation, and all land has been inherited and bought subject to it and with notice of it. It has also, in forms more or less modified, been subject to what we have called the mixed charges, which are partly for the benefit of the locality, and partly for the benefit of the nation; and, naturally, it was always subject to improvement charges, which were spent on its improvement, and which increased its rent. The owners of the land must not therefore complain of bearing national burdens; they have always borne national burdens, and the predecessors under whom they claim took the land on the condition of bearing them.

On the contrary, the real reason of complaint is that the silent progress of events is lessening the incidence of ancient obligations upon land, and lightening the burden which it ought to bear.

We have seen that the Poor-law charge on real property has been reduced since 1803 from 3s 4d to 1s 6d in the pound, and the "mixed charges" from 4s 5d to 2s 7d, which would of itself be a great boon to the landowner. But this is not all his gain. Not only is the aggregate poundage reduced, but he does not pay the same proportion of that poundage; other kinds of real property bearing constantly a greater and greater share of that poundage, and so relieving him.

The following table of the relative values of different classes of real property shows how great that relief has been:—

	1814.	1843.	1868.
Lands	69·28	49·10	33·20
Houses	27·84	41·44	47·27
Railways	...	2·82	11·11
Other Property	2·88	6·64	8·42
	100·00	100·00	100·00

—so that land which was rated to bear more than *two*-thirds of the local burdens, now is rated for *one*-third. Its owners are liable to pay, as time goes on, a burden in two ways less grievous; they pay a diminishing fraction of a diminishing poundage.

When this is known, we foresee an ugly controversy for the landowners with the "Land Reform League." That body, with Mr Mill at its head, goes far beyond our more moderate doctrine, and wishes (as we believe) to reserve, as far as possible, all the increase in the value of land to the State; they say the land was "conceded" "years ago" to the landowners in its then state, and at its then value; but year by year, by the growth of towns and the increase of people, it has immensely augmented in value—it has augmented much more than any capital expended on it by landowners would justify. The League would not interfere with the past, but would, in future, reserve to the State all similar casual benefits. We have not now to discuss this doctrine; but it is easy to see what such a League will say when they find that not only is land constantly acquiring a new value, but that it is constantly paying a less and less share of ancient obligations. The "debit" to the landlord's account is diminished, while the sum at his credit is rising, and the "League" will like neither.

The most important new kinds of personal property which have thus relieved the land are of course "houses," and the increase on them is as remarkable as the increase on the land. First of what we call the "mixed" charges houses bore the following proportions in the respective years:—

1826	26
1833	31
1841	37
1852	47
1868	47

And they bore almost the *whole* of the purely local charges which amount to 5,000,000*l*, which are almost one-fifth of the whole rates. Of course houses are greatly benefited by their new rates, but still they have greatly to pay for them.

Next week we propose to discuss the *rationale* of the large local house duty, and the proposal to remit the Imperial house duty, and to charge part of the rates on the owner not on the occupier. Our object now has been to show the real incidence of our local taxation, of which nothing so much was ever known before, of which, but for Mr Goschen's great care, labour, and ability, nothing like as much would have been known now.

(1.) THE LOCAL BUDGET OF ENGLAND AND WALES.

[*Table II. Part I. Appendix A.*]

SUMMARY showing RECEIPTS and EXPENDITURE, according to Sources of INCOME, and Description of EXPENDITURE.

RECEIPTS.	£
Rates	16,223,069
Dues, tolls, fees, &c.	4,363,314
Government subventions	1,225,068
Ordinary receipts from property	336,535
Extraordinary receipts from property (sales, &c.)	999,328
Loans	5,452,717
Miscellaneous receipts	1,539,192
	30,139,223

EXPENDITURE.	£
General purposes	22,117,651
New works	4,247,072
Interest on debt	2,109,445
Debt repaid	1,763,437
	30,237,605

(2.) LOCAL TAXATION OF ENGLAND AND WALES.

[*From Table III. Part I. Appendix A.*]

ANALYSIS of RECEIPTS, showing the AMOUNT derived from each Source of INCOME by each Class of LOCAL AUTHORITY.

Class of Local Authority.	Rates. £	Dues, Tolls, Fees, &c. £
Boards of Guardians	7,830,966	...
County Treasurers	1,500,567	...
Municipal Boroughs	914,377	567,934
Improvement Commissions	410,105	269,578
Local Boards	1,683,702	...
Vestries, &c., of Metropolis	1,036,409	...
City of London, &c.	175,005	382,351
Metropolitan Board of Works	417,106	2,378
Metropolitan Police	481,744	3,373
Commissioners of Sewers (Extra-Metropolitan)	42,871	...
Drainage and Embankment Commissioners (Extra-Metropolitan	176,138	...
Lighting and Watching of Parishes	79,393	...
Market and Fair Authorities	...	52,797
Bridges and Ferries	...	117,670
Harbour Authorities	...	1,259,990
Burial Boards	96,407	81,635
Highway Authorities	1,378,279	...
Turnpike Trusts	...	957,664
Pilotage Authorities	...	309,083
Mercantile Marine Fund (Light Dues, &c.)	...	358,861
	16,223,069	4,363,314

(3.) THE LOCAL BUDGET OF THE METROPOLIS.

[*Table VII. Part I. Appendix A.*]

ABSTRACT of Accounts, or such portion of them as relate to the Metropolis.

RECEIPTS.	£
City of London Corporation and other City authorities	1,824,656
Metropolitan Board of Works	2,109,330
Metropolitan police	822,051
Vestries and district boards	1,423,557
Boards of guardians, &c.	2,047,089
	8,226,683

EXPENDITURE.	£
City of London Corporation and other City authorities	1,771,096
Metropolitan Board of Works	1,935,495
Metropolitan police	832,835
Vestries and district boards	1,469,223
Boards of guardians	2,006,221
	8,014,870

(4.) PROGRESS OF RATES IN ENGLAND AND WALES.

[*Table IV. Part II. Appendix A.*]

STATEMENT showing the Progress of the RATE in the POUND of the Rates levied for COUNTY and PAROCHIAL EXPENDITURE, &c., in England and Wales, between 1803 and 1868, at the various dates, as far as possible, for which the rateable value has been ascertained.

A.—Rate per Pound of Expenditure for Poor Relief only.

* In 1868 only is it possible to state the total amount of all rates.

(5.) CLASSIFICATION OF RATES AND THEIR INCREASE.

[*Extract from Mr Goschen's Report, p.* 14.]

To sum up this part of my subject, it should be remembered that, on the broadest historical survey, there has been an increase of 8,000,000*l* in local burdens, of which—

£
2,000,000 are due to poor law expenditure, which excess for the present I will assume to be partly rural, partly urban.
5,500,000 are due to new rates, for the most part imposed since 1840, of which 5,000,000*l* are due to town rates, and only 500,000*l* to county police.
500,000 are due to an increase in highway rates and county rates, and miscellaneous expenditure, of which the main portion falls on rural districts.
8,000,000

Thus—

£
5,000,000 would fall on towns.
1,000,000 would fall on rural districts.
2,000,000 on poor law unions, which for the present may be considered as partly rural and partly urban. [In a later portion of my report I deal with the distribution of this increase.]

Of the total rates of 16,500,000*l* (in round numbers) now spent by local authorities, the following is a broad analysis:—

£
5,000,000, or 30·0 per cent., are exclusively urban rates.
3,000,000, or 18·5 per cent., being county and highway rates, are exclusively rural.
8,000,000, or 48·5 per cent., being poor law expenditure; and
500,000, or 3·0 per cent., being miscellaneous rates, are partly urban and partly rural.
16,500,000 or 100 per cent.

(6.) COMPARISON OF PROGRESS OF RATES AND ANNUAL VALUE IN THE COUNTIES OF LANCASTER, MIDDLESEX, SURREY, AND WEST RIDING OF YORK, AND IN THE REMAINDER OF ENGLAND AND WALES RESPECTIVELY.

[*Extract from Mr Goschen's report, pp.* 28-9.]

The total increase of rateable value in England and Wales between 1815 and 1868 was 48,770,000*l*, or 94 per cent.

To this total the four counties contributed 23,000,000*l*, or 47 per cent. of the whole amount.

The remaining counties of England and Wales contributed 25,770,000*l*, or 53 per cent. of the whole amount.

The total increase in the amount levied for rates (poor and county, church, and highway) in England and Wales during the same period was upwards of 4,300,000*l*, or 51·3 per cent.

Of this total the four counties bore 2,500,000*l*, or more than 58 per cent. of the whole amount.

The remaining counties of England and Wales bore only 1,800,000*l*, or 41 per cent. of the whole amount.

If we take *all* rates the comparison is as follows:—

Total increase of 1868 over 1815 about 8,400,000*l*.

Amount of increase borne by the four counties alone 4,900,000*l*, or more than 58 per cent.

It is interesting to look not only at the proportion of the increase borne respectively by the four counties and the rest of England and Wales, but also at the proportion borne by them respectively of the present aggregate of rates. Taking the poor and county only, we have the following result:—

	Poor and County Rates. per cent.	Rateable Value. per cent.
The four counties bear of the aggregate	36.18	35.33
Rest of England and Wales bear of the aggregate	63.82	64.67
	100.00	100.00

If all rates be taken, *i.e.*, if the urban rates (General District and Improvement Rates) be included, the following result is obtained, naturally showing a larger proportion borne by the four counties:—

	All Rates. per cent.	Rateable Value. per cent.
The four counties	40.40	35.33
Rest of England and Wales	59.60	64.67
	100.00	100.00

The four counties therefore appear, notwithstanding the great increase in their rateable value, to bear more than their share of rates. Formerly they bore less.

The gradual equalisation of the burdens borne by the four counties and the rest of England respectively by the steady relative increase of the former, and the decrease of the latter during 1815-68 is clearly shown by the following comparison:—

		1815.	1827.	1868.
The four counties.....	Percentage of all rates	22.28	25.01	40.40
Rest of England & Wales		77.72	74.99	59.60
		100.00	100.00	100.00

If these percentages of rates be compared with the percentages of rateable value in the same years, it will be found that, while, as has just been shown, the former have been gradually equalised, till, in 1868, the four counties bear 40·40 of the total rates for England and Wales, the equalisation of rateable value, though steady, has not proceeded with the same rapidity, so that the four counties have suffered considerable disadvantage:—

	Annual Value. 1815. per cent.	Rateable Value. 1868. per cent.
The four counties	24.38	35.33
Rest of England and Wales	75.62	64.67
	100.00	100.00

Thus, the excess in the percentage of burden borne by the rest of England and Wales over the four counties has been shown to be 19·20; whereas the excess in the percentage of the value of property bearing the burden for the rest of England and Wales over the four counties is 29·34.

(7.) PROGRESS OF THE ANNUAL VALUE OF THE VARIOUS DESCRIPTIONS OF REAL PROPERTY IN ENGLAND AND WALES.

[*Table XIII. Part II. Appendix A.*]

STATEMENT of the Amount of the Annual Value of LANDS, HOUSES, RAILWAYS, and other PROPERTY, and the Proportion per Cent. of each to the entire Assessment under Schedule A in various Years between 1798 and 1868.

Years.	Lands (includ. Tithes).		Houses.		Railways.		Other Property.		Total.	
	Amount.	Per Cent.	Amount.	Per Cent.	Amount.	Per Cent.	Amount.	Per Cent.	Amount.	Per Cent.
	£		£		£		£		£	
1798*	30,000,000	75·00	6,250,000	15·62	...	...	3,750,000	9·38	40,000,000	100
1814.....	37,063,000	69·28	14,895,000	27·84	...	...	1,537,000	2·88	53,495,000	100
1843.....	42,127,000	49·10	35,556,009	41·44	2,417,000	2·82	5,701,000	6·64	85,802,000	100
1850.....	42,834,000	45·46	39,055,000	41·45	5,320,000	5·65	7,007,000	7·44	94,217,000	100
1860	42,994,000	38·36	48,779,000	43·52	10,732,000	9·58	9,575,000	8·54	112,082,000	100
1868	47,766,000	33·20	68,012,000	47·27	15,980,000	11·11	12,112,000	8·42	143,872,000	100

* The figures for this year, as above stated, are from the estimate of Mr Pitt in proposing the tax; but the estimate is probably excessive as to some of the items. His general total is 127,600,000*l*, including 40,000,000*l* from trades and professions; but the actual return in 1803 was 115,361,952*l* (Marshall's "Digest," p. 29, Part II.), of which Schedule D amounted to 34,854,206*l*. In 1803 the annual value of the property assessed under Schedule A was 34,864,000*l*, which seems to show conclusively either that Mr Pitt over-estimated the value of real property in 1798, or that at first the machinery of assessment was defective; but as no detailed Return for 1803 has been observed, the distribution of Mr Pitt in 1798 is taken for comparison.

(8.) PROGRESS OF THE LEVY OF POOR RATES IN ENGLAND AND WALES ON LANDS, HOUSES, AND OTHER PROPERTY RESPECTIVELY.

[*Table XV. Part II. Appendix A.*]

STATEMENT showing the Amount and Proportion paid by LANDS, DWELLING-HOUSES, &c., of POOR'S RATE in England and Wales at the following dates compared, viz., 1826, 1833, 1841, and 1852 from Marshall's Digest, Part I., p. 45, as respects 1826, from "Local Taxes of the United Kingdom," p. 185, as respects 1833 and 1841, and from Parliamentary Return, No. 966, Sess. 1853, as respects 1852), with Estimate of Amounts levied in 1868, assuming that the Amount of Rates levied is in Proportion to the Share of each Description of Property in the Gross Annual Value charged under Schedule A.

(9.) PROGRESS OF THE RATES IN THE £ OF POOR AND OTHER RATES IN EACH COUNTY OF ENGLAND AND WALES.

[*Table V. Part II. Appendix A.*]

STATEMENT of the Rate per £ of the Rates levied for COUNTY and PAROCHIAL EXPENDITURE in each County of England and Wales at various dates ending with the Year 1868, showing, for 1803, and Averages of 1813-15, the Rate per £ of the Poor and County Rate, with a portion of the Church and Highway Rates included; for 1826-27 the Rate per £ of the Poor and County Rate, with the entire Church and Highway Rates added; for 1841, the Rate per £ of the Poor and County Rate only; and for 1868, (1.) The Rate per £ of the Poor Rate, inclusive of the County, Borough, Police, and Highway Rates, both when levied with the Poor Rate, and when levied separately; also including Church Rates; (2.) The Rate per £ of the Rates as in previous Column, with the Addition of Rates by Improvement Commissioners and Local Boards under Public Health Acts, &c.; and (3.) The Rate per £ of all Rates whatsoever—that is, the Rates as in Column 2, with the Addition of Sewers Rates and Rates of other kinds not previous specified.

	1803.	Aver. of 1813-15.	1826-27.	1841.	1868.		
	Poor and County Rate, with a portion of the Church and Highway Rate.	Poor and County Rate, with a part of Church and Highway Rate.	Poor and County Rate, with entire Church and Highway Rates. THE CIVIL WAR IN FRANCE.

NOTHING can be worse than the news of the week for France, except what the news of the week seems to imply:—and that is worse. Bad as it is to hear of the insurgents of Paris attacking the troops from Versailles, and being slaughtered by them without any tangible result; bad as it is to hear M. Thiers boasting of the success of his troops when he evidently shrinks from using them to put down the anarchy in Paris, though by all accounts they might have entered Paris on Monday "as easily as a knife would enter a cheese,"—yet it is still worse when we consider what all this hesitation and reluctance to act, on M. Thiers's part, no doubt really implies. It implies, as we understand it, and as the best judges of the situation appear to concur in understanding it, that M. Thiers fears the Assembly over which he presides at Versailles at least as much as he fears the revolution at Paris, and feels compelled to play off one against the other. He thinks that if his troops gained too complete a victory, the reactionary and affrighted Assembly installed at Versailles would at once use their power to restore a Monarchy in some very absolute form, and a Monarchy based like the one recently collapsed on military power. Perhaps he may dread this not a little because it would make an end of his own Government, for M. Thiers is M. Thiers, whom no one can accuse of too steady an adherence to political principles. "Napoleonic ideas" there really were, though they were far from politically-educating Ideas for France; but Thiersism

ideas there never have been, for they have always followed, not preceded, or even tended to cause, the changes of political history in France. Still whatever allowance we may make for the very natural dislike of M. Thiers to put an end to his own *régime*, we cannot well deny that many who are far more disinterested than he really fear a complete victory of the troops and an unfettered action of the Assembly, as the mere beginning of a see-saw of troubles of which it is not easy to see the end. The probability certainly is that unless a Government can be found which is based on a real compromise between the Republican and the Monarchical ideas, it will be overthrown almost as soon as formed only to be succeeded by some form of Government quite as little likely to last. This no doubt is the idea which restrains M. Thiers' party from even such energy as they might otherwise show for the reduction of Paris. They wish the Assembly to feel that if they do not frame the new Constitution with a view to the wishes of the great cities of France, they will be merely preparing for political oscillations of indefinite duration and indefinitely mischievous results. Whatever the selfish element may be in the views of M. Thiers, it is certain that without very obvious State reasons for moderation, he would never be able to pursue his present policy of reserve; if understood as a purely selfish policy it would be suicidal; there must be a great many members of the Government who understand and appreciate the public reasons for it, or it would have ended the career of M. Thiers before now. It cannot be doubted that the unreasoning temper of the Assembly is nearly as great a danger to France as the anarchical violence of Paris; nor that, when M. Thiers tries to soothe the nervous excitement of the country by anticipating the immediate triumph of his Government, he is quite as much bent on restraining, by the hopes he holds out, the impatience of the reactionists, as he is on daunting, by the hopes he extinguishes, the courage of the Commune. He evidently desired to give some guarantee to Paris that the Republic should not be tampered with, hoping to be able to use this guarantee as an unanswerable argument to the Legitimists and Orleanists when they press for a restoration. The silly violence of the Reds has taken that card out of his hand for the time; but we can hardly doubt but that he is still waiting for some opportunity of the kind, something that will pledge his Government *not* to restore a monarchy, and enable him to point to Paris as certain to avenge any attempt in that direction. We may even perhaps give him credit for seeing that a monarchy, resting solely on the support of the army, and with Paris and the other great cities hostile from the first, would be in no respect better than the *régime* from which all this collapse of political power has sprung, and would continue its mischievously destructive effects on the sources of public life and energy. Unless the respectable population of the cities can be persuaded to take some active part for themselves in the political organisation of the future, it will be quite impossible to revive any real freedom in France; and if this insurrection of the Commune is put down as the policy of the *coup d'état* would have put it down, and as the policy of the Versailles Assembly would still more put it down—with massacre, executions, and proscriptions—it probably would become impossible to persuade Paris or any other like-minded city to take any part in the new organisation. Thus, unless we are much mistaken, M. Thiers, shocked by the unscrupulous hatred manifested at Versailles towards the extreme Republicans, and anticipating that if once their power were unlimited, they would provoke a sharp reaction by their tyrannical use of it, is anxious to intimidate them into caution till he can get the Treaty with Germany settled, when he might make a new appeal to the country with some chance of obtaining a less alarmist Parliament to shape the political future of the country. Now this is a truly disastrous state of things, because, with Paris in the appalling state it now is, no government would ever dream of hesitating in the application of really stringent measures for the restoration of order, unless it saw a concealed danger almost as terrible on the other side, as is the conspicuous danger on the side of anarchy. The National Assembly has not made a dignified appearance, but it is quite obvious that those who know it best trust it least, and hold that if its fears were once removed, it might give vent to passions as dangerous to France as those of the Communists themselves, and so render durable tranquillity and temperate freedom a remoter dream than ever.

What France really wants—though it is hard enough to see where is the party that has the sense and courage to supply the want—is a moderate Republic headed by a man of constitutional temper, and yet of sufficient prestige and firmness of character to excite confidence in the mass of the people. It would be on every account a pity to restore any of the fallen dynasties,—first, because the only one which had any real hold on the people, has just failed so flagrantly not only in war, but in the still more important task of educating the French people,—and next, because a dynasty without popularity, and which must include incompetent men from time to time, is the very worst of all devices for governing a restless people like the French. It opens up a new prospect of disorder at every demise, nay, at every expectation of the demise of the Crown. The only use of a dynasty is the tradition of loyalty it carries with it, and that is not possible for any dynasty in France at the present day,—unless, indeed, it should be one which should bring the accession of Belgium to the diminished State. But though it is as futile to invent a dynasty for a people which has lost all faith in dynasties as it is to invent an aristocracy for a colony which has no past, and no power of understanding the hereditary principle, it is not equally useless to put a ruler at the head of affairs, who, in addition to considerable governing faculty, commands respect from a certain class of his fellow-countrymen on account of his rank. If France could have a notably able and firm man like the Duc d'Aumale at the head of the Republic,—a man able and firm not only for the suppression of anarchy, but for the self control which could resist the policy of encroachment, and protect the liberty of the nation as carefully as its order,—the prospect would not be so dark as it is. It would be desirable to have a man of rank in such a position, so long as he was one who was not suspected of aspiring to restore a throne, because his rank would soothe the prejudices of the reactionary party and make them less likely to break out into violence. On the other hand, it would be desirable to have such a man in the position of Protector or Guardian of the Republic instead of as Monarch, because it would be necessary to supply his place by a man of equal power on the cessation of his reign, and because the very name of Republic would soothe the prejudices of the Reds and the Irreconcileables, and make *them* less likely to break out into violence. For such a part you would need a man of great principle, of great judgment, of great courage, of great temper, of great fortitude, and of great patriotism; not too sensitive a man, not too despondent, not too sanguine. But with such a man—and the Duc d'Aumale is, we suppose, as near the mark as France is likely to get—there would at least be some prospect of freedom and order combined, for a period sufficient to train the political life of the nation. But the difficulty of the case is not so much the difficulty of finding the individual fit for the post, as the difficulty of getting any sufficient party to choose him and support him loyally when he is chosen. France is without leaders, and without even the spirit of faith and admiration which makes leaders. Those even whom other countries appreciate, she dares not herself appreciate. The Duc d'Aumale might be respected if once at the head of the Republic; but the difficulty of putting him there, even if he would accept the onerous responsibility, would not be slight. His name excites more repulsion than it does attraction. He is not believed in enthusiastically by any; he is hated and dreaded as one of the Orleanist Princes by many. The deadlock is so complete in France, that even for attaining the solution which seems most hopeful it is difficult indeed to discern any adequate political means.

THE IMMENSE EXPENDITURE OF THE LAST WEEK OF LAST YEAR.

THERE has been a most remarkable change in the aspect of the last financial year since we last wrote. The surplus of the year will not be anything like as large as we led our readers to expect. According to the account to the 25th of March the revenue was then 2,394,000*l* in excess of the expenditure. But there has been a very large expenditure in the last week, or rather the last five days of the financial year. From the usual note which we append to the weekly account it will be seen that there was spent in these five days:—

	£
Charges on Consolidated Fund	104,868
Supply Services	3,305,660
	3,410,528

And as the receipts of revenue were only 1,412,971*l*, the aspect of the accounts of the year is entirely changed. We warned our readers that the aspect of the account might be changed before the end of the year, but we did not expect it to be changed nearly so much.

The large expenditure in the last week of the year we understand is due to the new system of compelling the departments to surrender their balances. Formerly if a vote was unexpended within the year the balance stood to the credit of the department, and it might be expended in the following year without a fresh vote. Now unexpended balances must be surrendered to the Exchequer, and a fresh vote obtained. The result is that the spending services endeavour to pay within the year as much as possible of the liabilities which are really incurred within it. The accounts of contractors and others are consequently sent in as near the close of the year as possible, and cheques are drawn at the last moment. Hence the large issues from the Exchequer in the last week of the year.

The balance of the year now stands as follows :—

	£
Income.....	69,945,220
Expenditure	69,548,539
Surplus	396,681

This will not give Mr Lowe much ready money for the ensuing year, even if he should think of applying it to the necessities of the year.

The results brought out, however, are nevertheless very creditable to the Government. The situation at the end of the year is ever so much better than we had any reason to expect, after the large votes of credit found necessary subsequent to the completion of the financial arrangements of the year. We have only to compare the final estimates with the actual result :—

Estimates.	£	£
Revenue.....	67,634,000	
Expenditure	69,486,000	
Estimated deficit		1,852,000
Account.		
Revenue.....	69,945,220	
Expenditure	69,548,539	
Surplus		396,681
Total improvement upon estimate		£2,248,681

So that the Government now is two millions and a quarter to the good, compared with the estimates of the year. And we believe that there are supplementary estimates which will make the contrast still more favourable.

BUSINESS NOTES.

Days of Grace on Bills of Exchange.—A Bill has now been introduced into Parliament by the Government, to carry out the promise which Mr Lowe made to abolish the days of grace on bills of exchange at sight, so as to assimilate them to bills payable on demand. The Bill, which has been printed, is a very short one, and enacts simply that every bill of exchange or promissory note drawn subsequent to the Act coming into operation, and purporting to be payable at sight, "shall for all purposes whatsoever be deemed to be a bill of "exchange or promissory note payable on demand, any law "or custom to the contrary notwithstanding." It is proposed that the Act shall come into force one month after receiving the Royal assent. The Government promise has thus been carried out, and the concession will remove the incongruity in the Stamp Laws, by which bills of exchange payable on demand and at sight were subjected to different duties—the former to that of one penny only, and the latter to an *ad valorem* stamp. The proposal is certainly a much better one than the one originally thought of—to make the stamp on bills at sight one penny, only when the days of grace were not in fact taken advantage of—a proposal which would have been most unworkable. At the same time we must express our regret at the fact of the Bill dealing only with bills at sight. The incongruity in the Stamp Acts, which gives rise to the present Bill, is a trifle compared with the inconvenience which results from the general retention of days of grace on bills of exchange, contrary to all commercial practice outside England. The Government could effect the larger change by as simple a Bill as that now proposed, and as the inconvenience is much felt, and days of grace are utterly indefensible (for they serve no purpose but to complicate the mode of calculating when a bill falls due), we much regret the limitation of the measure.

The London, Chatham, and Dover New Capital.—One of the first acts of the restored company is to authorise the expenditure of half-a-million new capital under powers specially reserved by the arbitrators. The purposes for which the capital is required show how necessary it was in the general public interest, as well as in the private interest of the company, that the state of insolvency should be put an end to. Part of the money, viz., 150,000*l*, is for the improvement and enlargement of the Blackfriars goods station, which "was "so overcrowded at times that the goods manager had warned "them that a serious accident might occur there any time "that would cost them as much as the proposed outlay." Another demand of 22,000*l* is for the improvement of the junction at Brixton between the company's metropolitan and main lines, which at present is rather dangerous for fast trains. "Were it not for the great skill and presence of "mind of the signalman at that station a heavy goods "train of the Great Northern would have caused a fearful "and costly accident." There are similar demands for dangerous level crossings, while a large amount is required for additional accommodation near the Holborn Viaduct, so as to relieve the pressure upon the Ludgate hill station, and enable the company to do more business safely. These are the kind of things which make it intolerable for the public to have their railways in Chancery. It may also be observed that they are the kind of things which make it impossible to draw a hard and fast line against new capital. In a growing business there must be new expenditure, and the attention of shareholders should be given not to the prohibition of it, but to its due regulation, so that it shall really be adjusted to the increasing profit. In the present case the raising of the half-million will have a momentary bad effect on the preference stock. The money is to be raised by a new 4½ preference stock, prior to the arbitration preference, and will add an additional annual charge of 22,500*l* to the present debenture charges, which must be met before the latter gets a dividend. As there is now only a small surplus after paying the present debenture charges, the prospect of even a nominal dividend on the arbitration preference stock is thus adjourned. The adjournment however is not likely to be for long at the present rate of progress in railway traffic.

Foreign and Colonial Government Trust.—With reference to our paragraph of last week, we have received the following letter from a correspondent in the City well-informed on the whole case :—

I cannot help thinking that in your remarks on the meeting of the Foreign and Colonial Trust you have somewhat forgotten the circumstances under which the Trust was brought before the public, and was by them eagerly filled. The entire scheme was explained in detail, and a list of the foreign stocks selected was given, so that each subscriber might judge for himself. The essence of the scheme was simplicity itself, and amounted to this :—"Here are (say) eighteen or twenty different foreign stocks—some of the first, some of the second, and some of the third-class. We propose to put them together on the principle of average. In the absence of any great failure the dividends will yield considerably more than 6 per cent. interest on the investment; the interest will be limited to 6 per cent. per annum, and the excess of actual income over this limit, aided by the drawings in the several cases, will, in the course of some twenty-five or thirty years, repay the principal, and leave a reversionary and contingent margin to be apportioned among the parties concerned." It was never pretended that foreign stocks were at the same level with Consols. The price of issue, 80, indicated this very plainly; but let it be observed that this price of 80 has gradually risen to *par* in the course of some two years, showing pretty clearly what is the public appreciation of the *facts* of the Trust apart from any theory. You do quite right in these days of prevalent mendacious criticism to keep a sharp eye on public companies; but it is no impeachment of your motives or sagacity to discover that now and then in the multitude of cases you lapse into conclusions which admit of amendment, and which I am sure you will be as ready as anyone to amend.

We are not quite disposed to admit any error in our criticism which was directed against the exaggerated calculations of the prospectus respecting the reversionary margin. We can only refer our readers to the prospectus and our comments at the time.

United States' Trade.—Messrs Jay Cooke, M'Culloch, and Co., in their last weekly circular, give an interesting summary of the statistics of American trade in 1870, just published by the Treasury Bureau of Statistics at Washington.

The most general fact brought out is, that while the exports of produce from the United States valued in specie were about 12,600,000*l* more than in 1869, the imports of merchandise showed an increase of only 4,520,000*l*. The inference from this is that the United States borrowed less from Europe last year in its ordinary trade than it did in 1869, having paid for a larger share of its imports with the produce of the year. Probably also there would be a diminished export of securities in the aggregate, as the importation of capital, which is met by the export of securities, will be in the shape of goods of some kind and not in gold, which is an article of American produce. In other words, the abundant harvests of cotton and grain during the last two years have enriched America, and enabled it to borrow less than usual. It appears that in the last five months of the year there was an excess of exports, but in the last five months there was an excess of imports; and the change is attributed to the war—apparently not without some reason, as the war closed some markets for American produce, and would probably divert some exports from other countries, intended for the continent, to America. American exports are now once more in excess. The figures showing the diversion of trade are:—

	1870. dols.		1869. dols.
Total imports, gold value	486,799,018	.....	463,424,421
Total exports, gold value	484,569,111	.....	394,731,999
Excess of import	2,229,907	.....	68,692,422

	First Seven Months.		Last Five Months.	
	1870.	1869.	1870.	1869.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1870, and March 31, 1871:—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1870-71.	TOTAL EXCHEQUER RECEIPTS To March 31, 1871.		Same time last year.	
Balance on 1st April, 1870—	£	£	£	£	£
Bank of England	...	7,633,761		3,775,717	
Bank of Ireland	...	972,887		931,541	
			8,606,648		4,707,258
REVENUE.					
Customs	19,300,000	20,191,000		21,529,000	
Excise	21,660,000	22,788,000		21,763,000	
Stamps	8,589,000	9,007,000		9,248,000	
Taxes	2,850,000	2,725,000		4,500,000	
Income Tax	6,350,000	6,350,000		10,044,000	
Post Office	4,775,000	4,770,000		4,670,000	
Telegraph Service	675,000	500,000		100,000	
Crown Lands	385,000	385,000		375,000	
Miscellaneous	3,050,000	3,229,220		3,205,252	
Revenue	67,634,000		69,945,220		75,434,252
OTHER RECEIPTS.					
Advances, under various Acts, repaid		1,987,618		2,083,383	
Money raised for fortifications		150,000		200,000	
Money raised by Exchequer Bonds		700,000		1,300,000	
Temporary advances not repaid		...		...	
			2,837,618		3,583,383
Totals			81,389,486		83,724,893

EXPENDITURE AND OTHER PAYMENTS.

	Budget Estimate for 1870-71.	TOTAL EXCHEQUER ISSUES To March 31, 1871.		Same time last year.	
EXPENDITURE.	£	£	£	£	£
Interest of Debt	26,840,000	26,826,437		27,053,559	
Other charges on Consolidated Fund	1,820,000	2,113,196		1,730,133	
Supply Services voted by Parliament	40,466,000	40,246,632		40,021,059	
Telegraph Service	360,000	362,274		60,000	
Expenditure	69,486,000		69,548,539		68,864,751
OTHER PAYMENTS.					
Advances under various Acts		1,413,216		1,618,894	
Expenses of fortifications		150,000		200,000	
Exchequer Bonds and Bills, &c., paid off (Exclusive of 600,000*l* Bonds paid off with Surplus Income.)		770,500		4,434,600	
Surplus Income, to reduce Debt (Exclusive of 1,500,000*l* applied to repay Bank advances for deficiency.)		2,483,796		...	
			4,817,502		6,253,494
Balances on March 31st, 1871—					
Bank of England		5,678,915		7,633,761	
Bank of Ireland		1,344,520		972,887	
			7,023,435		8,606,648
Totals			81,389,486		83,724,993

The following are the Receipts on account of Revenue during the week ending March 31:—

	Receipts of Week Ending March 31.
	£
Customs	256,000
Excise	249,000
Stamps	188,000
Taxes	86,000
Income tax	287,000
Post Office	90,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	256,971
Total	1,412,971

The total receipts of the previous week were 1,330,954*l*.

The Exchequer issues of the week on account of expenditure were 3,410,528*l*, viz.:—

	£
Interest of debt	nil.
Other charges on Consolidated fund	104,868
Supply services	3,305,660
Telegraph services	nil.
	3,410,528

During the week the cash balances have decreased as follows:—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on March 25	6,952,472	1,846,093	8,298,565
— March 31	5,678,915	1,344,520	7,023,435
Decrease	1,273,557	1,573	1,275,130

The other receipts to date were 753,335*l*, the other payments were 30,898*l*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, April 5.

Paris is once more blockaded as in time of the Prussians, but not quite so completely. Most of its gates are closed both to ingress and egress; but of the six or seven railways, great and small that run into it, three are open, and by them the city can communicate with the outer world, and receive the food it needs. The Post Office is shut up. Since the morning of Thursday last, the Parisians have received *by post* no letters or newspapers from the country or from abroad, and *by post* have been able to despatch none. They have, however, employed at their risk and peril the railways that are open to carry their correspondence; but they get no answers.

Not only is Paris blockaded, but fighting has taken place in its immediate vicinity, as in the siege days. Since Sunday last the detached forts have been cannonading, and slaughter has being going on just as was the case then—only the victims are now all French instead of partly French and partly German, as then. Of this fratricidal war, the result is not doubtful. On one side, that of the Versailles Government, are able generals and disciplined troops; on the other, that of the Commune, journeymen compositors and crazy journalists are in command; and the troops are a mere rabble with muskets, who think that to sing and scream is equivalent to fighting. The only chance of success the Commune had, was

that the regular troops of Versailles would, like those sent against Montmartre, pass over to it; but in this it has been disappointed. It is, besides, torn by continual discord, whilst the Versailles Government has the greatest force that exists anywhere—that of public opinion.

The Commune being destined to defeat its acts ceases to be of much importance; but it may be noted that they have not come up to what was feared from a purely revolutionary ultra-democratic and socialist Government. Nine months' rent due have been suppressed, it is true, and a decree has gone forth that the payment of the clergy by the State shall cease, and that the property, real and personal, of the religious orders shall be confiscated. That is all its legislation of an economic order, and it is very little. It has not dared to deal with the question of commercial bills, though it promised a decision on them within twenty-four hours after its installation; and it has called on the representatives of commerce, and of workmen's associations to advise with it thereon. It has not even presumed to make any direct application of socialist doctrines, but has contented itself with the harmless measure of opening official registers of employers in need of workmen, and of workmen in need of work. This latter decree, however, contains expressions that are strange; workmen, for example, are requested, in asking for employment, to state what wages will satisfy "their wants," and employers what "social advantages" they have to offer to men. But that probably is mere socialist jargon, used without any definite intention.

In other respects the Commune has not been so terrible as was apprehended. It has decreed the impeachment of M. Thiers and five other Ministers, and the sequestration of their property, but that is mere *brutum fulmen*. M. Pouyer-Quertier is not one of the five, why, we are not told. The Commune has, too, visited more railway and insurance companies, and has seized all the money it could find; but though it found little—the banks and companies having taken precautions—it has neither shot nor beheaded anybody. Even when the manager of the goods station of the Lyons railway peremptorily refused to give up the cash he held, its agents did nothing more than present pistols at his head and threaten to kill him; they did not fire. It has occupied the Credit Foncier without doing mischief. The last of its visits of which I have heard was made yesterday to the Orleans railway. A band of Red National Guards in arms were ordered to seize the *caisse* and arrest the *gerant*. They pounced on some money and securities, but the clerks succeeded in removing a larger quantity of both that was in another room, and in putting it on a locomotive which went away at express speed. The Reds were told that there was no official called a *gerant*, but a Director-General and sub-Directors, and that all were away. But they said that as they had orders to effect an arrest, somebody must needs be taken, and so they carried off a young man who acts as secretary to the directors.

Last week people were in awful fear of the Commune, but as it has not been, I repeat, so terrible as was apprehended the fear has greatly abated. And as the tendency of the French is to go from one extreme to another, we may expect soon to see them laugh at it. On the Bourse it is already treated as a sort of *mauvaise plaisanterie*, which cannot possibly have a long duration. Accordingly, not only has the market not been flooded with offers to sell, but prices have actually improved. The Three's, which on the 30th ult. closed at 50f 0c, were yesterday 51f 27½c and to-day 51f 40c.

Uneasiness was caused last week by the non-appearance at the usual date of the announcement of the Ministry of Finance of the payment of dividends on Government stock. But though not made at Paris it was issued at Versailles, and was in these terms:—"Stockholders and pensioners of the State are informed that the dividends of the 3, 4, and 4½ stock, as also civil and military pensions due at Paris, will be paid at Versailles from 1st April." For payment at Paris no arrangement has been made, and this has subjected numerous persons to great inconvenience, communications with Versailles having been only difficult on some days, and completely interrupted on others.

It is stated that the Versailles Government has paid 200,000*l* to the Prussians; but no official confirmation of the fact has been given at Paris, nor so far as is known here, at Versailles either. The Assembly has, or will vote a bill according a credit of 72,500,000 for the payment of certain expenses occasioned by the Prussian occupation. As to the indemnity of 5,000,000,000 of francs, I have put it completely out of people's thoughts. It will, it seems, be the first thing to be dealt with when "order" shall be re-established.

The Bank of France has at last published a notice, which dissipates the fears entertained about forged notes of 25*f* being in circulation. It explains that the notes supposed to be forged are those issued by provincial branches, and differ from the notes of Paris in the mode of inscribing the numbers.

A return issued by the Orleans Railway Company shows that the receipts of 1870 of the Old Network were 80,210,011*f*, less by 9,048,392*f* than in 1869, and that those of the New Network were 30,759,249*f*, being 2,537,312*f* more. The same company makes known that from the time required for drawing up the accounts of the Government for carrying in 1870, and for its guarantee of interest on the new lines, it would not be possible to fix definitively the dividend to be proposed in the annual meeting called for 12th April. Accordingly that meeting is postponed to a date to be hereafter fixed, and 20*f* per share are to be distributed at once—15*f* as interest for 1870, and 5*f* on account of dividend.

The Lyons and Mediterranean Railway notifies that, from the difficulty of making up the accounts of 1870, the annual meeting ordinarily held in April must be postponed to May.

The Société Générale has held its annual meeting. The report presented by the directors stated that it had not been possible to make up the detailed accounts for 1870; but after a profound examination of the situation, they felt authorised in proposing a distribution of 5 per cent. on the paid-up capital, making 12*f* 50*c* per share. The report also stated that since the outbreak of the war the realisation of assets had permitted liabilities to be reduced by the large sum of 135,264,712*f*. It described the arrangements made for continuing the provincial and foreign operations of the company during the siege of Paris, and those at London with respect to the Peruvian loan and Peruvian guano. The report added that nothing in existing circumstances, or in the operations of the company, rendered necessary a new call on shares. The 12*f* 50*c* are now in course of payment.

In the meeting of the Paris Omnibus Company which has also been held, the receipts of 1870 were stated to be 21,997,202*f*, about 3,000,000*f* less than the year preceding, but the expenses were about 1,000,000*f* less also. The net profits, which in 1869 were 1,927,277*f* were only 704,516*f*. They were sufficient to give 17*f* per share, but the meeting determined that by a levy on the reserve, 25*f* should be paid. All the profits were realised before the investment of Paris; after that event there was a loss of about 20,000*f* a day. The greater part of the loss was occasioned by the Company being compelled to carry national guards at half price, as soldiers are. In the hope of lessening that obligation it required that such men should have their muskets with them: nevertheless it had to carry not fewer than 1,576,000.

In the annual meeting of the Sous-Comptoir des Entrepreneurs (builders) the operations of 1869-70 were reported to be more satisfactory than could have been expected, the profits amounting to 1,240,404*f*, of which, however, 287,323*f* are not yet realised. These profits, increased by balance from the preceding year, were sufficient to allow a dividend of about 25*f*, but on account of existing circumstances it was resolved to postpone the declaration of one to 30th June. A distribution of 5*f* 50*c* has however been made.

The directors of the Parisian Gas Company notify that they are obliged to profit by the permission accorded by the general meeting to postpone the payment of the coupon on shares due on the 6th, and that they will in consequence not require the second call on obligations issued to shareholders to be paid for the present.

The Paris Committee of the Ottoman General Credit Company informs holders of bonds of the Ottoman Treasury of 31st October, 1868, that they are allowed to the 10th April to declare whether they wish to receive at Paris the coupons due 30th April. After the 10th the coupons will only be paid at Constantinople.

PARIS, April 6.

The Commune has issued a proclamation calling the Government at Versailles "bandit and assassin" for having had shot insurgents taken arms in hand, and it threatens reprisals—"eye for eye, tooth for tooth." It has decreed that persons suspected of connivance with it shall be arrested and held as hostages; also that if another prisoner of war or partisan of the Commune be shot by the Versailles people, three of the said hostages chosen by lot shall be executed. In accordance with this decree it has put into prison the Archbishop of Paris, several parish priests, and several members of the Jesuit and other orders, and has had their houses ransacked and their property seized. It has also had arrested a considerable number of respectable persons, and has had their houses ransacked. It has, moreover, suppressed some newspapers.

All this is meant to strike terror into the population. But from what I see and hear nobody seems afraid. The Bourse, for its part, regards it all with perfect complacency. "It is sound and fury," say speculators, "and cannot last." And to prove that they think what they say, they have put the Threes to-day 20*c* higher than yesterday. But it must be stated that both the attendance and the transactions were extremely limited, as indeed they have been during the whole of the past week.

The following is a comparison of the prices of last Thursday and of to-day:—

	March 30.	April 6.
	f c	f c
Threes	50 60	51 60
Four-and-Half	76 25	...

Southern ditto	570 0	...
South Austrian Lombard ditto	...	...
Suez Canal	235 0	232 50

A new requisition of 500,000f has been made on the Bank of France by the Commune. The latter is preparing an issue of paper money of small amount. For some time gold has almost completely disappeared, and in petty transactions the big 5f silver pieces replace it.

Owing to the suspension of postal communications with the provinces, no reports of the markets of Havre, Marseilles, Bordeaux, and Nantes have been received.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Lords Commissioners of Her Majesty's Treasury having certified to the Commissioners for the Reduction of the National Debt, in pursuance of the Act 29 and 30 Victoria, cap. 29, section 16, that the actual surplus revenue of the United Kingdom of Great Britain and Ireland, beyond the annual expenditure thereof, for the year ended the 31st day of December, 1870, amounted to the sum of 2,950,035*l* 16s 9d. The Commissioners for the Reduction of the National Debt hereby give notice that the sum of 737,508*l* 19s 2d, being one-fourth part of the said surplus of 2,950,035*l* 16s 9d, will be applied under the provisions of the said Act, in the quarter ending the 30th day of June, 1871, towards the reduction of the National Debt.

The Liverpool Emigration returns just made up show that during the past quarter there sailed from the Mersey 18,279 passengers, against 21,571 in the corresponding period of last year. In the three months there sailed under the Act to the United States, 77 ships, with 16,243 passengers, of whom 15,243 were steerage; of the latter, 10,007 were English, 292 Scotch, 1,720 Irish, and 3,224 foreigners. The number of ships not under the Act which sailed during the quarter was—To the United States, 28 ships, with 1,292 passengers; to Canada, one ship, with 52 passengers; to Nova Scotia, one, with six passengers; to Victoria, seven ships, with 150 passengers; to the West Indies, two, with 16; to the East Indies, eight, with 105; to the West Coast of Africa, six, with 62; and to South and Central America, 22, with 356 passengers.

The following are the resolutions which were adopted by the House of Commons on Monday night, which were reported and agreed to last night, and which will be embodied in the Home Secretary's Licensing Bill:—"1. That it is expedient, from the 1st day of October, 1871, to repeal the duties of excise charged in England in respect of licences authorising the sale by retail, and not (except in the case of publicans' licences) by wholesale, of intoxicating liquors, and of licences to keep refreshment houses, imposed by the several Acts relating thereto.——2. That it is expedient to grant to Her Majesty, from the 1st day of October, 1871, the following duties of excise to be payable in England (that is to say):—Publican's general licence.—If the annual gross value of the premises do not exceed 10*l*, 5*l*; exceed 10*l* and do not exceed 20*l*, 8*l*; exceed 20*l* and do not exceed 30*l*, 11*l*; exceed 30*l* and do not exceed 40*l*, 14*l*; exceed 40*l*, 17*l*. Publican's limited licence.—If the annual gross value of the premises do not exceed 10*l*—Beer licence, 3*l*; wine licence, 2*l*; beer and wine licence, 4*l*. If the annual gross value of the premises exceed 10*l* and do not exceed 20*l*—Beer licence, 4*l*; wine licence, 3*l*; beer and wine licence, 6*l*. If the annual gross value of the premises exceed 20*l* and do not exceed 40*l*—Beer licence, 5*l*; wine licence, 4*l*; beer and wine licence, 8*l*. If the annual gross value of the premises exceed 40*l*—Beer licence, 6*l*; wine licence, 5*l*; beer and wine licence, 10*l*. Inn licence.—Same as publican's general licence. Eating-house licence.—Same as publican's limited licence. Refreshment house wine licence.—If the annual gross value of the premises do not exceed 50*l*, 3*l* 3s; if the annual gross value of the premises exceeds 50*l*, 5*l* 5s. Refreshment house limited wine licence.—If the annual gross value of premises do not exceed 30*l*, 2*l* 15s 8d; exceeding 30*l* and do not exceed 50*l*, 3*l*; exceed 50*l*, 4*l* 4s. Railway refreshment rooms licence.—If three rooms or bars for different classes of passengers, 17*l*; if two ditto, 12*l*; if only one room or bar, 6*l*. Theatre licence.—The same as for a publican's general licence. Beer-shop licence.—If the annual gross value do not exceed 20*l*, 1*l* 1s; if the annual gross value do exceed 20*l*, 2*l* 2s; spirit dealer's retail licence, 3*l* 3s; beer dealer's retail licence, 1*l* 2s. Wine retail licence.—If the annual gross value of premises do not exceed 50*l*, 2*l* 2s; if the annual gross value of premises do exceed 50*l*, 3*l* 3s; sweets retail licence, 1*l* 1s.——3. That it is expedient to authorise the imposition on holders of certificates from Justices authorising those holders to obtain a publican's general, a publican's limited, an inn or an eating-house licence, of a licence rent bearing such proportion to the annual gross value of the licensed premises as may be fixed by or in pursuance of any Act to be passed in the present Session.——4. That it is expedient to amend the laws relating to the sale of exciseable liquors in England."

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fourth week of March, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children	Adults.	Children under 16	4th week March, 1871.	Corresp'nding Total in 1870.

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, April 6, 1871.

The total since the 4th of January, 1871, is 1,088,587,000*l*, compared with 1,012,050,000*l* for the corresponding period last year, shewing an increase of 76,537,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week.	April 10, 1861.	April 8, 1868.	April 7, 1869.	April 6, 1870.	April 5, 1871.
Circulation, including bank post bills	£ 20,811,405	£ 25,123,650	£ 24,452,129	£ 23,822,401	£ 24,917,491
Public deposits	4,902,527	3,894,180	4,754,817	8,325,582	10,521,035
Other deposits	13,201,791	21,146,623	18,803,252	17,331,142	20,151,913
Government securities	10,222,938	13,283,000	14,970,798	12,827,812	12,941,143
Other securities	18,816,008	18,715,840	18,480,653	18,822,168	22,865,668
Reserve of notes & coin	7,439,092	11,214,082	8,251,075	12,023,492	13,110,918

Bank rate of discount	5 %	2 %	4 %	3 %	3 %
Price of Consols	91¼	93¼	93⅛	93⅛	92⅛
Average price of wheat	56s 4d	72s 6d	46s 4d	42s 5d	55s 9d
Exchange on Paris (shrt)	25 30 35	25 17½ 25	25 15 22½	25 17½ 25	...
— Amsterdam ditto	11 17½ 18½	11 18 18½	12 1½ 1⅝	11 18½ 19	11 19⅝ 12 0⅛
— Hamburg (3 months)	13 8½ 8⅝	13 9⅝ 10⅛	13 11 11½	13 10⅜ 10⅝	13 11½ 11⅝
Clearing-house returns	...	63,552,000	70,045,000	70,652,000	112,570,000

In 1861, there was a reduction of the Bank rate from 6 to 5 per cent., making a very rapid fall from the figure of 8 per cent., to which it had been carried by a concurrence of the American secession movement with the export of bullion necessitated by a bad harvest. The chief cause of the heavy fall was now stated to be the great restriction of commercial operations, and a farther fall was anticipated. Lord John Russell's Reform Bill of this year had just been withdrawn after protracted debates, and it was understood that the question of reform, as a Liberal Government measure, would be postponed for some years.

In 1868, the period of 2 per cent. consequent on the reaction after the panic of 1866 continued. Mr Disraeli's Government had just been defeated on Mr Gladstone's motion for disestablishing and disendowing the Irish Church. The impeachment of President Johnson had begun.

In 1869, the effect of the raising of the Bank rate to 4 per cent. the previous week had been felt at once. Money was cheaper on the continent than here. Mr Lowe's Budget, containing his plan for making the income and assessed taxes payable in January, had just been introduced.

In 1870, money was easy, the payment of the dividends having relieved the market. The most interesting foreign matter was the situation in France, where the Emperor was about to take a plebiscitum on the new constitutional changes.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,614,215*l*; in 1868, an excess of 2,430,983*l*; in 1869, an excess of 322,599*l*; and in 1870, a deficiency of 1,491,024*l*. In 1871, there is a deficiency of 2,713,755*l*.

Discount and Money Market.—The market is again easier this week as compared with the previous one, the rate for the best short dated paper being about ½ less than it was last week. The rate is now called 2½, and the tendency is not to exceed that, though the nominal quotation of 2½ ¾ is still in some cases maintained. The demand at the Bank has been very low all the week, being to-day exceedingly moderate; and the payment of the dividends which commenced to-day tends still farther to increase the superabundance of money in the open market. Unless matters take a rapid turn for the better in France, it seems inevitable that the Bank rate will soon be lower than it is. As regards the French situation, very little confidence has been given by the news of the successes of the Versailles troops. The fact that the soldiers of the National Assembly are either not strong enough to occupy Paris, or cannot be trusted within it, though they drive back the insurgents in the open, seems to show that the return to settled order in France will be a very slow process. In any case it would take a little time after the visible triumph of the Versailles Assembly before any reliance could be placed in the solidity of its power, and such distrust, as we have often pointed out, would diminish the demands which France might otherwise be expected to make on our markets.

The principal changes in the Bank account for the week, are a decrease of 1,342,945*l* in the public deposits, an increase of 987,748*l* in the private deposits, and a decrease of 729,160*l* in the "notes unemployed." The circulation has also increased 962,230*l*, and the "rest" has diminished with the payment of the dividends.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 to 3 months	2½	per cent.
Do 4 —	2⅝	per cent.
Do 6 —	3	per cent.
Trade bills—3 months	2¾ 3	per cent.
Do 4 —	3 3¼	per cent.
Do 6 —	3½ 3⅝	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	2	per cent.
Discount houses at call	2	per cent.
Do with seven days' notice	2¼	per cent.
Do fourteen days	2¼	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	2½	6	2	...
Vienna	5	5	5	5
Berlin	4	4	3½	3¼ ½
Frankfort	4	3½	2⅝	3
Amsterdam	4	3½	3¾	3
Turin	5	6	5	5
Brussels	2½	4	2½	3¼ ½
Madrid	5	5	5	5
Hamburg	...	...	2⅝	3¼
St Petersburg	5	8	4½	7

The Stock Markets.—There is hardly any general feature to chronicle for the week. The markets have been somewhat flat, owing to the usual diminution of business at the approach of the Easter holidays, and the number of realisations after the great rise in home railways which took place last month; but the prices of the better classes of securities have in general been well maintained. The great abundance of money sustains prices, and there has at no time been any sufficient likelihood of a speedy termination of the present Civil War in France to cause any apprehensions of an immediate change.

English Government Stocks.—The natural effect of the abundance of money, the prolongation of the suspense in France, and the payment of the dividends, is to strengthen the Consol market, and there is accordingly a slight advance to note for the week as compared with last. A scarcity of stock was likewise found to exist at the monthly settlement which took place this week, and the effect was equally to strengthen the market. The advance however is probably less than it would have been but for the approach of the Easter holidays, and the highest price of the week has not been maintained. The final quotation is 92¾ ⅞ for money, and 92⅞ 93 for the May account.

Subjoined is a list of the highest and lowest prices of Consols every day :—

	CONSOLS. Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	92½	92½	92½	92⅝	par to 5s pm
Monday	92½	92⅝	92⅝	93	par to 5s pm
Tuesday	92½	92⅝	92⅝	93	par to 5s pm
Wednesday	92½	92⅝	92⅝	93	par to 5s pm
Thursday	92½	92⅝	92⅝	93	par to 5s pm
Friday	Holiday				

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices Thursday.	Inc. or Dec
Consols for money	92⅝ ⅛	92⅝ ⅛	... ...
Do to account	92⅝ ⅛	92⅝ 3	+ ⅛
Reduced 3 %	91⅝ ⅛	91⅝ ⅛	– ⅛
New 3 %	91⅝ ⅛	91⅝ ⅛	– ⅛
Bank Stock, last dividend 4½ %	239 41	239 41	... ...
India Stock, 10½ %, red. at 250 April 30, 1874	205 7	205 7	... ...
India 5 %, red. at par, July 5, 1880	111 ⅛	111⅛ 12½	+ ⅛

Exchequer Bills.—Par to 5s prem.

COLONIAL GOVERNMENT SECURITIES.—The following are the changes for the week in this department :—

	Closing Prices last Friday.		Closing Prices Thursday.	Inc. or Dec.
Canada 6 %	105 6	.....	105 6	... ...
Ditto 5 %	98½ 9½	.....	98½ 9½	... ...
New Zealand 5 % Consolidated Bonds	99 ½	.....	98 9	— ½
New South Wales 5 % Bonds, 1888 to 1896	99 100	.....	99 100	... ...
Nova Scotia 6 % Bonds, 1875	103 ¼	.....	103 ¼	... ...
Queensland Government 6 % Bonds, 1884-5	108 9	.....	108 9	... ...
Victoria 6 %	112 13	.....	109½ 10½xd	+ ½
Ditto New 5 %	102 3	.....	102 3	... ...

New Zealand Government 5 per cent. debentures for 1,200,000*l* were disposed of to-day at the offices of the Crown Agents for the Colonies by public tender. The total applied for reached 1,829,000*l*, and tenders for 707,100*l* at and above 96*l*, and 492,900*l* at and above 95*l* 10s, the minimum price fixed, were accepted, the average rate obtained being about 95*l* 16s 6d.

FOREIGN GOVERNMENT STOCKS.—Comparatively little business has been done, but prices on the whole have been well maintained, though the changes for the week, which are within narrow limits, are of a mixed character. There is a good deal of general distrust manifested by investors as respects this market, the events of the last six months having shaken confidence, while it is known that a great many new demands are impending. At the same with the present abundance of money there is little disposition to sell, and prices fluctuate little. To-day being the last before the Easter holidays there was renewed flatness in the middle of the day on account of sales to close accounts, but prices were subsequently firmer.

The chief business, as was the case last week, has been in the French National Defence loan, which is now quoted rather higher *ex div.* than the quotation last week *cum div.*, showing a rise of over 3 per cent. The news of the success of the only constituted Government in France, moderate as that success is, has a specially good effect on French securities. Whatever difficulties the Government may have in obtaining new loans, and however unfortunate for the country the delay in reconquering Paris, the prospect of anarchy being sooner or later put an end to, is sufficient to enhance the credit of the Government.

The event of the week has been the invitation of subscriptions for the new Argentine loan, which has been so long talked of, and of which we subjoin an account in our Notices and Reports. The amount required is a little over 6,000,000*l*, and is stated to have been more than fully subscribed—the subscription list closing to-day. The loan however is not received with any marked favour on the Stock Exchange, though it is not exposed to the objections which the late Russian loan encountered. The occurrence of the Easter holidays has no doubt had some effect in restricting dealings. The final quotation this afternoon is 1¼ ⅜ p.m.

At a meeting of the Turkish bondholders of the loan of 1862 this week the following resolution was agreed to :—

That the committee is hereby authorised to incur the expenses necessary for establishing and effectually maintaing the syndicate for the Turkish loan of 1862, and that for the purpose of defraying the said expenses it is hereby agreed that the deduction of one penny in the pound be made during each half-year at Constantinople from the funds when received by the syndicate, and that the Imperial Ottoman Government and the Imperial Ottoman Bank be, and are hereby, solicited to render every facility to the committee in establishing the syndicate and giving effect to this resolution.

The object of the committee, it was stated, is to raise 2,600*l*. It is calculated that the assistance of two English gentlemen in Turkey would cost about 600*l*, and the services of another English gentleman, who must be a scholar, a linguist, and a man of position, would entail a cost of about 2,000*l* a year. It would be necessary for such a gentleman to permanently represent the bondholders in Turkey.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

ENGLISH RAILWAYS.—We have already noticed the general flatness in this market as in others. But notwithstanding this dulness there are a good many advances for the week, chiefly among the lines which did not share in the late general rise. North-Eastern, North London, South-Eastern Deferred, Lancashire and Yorkshire, London and South-Western, and London and North-Western, have all improved, the improvement taking place mainly on the publication of highly favourable traffic returns. In North-Eastern, which was so conspicuous for its great increase of traffic last year, the rise is the highest for the current half-year, though not so great as it was for many weeks during the past year. To-day there is no new feature to note; but the markets, after slight fluctuations, close firm, and there has been a renewed upward tendency.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :—

	Closing Prices last Friday.		Closing Prices Thursday.	Inc. or Dec.
Caledonian	89 ½	.....	89 ½	... ...
Great Eastern	43⅜ ⅝	.....	42⅞ 3⅛	— ¼
Great Northern	122 3	.....	122½ 3	... ...
Ditto A	134½ 5	.....	134½ ⅜	— ¼
Great Western	89⅛ ⅜	.....	88⅞ 9⅛	— ¼

London and Brighton	52¾ 3½	.....	53⅛ ⅜	+ ¼
London, Chatham, and Dover	16⅜ ⅝	.....	16⅜ ½	+ ⅛
London and North-Western	131 ⅛	.....	131½ ⅛	... ...
London and South-Western	92½ 3½	.....	96⅜ 7½	+ 4
Manchester, Sheffield, and Lincolnshire	52⅛ ⅜	.....	52⅜ 3	+ ¼
Metropolitan	69⅜ ⅞	.....	68⅛ ⅜	— 1⅛
Ditto District	34 ⅛	.....	33⅝ 4½	— ¾
Midland	129 ½	.....	129¾ 30	+ ¾
North British	36⅜ 7½	.....	36⅞ 7½	... ...
North-Eastern—Consols	147½ ¼	.....	149½ 50	+ 2½
South-Eastern	83 ¼	.....	84½ ⅜	+ 1⅛
Ditto Preferred	114 15	.....	114 15	... ...
Ditto Deferred	53⅜ 4½	.....	55 ½	+ 1½

The quotations for the leading debenture stocks compare as follows with last week :—

	Closing Prices last Friday.		Closing Prices Thursday.	Inc. or Dec.
Great Eastern A 5 %	109 11	.....	109 11	... ...
Ditto 1867 Redeemable	107 9	.....	107 9	... ...
Great Western 5 %	112 13	.....	112 13	... ...
London and Brighton 4½ %	100 2	.....	100 2	... ...
London, Chat., & Dover Arbitration 4½ %	94 6	.....	93½ 4½	— 1½
Metropolitan District 6 %	116 18	.....	116 18	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways for the week ending April 1), amounted to 727,818*l*, being an increase of 48,732*l* on the corresponding week of last year. The aggregate for the current half-year now is 8,192,243*l*, being an increase of 465,194*l* on the corresponding period of last year. The principal increases for the week are—North-Eastern, 10,520*l*; Midland, 7,215*l*; London and North-Western, 7,672*l*; Great Western, 4,731*l*; and Lancashire and Yorkshire, 4,236*l*. The following shows the increase in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

AMERICAN SECURITIES.—Very little progress appears to have been anywhere made with the issue of the new Five per Cent. bonds. The greatest success has occurred in the United States and in Germany, but the subscriptions in this country are insignificant in extent. It is rumoured that Mr Boutwell will attempt to force the loan by buying up Five-Twenty bonds in the market; but this operation, to be attended with the desired result, must be carried out on a large scale. The steady absorption of 6 per cent. bonds, however, has had a hardening effect upon values, and a further advance has taken place this week. The market closed with a firm tone. A reaction has taken place in Atlantic and Great Western Consolidated Mortgage bonds, but State securities have remained without material change. The following statement shows the fluctuations for the week:—

	Closing Prices last Friday.	Closing Prices Thursday.	Inc. or Dec.
United States 6 % 5-20 Bonds, exchg. 4/6	92½ ¾	92¾ ¼	+ ¼
Ditto 1867 Issue	92¼ ½	92½ ¾	+ ¼
Ditto 5 % 40	91½ ¾	91¾ ½	+ ¼
Ditto 6 % 1881 Bonds exchange 4/6	89½ 91½	89½ ¾	+ ¼

JOINT STOCK BANKS.—Most of the movements in this department have been of a favourable character, though the actual transactions have not been extensive. The most important movements have been an advance of 1 in Central of London and Chartered Mercantile of India; ½ in British Columbia, London and County, and Union of London; ¼ in Agra and Alliance.

TELEGRAPHS.—Some considerable changes have taken place in telegraph shares, and the result of the week's operations has been somewhat unfavourable. We note a decline of 2 in Anglo-American; ½ in Falmouth and Gibraltar; ¼ in China Submarine and Great Northern Extension; ⅛ in British Indian Extension. On the other hand, Anglo-Mediterranean and British Australian have advanced 2, and Reuter's ¼.

MINES.—There has been considerable activity in the mining share market, and some important changes have taken place in the quotations. South Caradon shares are nominally 20*l* lower. Great Devon Consols have given way 5; Tankerville and Great Laxey, ½. East Grenville, Margaret, and Tin Croft, have risen 1; Great Wheal Vor and Wheal Mary Ann, ½. The leading feature in the foreign market is the demand for Eberhardt shares, which closed at a rise of 5*l*. St John del Rey shares are 3½ higher on the week.

MISCELLANEOUS.—The changes in this department have not been numerous, and business has been confined within very narrow limits. Canada and Copper Miners shares are 1 lower; London Tramways, ½; and Van Diemen's Land, ½. North Metropolitan Tramways have advanced ¼, and Rio City Improvements, ¼.

EXCHANGES.—There is no particular change to note this week, except that the events in Paris have again put a stop to the short exchange upon that city.

The *Gazette* return states that the imports of the precious metals into the United Kingdom during the week ended April 5 were—gold, 341,424*l*; silver, 306,242*l*. The exports were—gold, 28,160*l*; silver, 497,365*l*.

Mr R. W. Crawford, M.P., who retires by rotation from the governorship of the Bank of England, was last week presented by the officers and clerks of that establishment with a picture of the "Bank Parlour," painted by Mr. J. O. Wingfield. This step was adopted as a mark of the sense entertained of several measures passed for their benefit during Mr. Crawford's administration, and his successful efforts to raise the tone and spirit of the service.

FRIDAY EVENING.

To-day being Good Friday there is no business to report. The Stock Exchange will also be closed on Monday.

Leeds and Liverpool Canal, general, Leeds.
North British Mercantile, general, Edinburgh.

SETTLING DAYS.
Ticket Days—April 13th and 27th.
Account Days—April 14th and 28th.

NOTICES AND REPORTS.

STOCKS.

Argentine 6 per Cent. Public Works Loan, 1871.—Messrs C. de Murrieta, and Co. have received subscriptions for 6,122,400*l* stock, guaranteed by the revenues of the Argentine Republic, the price of issue being 88½ per cent., or 87*l* 3s, allowing for accrued interest and the deferred payment of instalments. The interest is payable in London on the 1st of September and 1st of March each year, free from Argentine taxation, and a sinking fund provides for the redemption of bonds at par in 21 years. The prospectus stated:—

2. A sinking fund of 2½ per cent. upon the nominal amount of the loan, increased by the interest on the bonds from time to time paid off, will be applied to the redemption of the loan at par, by half-yearly drawings. The drawings will take place in the months of February and August, the bonds drawn being advertised in the usual way, and being paid on the first of the following March and September, when the interest on the drawn bonds will cease. The first drawing will take place in August next.

3. The Government reserves to itself the right to increase at any time, and from time to time, the amount to be applied in any year, to redeem the bonds. The surplus of the amount so applied beyond the sinking fund for the year is to be employed in purchasing bonds in the market.

4. The law authorising the loan directs that nearly the whole of the proceeds, after repaying to the Provincial Bank of Buenos Ayres their advances, amounting to about 560,000*l*, is to be applied towards the completion of the railway from Villa Nueva to Rio Cuarto (now in course of construction); the extension of the railway from Cordoba to Tucuman; the construction of the works of the port and customs warehouses at the city of Buenos Ayres; and the construction of wharves and customs warehouses at the city of Rosario.

British—National Debt Reductions.—During the present quarter 737,509*l* is to be applied to this purpose.

Chilian 7 per Cent. Loan, 1866.—Bonds, representing 14,800*l*, have been drawn for redemption at par on the 1st July next.

RAILWAY COMPANIES.

Cape.—Dividend announced at the rate of 4½ per cent. per annum on the ordinary stock.

Great Western of Canada.—The results of the past half-year's working compared:—

	1869-70. £		1870-71. £
Gross receipts	424,183		444,349
Working expenses	243,380		267,481
Net	180,803		176,868
From which deduct—Interest on loan and bonds, and loss on American currency	£89,773	£63,285	
Loss by fire, ferry renewals, &c.	4 125	nil	
	93,898		63,285
Profit	86,905		113,583
Add previous surplus and dividends	12,792		7,719
Available	99,697		121,302
Ordinary dividend at the rate of 5½% per annum	97,643	(6% p. a.)	117,521*
Surplus	2,054		3,781

* Including 13,150*l* for preference dividend.

The capital outlay amounts to 5,579,543*l*, including 71,588*l* during the half-year. The capital receipts are 6,138,736*l*. The renewal fund for the ferry steamers amounts to 21,728*l*. The charges on the conversion of American currency have been 17,361*l*, as compared with 37,156*l* in the corresponding half-year. The aggregate traffic receipts, compared with the corresponding half-year, showed a gross increase of 20,357*l*. The amount expended on the reconstruction of the line has been 14,141*l* in excess of the outlay in the same half of the preceding year, and for the twelve months 44,077*l* in excess of that for the corresponding period, all borne by revenue.

Greenock and Wemyss Bay.—Half-year's revenue 7,310*l*, showing an increase of 1,234*l*.

Portpatrick.—A dividend of 2 per cent. for the half-year has been paid.

Tournay to Jurbise, and London to Hasselt.—Half-year's ordinary dividend 2s 10d per share, besides 6s on the preference shares.

BANKS.

Bank of London.—The committee announce a second return of the capital of the bank of 2*l* per share, in addition to the first return of 1*l* 5s paid in May last.

Chartered Mercantile of India, London, and China.—A dividend of 2 per cent., free of income tax, is announced for the half-year.

Hong Kong and Shanghai.—Half-year's net profits $451,141, including $99,398 brought forward. A dividend of 4 per cent. for the half-year was declared, and it was decided to retain $268,687 to meet eventual losses on present outstandings, and to carry the balance of $22,554 to the credit of new profit and loss account.

National Bank of India.—It appeared at the meeting that by the transactions of the late manager at Hong Kong about 60,000*l* has been placed in jeopardy, but it is hoped that by the favourable realisation of securities, part of that sum may be recovered. 22,000*l* has been transferred from the reserve fund to provide for ascertained losses, and to wipe off the balance at debit of profit and loss account. Under these circumstances no dividend was declared.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Credit Foncier of Mauritius.—A dividend has been declared of 4 per cent. for the half-year.

International Financial Society.—At the shareholders' meeting on Wednesday a long discussion took place with respect to the policy pursued by the directors in connection with the Metropolis Sewage question, and the following resolution was passed almost unanimously:—"That this meeting, having considered the report, dated 23rd of March inst., issued by the directors, hereby declares its satisfaction therewith, and its full approval of the policy pursued by the board with reference to the Sewage question; and further, that the shareholders have entire confidence in the management of the society by the directors."

ASSURANCE COMPANIES.

British Empire Mutual Life.—During the year 636 policies, assuring 185,830*l*, were issued, yielding in new premiums 5,936*l*. The total income from all sources was 101,006*l*. 148 members died during the twelve months, and the claims arising therefrom, including bonuses, reached 43,496*l*. The accumulated fund amounted to 484,050*l*.

Industrial Fire Insurance, Limited.—Capital, 20,000*l*, in shares of 10s each. The design is to enable the industrial classes to insure their property against fire, by the weekly payment of 1d for any sum up to and not exceeding 100*l*.

Scottish Commercial Fire.—At the meeting the directors' report stated that the net premiums received in the fire department during the past year amounted to 45,243*l*, while the gross premiums were 53,489*l*, and the losses paid and provided for 22,776*l*. In the life department the gross premiums were 3,147*l*, and the claims 600*l*. The disposable balance was 12,336*l*, out of which a dividend of 7 per cent. was declared, and 7,500*l* added to reserve and contingent fund.

West of England Fire and Life Office.—At the meeting the net fire premiums were stated at 103,980*l*, and the losses and expenses 94,887*l*, leaving 9,093*l* to be added to the fire fund. The new life policies were 511, insuring 237,888*l*, and yielding in premiums 8,215*l*. The total life revenue is 167,359*l*, and the accumulated fund 1,067,495*l*.

MISCELLANEOUS COMPANIES.

Belfast Tramways, Limited.—Capital, 25,000*l*, in 10*l* shares. Belfast, the principal town in Northern Ireland, contains a population of 170,000; and it is proposed to construct a tramway about 4 miles long, running through the heart of the city. The contract price is 22,730*l*, and the contractors lease the line for 7 years at a 12 per cent. minimum rent.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The Easter holidays have interfered much with business operations during the past week, and transactions in all kinds of produce have been very limited. To-day was a dull day at Mark Lane. The corn trade, however, showed considerable firmness during the week, and prices have advanced 1s per quarter for both English and foreign wheat. Flour has also risen 1s per barrel. Oats have been in request for export, and the tendency of values has been upwards. Barley, beans, and peas have continued quiet, but without change in price. Maize has been rather dearer to purchasers.

The Liverpool cotton market has been quiet throughout the past week, and only a moderate amount of business has been done at barely steady prices. The total sales for the week, of five days only, are 51,370 bales, of which the trade have taken 40,670 bales, speculators and exporters, 10,700 bales. The imports are 66,811 bales, the actual exports, 25,324 bales, and to-day's stock is 751,230 bales. Quotations for American descriptions have receded $\frac{1}{16}$d per lb, and East Indian in some instances have declined $\frac{1}{8}$d per lb since last Friday. To-day the market closes quiet. Sales, 10,000 bales.

At New York on the 6th instant, middling Upland cotton was quoted at 15$\frac{1}{2}$c per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, March 11:—In this market there has been a steady inquiry for cotton from day to day on account of European exporters, and the amount of transactions reported very nearly equal last week's total. The events of the week have confirmed the anticipations given expression to in our last issue respecting prices, which have gradually receded until, prior to receipt of yesterday's telegram, quotations showed a decline of 10 rs to 15 rs per candy in most descriptions of the article. Business has been interrupted to some extent by the Holi holidays, otherwise we should probably have had to chronicle a heavier decline. Yesterday the market was steadier, and rates generally showed a recovery of about 2 rs per candy. In the up-country market rates have given way considerably, but not correspondingly with the decline here. This, we think, is owing mainly to the holidays, as during about half of the week ryots brought no supplies into the various centres. Had no favourable news been received from home, next week would no doubt have introduced a lower scale of values, but we fear that even the slight encouragement conveyed in late messages will have a stiffening effect, and help to retard the transit of cotton to the coast. The week's transactions may be summarised as follows:—2,300 candies new Dhollerah, April-May delivery; 1,100 candies old Dhollerah ready; 1,800 candies Akote ready, and 20 days' delivery; 2,000 candies Khandeish, Nuggur, Barsee, &c.; 650 candies Dharwar old; 150 new Broach, 15 days' delivery, and about 1,000 candies of sundries. From Tinnevelly our latest telegram is dated 9th instant, and quotes 6$\frac{1}{16}$d per lb. The export of cotton to 11th March is as follows:—

	1871.		1870.
London bales	1,167	.....	72
Liverpool	113,030	.....	87,169
Total, Great Britain	114,197	.....	87,241
Channel for orders	1,170	.....	2,463
Continent	40,198	.....	39,022
China	7,179	.....	10,744
Grand total	162,744	.....	139,470

Actual exports since last mail left, 17,532 bales.

Messrs E. B. Liddell and Co., writing from Alexandria on the 24th ult., remark:—Cotton.—Our preceding report was dated 17th instant. We have to report an improvement during the past week of about $\frac{1}{4}$d per lb on fair, and $\frac{1}{8}$d to $\frac{1}{4}$d on good fair. Upon fully good fair and upwards, and in Gallin cotton, the advance has been still more marked, these descriptions, from their increasing scarcity and constant demand, being paid relatively very high prices. The business transacted in to-day's market was but limited, owing in a great measure to the firmness of holders. We quote:—Fair, 7$\frac{3}{4}$d to 7$\frac{7}{8}$d per lb, f.o.b.; good fair, 7$\frac{7}{8}$d to 8d per lb, f.o.b.; fully good fair, 8$\frac{1}{8}$d to 8$\frac{3}{8}$d per lb, f.o.b.; Gallin, 9$\frac{1}{2}$d to 11$\frac{1}{4}$d per lb, f.o.b. Freight, $\frac{3}{4}$d per lb for steam-pressed bales.

The colonial produce markets have continued quiet throughout the week. Only limited quantities have been brought to auction, and privately the transactions have been restricted within very narrow limits. Sugar has ruled more active, but sales have been checked by the advance demanded. Coffee has sold at full prices. In rice and cocoa there is no change to notice.

The following report, dated March 7, has been forwarded by Messrs Ferd. Schultze and Co., of Colombo:—The shipping business of our port has continued active throughout the past fortnight, large quantities of produce having gone afloat for Europe, both direct and by steamer, *via* Bombay. The exports of our staple are still in excess of those at the same period last

year, both of native and plantation. The distribution of shipments is as undernoticed :—

PLANTATION COFFEE.

	1871. cwts.		1870. cwts.
To Great Britain.....	353,335	.....	343,209
Foreign ports.....	12,992	.....	3,597
Australia and India ...	8,580	.....	6,591
	374,907	.....	353,397

NATIVE COFFEE.

To Great Britain	41,886	.....	34,285
Foreign ports.....	10,707	.....	12,894
Australia and India ...	1,266	.....	1,691
	53.859	.....	48,876

There has been a fair demand for plantation parchment since the date of our last circular, but only small parcels have offered, and the amount of business done has been restricted. A few purchases of native good ordinary have been made at our previous and higher values for parcels of picked and dried for shipment.

* The stock of sugar in Holland is in first hands only; in all other countries in first and second hands.

Annexed is Messrs Southey, Balme, and Co.'s wool report :—The private demand which still continues in the London market forms the best augury for the approaching series. Several considerable parcels of snow white Capes have been taken for continental account at full rates, and a few shipments of new Port Phillip and Adelaide wool, available for private sale, have likewise found a good market. The only disturbing element—the political condition of France—still exists, and the probable measure of its influence on the French demand it is impossible to foretell. In the French woollen districts, however, a more hopeful feeling appears to have set in during the last few days. The arrivals to date comprise the following quantities :—Sydney, 11,527 bales; Port Phillip, 74,325; Adelaide, 28,086; Tasmania, 82; New Zealand, 10,333; Cape, 28,048—total, 152,401 bales.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on Feb. 28, remark :—Since our last there is no change to report in wool. The principal wool season has not yet commenced, and the arrivals are very small; but as the wool is coming into the interior towns fast, we may soon have the market well supplied. There is very little change to note in prices, except where buyers were anxious to complete parcels, when extreme rates were paid. The demand for America for long grease wool still continues active. Quotations are as follows :—Grease : Full-grown superior, 6d to 6½d; fine light, for scouring, 4¾d to 5¼d; heavy and inferior, 4d to 4½d. Fleecewashed : Superior clean, 9d to 9¾d; good average, 8d to 8¾d; inferior and seedy, 7½d to 7¾d. Snow-white : Prime Uitenhage scoured, 14½d to 15½d; second quality ditto and country scoured, 12½d to 14½d; inferior country scoured, 10d to 11½d.

Annexed is dated Messrs Durant and Co.'s circular, dated April 4 :—We have again to report a month of small doings in silk. During the first fortnight without change of prices, although even then they were only barely supported, but within the last ten days we have clearly a reduction of 1s per lb—at present confined to Tsatlee China—and this without inducing general business. A few parcels have been sold, but apparently consumers do not care to do more than supply immediate requirements. Political complications have no doubt largely contributed to this state of things, but we fear manufacturers have also continued to find difficulty in the sale of their goods, and the arrivals have been large, and importers, impatient of long quiet, were in some cases anxious to be moving. The deliveries are decidedly good, larger in aggregate and in each individual class than in any month since June of last year. In Canton silk they are especially large, marking how surely and certainly consumption follows comparative cheapness. Japan silk continues neglected, and very difficult of sale. In Bengal silk there has been some little business, and a small parcel of new Surdah has realised 27s.

These quantities include all that has arrived off coast and the different ports, but not yet taken into stock.

Messrs Mohr Brothers and Co., dating from Akyab, March 2, observe :—Nakrenzie rice—Our market has been pretty fairly supplied during the fortnight under review, but the bulk of the rice brought in contained a great admixture of paddy, above 50 per cent. in an average, and the demand showing itself very active at the time, the stuff was readily taken at the same price lately paid for rice with 33 per cent. paddy, so that for some days good three parts shipping quality could not be made up below a cost of 55 rs to 56 rs, including brokerage and loss in winnowing and sifting. Buyers then combined to enforce the sifting of the rice, offering in the market to three parts, and this has enabled us during the last eight days to ship again good three parts rice at 52 rs to 53 rs per 100 baskets of 28 lbs, quite ready for shipment, which rates we give as our to-day's quotations. The same are equal to 5s 6d to 5s 7d per cwt, free on board. The tonnage in port amounts to

22,000 tons capacity, against 14,000 tons same period in 1870, and 25,000 tons in 1869. Exports up to end of last month represent 14,207 tons rice to Europe, against 2,503 tons same period in 1870, and 2,164 tons in 1869. Freights—Seeking vessels have not come in. This accounts for the absence of any engagements, as there exists still some demand for small sized ships on the spot, for which we quote nominally 4/ open charter.

Messrs T. J. and T. Powell report:—It was almost inevitable that, with the termination of hostilities between France and Germany, most of the orders for accoutrements for those armies should cease, and consequently that the articles most required for such purposes should be less urgently wanted; these expectations also dispose the buyers to postpone their purchases as long as they can, in anticipation of reduced prices. Notwithstanding these disadvantages, however, the transactions of the month amount to a good average, and include some purchases for the continent, while prices show very slight changes. The demand has been marked by a greater inquiry for light than for heavy sole leather, while most descriptions of dressing goods have been in fair request. The stocks in general are limited, although dressing hides and shaved hides are in better supply. The market for raw goods has undergone very little change. The public sales have not shown much animation; the prices of sole leather hides have been well maintained, and in some cases have advanced, while East India kips have slightly declined. The chief transactions apart from the public sales have been in salted French hides, of which a large number have been imported, and have gone into consumption. The stocks of most articles are moderate.

Messrs Churchill and Sim have published the following statistics:—

STOCK of TIMBER, DEALS, &c., at the PUBLIC DOCKS on 1st April.

Foreign—	1871.	1870.	1869.

The following is from L. Th. van Houten's (Rotterdam) monthly tin circular:—Our tin market has been quiet during this month, and the transactions have only been on a very limited scale, pending the result of the Dutch Trading Company's public sale. Banca tin was sold in the beginning of the month at 77½ fl, but the demand diminishing, the price fell to 76 fl for spot parcels, while 75 fl was paid for lots ex sale. 80,791 slabs in public sale were sold at an average of 75 fl, with a curtailment of 48 per cent. on the quantity of all orders executed. After the sale some lots changed hands from 75 fl to 76½ fl, which latter price is now the nominal closing quotation. Billiton tin remains very scarce, but the demand was not large, and a few small parcels ex ship arrived were sold at 76 fl. For a parcel afloat, 75 fl was offered after the sale, but holders demand higher rates. The Billiton Company has given notice, that the bi-monthly public sales to be held in Batavia, commencing in April next, up to February, 1872, will each comprise about 7,800 peculs, instead of 6,000 peculs, as heretofore. The following statement shows the position of Banca tin in Holland on the 28th March from the official returns published by the Dutch Trading Company:—

	1871.	1870.	1869.
Import in March.....slabs	9,715	26,054	7,457
Previously this year	17,770	16,068	15,125

Import in March	500	5,050	5,450
Delivered and shipped in March	2,600	2,950	4,350
Quotation March 30. { Banca	76½fl	72fl	80½fl
{ Billiton	75½fl	71fl	79½fl

The quantity of Banca tin now afloat for the Dutch Trading Company is 18,590 peculs, equal to 1,162 tons, against 26,300 peculs, equal to 1,644 tons, last year. We estimate the quantity of Billiton tin now afloat at 11,365 peculs, equal to 710 tons, against 8,841 peculs, equal to 553 tons, last year.

Annexed is Messrs William Moran and Co.'s indigo report:—We have hardly any business to report in this market during the past week. A few small parcels have arrived from Rungpore, but their quality generally proves to be indifferent. On the evening of the 1st instant Calcutta was visited by a heavy fall of rain, which lasted throughout the night, and was succeeded by more heavy showers the following night. This rain is reported to have fallen all over Kishnaghur and Jessore, where it has been of great service in bringing on the October plant, and we shall no doubt hear that it has been general throughout the adjoining districts of Lower Bengal. Rain has also fallen less heavily, however, over parts of Tirhoot and Chumparun, and where this has been the case and early sowings have recently been effected, it may necessitate the breaking up and re-sowing of some of the lands, but we have not so far heard of much damage on this account. Exports of indigo from 1st November, 1870, to 4th March, 1871:—To Great Britain, 16,251 chests; to France, 358; to Trieste, 2,781; to foreign Europe, 250; to America, 2,143; to Gulphs and Levante, 1,666—total, 23,449 chests.

The annexed is dated New York, March 24:—The volume of trade continues moderate for the season, and the fluctuation of prices on the whole unimportant. The supply of the leading raw staples and manufactures of home production is rather below than above the average of former years, when the natural growth of population is taken into consideration; while, on the other hand, the stocks of many of the leading foreign commodities are excessive, a fact largely due to heavy consignments made under the exigencies of the late European war, and also to the decreased production of home manufactures during the last six or eight months, consequent upon the protracted drought, now happily ended. The heavy supply of foreign goods is plainly indicated by the Custom-house statistics, which show that the foreign imports at this port since the beginning of the year are over 30 per cent. in excess of the corresponding period last year. The imports at most of the outports also show a decided increase. But this heavy influx of foreign commodities is looked upon as a natural and healthy symptom, indicating an improved condition of those great home interests which contribute to our exportable products, the outward trade during the three months indicated showing an increase of nearly 50 per cent. over the corresponding period of last year, notwithstanding the important shrinkage in the price of some of the leading staples, notably cotton. The money market is a little easier than in the early part of the week, the supply of unemployed capital having, if anything, increased. The rates for call loans are 4 to 5 per cent., and for discount of short prime paper 6 to 7 per cent., with 8 to 10 per cent. for second-class names. There is little prospect of any considerable drain of currency to the interior, judging from the reports from the leading cities. At New Orleans money is represented as being plenty, and discount rates 8 to 10 per cent. At Cincinnati the anticipation of a close market in April seems unlikely to be realised, the banks having ample means, and are able to take all the paper offered by depositors at 8 to 9 per cent. At Chicago money is reported decidedly easy, as all the banks are better supplied with loanable funds than for mo ths past, and as the demand for favours is comparatively light, loans are negotiated with the greatest freedom. This monetary ease at important points of distribution in the interior is a hopeful indication as regards general trade, which just now is restricted by the bad condition of the roads in many parts of the country.

THE COTTON TRADE.

LIVERPOOL.—APRIL 5.

Cotton has been in fair demand throughout this week, but holders have offered their stocks rather freely, particularly the lower descriptions, and prices show a decline of nearly ¼d per lb. For Sea Island there has been more inquiry, especially for the finer kinds of Island cotton, which have commanded full prices. American continues in general demand, but the quotations are reduced partially ¼d per lb. New York advices to the 5th instant quote middling upland 15½ cents, costing to sell in Liverpool 8d per lb, by steamer. Brazil has been in moderate request, at a decline of ¼d per lb in most descriptions. For Egyptian there has been a fair demand, and prices are without material change. In East Indian the business has been moderate, but last week's prices are generally maintained.

In cotton to arrive the transactions have been comparatively limited. The latest quotations are—American, basis of middling, from New Orleans, March-April shipment, not below low middling, 7½d, at sea, not below good ordinary, 7 7/16d; loading, 7 5/16d; low middling, from New Orleans, March-April shipment, 7 7/16d; Texas, not below good ordinary, April-May shipment, 7½d; good ordinary, New Orleans, not below strict ordinary, shipping or shipped, 6¼d per lb.

The sales of the week (five days), including forwarded, amount to 51,370 bales, of which 2,100 are on speculation, and 8,000 declared for export, leaving 40,670 bales to the trade.

APRIL 6.—The sales to-day will probably amount to about 10,000 bales, with a quiet market.

Saturday, the 8th, and Monday, the 10th April, will be strict holidays in the cotton market.

NEW YORK.—MARCH 24.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, March 24. From the figures thus obtained it appears that the total receipts for the seven days have reached 81,426 bales, against 102,484 bales last week, 136,533 bales the previous week, and 126,935 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,240,870 bales, against 2,358,317 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 882,553 bales. The exports for the week ending this evening reach a total of 97,033 bales, of which 64,361 were to Great Britain, 4,985 France, and 27,687 to rest of the continent, while the stocks as made up this evening are now 624,419 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending March 24.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	36327	16065	52392	35443	262032	204364
Mobile	...	1595	1595	7173	62351	65195

All other ports	1164	...	1164	1496	35500	26000
Total	64361	32672	97033	72562	624419	459071
Total since Sept. 1	1708336	460781	2169117	1467701	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 24,471 bales, while the stocks to-night are 165,348 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to March 17, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph :—

RECEIPTS and EXPORTS of COTTON (bales) since Sept. 1, and STOCKS on hand

There has been a fair business doing the past week. For the first two days prices were heavy and lower on all grades, middling Uplands closing Monday night at 14⅞c. and ordinary at 11c, against 11¼c for ordinary, and 15⅛c for middlings on Friday. At this point, however, there was a reaction. On Tuesday the Liverpool quotations becoming firmer, and the market more active, prices here, in sympathy with this improved tone, were stronger, and for the better grades, which are in comparatively light supply, an advance of ⅛c was established. Wednesday, Liverpool was ⅛d higher, the official quotation being 7⅛d to 7¼d, against 7⅛d to 7⅛d, the previous day; thereupon our market took a further step forward, closing that day at 15⅛d for middling Uplands, 14⅞ for low middling, and 12⅛ for good ordinary. Thursday, middling Uplands closed at Liverpool at 17⅛d, and here at 15⅛c. But to-day, with Liverpool a little less favourable, the better grades are off in this market ⅛c, but the other grades are steady. The basis of the improvement here this week has been as noted above, the firmness and improvement at Liverpool, which have much encouraged holders, especially as now the receipts are beginning to show a marked decline. Just at the close of the month, too, the purchasing to meet maturing contracts help to sustain prices. For forward delivery prices have, in the mean, followed the rates for spot cotton. There has been more inquiry for March, and quotations are relatively higher. To-day's prices closed for March, 14⅛c; for April, 13 ⅞c; for May 14c, for June, 14c; for July, 14⅛c; and for August, 14⅛c. The total sales of this description for the week have been 75,200 bales, including 100 free on board. For immediate delivery the total sales foot up this week 22,110 bales, including 2,242 bales to arrive, of which 4,317 bales were taken by spinners, 1,408 bales on speculation, 15,885 bales for export, and 600 bales in transit. The following are the closing quotations:—

	Uplands and Florida.	Mobile.	New Orleans.	Texas.
	c	c	c	c
Ordinary per lb	11 @ ...	11¼ @ ...	11¼ @ ...	11¼ @ ...
Good ordinary	12⅛ ...	12⅝ ...	12⅝ ...	13⅛ ...
Low middling	14 ...	14⅛ ...	14⅛ ...	14⅛ ...
Middling	15⅛ ...	15⅛ ...	15⅛ ...	15⅛ ...
Good middling	16⅛ ...	16⅝ ...	16⅝ ...	17 ...

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Mar. 24, 1871.			Week ending Mar. 24, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	2161	2679	21521	1981	2195	22165
Columbus	429	1480	8375	324	245	12336
Macon	627	1443	9099	505	1132	14453
Montgomery	702	1699	6888	222	805	10825
Selma	535	1145	5250	126	315	5204
Memphis	7614	10497	34687	4501	8807	18444
Nashville	1353	1687	7402	742	560	6988
	14421	21130	92881	8901	15240	90554

These totals show that the interior stocks have decreased during the week 7,809 bales, being now 2,327 bales more than for the same period last year, while the aggregate receipts are 4,417 bales more, and the shipments 5,941 bales more than for the corresponding period of 1870.

The exports of cotton this week from New York show an increase since last week, the total reaching 25,931 bales, against 15,659 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks, also the total exports and direction since September 1, 1870, and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, March 31.—According to Messrs Moffat, Davidis, and Co.'s report, the receipts of cotton at all ports have been 72,000 bales, and since the 1st of September 3,303,000 bales. Shipments to England, 66,000 bales; ditto to France, 11,000 bales; to the continent, 35,000 bales; total since the 1st of September, 2,285,000 bales. Stock at all ports, 580,000 bales. Middling upland, 7d, cost and freight per steamer.

NEW YORK, April 4.—The receipts of cotton at all United States' ports for the last four days have been 36,000 bales. Shipments to England, 26,000 bales; to France, 9,000 bales; and to the continent, 20,000 bales. Middling Upland, 7d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, April 6.—There has been a great want of animation in our market during the whole of the past week. Each day but a very moderate business has been done, and certainly much under the production of the district, yet prices have been remarkably well sustained, both spinners and manufacturers resolutely setting their faces against reducing prices, and being still indifferent about selling, owing to their contracts on hand. Buyers have generally had to pay full rates for the orders they have had to give out. The principal business of the week has been from stock or for quick delivery, long dated contracts being still very seldom resorted to. Yarns and goods for our large eastern markets have been neglected. For the home trade a fair business has been done especially in cloth, some descriptions of which are under contract till the middle of June. The market closes tame, but without change in values. To-morrow being Good Friday there will be no market, so that the business of the week practically ends to-day.

BRADFORD.—The tone of the wool market to-day is rather quiet, though a fair amount of business has been done, particularly in wools of the demi-lustre class for immediate consumption. Prime wethers are most in request, and some business is doing in hogs of good quality. Lustre wools are in moderate request; prices are very firm. Noils and brokes are in good demand, and are rather dearer. In worsted yarns there is considerable activity. Prices are very firm. A moderate amount of business is doing in the piece market, and quotations continue firm.

ROCHDALE.—The woollen trade of this district is in a healthy condition, although prices of flannels continue unsatisfactorily proportionate to the advanced price of raw material. Woods continue firm, and large quantities have changed hands.

DUNDEE.—In our flax market there is little change to notice; few transactions have been taking place in goods on the spot, and although holders generally continue firm in requiring full rates the tendency has been, if anything, in favour of buyers. Medium qualities of tow continue in fair demand, and prices are well maintained, the quantity for sale not being large. The recent liberal arrivals of jute, and the continuance

of large shipments, has rendered the market rather weaker, and buyers only offer rather lower prices. The yarn market has continued very quiet, and few transactions have been taking place during the past week in any descriptions. The demand for linens continue good.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, MARCH 24.

The market for breadstuffs during the past week has been less active, closing with some decline in prices, from those obtained early in the week. The receipts of flour have continued on a moderate scale, but the demand has been less active. The inquiry from Europe has nearly ceased, except at reduced prices, the local trade has taken only to supply immediate wants, and the demand for the West Indies has been less active. There has been, however, a pretty good inquiry for the British provinces, and low grades of State and Western brands—those selling under $6.70—have moved off pretty freely, and not being very plentiful, have brought full prices, especially good lines of superfine. For regular lines of shipping extras, holders, in view of the relatively higher prices now obtained for wheat, have not been disposed to make any concession, but have not been able to realize more than $6.65 to $6.70, at which sales were made to-day. Corn meal has declined, leading to free sales. Wheat has entirely lost the excitement and activity noted in our last, but prices are generally about as last Friday. An advance in ocean freights, and the fact that flour was dull, were the main causes of the depression, but the absence of shipping orders, notwithstanding an advance reported from Liverpool, has made holders anxious to realize. The shipping orders in the last few days have been almost entirely from London and Glasgow. Receipts at the Lake ports are smaller than last year, but this is owing to a diversion in favour of St Louis. At to-day's market there was a fair degree of activity at $1.57 to $1.61 for new spring; $1.58 to $1.60 for old red winter, and $1.70 to $1.72 for new amber winter. No. 1 spring sold early in the week at $1.62½, and amber winter $1.74 afloat. Corn has been in full supply, and the shipments eastward from Chicago have been large, under which prime new mixed has declined to 84c to 84½c, and yellow to 85c to 86c, at which there were few sales to-day. Rye has been dull, but about steady. Barley and barley malt remain in the unsettled state previously noticed. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

There was no market held here to-day, but during the week considerable firmness has prevailed. The state of affairs in France has had the effect of checking purchases for exports but the defeat of the insurgents has led to the belief that the trade will soon be resumed. On Monday factors held firmly, though considerable difficulty was found in realising 1s per quarter more money. We quote, however, an advance to that extent on both English and foreign grain of good quality. Later on in the week transactions in wheat were still very limited, but extreme prices were demanded and paid. The market is still over-supplied with flour, millers having manufactured largely in anticipation of a heavy French demand, but values have ruled steady in sympathy with the firm tone in the wheat trade. The imports of foreign grain have been liberal, the bulk of the arrivals consisting of wheat, while the estimated number of grain-laden vessels afloat for the United Kingdom is 210, against 205 last year, of which 130 are wheat-laden, against 130 last year.

The demand for spring corn has been moderately active. Oats have been in improved request, and the tendency of the quotations has been upwards. The arrivals have been limited. Maize is also the turn dearer, but we note no change in the value of beans or peas.

Mr Geo. Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days, 50 grain and seed-laden vessels have arrived at ports-of-call, viz., 21 wheat, 3 maize, 10 barley, 1 beans, 1 linseed, 3 cotton-seed, 3 flour, 2 valonea, 2 oilcake, 1 palm-nut kernels. The floating grain trade has been irregular. Wheat—Fine cargoes 1s dearer; secondary, difficult to sell. Maize—Good cargoes steady in price. Barley 1s to 1s 6d dearer. Rye in quiet demand. The reported sales are as follows:—Wheat—9 arrived cargoes: Ghirka Odessa, 51s to 51s 9d; Marianopoli, 54s 3d to 54s 9d; Berdianski, 55s 3d per 492 lbs; No. 1 spring New York, 53s 6d to 55s 6d per 480 lbs. On passage, 1 cargo Californian at 61s 6d per 500 lbs. Maize—2 arrived cargoes: Odessa, 36s; Galatz, 36s 6d per 492 lbs. On passage, 1 cargo Varna, 33s per 480 lbs. Barley—4 arrived cargoes: Azow from Taganrog, 28s 6d to 28s 9d; Mavarna, 30s; Varna, 28s 9d per 400 lbs. Rye—Shipped or to be shipped, 1 cargo Azow at 36s per 480 lbs. Linseed—100 tons ordinary brown Calcutta, 63s 3d to 63s 6d. Shipped or to be shipped, 450 tons ditto East India Calcutta, 63s per 410 lbs. Rapeseed—Arrived, 200 tons ordinary brown Calcutta at 66s. Shipped or to be shipped, 1,000 tons ditto, 65s to 66s 3d per 416 lbs. Cotton-seed—Shipped or to be shipped, 1,000 tons Egyptian, 9l to 9l 2s 6d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, THURSDAY MORNING.

SUGAR.—The tone of the market has at length improved, the refiners having extended their operations in West India, the latest sales effected showing a rise of 6d per cwt on recent depressed quotations, and a few parcels of low brown sorts, including Manila, have changed hands. There are not further sellers on former terms. The sales of West India on Tuesday and Wednesday amounted to 1,313 casks, including crystallised Demerara by auction at 35s to 36s per cwt. The first imports of new Barbadoes and grocery Porto Rico will be offered at public sale to-day. Latest advices from the Havana continue to show a very important falling off in the shipments to Europe. The receipts from the Mauritius have been much less than last season, but the total supply here has not shown any material decrease. Home deliveries continue very steady. The stock in London is 22,500 tons less than the previous season's. There will soon be a better supply from the West Indies.

Mauritius.—There have not been any public sales.

Madras.—Rather higher rates are demanded for Jaggery, and no further business reported.

Penang.—1,000 baskets brown sold at 19s.

Manila.—About 10,000 bags unclayed Manila have sold on the spot at 21s: 500 tons to arrive at 21s 6d for Zebu.

Other Foreign.—A floating cargo of Cuba is reported at 26s for the United Kingdom (molasses sugar), and one of Bahia at 22s 6d per cwt.

Retined.—The trade have been buyers at rather higher prices than last quoted for dry goods, 42s to 44s per cwt upwards, and the supply is now moderate. Pieces meet with a better demand.

Rum.—The market has been quiet, and sales to any extent cannot be made upon former terms. Some business to the extent of 350 casks Mauritius reported at 1s 4d: Demerara has obtained 1s 10d to 1s 11d proof. A few sales of Jamaica have been made at 3s 7d to 4s per gallon.

Cocoa.—Small sales have been effected in Guayaquil at 51s to 52s for good, but common qualities are dull. Supplies of Grenada have arrived. At the public sales on Tuesday 1,466 bags Trinidad went steadily, the middling to fine sorts being most in demand at from 60s to 100s; grey and ordinary sold at 51s to 58s. A portion was taken in. 105 bags Grenada were bought in, also 139 bags Surinam. The landings last week were heavy, including 5,344 bags foreign, chiefly Guayaquil, which makes the total stock 38,600 bags, &c., against 26,000 bags last year, and 36,650 bags, &c., in 1869 at same date.

Tea.—Some arrivals have taken place, but the importers do not seem desirous to bring much upon the market until after Easter. The demand during the week has been rather limited, and the public sales, comprising 8,300 packages, showed little change in quotations for the parcels sold "without reserve," excepting common green teas, which went rather cheaper. The deliveries keep steady, and the stock in the United Kingdom is 11,500,000 lbs less than at the same date last year.

Coffee.—The market has been without improvement, and several arrivals have taken place, chiefly from Colombo. Native Ceylon meets with little inquiry unless at lower prices. The small quantity of plantation brought to auction, viz., 100 casks 177 barrels and bags, has sold steadily: colory, 66s 6d to 76s; superior bold at 83s; pale and greyish, 62s 6d to 66s. 107 bags Jamaica realised 52s 6d to 56s 6d for good to fine ordinary. 126 bales and half-bales Mocha were withdrawn. 97 cases East India, of the new crop, sold as follows: middling colory Wynaad, 69s to 69s 6d; bold, 78s 6d. 37 cases greyish Neilgherry kind mostly found buyers at 63s 6d for rather small berry. 2,414 bags Rio were chiefly taken in. A few lots sold at 50s to 52s 6d. 724 bags washed Rio bought in. 118 bags Guatemala sold at 58s 6d to 60s, and 376 bags Santos at 50s 6d to 59s 6d. 1,008 bags washed Santos partly found buyers at 59s 6d to 63s per cwt. The stock is now 2,150 tons less than last year's, but there have been arrivals from Colombo, and the supply will shortly increase. A parcel of good to fine East India of the new crop is declared for sale next week.

Rice.—Transactions have been of moderate extent during the week, including Rangoon on the spot at 9s 4½d; white Bengal, 10s 6d to 11s 3d; bold, 12s 3d to 12s 4½d: Moonghy, 9s 3d to 9s 9d; ditto, 9s to 9s 3d. ex quay. There have not been any public sales. The market although rather quiet is firm.

Imports and Deliveries of Rice to April 1, with Stocks on hand.

Stock	4350	...	4270	...	3780	...	15800

Sago.—919 bags were taken in at 18s 6d for bold brownish. 328 bags small grain at 17s 6d per cwt. There was not any demand.

Sago Flour.—451 bags Singapore were bought in at 15s 3d.

Tapioca is dull. 786 bags Singapore were chiefly bought in.

Pearl Tapioca.—348 bags were chiefly taken in at 18s 6d to 19s for very bold white. A small parcel of white medium sold at 18s 6d per cwt.

Black Pepper.—The market is unsettled, but a few parcels have sold privately at last week's rates. 1,019 bags Penang by auction were partly disposed of at 4¾d; one lot, 4¼d. The sound portion of 1,219 bags Singapore was taken in above the value, viz., 5¾d per lb.

White Pepper is dull. 237 bags Singapore by auction part sold at 7¼d for common quality, being rather cheaper.

Other Spices.—Nutmegs obtained steady prices in the public sales. 28 cases, chiefly Java, went as follows and all sold: 66's, 3s 6d; 76's, 2s 8d; 80's, 2s 5d to 2s 6d; 86's, 2s 4d; 116's to 100's, 2s 2d to 2s 3d; wormy defective, &c., 6d to 1s 1d, 5 casks taken in. 12 cases Java mace sold steadily at 2s 3d to 3s 6d for ordinary to fair quality, the latter rather wormy. 230 bales Zanzibar cloves were chiefly bought in at 5d, a few lots 2¾d to 3d per lb. 97 packages broken Java cinnamon sold at 40s per cwt. 115 bales Ceylon at 1¾d to 1¾d for spurious. 123 bags chips were taken in. 310 bags bark partly sold at 1¾d per lb. 155 cases cassia buds sold at 77 7s 6d to 77 12s 6d. 224 cases Cochin ginger of the new crop sold at 62s to 90s for rather small to bold, part scraped; one lot 100s; small, 44s to 45s. 349 bags Bengal partly sold at 25s per cwt.

Saltpetre.—The market remains without alteration, and is very dull. A small quantity of Bengal has sold privately, viz., about 1,400 bags: refraction 85, at 25s 6d; 5¾ to 5, at 25s 9d to 26s 6d per cwt. No sales reported for arrival.

Imports and Deliveries of Saltpetre to April 1, with Stocks on hand.

	1871.		1870.		1869.		1868.
Imported .....tons	1700	...	1800	...	1100	...	1900
Total delivered	2400	...	2500	...	2500	...	3200
Stock	2700	...	2550	...	2750	...	6000

Cochineal.—At the public sales on Wednesday 995 bags Teneriffe barely half sold at rather lower rates. Silvers, 2s 3d to 2s 7d; black, 2s 4d to 2s 6d, and superior up to 3s 1d. 92 bags Honduras, part sold at easy rates, but the blacks were chiefly taken in. 48 bags Mexican sold as follows: silver, 2s 4d to 2s 5d; black, 2s 6d to 2s 7d per lb.

Other Dyestuffs Goods.—There is not much business passing in cutch, but the market is firm. 352 bales gambier were taken in at 16s 6d. There are buyers for arrival. Present value 16s to 16s 3d. The former price has been paid. 50 cases China galls were taken in at 48s. 78 bales Bengal safflower were mostly bought in at 6*l* to 9*l* 15s per cwt.

Shellac.—The market is rather quiet. At the public sales 334 chests were partly sold: native orange, 5*l* 10s to 5*l* 15s; low button, 72s 6d to 78s; good, 6*l* 10s to 6*l* 12s 6d per cwt.

Metals.—A general feeling of quietude has prevailed in these markets, prices occasionally showing some decline. A steady demand has been experienced for manufactured iron. Scotch pig, which at one time rose to 53s 10½d cash, has since fallen to 54s 4d, and to-day quoted 54s 6d. A few sales have been effected in tin at last week's prices. Straits, 129*l* to 129*l* 10s; to arrive, 128*l* 10s. English steady. The stock of spelter in the kingdom has increased to 4,113 tons. Business has been done in Silesian at 18*l* 7s 6d. Lead supports the advance recently quoted, and is in steady demand. Most of the contracts made in copper have been at prices favourable to the buyers, but the market is now firmer. Chili, &c., 64*l* to 66*l*; Walaroo and Burra, 73*l* 5s to 74*l* per ton.

Hemp.—Manila has been almost neglected. Petersburg clean remains quiet. The Government require tenders for Russian to be sent in.

Jute.—Shipments from Calcutta being upon a larger scale than of late, and trade in Dundee less animated, the market for jute is quiet. At the public sales yesterday, 4,000 bales partly sold at 10s decline, from 20*l* 5s to 26*l* 5s for low to fine, and rejections at 18*l* 15s per ton.

Linseed.—The market is firmer, and Calcutta quoted 63s 3d to 63s 6d. To arrive, 63s per quarter, paid.

Oils.—Olive oils on the spot remain dull. A cargo of Naples sold for Russia at 49*l* per tun. No change can be quoted in sperm or other common fish. Cocoa-nut: Ceylon, 40*l* to 41*l* 10s. Cochin scarce, and nominally unaltered. Linseed oil is steady, closing at 32*l* on the spot. English brown rape, 43*l* on the spot or early delivery, and 43*l* 5s to 43*l* 10s last six months. Refined, 45*l* per ton.

Petroleum.—American refined, 1s 4½d to 1s 5d; for delivery in the last four months, 1s 6d per gallon.

Tallow.—There will not be any public sales held to-day, but the market for Russian continues flat. Petersburg on the spot or for early delivery 43s 3d; June, 43s 6d to 44s 9d; October to December, 45s 3d to 45s 6d per cwt.

Particulars of Tallow—Monday, April 3, 1871.

POSTSCRIPT. Thursday Night.

Sugar.—The market was firm to-day, and closes quite 6d dearer for West India. 456 casks Barbadoes, the first of the new crop offered by auction to-day, sold steadily: soft brown and yellow, 28s 6d to 31s 6d; grainy, 32s to 35s. 306 casks 100 barrels Porto Rico of the new crop sold at 31s to 34s for low soft to rather bright yellow. Sales of West India to-day, 716 casks; for the week 2,019 casks. A floating cargo of Bahia is reported sold at 24s for the United Kingdom, and one of Maceio in bags at 24s 9d. 10,500 bags Java syrups on the spot at 19s 9d; and 1,500 bags low unclayed Manila at 19s 6d.

Treacle.—400 barrels American sold at 16s to 16s 6d per cwt.

Coffee.—175 bags Mysore sold at 80s 6d to 95s. Small sales of Rio are reported by private contract.

Rice.—Further business has been done in white Bengal at 11s 3d.

Spices.—No change. Penang black pepper, 5¾d per lb.

Drysaltery Goods.—1,314 bales gambier by auction were withdrawn. 702 bags Java turmeric taken in at 16s. 252 chests lac dye were mostly bought in. 271 bales Bengal safflower, part sold at 5*l* 5s to 6*l* 12s 6d for broken and low quality.

Hides.—The sales of West India to-day went at previous rates to ¼d per lb decline.

Tallow.—Petersburg unaltered. There were not any public sales of Australian to-day.

ADDITIONAL NOTICES.

Refined Sugar.—The home market meets with improved demand, at a rise of 1s per cwt. Dutch crushed continues firmly supported, at an advance of 1s 3d per cwt; sales of first marks, No. 1, have been made at 36s, f.o.b. Amsterdam for delivery this month.

Green Fruit.—The report of Messrs Keeling and Hunt states that Azores and Valencia oranges are in good demand for the Easter holidays, and prices well supported. The stock of lemons having increased, prices are lower, which will stop further shipments, and improve the market. The last arrival of Seville sours to hand. Barcelona nuts firm. West India cocoa-nuts have a ready sale.

Dry Fruit.—Currants are without alteration in value, but are held firmly, stocks (as are those of all dried fruits) being very light. Raisins are in fair demand, but the market generally is quiet, though strong.

English Wool.—Hardly so good a demand. Prices steady.

Colonial Wool.—Market quiet, prices very firm.

Flax.—Market steady.

Hemp.—Market for Russian very quiet, good Manila scarce and more inquired after.

Seeds.—The seed trade continues steady in value and demand for all descriptions.

Tobacco.—There has been rather more inquiry in our market during the past week, although the transactions have only been upon a limited scale. For exportation there is a demand for low classes of Kentucky leaf, of which there is but little offering. In other growths suitable for segar purposes and cutting there has been a good business done.

Metals.—The business induced by the condition of affairs in Paris continues unabated. Copper has been selling very slowly, but prices are steady. Iron is quiet for the most part. Tin is quoted higher in Holland, but operations have been very limited here, and consequently prices have remained stationary. Spelter is quiet, but firm in prices. Lead is in steady demand at the advanced rates. Tin-plates steady.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian itto	45	0
Melted stuff	33	6
Rough stuff	17	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 138 casks.

METROPOLITAN CATTLE MARKET.

MONDAY, April 3.—The total imports of foreign stock into London last week amounted to 13,494 head. In the corresponding week in 1870, we received 8,111; in 1869, 11,929; in 1868, 3,694; and in 1867, 8,245 head.

There were limited arrivals of English beasts on sale here to-day, the condition of which was good. The market was fairly supplied with foreign beasts, and there were in addition nearly 300 at the waterside. Of the foreign arrivals in this market 260 came from Gothenburg, 212 from Jutland, 200 from Spain, and 230 from Dunkirk. Trade ruled slightly firmer, though the actual rise in the quotations was unimportant and not general. The extreme top price for choice Scotch heifers was 5s 6d per 8 lbs, large Norfolk fed animals being quoted at 4s 10d to 5s 2d per 8 lbs. From Norfolk, Suffolk, Essex, and Cambridgeshire we received above 1,000 Scots or crosses; from other parts of England about 450 of various breeds; from Scotland 110 Scots and crosses, and from Ireland about 90 oxen. The number of sheep in the pens was below the average for the time of year, but there were about 7,000 on offer at the waterside. The demand for choice mutton ruled steady, and good Down wethers sold at 6s 6d per 8 lbs in the wool, and at 5s 8d shorn. Lambs were in demand at advanced currencies, the quotations being 8s to 8s 6d per 8 lbs. Calves and pigs ruled steady in value.

SUPPLIES ON SALE

	April 4, 1870.	April 3, 1871.
Beasts	3,369	2,555
Sheep and lambs	23,800	17,550
Calves	93	150
Pigs	75	110

LIVERPOOL MARKETS.

CORN.

(FROM OUR OWN CORRESPONDENT.)

TUESDAY, April 4.—At this day's market there was a good attendance of the town and country trade, as there will be no market held here on Friday next, and considerable disposition to buy was evinced. Wheat was in fair request, at an advance of fully 2d per 100 lbs on red, and 3d for white descriptions since this day week. Flour was in better demand, but without quotable change in value. Oats were difficult to move, and ½d per 45 lbs lower, but oatmeal remained as last quoted. Beans showed a decline of 6d per quarter, but barley and peas brought full prices. Indian corn was in better demand, and may be quoted 3d per quarter dearer on the week, primed mixed American bringing 34s 3d to 34s 6d; yellow, 34s 6d to 35s; and white, 34s 6d, to 35s 6d per 480 lbs. Prime old Danubian was held for 35s 6d per 480 lbs.

WAKEFIELD, Thursday, April 6.—In consequence of the market being held off the usual day, there was but a broken business. Wheat was 1s dearer, but business passing was only to a limited extent. English barley was firm at full prices. Foreign in fair demand at late rates.

The Gazette.

BANKRUPTS.

TUESDAY, April 4.

Edward Flower, Aldgate, druggist.
Clement Alfred Haslewood, Muswell hill, Hornsey, stockbroker's clerk.
Joseph Catt, jun, Wittersham, Kent, victualler.
William Chappell, Upper Beeding, Sussex, builder.
William Davis, Birmingham, builder.
Edward Lane, Berrow, Worcestershire, farmer.
James Duncan MacGregor, Wood green, Middlesex, gentleman.
Joseph Outram, Woodville, near Burton-on-Trent, wood salesman.
Harold Slingsby Duncombe Richardson, Manchester, barrister-at-law.
Frederick Wainwright, West Derby, Lancashire, boiler maker.

SCOTCH SEQUESTRATIONS.

Duncan Grant Mackenzie, Shieldaig, Ross-shire, merchant.
Andrew Meek, Dunbarrow Mills, Forfarshire, miller.
George Gray, Edinburgh, saddler.
George Gray, Galashiels, spirit merchant.
Robert Gray, Island of Westray, boatman.
Angus Dennison Henderson, Edinburgh, stationer.
Archibald Allardyce, Glasgow, plumber.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

George Luke Priddle, Hardwick place, Commercial road East, surgeon and apothecary.
Charles John Johnson, Norfolk square, Paddington, clerk.
James Edgcombe, jun., Rose Cottage, Beulah hill, contractor and builder.
John Holmes and James Holmes, East Cowton, near Northallerton, farmers.
Thomas Atherstone Matthews, Hedon, York, tailor.
Richard Reed, Ide, Devon, innkeeper.
Thomas Rhodes, Queen street, Leeds, commission agent.
William Walker, Louth, coal merchant.
John Garrett, Sandon street, Liverpool, chemical manufacturer.
Henry Meathrel, Modbury, licensed victualler.
William Beachey Head, Blackpool, hotel keeper.
Thomas Jones, Neston, near Chester, auctioneer.

SCOTCH SEQUESTRATIONS.

Messrs C. and A. Christie, Gladsmuir, near Tranent, ironmasters.
Andrew Minto, Pleasance, Edinburgh.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

FINE FLAVOURED, STRONG BEEF TEA at about 2½d a pint. ASK FOR LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

Laboratory, 35 Long Acre, and all Druggists.

TEETH.—MR WEBB (MANY years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S extraordinary improvements in ARTIFICIAL TEETH and PAINLESS DENTISTRY, Patent No. 562, improved Jan., 1871, afford the following advantages:—

1stly. EXTREME LIGHTNESS (being completely self-supporting), combined with great efficiency, durability, and comfort, thus avoiding the covering to the palate hitherto considered an indispensable adjunct to Artificial Teeth.

2ndly. MODERATE CHARGES, accounted for by their extreme simplicity of construction, while the highest class of mechanism and materials only are employed, combined with an experience of half-a-century in their adaptation.

3rdly. ABSOLUTE IMMUNITY FROM PAIN, the compressed NITROUS OXYDE GAS, after an experience of many thousand cases in hospital and private practice, ensuring this desideratum with an absolute certainty, the laughing gas being not only absolutely free from danger but positively pleasant.

4thly. So successful an imitation of nature (springs being entirely dispensed with) that detection becomes an impossibility.

MESSRS GABRIEL,
61 LUDGATE HILL, CITY, and 56 HARLEY ST., CAVENDISH SQ., London.

MESSRS GABRIEL'S
CELEBRATED PREPARATIONS
FOR PRESERVING AND BEAUTIFYING THE TEETH
Are sold by all Chemists and Perfumers in every town.

At Geneva—MM. Ombard Odier and Co.;

At Berne—MM. Von Graffenried and Co.;

At Lyons—MM. P. Gallaine and Co., and Widow Morin, Pons et Morin.

In exchange for the shares deposited, a certificate of deposit will be given, and also a card according the right of admission to the meeting.

The shareholders entitled to take part in the deliberations of the general meeting, ordinary and extraordinary, may be represented by delegates possessing their authorisation, but having themselves the right to be present.

The authorisation in question must be written on the back of the certificate of deposit and must be presented at the latest the 18th April 1871.

As the resolutions that will be submitted to the general meeting, ordinary and extraordinary, can only be adopted by a meeting comprising at least the fifth of the capital or 10,000 shares. Shareholders are earnestly requested to attend or to have themselves represented.

MILNERS' STRONG HOLDFAST AND FIRE-RESISTING SAFES of Six Progressive Qualities and Prices, suitable for all amounts of cash, CHESTS, STRONG ROOMS AND DOORS with all the Latest Improvements, effectually guarding against the novel modes of attack, as used by the Cracksley gang in the Cornhill and other robberies (against which no safe made before 1868 is secure), but which, in addition to Milners' succession of improvements during the last half-century constitutes their safes the strongest, and (all circumstances considered) the cheapest safes to resist against fire and the modern burglar. Milners Patent Safe Works, Liverpool, the most extensive and complete in the world. Depots Liverpool, Manchester, Sunderland, Leeds, Hull, London Depot, 47a Moorgate street, City, near the Bank of England. Circulars free by post.

MORE CURES OF ASTHMA AND COUGHS by Dr Locock's Pulmonic Wafers.

Lyndon, Cheshire.—In allowing any mention of the above, I consider all imputations to suspicious and promoting that unreasonable haste in order to obtain a refreshing sleep, have generally stood unrivalled.—H. Evans, Druggist." They give instant relief to the breath and lungs, and have a pleasant taste. Price 1s 1½d per box. Sold by all medicine vendors.

HOLLOWAY'S OINTMENT.—

No Cure, even without desire.—If we said to see the worthy in search and ought to cure for wants to find a family where it is needed of work. An ulcer on the leg, a wound of some a gouty joint, a rheumatic affection, or a stubborn sore will not long withstand its power. The ailments [illegible] with Holloway's soothing, healing, and purifying ointment. There are few persons to be found that they have not personally proved its good influence upon [illegible]. There is no [illegible] which it will not [illegible] to be [illegible] of [illegible] of [illegible] of

SPANISH FLY IS THE ACTING ingredient in ALEX. ROSS'S CANTHARIDES OIL, which speedily produces Whiskers and thickens Hair. 3s 6d, sent by post for 54 stamps.—ALEX. ROSS, 248 High Holborn, London, and all Chemists.

HAIR-CURLING FLUID, 248 HIGH Holborn, London.—ALEX. ROSS'S CURLING FLUID curls Ladies' or Gentlemans' Hair immediately it is applied. Sold at 3s 6d, sent free for 54 stamps. Had of all Chemists.

GREY HAIR, 248 HIGH HOLBORN, London.—ALEX. ROSS'S HAIR DYE produces a perfect colour immediately it is used. It is permanent, and perfectly natural in effect. Price 3s 6d, sent by post for 54 stamps; and all Chemists.

HAIR DESTROYER.—248 HIGH Holborn, London.—ALEX ROSS'S DEPILATORY removes superfluous hair from the face, neck, and arms, without effect to the skin. Price 3s 6d, sent for 54 stamps. Had of all Chemists.

HAIR COLOUR WASH.—BY damping the head with this beautifully perfumed Wash, in two days the hair assumes it original colour, and remains so by an occasional using. 10s 6d, sent for stamps. ALEX. ROSS, 248 High Holborn, London, and all Chemists.

EMPLOYMENT.—WANTED, BY A Gentleman (aged 33) who has been for the last 16½ years in one position of trust in a country Bank, occupation of a similar nature.—Address O. V., Post Office, Bedford.

PARTNERSHIP OR OTHERWISE. —A gentleman is required who can command from £8,000 to £10,000 capital in a large Chemical Manufacturing Business, whose products are of the highest class, and in great and increasing demand, with but limited competition.—Principals only need apply, by letter, to S. N. Driver, Esq., Solicitor, 59 King William street, London bridge.

WANTED, BY A COMMISSION Firm in the Manufacturing Districts doing business with the East, possessing a good commission and first-rate facilities, a PARTNER with means, or the co-operation of a monied concern in London.—Address T. c/o., J. Edwin Carter, Esq., Solicitor, Austinfriars, London.

WANTED, A GENTLEMAN TO take the entire charge and management of a First-Class Bonded Wharf and Warehouse. Must be thoroughly experienced, and if well known on change, would be preferred. Payment by a small fixed salary with good percentage on profits, to a really first-rate man.—Apply, by letter only, in the first instance to Cousens, Renshaw, and Co., Brook's wharf, Upper Thames street, E.C.

TO CAPITALISTS.—A PAPER Manufacturer, carrying on an old-established concern in Lancashire, wishes for one or more PARTNERS, who could bring in a further capital of £20,000. The supply of pure water is plentiful, coals cheap, and carriage very convenient.—For further particulars apply to Messrs Sale, Shipman, Seddon, and Sale, Solicitors, 29 Booth street, Manchester.

TO IMPORTERS AND WHOLESALE MERCHANTS in LEATHER WARE (Portefeuille Articles).—To some important firm of England an agent at Frankfort-on-Main offers his services in managing the purchase of Offenbach leather ware (Portefeuille articles). Knowledge of the cheapest sources, especially amongst the smaller manufacturers in the neighbourhood, enable him to promise such advantages, that often will exceed those given by larger establishments.—For references and particulars apply to T. G. 401, care of Messrs G. L. Daube and Co., Advertising Office, Frankfort-on Main, Germany.

MALVERN COLLEGE.

The Second Term will begin on Friday, May 5th.
Terms of Tuition and Board, £90 per annum.
For Clergymen's Sons passing an Entrance Examination £80 per annum
For particulars inquire of the Secretary.

PALL MALL CLUB,
24 Suffolk street, Pall Mall, S.W.

This Club is instituted for Gentlemen who desire to enjoy the advantages of a Club that is free from political bias. There is no liability attaching to membership. Members are elected fortnightly by ballot of the Committee. Entrance fee, Five Guineas. Annual subscription—town members, Four Guineas; ditto country members, Two Guineas.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL, for March, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to March 29.

Advertisements for next Number, to be published on April 29, must be sent to insure insertion on or before April 27.

OFFICE—349 Strand.

BANKING DURING THE SIEGE OF PARIS.

We print elsewhere a remarkable communication from an eminent French authority, which gives a most curious account of the mode in which the Société Générale and other French banks provided for the demands upon them during the siege. It is the largest and best met run in the history of banking. The complete story is told by our correspondent, but a very few figures tell it strikingly to men of business. The liabilities to the *public* of the *Société Générale* were:—

	£
On the 30th June, 1870	7,809,000
On the 23rd March, 1871	2,540,000
Payments in consequence of the run	5,268,000

Before the war the business of the bank was going on just as usual. The whole pressure was sudden, and consequent on the invasion and the national disasters.

The bank was able to pay in so short a time two-thirds of its liabilities to the public (which no English bank except the Bank of England could do), because it had invested that very large proportion of its means in convertible securities. Of course in France itself such securities were perfectly unsaleable, but the "Société Générale," and several other French banks, showed a remarkable foresight. Just after Sedan they sent all their convertible securities to England, and therefore when the real pressure came they were able to dispose of them on the London Stock Exchange, and so obtained much money. But what, it will be said, was the use of funds in London when the run was in Paris, which was shut up by the siege, and at other places in France, to which it would have been very difficult to send large sums in cash? The difficulty was met thus. Though the post had ceased to work, means were found of obtaining a trustworthy account of the sale of the securities and of the existence of the funds in London. Upon the strength of these the Bank of France advanced its notes as it needed to the *Société Générale*, and with these it paid the public. For a time therefore the Société Générale owed the Bank a large sum. But they do not owe it any longer. As soon as peace was made, they took their money from London, and paid off all they owed.

Of course the Bank of France could not have done so had it been itself in any discredit, or in any fear of it; but it was exempt from apprehension—first, because it had been required by the Government to suspend *specie* payments, and because its notes have, notwithstanding that apprehension, circulated without the slightest misgiving. It itself, we believe, sent most of its bullion to its maritime branches, such as Brest, and Bordeaux, and Toulon; whence, as France had always the command of the sea, that bullion could if necessary be sent at any moment to England, or any other place where the Germans could not come. In consequence of this most admirable precaution, our correspondent states that the Bank of France still retains as much as 24,000,000*l* of actual coin and bullion, a larger amount than that of the Bank of England.

It must not be supposed that these disasters will not have cost the Société Générale or the Bank of France, or any other similar "institutions of credit," very dearly. Any English bankers who will look at the balance-sheets appended to this article will see that the blow has been very heavy.

1st. The liabilities to the public—that is, the means of making profit—have been reduced two-thirds, as we said.

2ndly. Much of the remaining part of its securities being of a commercial nature must be heavily depreciated by the present state of commerce.

But it is much to have been able to stand such a shock at all, and on any terms. The timidity of French bankers has often been blamed; but their answer always was—"We have revo-"lutions in France, which you have not in England; we shall "keep strong, for we remember 1848;" and the event has shown that they duly estimated the instability of the apparent prosperity of their country, and were wise in acting

with a caution which an English banker would have deemed childish and unreasonable.

MR GOSCHEN'S PROPOSALS.

THREE of Mr Goschen's proposals are plainly wise.

1st. That all local bodies expending money or levying taxation should be compelled to make up their accounts in the same form to the same time, and to send them to the same public office in London. This may seem simple, but because it has not been done, nobody till now has known what our local expenditure or our local taxation was. The immense trouble and labour which Mr Goschen has taken to discover them ought never to have been necessary. It is miserable waste of most valuable time to invent a chaos for a Cabinet Minister to rectify. If, under penalties, all local authorities had been compelled to prepare prescribed accounts, Mr Goschen's great labour would have been needless, and we should have learned the result long ago without him.

2ndly. That there should be an independent and similar audit of all these accounts, so that we may be sure that all the figures are true, all the directions for making them up complied with (which is most important when various accounts are to be combined), and all the money received duly expended. There may be a little personal difficulty in settling *who* shall be the proper auditor, and some people may not like to cease to be auditors of their own accounts or other's, but no one can deny the propriety of the proposal.

3rdly. It is equally reasonable that there should be only one collecting authority within the same area. At present, several co-ordinate authorities come at different dates, and when they choose, to the ratepayer, and say—"Pay me such and such "rates." Mr Goschen proposes that at a certain period, say early in January each year, a "demand note" should be served on each ratepayer, saying what it is he will be required to pay, why he will be required to pay, and when. To this plainly no objection can be made; it is a plain good unmixed with evil.

There may be and will be in the same area various *requiring* authorities, that is, various persons or bodies entitled to make requisition on the collecting authority, and the limits of the jurisdiction of these will not by any means necessarily be the same as the limits of the collecting authority. There are certain rates which we may plainly call *universal;* that is, their objects exist everywhere, though not everywhere to an equal amount and intensity. Such, for example, are the poor relief and police rates. These may be divided almost as we please throughout England. The unit of collection and assessment is entirely arbitrary, and there will often be no very conclusive reason for choosing one unit rather than another. One person would have an individual preference for one system, another for another, and some one must make a despotic choice between them. The matter is one in which nature fixes no boundaries, and in which man must invent the best he can. But the case is different in *improvement* rates. These are essentially not universal but local; they benefit certain lands and houses, and their effect ceases of itself at a certain geographical limit; they have a defined frontier made by nature. And it does not at all follow that this limit will coincide with any previously existing local division. Take for example the smallest and most workable existing division—the parish. Suppose a parish half moorland, which wants draining, and half hill-land, which does not. Suppose that from geographical conditions the moor must be drained by combined action among the owners, and that no single owner can in this case, as in ordinary cases, drain for himself. Clearly there ought to be a drainage rate on all parties interested, or all who will benefit by it. But the gainers will be only the owners of the moorland; the owners of the hill-land will not gain at all. Then to be just, the rate must not be a parish rate; it must be paid by the moorland which will be improved, not by the upper land which will not be touched.

In all cases it is requisite that the amounts of the rates to be collected, and the persons from whom they are to be collected, should be known to the collecting authority, but nothing else is necessary. Suppose that the area of a drainage rate or a sanitary rate should be half in one collecting district and half in another, and that it be not collected all through either district. If the dividing frontier be definitely known, the collecting authority (on receiving due requisition from the assessing authority) can make out its demand note, containing this rate in the proper cases, and not containing it in others. And it can levy the rate in the same manner. The whole subject will be confused if we do not sharpen in our minds the distinction between the "requiring" and the "collecting" authority. There may be as many requiring authorities as local circumstances make needful, and their boundaries may intersect and overlap as they now do, and as their benefits do; but the collecting authority—the authority with whom the ratepayer deals—should be in all cases one and the same. Local taxation should not be a "maze of little bills." It should be one single "consolidated rate."

But when we have these three proposals we arrive at many conclusions, each of which is fair matter of doubt and discussion, and each of which must be well discussed before it is adopted. In the main they may be good—we believe they are good; but they are not, like the three proposals we have stated, indisputable financial axioms. We will state them consecutively.

Mr Goschen chooses the parish for this "unit of "collection." We confess we doubt if he is right, though the subject is full of difficulty, and though we cannot speak upon it with much confidence. Certainly every existing division is liable to great objection. The most important of our local divisions were settled by circumstances and in times long ago forgotten. The boundaries of our counties were fixed by continued fighting and struggle in the Anglo-Saxon times. These counties were then kingdoms and provinces more or less independent. These frontiers are like those of France and Germany, the "product of ancient skill and ancient "valour." But no way of settling boundaries can be less adapted to modern uses, or more remote from our present convenience. That rates should be levied or not levied, paid or not paid, according as Anglo-Saxon A. B. was weak or not weak, was victorious or was vanquished, seems scarcely reasonable. Yet there is the gravest difficulty in altering the boundaries of counties, though they are unequal in area, unequal in population, and their frontiers run in the most shapeless manner. The parish again is not a modern civil division, but an ancient ecclesiastical division. We have never seen a rational account of the mode in which their boundaries were settled. But everyone knows that in the result nothing can be more irregular or more arbitrary: some are small, some are large, some populous, some thinly inhabited, some of one shape, some of another. Occasionally a parish will contain "islands" belonging to another parish, and as a compensation perhaps it will have some fragmentary parts outlying in a third parish. If you wanted to make a bad civil division, you could hardly make a worse division than the old church division of parishes. And the bad results are not simply speculative. Mr Goschen

proposes that all the officers of the parish should be elected at once as a sort of political local life; that the parochial board should be the unit of local taxation and local administration. But owing to the smallness of many parishes there will be no real local life, and no sort of free election at all. Many parishes belong to a single proprietor, and whatever he says will be done, and whoever he suggests will be appointed. Now that we are abolishing "close" boroughs, we should not for important civil purposes establish "close" parishes.

We own however that we have great difficulty in suggesting a better plan. Every existing division has incurable defects. The "unions," which suggest themselves at first sight, do not correspond with the counties, and there is great difficulty in altering either. The "union" is the basis of "poor relief" taxation; if we alter it we alter the distribution of the most important local burden. And counties are hard to alter, because having existed continuously from the Anglo-Saxon times, they seem to have acquired a prescriptive right to exist as they are, and we can scarcely think of England without them. The parish itself when large enough, and a combination of parishes, as Royal Commissioners might direct, would, we are inclined to believe, be the most desirable unit.

Next Mr Goschen proposes that the owner, not the occupier, should pay half the rates; and he plainly expects that this will make a considerable change in this incidence. If abstract political economy were exactly true—if man were that always careful, always active, always foreseeing being which economists make him, there would be no change, except one. Inevitably, under the system in which the occupier pays all rates, any addition to rates during the time of occupation must fall on him. He cannot shift that addition. With the rates in existence or foreseeable at the beginning of his tenancy he can deal. He can say—"I will not pay so much rent for acre B as I should "for acre A, for its rates are greater." But now, in the middle of his tenancy, circumstances may bring an increase to the rates on acre B. He cannot help himself, he must pay it; he must bear the evil of an augmentation, and by way of compensation he has the gain of a diminution. And this is a very considerable evil. "Improvement rates" are very largely the cost of permanent benefits to certain properties. They ought not therefore to be entirely borne by the temporary occupiers of such properties. Suppose a lease for 21 years, and suppose that during it an improvement rate is imposed which is to defray in 20 years the cost of a lasting improvement, clearly the whole cost of the improvement will be borne by the temporary leaseholder. The permanent owner will not pay any of it. Mr Goschen's proposal will charge the permanent owner with a part of the cost of permanent improvements, and clearly he ought to bear a part.

What else Mr Goschen's proposal will effect it is not so easy to say. The conclusion of abstract political economy that it will have no effect is restrained by several influences like the following:—

1st. By the friction of human life the person who is under "cash advance" is very liable not to get that "cash advance" back. It might be said that an owner finding this new charge on him, and that the tenant who used to pay it is exempt from it, would raise his rent. He would be a fool, one would say, not to raise it. Yet Sir John Tuwaites, a most excellent witness on the subject, said that he did not think the greater part of the London house-owners would raise it; they would not be "keen enough." And we believe that in small properties—that is to say, where the entire amount paid by each owner is small, and where in consequence all such owner would suffer would be the loss of a few shillings, and where he would have to take some trouble to get back that few shillings—the occupier would really gain, and the owner really lose by the change. The payment would really fall on the first advancer—that is, the owner; but in large properties—in properties managed by agents—we cannot conceive that it would be so.

2nd. Agricultural land is very often not let at a rack rent. The cash for political power, for personal popularity, for social deference, frequently inclines an owner not to charge all he might for his land. The wish to be thought a good landlord, and the fear to be thought a bad landlord, are powerful motives, and they tend to make an owner pay the charge the law casts on him rather than raise his rent, and so transfer it to the tenant. No one can say how far these feelings will influence men, or how far they will not.

There are several other such influences, but it would be very tedious and not very useful to discuss them at length. One conclusive observation applies to them all. The change is certain to do good, because it will sometimes prevent the whole burden of permanent improvements from falling on the temporary occupier, and it cannot do any harm, because the owner should exert himself to get a compensation in a rise of his rent. If he cannot get that rise, it shows he was getting somehow more than his proper rent before; if he can get it, there is no harm done.

But the economical side is not the most peculiar side of Mr Goschen's proposal. It has a political side also. Hitherto, every proposal for reforming Quarter Sessions and substituting a representation of ratepayers has been met by saying that in fact the justices, as owners of property, are the real payers of rates; that the occupiers only advance them temporarily, and therefore that the proposed alteration would be a step backwards, and substitute a body elected by non-ratepayers, and having presumably no interest in ratepaying, for a body which, though irregularly chosen, is really composed of ratepayers. But now that the owners are to pay half of the rates, this objection ceases. We can have a county board really elected by final ratepayers, and not by temporary advancers.

Mr Goschen's new county polity is composed of a parochial board and a chairman of such board elected by the parish, and a county board elected part by the justices and part by the chairmen of the parochial board, who are to assemble in "Petty Sessional divisions" for that purpose. And this purpose seems to us blameably conservative, though probably on account of the Parliamentary strength of the county magistrates it was good policy to make it. Now that we have a representation of owners, why should the "county magistrates" have a specific representation? For what reason, except because they represent property, can they claim to interfere with the county funds? There is no romance about the office. It has long been said that the person who would get most by the abolition of the office of county magistrate would be the patronage secretary of the Treasury. After every general election he is besieged with applications for it from persons who have been useful, or think they have been useful, at the election. And generally these applicants are not very fit for the place. The county magistracy, being an office which is supposed to be especially "gentlemanly," it is exactly persons not gentlemen—persons at any rate who are not in a very assured position—who are most desirous of obtaining it. Very often the patronage secretary does not like to ask the Lord Lieutenant to make magistrates of exactly the sort of very active, not over scrupulous, not very refined person who has been particularly useful at an election, and yet that sort of person is sure to be offended if he does not get what he wants. On the whole, the magistrates of a county are not so much the great people of the county as the persons who wish to be thought great people. Why should these have a particular representation? Mr Goschen's proposals for a new County Government in the main are excellent, but this we believe to be a blot, though it may be necessary to carry the Bill.

We have not room now to speak of the last and most interesting of Mr Goschen's proposals—the almost immediate relinquishment of the House duty by the Imperial to the local Exchequer. Before we write again we shall have heard what Mr Lowe has to say about it, and we own we are curious to hear the arguments by which he will justify it.

RATES ON OWNERS.

5. The following enactments shall be made with respect to the liability of the owner in respect of the consolidated rate; that is to say,

1.) Where the occupier of any rateable property who has paid any instalment of the consolidated rate pays a rent in respect of such property, he may, if the rent paid by him is not less than the rateable value of the property, deduct from such rent one half of the sum which he has paid as rate; but if the rent paid by him is less than the rateable value, he may deduct from each pound of the rent which he is liable to pay one half of the sum in the pound which he has paid as rate, and so on in proportion for any less sum than a pound:

2.) Where any person receiving rent in respect of any rateable property also pays a rent in respect of the same, he may deduct from the rent so paid by him a sum bearing such proportion to the amount of rate deducted from the rent received by him, as the rent paid by him bears to the rent received by him:

(3.) Where any person receiving rent in respect of any rateable property has agreed to pay rates or is rated under the said "Poor Rate Assessment and Collection Act, 1869," he shall, for the purposes of the provisions of this Act relating to rating, be deemed to be the occupier:

(4.) Every person receiving in respect of any rateable property rent from which a deduction has been made on account of rate shall be deemd to be an owner for the purposes of this Act:

Provided as follows—

(*a*) That no deduction shall be made under this section by any occupier in respect of such portion of the consolidated rate as is paid by him in satisfaction of the precept of the council of a borough;

(*b*) That no deduction shall be made under this section by any occupier in respect of any portion of the consolidated rate which represents or is substituted for a rate which such occupier has contracted to pay by a contract entered into before the passing of this Act.

(5.) Any contract made by an occupier after the passing of this Act, by virtue of which he is deprived of his right to make a deduction from his rent which he would otherwise be entitled to make under this section, shall, so far as relates to such deduction, be void both at law and in equity.

ENGLISH REPUBLICANISM.

Our objection to Mr Auberon Herbert's speech at Nottingham in favour of applying the elective principle to the Head of the State is not its audacity, but its prematureness. There is no more reason for forbidding a Member to advocate Republicanism from the platform than for forbidding a Professor to advocate it in a book. A certain, though as yet not an important Republican party, exists in England; and it is for the interest of the Monarchy, as well as of the country, that its ideas should be discussed, and discussed by men of more mark than the speakers who usually address the so-called Republican meetings. But while admitting fully Mr Herbert's right to raise the question, we cannot but blame his choice of an opportunity, cannot but doubt if he recognises the risk he would, if successful, run of sacrificing Republicanism in order to secure a Republic. In a country like this, where the population is as yet uneducated, where the laws are exceptionally mild, and where the poor are very numerous, it is absolutely necessary that the law should in some way or other be made awful; that "treason"—that is, resistance to established order—should be considered an extremely dangerous experiment. This end—the first end of every scheme of Government—is secured here through the prestige attaching to the Crown. The common people believe that they cannot resist the Queen, and consequently obey laws which are not supported by any adequate force. In the counties more especially, order is maintained by a system of deferences, and an excited crowd will yield before a single policeman because they think him the representative of an invisible but irresistible force. If the Monarchy disappeared this habit of deference would disappear also, and we cannot see anything except armed force by which it could be replaced. It is very easy to say that the English are a law-abiding people, but it is not the fact. Unpopular laws in England are bitterly resisted, and in many cases resisted by force. We used to send soldiers against smugglers; the establishment of turnpikes in Wales was resisted by armed men; and Lord Grosvenor's attempt to prohibit Sunday trading was abandoned for fear of an insurrection in London. If England were to-morrow a Republic, the Commons would on Monday find themselves obliged to strengthen authority in every direction, to levy more troops, to pay more police, to pass new and sharper laws for the protection of property—in short, to secure through a visible display of force what is now secured through the respect felt for the Sovereign's authority. The first end of Republican institutions—the preservation of liberty—would have to be sacrificed to secure the first end of all institutions of government—the preservation of order. It is true that this danger is a temporary one; that when the people are once educated the necessity for an artificial system will disappear; but they should be educated before a radical change in the constitution is so much as broached—except for purposes of discussion. Mr Herbert will say that the people once relieved of a superincumbent weight will very speedily organise themselves; but he himself must be well aware that as yet they show little disposition to do it. It may be a melancholy fact that in England a public meeting with a great person in the chair is usually orderly, and with a little person is usually disorderly; but it is a fact, and statesmen are compelled to take all facts, however ignoble, into the account. No doubt there are parts of Great Britain, as for example Scotland, which are ripe for Republicanism; but those parts are few, and do not include either the great cities or the great manufacturing counties, places of all others where order is most important to well-being.

Mr Herbert's main hope in advocating Republicanism appears to be the introduction of a simpler method of life into the country, but that is certainly not the object of the less educated English Republicans. We doubt if it is an attainable object at all, believing that whenever a wealthy class is permitted to exist, the best corrective of its luxury is not simplicity as Mr Herbert understands it, but the simplicity which comes of excessive refinement; and the abolition of a Court—that is, of a final standard of refinement—would not tend to increase this; but we may let that pass. The practical point is not Mr Herbert's view, but the view of the class which alone is likely to begin any serious Republican agitation. We question if there is much hope to be found in that view. The speakers who try to encunce it in Land Leagues, in Republican programmes, and in public meetings, all seem to us inspired with one idea—that a Republic would diminish the suffering of townspeople, would in some unknown way reduce the inequalities in the external condition of different classes in the country. We cannot see how the change, even if beneficial in other ways, could possibly secure this result. A Republican Assembly might no doubt allow land to be sold like sugar, but the only result of that would be that it would be absorbed more rapidly by those who could pay most for it. It might decree that all landed property should be equally divided at death, but that would only drive the energetic, as in America, to vast accumulations of personalty. It might even order estates to be sold, and help the labourers to buy them; but the only effect of that would be to create a class more immoveably Conservative than Peers, and possessed besides of very great physical power. The townspeople on the continent are not better off but worse off than they are here, and so they would be in America but for the abundance of work. No doubt a certain equality might be introduced into the external forms of society, but that would be of very little value to the oppressed class, and is certainly not the object for which some of them are contending when they cheer for a Republic. In one programme before us it is suggested that the means of raising the people should be a change in the incidence of taxation—that indirect should be replaced by direct taxes; but that suggestion involves this unanswerable dilemma. Either a Republic will divide property more equally, or it will not. If it will not, then the equality of condition desired will not be attained; and if it will, the power of those who resist direct taxation, and especially taxation on land, will be indefinitely increased. A new land tax could not be imposed either in France or America without insurrection. We doubt in fact whether the substitution of a Republic for a Monarchy would in England produce any economic results at all, and whether therefore the first consequence of change would not be a disappointment so cruel as to produce the reaction which in their politics Englishmen have hitherto avoided, and the kind of disorder which ends in military dictatorship. This is a very small and a very crowded country to try experiments in, and till education has made them a little safer they are better let alone. When education has taught men like Mr Herbert that Republicanism and luxury are not incompatible, and men like Mr Odger that economic forces are nearly independent of forms of government, it will begin to be safe to believe that Englishmen can dispense with the useful fiction that their government is conducted from above.

MR BRUCE'S NEW LICENSING BILL.

The condition precedent of all Licensing Bills, that the sale of liquor must be a monopoly, is not quite so clearly established as Mr Bruce assumes, and as his supporters in the

Press are apt to argue upon grounds somewhat different from his. He says the people wish it so, and therefore it must be so; but the people only wish it so because they are afraid of the spread of drunkenness, and have never heard of any method of preventing it except legal restriction. A single speech from Mr Gladstone, stating the very strong, though it may be the answerable, reasons for believing that real free trade in liquor would diminish drinking, by diminishing the main temptation to drink, namely the society which drinking in public-houses secures, might create an important change in their opinion. The argument from the popular will, always a bad one, has as yet no force, for the popular will has never been fairly instructed, while the journalists' argument from experience, is singularly delusive. The friends of the Bill all go about saying that the experiment of free trade has been tried and has failed at Liverpool, but it never was tried, and therefore never failed. What was tried was a totally different experiment; the concession to everybody who asked for it of a right to open a shop in which people might stand or sit, and be tempted to make themselves drunk,—an entirely different affair. Free trade in liquor—its sale without restriction so long as it is not drunk at the place of sale—has never been tried in England since licensing commenced, and it is by no means so certain, as everybody assumes, that its result would be disastrous to public morals. On the contrary, it might be beneficial, as silent drinking is not attractive; and the man in want of society would have to seek it—as at Gothenburg, an instance quoted by Mr Bruce—in places where liquor was not sold. No example perhaps can be drawn from any country inhabited by southern people, the habit of drinking being somewhat affected by race, but it is to be noted that from the day our own better classes ceased to frequent taverns and began drinking at home, the custom of getting drunk fell into such disrepute that it has come to be considered disgraceful.

We make this protest, however, rather in the interest of our science, than with any view of advocating an experiment we know to be nearly hopeless. The bulk of the English people do not wish to take their liquor at home, as the upper and middle classes do, but to make of their thirst an excuse for escaping from disagreeable homes, and of course their wish must be more or less obeyed. As they prefer to drink in groups in places where when the liquor is done they can get more, and as groups engaged in drinking in a public-house are sure to drink too much, supervision becomes necessary, and limitations must be enforced which establish in the end a monopoly of the right of selling liquor. This monopoly once admitted the right of the State to regulate it becomes clear. Mr Bruce upon this subject is, from his own point of view, far too weak and indistinct. Parliament has a perfect moral right to regulate the monopoly it has created according to its own view of the public welfare, and is by no means bound to make concessions to publicans except in fulfilment of contract, or to allow ratepayers in parishes any voice in the matter. Its right, and in one way its duty, is to see that the privilege it has granted is wisely used, and we are by no means clear that the wisest way of doing this has been yet discovered. We rather think the wisest way would be to allow the Excise only to grant licenses, to fix the number to be granted in proportion to population, and then to make sharp and strict rules for decent management, to be carried out at the expense of the monopolists. To concede the right to justices, controlled by parishioners who may be ruled by brewers, is a weak way of subordinating the national will upon an important point to the will of particular localities, and will end, we are greatly afraid, in a desperate attempt by the trade to acquire parochial influence—an evil greatly to be deprecated. We should prefer a simpler, swifter, and more responsible machinery—the one Mr Bruce suggests will be irresponsible to the country at large,—and we do not see any sound reason why it should not have been created, or at least fairly tried as an experiment—say in Lancashire, the county believed to be most desirous of the Bill. If it worked well, as it probably would have done, it could then have been extended, and the liquor trade placed, where every monopoly ought to be placed, under the direct authority of Parliament. As it is, we believe Mr Bruce's Bill will end in inducing the justices to refuse all new licenses, for fear of the action of the ratepayers, and in vesting existing licenses with a ten years monopoly, which will be so wealthy, so strong, and so easily controlled, that at the end of the ten years it will extort from Parliament an extension of time, on the ground that it is difficult to overset a system in which so much property is involved. If it is difficult to suppress a privilege avowedly granted only for one year, it will be still more difficult to suppress one granted for ten. The Home Secretary gives up so much of the power of the State in conceding compensation to the holders of annual licenses, that henceforward, unless public opinion becomes stronger than at present, it will be very difficult for the State to deal with the mass of vested interests in the liquor trade.

We entirely approve the professed object of the Bill, namely, the strict regulation of a privilege granted by law in the interest of the people; but we doubt if its machinery—the action of the rate-payers—is one which it is advisable to invoke; we repudiate altogether the claim to compensation for the withdrawal of a commission distinctly limited on the face of it to one year, and we cordially approve only one provision of the Bill. This is the creation of the separate inspecting department. The police ought not to be inspectors of public houses. They cannot stand the temptation of free liquor on cold days, or of bribes offered to increase very meagre salaries, and their efficiency is diminished by their subserviency to the publicans. It is argued that the publicans may corrupt the inspectors; but they will be a higher class of men, and if they yield their fall will be much less injurious to the public interest. We might as well expose jurymen to unusual temptation as expose the police, and should produce much the same result. If any force is to be corrupted it had much better be one which interests the Treasury only than one which has in its hands a most important branch of the administration of justice and of the service for public security. Of course in saying this, we do not assume that the police is corrupt in the matter of public house inspection. We only say that if it is not, then the new inspectors will not be, and that if it is, we are corrupting a force which it is of especial interest to keep pure.

THE FINANCIAL INSTITUTIONS OF PARIS SINCE THE WAR AND DURING THE SIEGE.

[We have received the following interesting contribution from an eminent French economist who was in Paris during the siege, and was closely connected with some of the principal financial establishments.—Ed. Economist.]

England has passed through formidable crises, which have more than once imperilled its institutions of credit. But neither war nor financial disasters have ever exposed it to so great a peril as that which France has had to endure since the declaration of war: the invasion of the national territory by a victorious enemy, the siege of Paris, and the Communist revolution which has followed it, and which provokes a second siege—such is the lamentable trilogy which seems now to be approaching a tragical termination.

Much has been written concerning this series of misfortunes surpassing the gloomiest records of history. But there is one side of them which has remained obscure—the side of credit and finance. It may present a curious subject of study, and become the occasion of an instructive experience. The gravest problems have been stirred, the most decisive lessons taught; the fiduciary circulation, the monetary system, institutions of credit, to mention only at present the principal points exclusive of the finances of the State—all these questions discussed with so much ardour in recent years have suddenly clashed against the touchstone of the most unforseen events, passing from the domain of purely scientific discussion into the domain of immediate practice. What was only a hypothesis became a *matter of fact*, and the theatre upon which acts of such great importance were performed is one of the vastest theatres of the world.

No one is ignorant of the rapid development of the production, riches, and credit of France during the last quarter of a century. The fertile seed sown by the Government of July has produced an abundant harvest, partly reaped under the Republic of 1848, and which has singularly increased under the Empire. Railways, commercial industry, agriculture, public and private credit, all grew into colossal proportions; salaries augmented and capital increased rapidly; enormous expenses submitted to for military expeditions and the works of peace left unexhausted the never-failing spring of wealth which latterly procured an increase of the wealth of the country to the amount of 10,000,000,000 a year, while the

public fortune of France rose from 7,000,000,000*l* to 8,000,000,000*l*, and the aggregate revenue of the people exceeded 800,000,000*l*.

Not only did the most varied undertakings obtain at home the necessary means of activity, but the use of capital abroad was multiplied. The reduction of the rate of interest naturally caused a search for profitable investments in the general market, and France became, by the side of England, the great financial *purveyor* of the world.

This prosperity appeared to go on without hindrance, stimulating the audacities of speculation along with the development of profitable labour. And with the increase of capital, credit—that book so long closed for us—saw its pages shine with a sudden splendour. Before the revolution of February, the issue of notes, doing the work of money, languished under the *régime* of a division of the privilege between the Bank of France and the banks of the departments. The introduction of unity into the circulation, in consequence of the fusion of the various establishments, endowed the Bank of France with a power of issue previously without example. From 10,000,000*l* the circulation rose successfully to more than 50,000,000*l*, without a forced issue, and even without being made "legal tender," all the while that the metallic money of France almost reached the colossal figure of 200,000,000*l*, or double the metallic money of England. The annual discounts of the Bank exceeded 240,000,000*l*, although the institutions of credit, successively created, also cultivated in a profitable manner a portion of this immense field. Attempts in this direction had in effect been made in no small proportions. Freed from the peril and the responsibility of the issue of notes doing the duty of money, veritable banks were established to facilitate commerce, industry, and agriculture, to develop financial investments, and to attract deposits, the resources thus collected being usefully employed. From England were borrowed the most diverse forms of those expedients, destined to economise and render profitable the functions of capital in proportion as they increase; the system of cheques was being rapidly naturalised on that soil whose financial culture promised to make as rapid progress as its rural husbandry. In a few years there sprung up—to speak only of the most important establishments—the Comptoir d'Escompte, the Credit Foncier, the Credit Mobilier, the Société du Credit Industriel et Commercial, the Société Immobilière, the Société Générale for the encouragement of Commerce and Industry, the Société des Depôts et Comptes-courants, the Société Algerienne, the Bank of Paris, &c. The capital of these companies, easily obtained, amounted to tens of millions sterling. Without doubt they have had different fortunes. One knows the history of the splendour and of the decline of the Credit Mobilier and of the Société Immobilière, condemned to cruel embarrassments long before the declaration of war. But up to the middle of last year the other financial societies of Paris voyaged in full prosperity with all sail set. The figure of the deposits which they had collected, without yet reaching the level of the immense riches consigned to the English banks, went on augmenting, and the spirit of enterprise extended its sway.

How have the declaration of a terrible war and the unheard-of disasters which followed it reacted upon these credit institutions, which although so young were already so largely developed? How have they borne a shock which might well have broken elsewhere the most ancient and most solidly-directed establishments? What has become of the fiduciary circulation? and how has Paris besieged been able to continue the life of its financial establishments when all communications were cut, and people were obliged to trust their correspondence to the fragile cars of balloons and the boldness of some rare adventurers who succeeded from time to time in passing the enemy's lines? Assuredly there is here a spectacle interesting to notice, and which deserves better even than to arouse some active curiosity. It brings with it the light of an experience acquired upon a large scale.

Let us say it at once: the terrors of a terrible conflict, lost battles, the necessities of the armed contest, the horrors of the siege—have not caused the destruction of one of the institutions with which we are here concerned, and the circulation has escaped a peril which threatened to become fatal. Without doubt inexorable necessities caused the proclamation of the forced currency of the notes of the Bank of France; but the solidity and known prudence of this great institution, and the unity of action which is its basis, sufficed to efface in a few days all difference between the price of the note and the value of money, because the facility of issue was limited, and because the wisdom of the Bank was able to restrict the issue, even under the authorised figure. It must not be forgotten that the circulation was already more than 50,000,000*l* under the empire of full liberty in the payments and in the fabrication of notes. When the forced currency was introduced, its indispensable corollary, the limitation of the amount of the circulation, was at the same time inserted in the law. This limitation, fixed at first at 72,000,000*l*, was finally raised to 96,000,000*l*. That is a large figure beyond doubt, but what development of the instrumentality of payments has there not resulted from the rapid extension of the market and the enormous increase of wealth? On the other hand, it must also be granted that in the time of trouble operations "for the account" are restricted, transactions for cash are multiplied, demanding more signs representative of value; finally, the economical method of the Clearing-house is unknown in France. This country possessed before the war more than 50,000,000*l* of bank-notes, with 200,000,000*l* of the precious metals. A portion of the precious metals went abroad; the metallic reserve of the Bank of France, which was nearly 48,000,000*l*, fell to 24,000,000*l*, at which it remains, and which is still a fair sum. One understands then how the notes of the Bank of France, covered by the confidence which it inspires, protected by the unity of title, maintain themselves on a par with metal, when the actual issue remains much below the issue authorised, for a difference of about 20,000,000*l* exists between the two figures; when also the metallic reserve almost amounts to the third of the actual issue. The wisdom of the Bank and its large credit thus meet with a legitimate reward, and those who have always defended the unitary constitution of this great establishment, congratulate themselves on having seen the triumph of their ideas within six years.

The same may be said for those who have protested in France against the suppression of the legal money of silver, which circulates there along with the legal money of gold. The metallic stock of this country has singularly preserved it from a financial storm: based upon the solid land of gold and silver, kept in large quantities, the circulation and the affairs of business have been compensated in a day for the successive sacrifices made to maintain the steady mechanism of the instrument of exchanges. When the proportions of the general wealth have grown to a colossal bulk, the portion of that wealth which is represented by the precious metals becomes a small fraction, and the cost of maintaining a metallic system is reduced to an insignificant sum compared with the capital of society. In this respect the experience of France may be considered decisive.

The experience of France is also decisive in what concerns the operations of establishments of credit. Those which were in normal activity at the moment of the crisis have happily surmounted it. Are there many institutions which, like the Credit Foncier and the Credit Agricole, could have paid, under the disasters of the *run* provoked by the war, 7 to 8 millions sterling in a few months, paying out their deposits, and keeping faith with their miscellaneous engagements? or which would have found themselves in a position like the Société Générale, to pay from the 1st of July, 1870, to the 23rd March, 1871, more than 5,200,000*l* of accounts-current and obligations while passing through a frightful crisis and a state of siege? These facts are so extraordinary that they deserve to be considered more closely, and verified by documents.

We can do so in a precise manner as far as the "Société "Générale pour le developpement du Commerce et de l'In-"dustrie" is concerned, as we have before us the official report of the general meeting of this great establishment, held on the 30th March last, in the midst of the most critical circumstances which have ever depressed a metropolis of civilisation and commerce. This society has already been able to furnish an exact analysis of its affairs, which we wish to examine pending the production of their reports by other establishments. But the actual specimen furnishes the complete elements of a general appreciation.

The Société Générale was founded in 1864, with a capital of 4,800,000*l*, half of which was paid up, or 2,400,000*l*. The second half may be called up, according to the wants of

the society, by a decision of the Council of Administration. The shares are *nominative* until they are completely paid.

This company embraces two sorts of operations, destined to be combined,—the one is of the financial order, the other concerns especially commerce and industry. It is constituted as an establishment of banking, finance, and credit; it shares in the negotiation of loans, and the creation of miscellaneous enterprises. Thanks to its initiative, a complete system of deposits on accounts-current has been organised, adapting itself to the entire circulation from the most modest savings to the largest and most rapid movements of banking and commerce. The interest paid on sums deposited varies according to the rate of discount of the Bank of France; it has been graduated from 1 to 5 per cent., according to the mode of withdrawal—the division being into accounts at call for all sums, accounts with privilege of drawing cheques for limited sums, and deposits upon receipts, and obligations at three months' to five years' date. It also cashes coupons, makes advances on securities and on warrants, and it takes part in industrial and financial operations both in France and abroad.

The Société Générale has perfectly answered to its title by the multiplicity and varied nature of the services which it has rendered. It possesses numerous agencies in the principal provincial towns, and fifteen branch offices in Paris. Its profits until 1870 have progressively increased, and besides a permanent appropriation of a tenth of these profits to a statutary reserve account, which already amounts to more than 150,000*l*, it has constituted a special reserve fund, amounting to 84,000*l*, the united reserve amounting to about 240,000*l*, the tenth of the capital paid up, after four years of effective working. It has thus adopted the precedents of the financial establishments which make the honour and the strength of England in performing an act of prudent vigour. In truth the real interest of those who participate in a great business is not concentrated in the distribution of the largest dividend which they can legitimately offer to the shareholders, but in the solidity and good repute which are acquired by carrying strong reserves to the support of the enterprise, and the consideration which attends it. Such has been the secret of the high position rapidly gained by the Société Générale, as well as by the Credit Foncier of France. They have thus brought into their *caisses* a considerable mass of deposits at reduced interest.

Thanks to the firm and able direction of the council of administration—which includes financial notabilities such as M. Dumere, President, M. Blount, Vice-president, and MM. Davillier (Regent of the Bank of France), Alfred Le Roux (former Minister of Commerce), Fère (Regent of the Bank of France), Talabot (Director-General of the Lyons Railway), Gunneron (Honorary "Agent de Change"), Denion Du Pin (Administrator of the Messageries Nationales), Premsel (banker), Wolowski (Member of the Institute), &c.; and which is thoroughly seconded by the able manager of the company, M. Charles Herpin—the dividends have successively increased as follows:—When the capital paid up was 5*l* per share, to 13s 5½d per share for 1865, and to 13s 10½d for 1866; since the paid-up capital has been 10*l*, the dividend has been 1*l* for 1867, and 1*l* 5s 2½d for the years 1868 and 1869 respectively, in which also sums of 32,000*l* and 60,000*l* were carried to the special reserve, besides the statutary reserve, increased by 38,245*l* in 1868 and 66,032*l* in 1869.

Although the year 1870 has suffered so much from the war, it has nevertheless yielded a dividend of 5 per cent., or 10s per share. This is a result which sufficiently proves the robust constitution and good administration of the Société Générale, and which shows how well it has been able to resist the most threatening circumstances.

A statesman was asked what he had done during the most terrible year of the first revolution. "I have lived" he said simply. The Société Générale and the other great financial companies of France may also reply, after the torments of a terrible contest and a siege of Paris: "We have lived." This is itself no small praise of their attitude. But the Société Générale has done better still. It has realised nearly 160,000*l* of profit, and can pay its shareholders a dividend, after having fully discharged its obligations to its various creditors.

It is sufficient to compare the balances of 30th June, 1870, with those of 31st December, 1870, and 23rd March, 1871, to get an idea of the intensity of the crisis and of the foresight developed in order to overcome it successfully. The accounts-current on cheques and at call, and the deposits on receipts, which were more than 4,480,000*l* on the 30th of June, 1870, had been reduced to 560,000*l* on the 31st of December, and to 440,000*l* on the 23rd of March, 1871. The obligations at fixed dates had been reduced from 1,818,000*l* to 1,472,000*l* and then to 1,384,000*l*; the bills to pay had diminished from the figure of nearly 1,200,000*l* to that of 880,000*l* on 31st December, and then to less than 480,000*l* on the 23rd of March, 1871. The sums paid in the interval, including one or two other heads, exceeded 5,400,000*l* without new resources, the run upon the deposits having commenced from the beginning of July, 1870.

How has the Société Générale been able to face such enormous demands in circumstances so critical? This is the most important point to understand—how it has so strongly shown its force in submitting to a most fiery test.

From the beginning of the war the society converted into cash that portion of its assets necessary to meet the demands, and thanks to the nature, at once solid and negotiable, of its securities, it was able to pay so much. The solicitude exercised in the choice of investments corresponding to the funds which were temporarily deposited, was also fully brought out. It had wisely restricted its share in the industrial operations which would have made the capital inconvertible; it has been able constantly to combine safety with the easy disposal of its investments. Prudent measures had also been adopted in time by the Société Générale, as well as by the Bank of France and by the Credit Foncier, in prospect of the possible investment of Paris. A large portion of the disposable cash and securities was conveyed to the agencies in the country and to the seaports.

The Société Générale conveyed a portion of its resources to Lyons and Marseilles, and it established a provisional bureau at Geneva, maintaining also the activity of its provincial business, and of its relations abroad. Its regular business has thus continued in the departments without being interrupted in Paris. The devoted assistance of MM. Dreyfus *frères*, financial agents of the Peruvian Government, has enabled provision to be made for the loan of that State, and for the large guano operation, in a situation as exceptional as unforeseen. So much went on as usual, so much was preserved, notwithstanding so many obstacles apparently insurmountable. All the obligations have been met without trouble, by means of a simple and provident organisation.

It must also be said that in besieged Paris, the Bank of France has loyally and broadly fulfilled its mission of a great establishment of public interest, in reconciling what the security of its position commanded with the prudent facilities given to solid establishments. In this way it opened a credit of 920,000*l* to the Société Générale, which was wholly reimbursed in the month which followed the restoration of communications after the siege. The Bank of France has understood the solidarity which unites the existence of great financial institutions; it has avoided the calamity of rude stoppages of credit, while preserving its own position, and giving a striking proof of the strength of the principle on which it rests.

The Société Générale was the banker of the Lyons Railway Company, which had deposited with it 480,000*l*; that sum has been completely paid.

So rude an experience thus rapidly passed through fortifies its credit, and promises it a future more and more prosperous as soon as there is a little calm permitting the resumption of business. It was profiting already from a prodigious outburst of activity during the first fortnight of March, before the outbreak of that terrible revolution of which Paris is the victim, and which has awakened throughout the world a feeling of sad sympathy for a country so cruelly tried. Let order but be re-established in the capital and all will be regained; for France, in spite of its misfortunes, possesses vast resources, and what has happened since the war and during the siege has revealed the wisdom and the force of the financial institutions which it possesses, and which will be a solid lever of material reconstruction, and a powerful instrument for the revival of productive industry.

BUSINESS NOTES.

Indian Finance.—Sir R. Temple's Budget statement was anticipated this year for people in England by the simultaneous speech of Mr Grant Duff in the House of Commons. We commented on that speech at the time, pointing out the unsatisfactory nature of the surpluses which had been obtained

on account of opium "coming to the rescue." There is very little to add from the statement of Sir R. Temple, which is now before us, except that the fuller details and the figures of the accounts confirm the impression that there is something amiss, and a great likelihood of another mess revealing itself very soon. Anyone can see that the most general statement of the three Budgets which are dealt with does not promise well. There was a nominal surplus of 118,000*l* in the last closed year, 1869-70; and the Budget estimate for 1871-2 provides for a surplus of 93,000*l* — not reckoning in both cases the extraordinary Public Works expenditure, which is to be met by loans. No great satisfaction can be felt at a merely narrow escape from a deficit in the closed year, though that result is so much better than was at one time expected; and it is but too obvious that a margin of 93,000*l*, which is all that is arranged for next year, is so narrow as to invite misfortune. No doubt the regular estimate for the intermediate year 1870-71 shows a surplus of about 1,000,000*l*, but it would be absurd to discuss these "regular estimates." The fact remains that the last account and the new Budget in Indian finance have not a very re-assuring look. The most dangerous sign is the extent to which opium is once more trusted. We have the following series of figures:—

	£
1869-70 (actual)	7,951,000
1870-71 (regular estimate)	7,996,000
1871-72 (Budget estimate)	8,038,000

That is to say, the unexpectedly high figure of the last two years, supposing the regular estimate of 1870-71 to be realised, is taken as the minimum for the coming year. Even if the Indian Government were sure of a high total for one more year, they ought not, as we have often shown, to spend it all, but to reserve a portion so as to secure a regular income one year with another; but it is worse than folly to feel sure of the high income beforehand, and prepare to spend it. We are inclined to distrust the estimates in other respects, the present condition of Indian trade being somewhat gloomy; but these two main features of a narrow surplus and a large estimate from opium are quite sufficiently alarming.

The Good Friday Railway Traffic.—Good Friday week has shown in a very striking manner how rapidly the traffic of our home railways is increasing. Naturally a large increase is looked for on account of the holiday passenger traffic, Good Friday having occurred in a different week last year; but on the principal goods lines at least there is a very serious drawback in the stoppage of the goods traffic. The returns when analysed, however, show that notwithstanding the partial suspension of goods traffic, that description of business as well as passenger traffic has generally increased, having diminished, and that slightly, only in a few cases. The increase has not perhaps been so great as in other weeks, but that it exists proves the existence of a much larger business in the country, since a short week yields now rather more than a whole week last year. All the companies do not publish complete returns, but enough do so to permit us to give the following table showing whence the increase of traffic has come:—

	Total Increase.	Increase in Passenger Traffic.	Other Traffic—Increase.	Other Traffic—Decrease.
	£	£	£	£
South-Eastern	5,331	4,202	1,129	...
Great Western	7,060	7,805	...	745
North-Eastern	8,687	3,316	5,371	...
Midland	10,382	7,074	3,308	...
Manchester & Sheffield	2,198	2,643	...	448
London & N. Western	13,078	12,055	1,023	...
London and Brighton	8,539	8,315	224	...
Lon. Chat. and Dover	2,757	2,761	...	4
Lancas. & Yorkshire	10,948	9,430	1,518	...
Great Northern (−)	944	2,322	...	3,266

It is very remarkable, we think, how well the goods traffic has been maintained on almost all the great goods lines.

Business Telegraphic Messages.—In an able report on the new telegraphic system, which Mr Scudamore has just presented to the Postmaster-General—a report which will reward a full examination—he adverts to one subject of great interest to business men. We refer to the failure of the new system to permit an exchange of telegrams between the business centres of London and the provinces in the course of the business day—a facility obtainable under the old system, and which was highly valued. Mr Scudamore's defence of the department is, in fact, that after a little more time for organisation the facilities of the new system will be as great as the old. In that case, there will be no room for farther criticism. But he seems also to think that the business men who enjoyed the former facility had an undue privilege, and he looks with disfavour on the remedy of extra payment for priority messages, which we suggested as a means of meeting the grievance. "If it were once "admitted," he says, "that a message called special, and on "which 5s were paid, ought to go before a message "called ordinary, and on which 1s was paid, then it would be "impossible to contend that a message on which a guinea was "paid should not have priority over a message on which 5s were "paid. If the principle of strict rotation were once "abandoned, the chief use of the telegraph would fall to the "rich, or to those whose wants, for the time being, made "them as lavish as the rich." We confess we do not see that this is any defence at all. That there are degrees of urgency in messages lies in their very nature, and in fact the enforcement of strict rotation will at times deprive of the use of the telegraph those who have most occasion for it. Sometimes if a message cannot be delivered within a given number of minutes, it will be of no use. It is only working the business of telegraphy properly to arrange as good a test of urgency as can be devised, and the money test appears most perfect. The facilities afforded for miscellaneous and less urgent wants would still be great enough to tempt the public. The distinction in fact already exists in the Post Office and all other systems of communication. Letters which have extra stamps are received for the mails after the box has closed, that is, they have priority over letters not so stamped. In the same way on railways, ordinary passenger and goods trains are shunted for the express. In telegraphy, however, the degrees of distinction in the importance of communications are even more extreme, and to neglect the cultivation of the business according to its nature is a great mistake, besides being a grave injury to the public.

Scotch Banking.—We extract from the *Scotsman* the following interesting statistics of Scotch banks, compiled by Mr Forrester, stockbroker, Glasgow:—

Name of Bank.	When Established.	Number of Branches	Capital Raised.	Reserve Fund.	1870. Deposits, &c.	1860. Deposits, &c.
			£	£	£	1865. £
Bank of Scotland	1695	75	1,000,000	300,000	8,051,637	6,488,227

Wrecks and Casualties.—A Board of Trade return has just been issued as to the wrecks and casualties of shipping during the year 1870. From this it appears that the total number of shipping casualties attended with loss of life

"on and near the coasts" of the United Kingdom was 118 in that year, of which 103 were total losses and 15 "partial "damage," and that the number of lives lost was 711. The number of British sailing-ships included in this number was 90, involving a loss of 567 lives; of British steam-ships 10, involving a loss of 80 lives; and of foreign sailing-ships 18, involving a loss of 64 lives. It would appear from this list, judging by the number of voyages made by steamers and sailing-ships, which are now nearly equal in tonnage, that steamers are much safer than sailing ships. There have been fewer casualties, and the number of lives lost is fewer. Steamers are also the passenger-carrying ships, so that accidents to them would be proportionately dangerous to life. Of the loss of life in steamers, one was through foundering, 23 through the stranding of one ship, 29 from four collisions, and 27 from four accidents by other causes. Thus collisions are the great source of danger to steamers. Among sailing ships, however, 105 lives were lost through the foundering of 19 ships, and 371 by 40 strandings. Sailing ships are thus proved to be less seaworthy than steamers, and though there are more accidents than there ought to be to the latter from "collisions"—a danger to which they are more liable than sailing ships—still the new accidents from this cause are of much less importance than the old accidents from unseaworthiness.

BOARD OF TRADE RETURNS.

The trade and navigation accounts for March have been published this week, and (subject to the alteration in the mode of compiling the statistics, which does not allow an accurate comparison to be made—more particularly in the case of imports) show the following results. The declared values of the imports during the first three months of the year amounted to 75,424,841*l*, against a computed real value of 56,762,682*l* in 1870, and 56,885,498*l* in 1869. Much of the excess in the present year is to be attributed to the different manner in making up the accounts, which allows the inclusion of the landing accounts referring to a later date. With regard to the export trade, the figures approach more nearly to the truth, as no great change has taken place in mode of compiling the figures referring to the exports. The return shows that the declared value of the exports for the three months under review was in—

	£
1869	12,804,695
1870	15,078,774
1871	16,231,415

The following is an account of the quantities of certain principal articles of imported merchandise (subject to duties of Customs) remaining in the bonded warehouses of the United Kingdom on the 31st March, 1871, compared with the quantities in warehouses on the 31st March, 1870:—

	1870.		1871.
Cocoa ..... lbs	5,724,134	.....	7,355,296

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending April 8:—

	Receipts of Week Ending April 8.
	£
Customs	315,000
Excise	180,000
Stamps	175,000
Taxes	10,000
Income tax	101,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	204,147
Total	993,147

The total receipts of the previous week were 1,412,971*l*.

The Exchequer issues of the week on account of expenditure were 5,286,836*l*, viz.:—

	£
Interest of debt	5,100,257
Other charges on Consolidated fund	46,579
Supply services	140,000
Telegraph services	nil.
	5,286,836

During the week the cash balances have decreased as follows:—

	Bank of England	Bank of Ireland.	Total.
	£	£	£
Balances on March 31	5,678,915	... 1,344,520	... 7,023,435
— April 8	1,985,001	... 778,911	... 2,763,912
Decrease	3,693,914	... 565,609	... 4,259,523

The other receipts to date were 59,166*l*, the other payments were 25,000*l*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, April 12.

The Commune is lasting longer than was expected. But it has been maintaining its ground at the cost of a most horrible civil war, and of the bombardment of the most splendid *quarter* of Paris. Every day during the past week the Parisians have risen to the sound of musketry and the roar of artillery; they have heard them all day long, and even far into the night. The firing has produced more deaths and woundings than have yet been counted, and has done great damage to houses. It has, too, rendered almost impossible the transaction of any business, except that in food, which must needs be carried on. Accordingly the number of closed shops is greater than ever, banks and counting-houses might without inconvenience be shut up too, and the Bourse is almost a desert.

At first the commercial community was disposed to stand by the Government of M. Thiers and the Assembly at Versailles. But now it accuses them of being in a great measure the cause of the lamentable situation that exists. It says that they had not accorded Paris the municipal liberties it had the right to expect, and gave it no real relief in the matter of commercial bills and of rent; that though the working men were embued with revolutionary ideas, were unemployed and in arms, and were consequently more dangerous than ever they were before, no attempt was made to soothe them, none to procure them work; and that besides the error was made of sending troops to attack them without the absolute certainty of success—an error grave everywhere, and in Paris almost suicidal. It says, too, that the Government and Parliament have displayed a deplorable want of tact in dealing with the Commune—have, for example, not tried to dissolve it, by seducing its moderate members with places or with money, and by imprisoning the more dangerous. And what will be the end of all? Some honest citizens are trying hard to bring about a conciliation; but the minimum of what they consider necessary for Paris far exceeds the maximum of what Versailles is willing to grant; and so, according to present appearances, cannon and bayonet must be left to give the victory to one side or other. Whichever side wins, we may be certain that it will be merciless and cruel, as triumphant political parties always are in France.

According to the law passed in the Assembly, it is from to-morrow (the 13th) that the great mass of commercial bills left unpaid during the war can be exacted. But, as was foreseen, debtors are now saying that they are no more capable of paying than they were a month ago, or at any previous period, trade not having revived. In the groups that in these troubled days collect on the boulevards, it is by no means rare to hear loud complaints expressed of the manner in which the Parliament and the Government have treated this bill question. It seems that they themselves see that something more must be done with respect to it; for the day before yesterday they permitted a private member, M. Ducuing, to present a *projet de loi*, enacting that "the prolongation of the delays of payment, accorded by the law of 22nd March, shall be continued until the Bank of France shall have notified the resumption of its discount services with its branches, and that no legal proceedings for payment can be taken until a fortnight after such notification." He has also introduced a Bill for facilitating to debtors who in definitive may be unable to pay arrangements with their creditors, and so save them from the disgrace of being declared bankrupt. How the Assembly has dealt with these measures we have not yet learned, postal communications between Paris and the country being still interrupted.

On its part, the Commune has not yet fulfilled its promise to legislate on commercial bills; but M. Beslay, one of its members in the finance section, and who has been "dele-

gated" by it to the Bank of France, that is, placed in charge of that establishment, has published in the *Journal Officiel* a project on the subject. He says that everybody is convinced that time must be allowed for payment; but that all the schemes hitherto proposed have been found impracticable, owing to the difficulty of getting to the new bills that would have to be given the same endorsements as on the original, whereby, consequently, they would not possess the same value. He advises the establishment, under the patronage of the Commune, and with a subvention from it, of a bank for "liquidating the bills unpaid since July 1, 1870—the date at which rumours of war paralysed trade and credit—the bank to be called Comptoir Commercial de Liquidation, and to be in existence for not more than three years—"the period generally acknowledged to be necessary for obtaining without a shock the payment of unpaid bills." To this institution he proposes to give the power of creating notes of 20f, 50f, 100f, 500f, and 1,000f, to circulate like Bank of France notes. The holder of an unpaid bill is to receive the full amount of it in this new paper, he handing over the bill to the Comptoir. In addition, he is to draw on the person who originally subscribed it 36 bills, payable at various dates from two months to 31st May, 1873, or 24 for those exceeding 200f, interest at the rate of 6 per cent. to be added to the total amount due, and to be included in the last bill. The Comptoir is not to be allowed to negotiate these securities, and when the payment of them shall be regularly completed it is to give up the original, and the subscriber of it will be free. In case of payment in advance, interest of 6 per cent. is to be deducted; in case of non-payment, the endorsers of the original bill are to be liable in the usual way. In order to create public confidence in the notes of the Comptoir, it is to be stipulated that they shall be reimbursed at sight from 31st August, 1874. M. Beslay affirms that this project, if adopted, would do what circumstances call for—1st, give time to the debtor; 2ndly, maintain the liability of the endorsers; and 3rdly, pay the creditor, or as he expresses it, "give immediate value to a dead capital." He does not, however, he adds, propose to extend the measure to the Bank of France—that establishment, "having an interest in opening the credit of Parisian commerce, being left at liberty to take such measures with respect to bills in arrear as it may think fit;" but he confines it "to bills held by traders," which he says amount to an important sum.

Political events are not unlikely to prevent the scheme from being realised. But such as it is, it comes nearer to the requirements of the people who have bills to pay than any that has yet been presented; and it would doubtless be satisfactory to holders, if only they could be assured that the paper of the Comptoir would possess the same circulating value as bank-notes. To convince them of that would, however, perhaps be difficult. In his quality of delegate to the Bank of France, M. Beslay conducts all the negotiations the Commune is under the necessity of having with that establishment, and he has arranged with it to pay over on demand the funds it holds belonging to the City of Paris, also to make advances, if required, on security of the city property.

M. Beslay is the only member of the Commune of whom I have any personal knowledge. He is not a workman, not a shallow scribbler, not a crazy fanatic like most of his colleagues, but is a *bourgeois* of some substance. He is a Breton, and has all the decision and tenacity of his race. He is the son of a distinguished Parliament man of the time of the Restoration and of Louis Philippe, and he himself was a member of the Chamber of Deputies under that King at the same time as his father was. In those days a large property qualification was required for an elector, and a larger one for an M.P. He subsequently was elected to the Assembly of 1848. He is a civil engineer by profession, and founded an engine-building establishment of some importance at Paris. He was one of the first among the few in this city to try the experiment of associating workmen in the profits of a commercial enterprise. He has always taken great interest in questions that concern such men, and has ever been ready to assist, both by advice and money, those that made, as many did, mechanical inventions that appeared to present real utility. He has for many years possessed much influence among the working class, was, like it, utterly opposed to the Empire, and is, like it, of extreme Republican opinions. He is of very advanced age, but is still vigorous both in body and mind. He is, I imagine, the only man in the Commune who has any practical knowledge of finance and commerce, and if, contrary to expectation, the Commune should stand, he will no doubt be its Finance Minister. But that he is capable of grappling with such a crisis as the present I cannot venture to affirm. Something more than an acute man of business is required to deal with it.

A project for a convention between the Commune of Paris and the National Government of France has been put forward by one of the members of the former. It declares Paris a free town, and interdicts the Government from meddling in its affairs. It proposes that Paris shall contribute towards the expense of the navy, of arming fortresses, of railways, navigable rivers, canals, and roads of all France; but that it shall give nothing for the army, for the financial administration, and for public worship, as it is to have its own military force (National Guard), and to regulate its own finances and worship. It offers to send representatives to the National Assembly, and to accept its decisions in all matters in so far as they are not contrary to the Communal Constitution. It says nothing of Paris taking part of the national debt, or sharing in the national property; but demands that it shall pay no Customs' duties at the frontier, but that all merchandise destined for it from abroad shall pay in Paris the tax that may be imposed. It says that in the administration of justice imprisonment only shall be inflicted, and that crimes shall be punished by exclusion from Paris for five, ten, or twenty years, or for life; added to which the French Government may apply the penalties it thinks fit, though why it should deal with Paris criminals is not explained. Finally, it accepts the conditions of peace, and undertakes that Paris shall pay its part in the Prussian indemnity.

Mention has been more than once made in your columns of the scandalous manner in which the public finances were treated by the delegation of the Republican Government at Bordeaux, of which M. Gambetta was chief. In a recent sitting of the National Assembly at Versailles, the Minister of Finance, M. Pouyer-Quertier, stated that out of 535,000,000f demanded for it, he had only been able to obtain proof of the employment of 175,000,000f. He accordingly obtained the passing of a Bill charging a commission of sixty members of the Assembly to examine into all the contracts entered into by that delegation and its agents, with power to interrogate persons, and to acquire the production of papers. The Bill contains the enactment that a copy of every contract must be presented to the Minister of Finance within two months under pain of being declared null and void.

The Bourse being, as stated above, almost deserted, transactions have been extremely limited. Yesterday in the Threes there was one quotation for cash, 51f 40c; one for end of month, 51f 45c; one for Italian, 54f 25c; one for Paris Gas, 740f. To-day the Threes have been 51f 50c for time; Italian, 55f; Gas, 740f; Lyons Railway, 800f.

In a meeting of the shareholders of the Banque de Belgique, held at Brussels, it was stated that notwithstanding the war profits of 1870 exceeded those of 1869, being 1,346,240f to 1,217,939f, and that after deductions for the directors and the reserve, they were sufficient to give 60f per share.

PARIS, April 13.

The Commune has decreed that "on account of the numerous questions raised by the law on the payment of bills, and the necessity of a more profound examination of them, all legal proceedings on bills shall be suspended to the day at which a decree respecting them shall appear in the *Journal Officiel*."

In a letter to the *Journal Officiel*, M. Beslay modifies three points in his project on bills:—First, that 18 and not 36 bills shall be given in exchange for the notes of the Comptoir, one of the 18 to be payable every two months, so that the last will be due the 36th month; secondly, that the interest shall be 3 per cent.; and thirdly, that bills exceeding 2,000f (not 200f as printed) shall be replaced by 12 others falling due from three months to three months, and bearing 6 per cent. interest.

The Bourse quotations of to-day are—Threes, 51f 35c for end of month, 51f 50c for cash; Italians, 54f 85c cash; Lyons Railway, 870f cash. Some railway obligations have also been sold. After the Bourse was opened, two-and-a-half hours passed before a single dealing took place in Threes, and this is said to be an unexampled circumstance.

COMMERCIAL AND MISCELLANEOUS NEWS.

The following shows the average state of the note circulation of the United Kingdom during the four weeks ending February 25:—

	Jan. 28, 1871.	Feb. 25, 1871.	Increase.	Decrease.
	£	£	£	£
Bank of England	23.889.124	23.378.607	...	460.517
Private banks	2.714.157	2.596.038	...	118.119
Joint stock banks	2,350.753	2,301.179	...	49.574
Total in England	28,904.034	28.275.824	...	628.210
Scotland	5,002.232	4.912.266	...	89.966
Ireland	7,392.625	7.405.626	13.001	...
United Kingdom	41.298.891	40.593.716	13.001	718.176

And as compared with the month ending the 26th of Feb., 1870, the above returns show an increase of 629,443*l* in the circulation of notes in England, and an increase of 1,576,947*l* in the circulation of the United Kingdom. On comparing the above with the fixed issues of the several banks, the following is the state of the circulation:—The English private banks are below their fixed issue 1,389,225*l*, the English joint stock banks are below their fixed issue 437,461*l*—total below fixed issue in England, 1,826,686*l*; the Scotch banks are above their fixed issue 2,162,995*l*; the Irish banks are above their fixed issue 1,051,132*l*. The average stock

of bullion held by the Bank of England in both departments during the month ending Feb. 22, 1871, was 21,850,774*l.* being a decrease of 231,002*l.* as compared with the previous month, and an increase of 2,147,339*l.* when compared with the same period last year. The following are the amounts of specie held by the Scotch and Irish banks during the month ending the 22nd of Feb., 1871:—Gold and silver held by the Scotch banks, 3,212,311*l.*, gold and silver held by the Irish banks, 2,898,497*l.*—total, 6,110,808*l.*; being a decrease of 115,323*l.* as compared with the previous return, and an increase of 775,390*l.* when compared with the corresponding period last year.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 25th day of March, 1871:—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	343418	557158	328008
Royal Bank of Scotland	216451	581895	503531
British Linen Company	438024	467380	209589
Commercial Bank of Scotland	374889	629880	373887
National Bank of Scotland	297024	499927	372026
Union Bank of Scotland	454398	660881	385204
Aberdeen Town & County Banking Company	70733	156880	107683
North of Scotland Banking Company	154319	286450	141114
Commercial Banking Company	274321	441166	243014
City of Glasgow Bank	72921	459487	456217
Caledonian Banking Company	59434	72704	42212

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the first week of April, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children	Adults.	Children under 16	1st week April, 1871.	Corresponding Total in 1870.
West district	5,080	8,204	5,741	19,545*	23,543
North district	7,042	11,641	8,942	27,625	30,779
Central district	6,040	7,475	5,916	20,040	22,989
East district	7,105	10,678	9,399	27,180	34,791
South district	8,651	17,145	15,089	40,885	46,672
Total of the Metropolis	35,047	55,141†	45,087	135,255	158,774

* No return has been received this week from St George's (West District.)

† Of these outdoor paupers, 13,712 are men and 41,429 are women.

Total Pauperism of Metropolis.—Population in 1861, 2,802,000.

Number of Paupers.

	Indoor.	Outdoor.	Total.
First week of April, 1871	35,047	100,208	135,255

926	224	49	1,179

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during March, 1871:—

Imports.

By Sea.	Ships.		Tons.	By Railway and Canal.	Tons cwt.
Newcastle	257	...	133,083	London and North-Western	60,452 8
Scotch	30	...	8,320	Great Northern	79,180 0
Sunderland	121	...	64,395	Great Western	55,417 5
Maryborough	13	...	5,254	Midland	120,267 0
Hartlepool	111	...	35,651	Great Eastern	62,889 5
Blyth	18	...	6,421	South-Western	2,035 13
Welsh	5	...	925	London, Tilbury, and South.	...
Yorkshire	30	...	3,145	South-Eastern	785 3
Kent coal	1	...	357	Grand Junction Canal	789 15
Cumbria	10	...	941	London, Bright. & S. Coast	3 6
Total	578	...	258,412	Total	391,306 15
Imports during Mar. '70	558	...	240,541	Imports during Mar., 1870	347,373 18

Comparative Statement, 1870 and 1871.

	Ships.		Tons.
By Sea.—Jan. 1 to Mar. 31, 1870	1,707	.....	829,017
— — 31, 1871	1,608	.....	910,095
Increase in the present year	101	.....	9,987
			Tons cwt.
By Railway and Canal.—Jan. 1 to Mar. 31, 1871			1,114,181 12
— — 31, 1870			1,022,005 8
Increase in the present year			92,175 4

Export list, showing the distribution of coal imported into the port or district of London by sea, rail, and canal, and afterwards exported coastwise or to foreign parts, or sent beyond limits of London district, by rail or inland navigation, during March, 1871:—

Exports.

1. Railway-borne coal passing "in transitu" through district	tons	43,126
2. Sea-borne coal exported to British Possessions or to foreign parts, or to the coast		
Issued sent beyond limits by railway	tons 38,467	
Ditto by canal and inland navigation	... 19,478	
	... 2,889	
		57,832
3. Railway-borne coal exported to British Possessions, or to foreign parts or to the coast	11,107	
Ditto by canal and inland navigation	210	
		11,317
4. Sea-borne coal brought into port and exported in same ships		93
Total quantity of coal conveyed beyond limits of coal duty district during March, 1871		112,555
Ditto, March, 1870		114,879

An annual Parliamentary return shows that in the year 1870 4,026 immigrants from India were introduced into the island of Mauritius, and 7,742 into the West Indies, the latter number comprising 4,943 brought to British Guiana, 1,893 to Trinidad, and 906 to Jamaica. From 1843 to 1870 349,001 immigrants and liberated Africans have been introduced into Mauritius, and 225,993 into the West Indies, India furnishing 475,464 of the total number. In 1870 2,842 returned home from Mauritius, 421 from British Guiana, with earnings amounting to 12,290*l.*, remitted for them through Government agency, and 408 from Trinidad, with 10,782*l.* so remitted. Since 1843 7,621 have returned home from British Guiana, and more than 128,000*l.* of earnings were remitted through Government agency for 6,313 of them; 97,418 returned home from Mauritius, but there is no account of their earnings remitted, nor any complete account for the West India Islands.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 12th day of April, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	36,541,345	Government debt	11,015,100
		Other securities	3,984,900

— Hamburg (3 months)	13 6¾ 7¼	13 9¾ 10½	13 11 11½	13 10⅝ 11	13 10½ 11⅛
Clearing-house return	...	54,188,000	65,027,000	90,504,000	64,470,000

In 1861, money continued easy, in consequence of the contraction of business, and there had been a question of a farther reduction in the Bank rate; but the Bank had decided to wait a few days longer to perceive the effect of their last move on the exchanges, and also in prospect of an immediate collision between the Secessionists and the United States Government. Mr Gladstone had just made an unexpected announcement of a large surplus—1,923,000*l*—in his Budget. He again proposed to abolish the paper duty.

In 1868, the period of 2 per cent. continued. The project of transferring the telegraphs to the State was now being actively discussed.

In 1869, money was easy, the recent rise in the Bank rate to 4 per cent. having quickly done its work. A new Russian loan of 11,000,000*l* had just been introduced. Mr Lowe's dicta in his last Budget about the money market taking care of itself were being keenly discussed.

In 1870, there had been a little hardening of the rates for money just before Easter, but they were again easier. Mr Lowe had just brought in his Budget, showing a surplus of 4,337,000*l*. The proposed plebiscitum in France was continuing to attract attention.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,034,833*l*; in 1868, an excess of 2,359,105*l*; in 1869, an excess of 741,670*l*; and in 1870, a deficiency of 1,228,086*l*. In 1871, there is a deficiency of 278,949*l*.

Discount and Money Market.—As was generally anticipated, the Bank rate was reduced on Thursday to 2½ per cent., having stood at 3 per cent. since the 2nd of March, when the French demands consequent on the conclusion of peace were causing great apprehensions of a period of dear money. The disappointment of these apprehensions by the outbreak, on the 18th of March, of the Communist insurrection, and by the protracted duration of the civil war which ensued, has at length made a return to the former rate of 2½ inevitable. From the long suspense which has prevailed, and which has checked new undertakings of every kind, there has perhaps never before been a greater accumulation of money in Lombard street than there is now; and to increase the superfluity the continental troubles cause a great deal of money to remain and to be sent here. Since 1866 we have not had so much foreign money. The Bank too has been losing its business since the great pressure at the beginning of March, which induced it to raise the rate. Its private securities, which were then 24,745,000*l*, are now 21,630,000*l*, and the proportion of reserve to liabilities has remained during the last few weeks about 45 per cent., the total reserve being now 13,023,000*l*. The changes in the account during the last week have been insignificant, except that the private securities have farther diminished 1,234,000*l*, but the position was previously such as not to be long endurable.

Business in the open market had quite anticipated the change at the Bank, the quotation last week for the best short-dated paper being 2½ per cent., and the fall in the Bank rate has been immediately followed by a farther decline of ¼ in the open market. The rates for long-dated paper are also proportionately lower, and corresponding changes have also been made in the allowances for money by the joint-stock banks and discount houses. The market is now somewhat steadier than it has been for the last few weeks; but the quotations are still not so close as they are in a good market. To-day there has been some extra demand both in the open market and at the Bank in connection with the Stock Exchange settlement, but nothing material to set off against the downward tendency of the value of money.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months		2½	per cent.
Do	4 —	2⅝	per cent.
Do	6 —	2¾ 3	per cent.
Trade bills—3 months		2½	per cent.
Do	4 —	3	per cent.
Do	6 —	3¼ 3½	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1¾ per cent.
Do fourteen days	1¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6*	2	...
Vienna	5	5	5	5
Berlin	4	4	3½	3½
Frankfort	4	3½	2¾	3
Amsterdam	3½	3½	3½	3
Turin	5	5	5	5
Brussels	2½	4	2½	3¼ ½
Madrid	5	5	5	5
Hamburg	...	...	2½	3¼
St Petersburg	5	8	4½	7

* Nominal.

The Stock Markets.—The expectation that the Bank rate would be reduced this week, and the actual reduction of the rate on Thursday, combined with the continuance of suspense in France, have made almost all the stock markets buoyant this week. English Government securities and the principal colonial and home investments have all advanced, and the tendency has also been upward in the foreign market, being most strongly marked there to-day. The most conspicuous fact of the week has been another great advance in English home railways, which is all the more striking because of the magnitude of the speculative account for the rise which the settlement showed to exist. This advance is evidently connected with the large increase of traffic, which would have a good effect on the railways, apart from the special circumstances of the money market; but the abundance of money for the moment, and the apparent likelihood of the suspense in France continuing, coupled with great confidence in the soundness and expansion of trade, are apparently carrying to an extreme point every class of home securities. The suspense, moreover, is just sufficient to keep the public from embarking largely in new enterprises, and the absence of new commitments is favourable for the time to all established investments.

English Government Securities.—The advance in this department, consequent on the state of the money market, has been very marked. The closing figure of last week for the May account was 92⅞ 93, and on Thursday, after the reduction of the Bank rate, it was 93⅛ ¼—a rise of ¼, the tendency to-day being still upwards. There would seem to be comparatively little danger of any material reduction of the present store of money for some weeks to come. France can hardly be an effective borrower for many weeks in whatever way the provinces conquer Paris, and it will take some time before the new engagements have a marked effect. These circumstances strengthen the Consol market, in which the bear account is now very weak. The closing quotation to-day for the May account is 93¼ ⅜, or an advance of ⅜ upon the closing price of Thursday last week.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	92¾	92⅞	92⅞	93	par to 5s pm
Monday		Holiday			
Tuesday	92⅝	92¾	92⅞	93	par to 5s pm
Wednesday	92⅝	92⅞	92⅞	93	par to 5s pm
Thursday	92⅝	93⅛	92⅞	93⅛	par to 5s pm
Friday	93	93⅛	93⅛	93⅜	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

Ditto New 5 %	102 3	.....	102 3	... ...

FOREIGN GOVERNMENT SECURITIES.—From the usual statement, which we subjoin, it will be noticed how general has been the advance for the week, though in the majority of cases it is not very great. In hardly any instance is there a decline. To-day the market was even better than it has been previously, the rise extending to Spanish, Italian, and other stocks which have been lately neglected.

The most conspicuous advance for the week is in Peruvian 6 per Cent., 1870, which have risen between 2 and 3 per cent. compared with last week. No special cause is assigned, but the amount of this stock is small, and a good demand for investments paying high interest has a greater proportionate effect on such stocks.

The French National Defence loan has fluctuated a good deal, but within narrow limits, according to the varying fortunes of the contest before Paris, and the final quotation is 92½ ½. ½ under that of last week.

The letters of allotment in the Argentine loan were delivered on Wednesday morning—a large proportion of the applications, it is understood, having been allotted. At first the scrip fell to ¾ ½ pm., but it speedily rallied to 1½ ¾ pm., advancing on Thursday to 2 to ¼ pm. To-day the scrip has been somewhat less firm, and closes at 1¾ ⅞ pm. The quotation indicates, we believe, the genuineness of the applications from the public, the disposition on the Stock Exchange, as we noticed last week, having been rather unfavourable.

The rise in Egyptian and Turkish securities is also very observable this week, though the movement in the latter case has not until to-day extended to the 5 per Cent. loan of 1865. The rise in this case however is ¼ only.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices April 6.		Closing Prices this day.	Inc. or Dec.
Argentine 6 %	91 ½	.....	92 ½	+ 1

Ditto 6 % Railway Bonds	70½ ½	.....	70½ ¾	+ ½

ENGLISH RAILWAYS.—The upward movement has also been pretty general in this department, but more conspicuously in North-Eastern, London and North-Western, Lancashire and Yorkshire, Chatham and Dover preference, Great Eastern and Caledonian. In other cases the recent advances have also been well maintained, even where there is no actual improvement. The only exception is the Great Northern, in which there was a sharp fall on the publication of an unfavourable traffic return—actually showing a decrease, notwithstanding the increased passenger traffic of Good Friday. The Northern lines generally suffer from the continual reports of competitive reductions in the coal rates, and we do not believe that the fall in the Great Northern is mainly due to the unfavourable traffic return of a single week. To-day the railway market has again been very good. The usual table which we subjoin furnishes the best proof of the improvement which has taken place. The rates of continuation have been high, there being a large speculative account open, but the abundance of money has made arrangements easy at a good rate.

With regard to the traffics, we notice below how the fact of the holiday week is insufficient to account for the great increase. In almost all the great companies it is found that though the last was a short week for goods' traffic, as compared with the corresponding week of last year, yet the goods' traffic had not diminished, showing in some cases a considerable increase.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :—

	Closing Prices April 6.		Closing Prices this day.	Inc. or Dec.
Caledonian	89 ¼	.....	89¾ ⅝	+ ⅜
Great Eastern	42¾ 3½	.....	43¾ ⅛	+ ⅜
Great Northern	122½ 3	.....	125 6	+ 3
Ditto A	134½ ¾	.....	135½ 6	+ 1½
Great Western	88¾ 90	.....	89½ 90½	+ 1
Lancashire and Yorkshire	139½ ½	.....	141½ 2	+ 2½
London and Brighton	53¾ ¾	.....	54¾ ⅞	+ ⅛
London, Chatham, and Dover	16½ ½	.....	17½ ⅝	+ 1½
London and North-Western	131½ ½	.....	134½ ½	+ 3
London and South-Western	96¾ 7½	.....	97½ 8½	+ 1
Manchester, Sheffield, and Lincolnshire	52¾ 3	.....	53¾ ⅞	+ ⅞
Metropolitan	68¾ ⅝	.....	68¾ 9½	+ ⅞
Ditto District	33¾ 4½	.....	33½ 4	− ½
Midland	128½ 30	.....	131½ 2	+ 2
North British	36½ 7½	.....	37½ 8	+ ⅝

South-Eastern	84½ ¾	.....	85½ ¾	+ 1
Ditto Preferred	114 15	.....	114 16	... ...
Ditto Deferred	55 ½	.....	56 ½	+ 1

The quotations for the leading debenture stocks compare as follows with last week :—

	Closing Prices April 6.		Closing Prices this day.	Inc. or Dec.
Great Eastern A 5 %	109 11	.....	109 11	... ...
Ditto 1867 Redeemable	107 9	.....	108 10	+ 1
Great Western 5 %	112 13	.....	112 13	... ...
London and Brighton 4½ %	100 2	.....	100 2	... ...
London, Chat., & Dover Arbitration 4½ %	93½ 4½	.....	95 ½	+ 1
Metropolitan District 6 %	116 18	.....	116 18	... ...

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending April 8 to 776,424*l*, being an increase of 82,712*l* on the corresponding week of last year. The aggregate receipts of the current half-year are now 8,968,667*l*, being an increase of 547,249*l* on the corresponding period of last year. A large part of the increase is due to the increased passenger traffic from the occurrence of the Good Friday holidays, but as this increase is partly neutralised by the diminution of the goods receipts it is remarkable that the increase is so large as it is. The principal increases for the week are—London and North-Western, 13,078*l*; Lancashire and Yorkshire, 10,948*l*; Midland, 10,382*l*; London and Brighton, 8,439*l*; North-Eastern, 8,687*l*; Great Western, 7,060*l*; South-Eastern, 5,332*l*; and Great Eastern, 5,478*l*. The Great Northern shows a decrease of 944*l*. The following shows the increase or decrease in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70	Aggregate Receipts of Half-year to date. Amount.	Inc. or Dec. on Corresponding period in '70.

We notice below, in our Notices and Reports, the issue this week of 7 per cent. bonds of the Central Uruguay Railway of Monte Video. The subscription list will close on Wednesday, the 19th instant, for London, and on Thursday morning for country applications. The price has advanced to 1⅝ ⅞ prem.

AMERICAN SECURITIES.—United States' Five-Twenty bonds are now quoted ex the coupon due May 1, and close at an advance of about ½ on the week. There have been no transactions of importance in the market in the new Five per Cent. bonds, and nothing has transpired in reference to the extent of the applications. Atlantic and Great Western Consolidated Mortgage bonds have met with some inquiry.

	Closing Prices April 6.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	92½ ¾	90⅜ ⅝ xd	+ ½
Ditto 1865 Issue	92½ ½	90 ¼ xd	+ ¼
Ditto 1867 Issue	91½ ½	92 ¼	+ ¼
Ditto 5 % 10/40 Bonds, exchange 4/6	89⅛ ⅜	89½ ½	+ ¼
Atlantic and Great Western Consol. Bonds	41½ 2	41⅜ 2½	+ ¼
Erie Shares	18⅜ ⅝	18⅛ ⅜	— ¼
Illinois Central Shares	110 ½	110¼ ¾	+ ¼
Massachussets 5 % Sterling Bonds, 1900	94 6	94 6	... ...
Panama General Mortgage 7 % Bonds, 1897	93 5	94 6	+ 1
Pennsylvania Gen. Mort. 6 % Bonds, 1910	91½ ¾	92⅝ 3½	+ 1½
Virginia 6 % Bonds	57½ 8½	58½ 9½	+ 1

JOINT STOCK BANKS.—The changes in the quotations for bank shares have not been of great importance, but a tendency to reaction is apparent in some few instances. Agra shares have given way ¼; Anglo-Egyptian, New Zealand, and Chartered of India, &c., ½; Chartered Mercantile of India, 1; but Alliance are ¼ better; British North America and English of Rio de Janeiro, 1.

TELEGRAPHS.—A fair average business has been transacted in this department, and the tone, on the whole, has been favourable. Some adverse changes, however, are reported. Great Northern, French Cables, and British Indian Submarine are ¼ lower; but Anglo-Mediterranean, British Indian Extension, British Australian, and Great Northern have advanced ½; Anglo-American and Submarine 1. In Construction shares there is no change for the week.

MISCELLANEOUS.—The changes in this department have not been numerous, but Steam Navigation shares have advanced in consequence of the improved dividends paid. Royal Mail Steam have improved 4; Peninsular and Oriental, 3; and General Steam, 1. Rio City Improvements are ⅜, and Northern Metropolitan Tramways ½ higher. Hudson's Bay shares have risen ⅜.

The death was announced this week of Mr James Walker, chairman of the Madras Railway Company, deputy-chairman of the Oriental Bank Corporation, and one of the directors of the Union Bank of London.

MINES.—The mining share market has been somewhat active this week, and some important fluctuations have taken place in values. Among British mines West Chiverton have advanced 3; South Wheal Frances, 4; East Caradon and Granville, ¼. Devon Great Consols are nominally 5 lower; Assheton, Van, and Great Wheal Vor have given way 1, South Condurrow and Tankerville, ½. In the foreign mining market considerable activity has prevailed in the demand for Eberhardts and United Mexican, which show a rise of 3 and 1¾ respectively. Fortuna shares are ¼ better on the week. St John del Rey shares have been in good demand.

EXCHANGES.—Bills on France have been rather more in demand this week. There has also been an advance in the rates on Amsterdam and St Petersburg, and a fall in the rate on Antwerp.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The amounts to hand during the week comprise only 62,000*l* per Countess of Kintore, from Auckland, and 6,940*l* per Nile, from the West Indies. There is, however, no demand for abroad, and the bank has received about 273,000*l* since our last circular of the 6th instant. The Douro has taken 101,000*l* to the Brazils.

Silver has been slightly more in request during the week, and prices remain as mentioned below. We have received about 93,000*l* from India, and 46,000*l* from the West Indies.

Mexican Dollars.—We have received about 24,000*l* from New York. The demand has been so active for the outgoing mail to China of the 15th instant that prices have slightly improved, as mentioned below.

Exchange on India for banks' drafts at 60 days' sight is 1s 10⅛d to 1s 10⅜d.

Indian Government loan notes.—We quote 4 per Cents., 92 to 92¼; 5 per Cents., 100 to 100½; and 5¼ per Cents., 107 to 107½.

Quotations for bullion.—Gold—Bar gold, 77s 8⅜d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0 3/16d to 5s 0¼d per oz std; ditto containing 5 grains gold, 5s 0⅜d to 5s 0 1/16d per oz std; Mexican dollars, 4s 10⅜d to 4s 10⅞d per oz, last price.

The *Gazette* return states that the imports of the precious metals into the United Kingdom during the week ended April 12 amounted to—gold, 132,259*l*; silver, 288,227*l*. The exports were—gold, 111,700*l*; silver, 157,731*l*.

The sum of 64,000*l* in gold has been sent into the Bank of England to-day.

FAILURES AND EMBARRASSMENTS.—With regard to the bankruptcy of Messrs J. and R. Jeffery and Co., of Compton House, Liverpool, it is stated that at a meeting on Wednesday:—

Mr Phelps, of London, who represented numerous creditors, submitted resolutions embracing the following among other proposals:—The confirmation of all proceedings taken by the committee of creditors appointed on the 14th of March; the payment out of the estate of the bankrupts of all expenses incurred by and on behalf of the committee, as well as the allowance for maintenance of the bankrupts; and the transference of the proceedings in the matter to the London Bankruptcy Court, on the ground that by far the largest proportion of creditors in number and value resided in the London district. Mr Phelps handed in proofs from 500 creditors of the aggregate value of 160,000*l*. The proposals submitted were agreed to, there being only one dissentient. Messrs Honey and Jocelyn, of London, were appointed trustees. The committee of inspection are Messrs S. Watts (Manchester), and James Irvine Hughes, J. Scott, Charles Spencer, and Richard O. Yeates (all of London).

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, April 17.

Cafartha Lead Mining, general, City Terminus Hotel.

TUESDAY, April 18.

Cape Railway, general, City Terminus Hotel.
San Paulo (Brazilian) Railway, general, City Terminus Hotel.
Chartered Mercantile Bank of India, London and China, general, 65 Old Broad street.
Recife and San Francisco Railway, general, London Tavern.
Brenkurn Iron and Coal, general.

WEDNESDAY, April 19.

Chartered Bank of India, Australia, and China, general, London Tavern.
Lancashire and Yorkshire Railway, special, Manchester.
Delhi and London Bank, general, 76 King William street.
Florida Silver Mining, general, London Tavern.
Vale of Towry Railway, general, Euston square.

THURSDAY, April 20.

Grand Trunk of Canada Railway, general, City Terminus Hotel.
Queensland Sheep Investment, general, 21 Old Broad street.
Oriental Bank Corporation.
New Quebrada, general and special.

FRIDAY, April 21.

Standard Bank of British South America, general, 10 Clement's lane.

SETTLING DAYS.

Ticket Days—April 27th; May 11th and 30th.
Account Days—April 28th; May 30th and 31st.

NOTICES AND REPORTS.

STOCKS.

Russian 4½ per Cent., 1860.—Bonds, representing 100,000*l*, have been drawn for redemption at par on the 1st June.

RAILWAY COMPANIES.

Cape.—The report announces that the traffic receipts for the past half-year were 21,012*l*, against 20,274*l* for the corresponding period of 1869. The net profit was 4,404*l*, and the amount available for dividend is 12,840*l*. In addition to the agreed dividend at the rate of 6 per cent. per annum on the preference stock, a dividend is recommended at the rate of 4½ per cent. per annum on the ordinary stock.

Central Uruguay Railway of Monte Video—New 7 per Cent. Bonds.—This company has been formed to construct a trunk line from Monte Video to Santa Lucia and Durazno, and a share capital of 320,000*l* has locally been subscribed. Messrs Waring Brothers are the contractors, and the State guarantees a net revenue of 700*l* per mile per annum. The London and River Plate Bank are issuing 300,000*l* in 7 per cent. bonds at the price of 75*l* per 100*l* nominal, secured by a first mortgage on the first section (40 miles) to Santa Lucia. A 1 per cent. sinking fund provides for their redemption at par in 33 years from 1873. The first two years' interest is secured by trust. The annual sum required to pay interest and sinking fund will be 24,000*l*, and the Government guarantee upon the section is 28,000*l*, irrespective of working profits in excess.

Grand Trunk of Canada.—The revenue accounts for the last and corresponding half-years:—

	1869. £		1870. £
Gross receipts	790,193		793,740
Working expenses	484,571		592,762
	305,622		200,978
Renewals	74,745		136,101
Net profit	230,877		124,877
Add previous balance	18,754		8,639
Available	249,631		133,516
For Canada & American currency, postal subsidiary interest rents and mortgage interest	182,273		132,398
Surplus	67,358		1,118

In the second half of 1869, a first preference dividend was paid in cash having as surplus 1,612*l*. For the past half-year no such dividend can be paid. Competitions and reductions in fares were the cause of there being only a small increase in receipts notwithstanding that a much larger amount of freight and number of passengers were carried. The renewals with steel rails were exceedingly heavy, and all was charged to revenue, whereas in the corresponding half 36,343*l* was charged to capital. These renewals will contribute to future economy in working. The loss upon American currency conversions has fallen off. The capital required for the international bridge at Buffalo has been provided, and the bridge will probably be opened for traffic in the course of next year. Since last December, when a partial cessation of competition for Western traffic between the railways of the United States occurred, a great improvement has been manifested. The working of the current half-year has already resulted in an increase of 58,000*l*, or an average of about 5,000*l* per week. The completion of the international bridge over the Niagara river is assured. The Intercolonial Railway is being rapidly constructed, and other enterprises of importance are projected, which cannot fail to give an increased stimulus to the trade and commerce of the country.

Great Luxembourg.—The gross receipts for the second half of 1870 amounted to 191,785*l*, as compared with 188,322*l* in the same half of 1870. The net earnings were 95,176*l*, against 101,525*l*. After deducting sums for interest and reimbursement payments, there remains 28,721*l*, out of which a dividend of 5s 6d per share is declared; surplus, 1,221*l*. The events of the war not having allowed correct accounts to be obtained from the French companies the receipts for the past six months of 1870 are partially estimated.

Illinois Central.—The gross earnings for 1870 were $8,678,958, the working expenses $4,759,008, the State taxes $490,111, and the rent of leased lines in Iowa $572,517, leaving the net earnings $2,857,322, against $2,887,375 in the year 1869, showing a decrease of $30,053.

Recife and San Francisco (Pernambuco).—The extension of the guarantee has raised the net annual income from 56,000*l* to 80,283*l*. The directors state that yellow fever has recently prevailed at Pernambuco, and that several fatal cases had occurred among the company's staff. The traffic receipts for the half-year amounted to 37,707*l*, and for the corresponding half of 1869 to 44,775*l*, showing a decrease of 7,068*l*; and the working expenses, exclusive of exchange, amounted to 28,469*l*, against 26,025*l* in the same half of 1869, showing an increase of 2,444*l*. The revenue accounts showed a balance of 26,996*l*, sufficient to pay a dividend for the half-year at the rate of 4 per cent. per annum, with 3,188*l* carried forward.

San Paulo.—The war in Europe has interfered with the export of coffee; but notwithstanding the decrease in the traffic, the revenue shows, owing to the great rise in the exchange, a net balance in sterling to the credit of the Imperial Government of 44,310*l*, being nearly equal to that for the corresponding half-year of 1869. This sum, with the balance to be received under the guarantee, enables the directors to pay a dividend at the rate of 6⅝ per cent. per annum.

BANKS.

Bank of British Columbia.—At the meeting the accounts for the half-year showed a balance at the credit of profit and loss of 19,545*l*, and a dividend and bonus, equal together to 3 per cent., were declared, leaving 10,605*l*, out of which it was decided to apply 10,000*l* towards the reduction of certain accounts.

MISCELLANEOUS COMPANIES.

Bahia Gas.—The directors recommend the payment of the usual dividend at the rate of 10 per cent. per annum on the preference shares, and 3 per cent. per annum on the ordinary shares; after which a balance of 152*l* 18s 9d will remain.

British Indian Submarine Telegraph.—Half-year's receipts 41,310*l*, of which 11,901*l* was earned in March, the Falmouth cable being again in operation. In future, receipts will be published monthly, and the board propose to pay an interim dividend next July.

Commercial Gas.—After payment of a dividend at the rate of 10 per cent., a surplus of 2,518*l* remains to be added to the reserve.

Fairbairn Engineering.—The report shows an available total of 10,275*l*, including a previous balance of 590*l*, the net profit for the year ended the 31st of March having been 9,685*l*, against 3,680*l* in the preceding year, and recommends a dividend of 2s 6d per share (making 5 per cent. for the twelvemonth), and the appropriation of 2,000*l* to the reduction of the sum paid for goodwill, leaving 1,286*l* as surplus.

Falmouth, Gibraltar, and Malta Telegraph.—Traffic receipts for the six months ended March 31, 41,237*l*; notwithstanding an interruption of 75 days, which cost 16,000*l* to repair. The repaired line is now in operation, but a loss of insulation has occurred, which renders it advisable to lay an alternative route between Gibraltar and Lisbon. The revenue would have enabled the declaration of a dividend at the rate of 5 per cent. per annum, but that the funds have been temporarily required for the above purpose.

London Gun Company, Limited.—Capital, 120,000*l*, in 10*l* shares. It is proposed to acquire a gun factory at East Greenwich, situated upon 17 acres of land, and upon which 62,000*l* has recently been expended. The purchase price of the 73 years' lease is 26,000*l*; and it is intended to expend about 38,000*l* in additional machinery, so as to adapt the factory to the manufacture of every class of gun now made in this country, including the largest in use or contemplated on the continent and elsewhere, as well as articles of general manufacture.

Mellors and Co.—The directors are prepared to issue at par 2,770 fully paid-up shares (1*l* each), so as to raise the called-up capital from 18,230*l* to 21,000*l*. They state that this increase of capital is rendered necessary by the additional business.

Royal Mail Steam Packet.—A half-year's distribution of 4*l* per share is recommended, free of income tax.

Surrey Consumers' Gas.—Half-year's available profit, 15,277*l*; and after payment of the maximum dividend, 4,777*l* remains.

Union Steamships.—An interim dividend of 1*l* per share has been declared.

MINING COMPANIES.

Perran Wheal Vyvyan Silver-Lead Mine, Limited.—Capital, 24,000*l*, in 2*l* shares. Object—to purchase the lease of this mine in Perranzabuloe, Cornwall, for 3,000 fully-paid shares, and to work the same.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

Information having been received of the re-opening of the navigation of the Danube, the mails for Constantinople, for conveyance by the route of Belgium, Vienna, Rustchuck, and Varna will be made up at this office on the evening of every Tuesday and Friday, and supplementary mails on the morning of every Wednesday and Saturday, until further notice. No closed mails for Constantinople will be forwarded, via Trieste, so long as the more direct route via Rustchuck and Varna remains open.

Information having been received from the Danish Post Office that the steamers plying between Copenhagen and Iceland will call either at Lerwick or Leith on each of their voyages during the present year, mails for Iceland will be despatched on the following dates, and all letters, &c., reaching Lerwick or Leath in time will be forwarded in such mails:—April 19, from Lerwick; May 31, July 8, and August 15, from Leith; September 25 and November 10, from Lerwick. Correspondence forwarded in these mails will be liable to the following rates of postage:—Letters (when prepaid)—Per ½ ounce, 4d. Newspapers—For each newspaper, not exceeding 4 ounces, 3d; every additional 4 ounces, 3d. Book packets and patterns—Not exceeding 1 ounce, 1d; above 1 ounce and not exceeding 2 ounces, 2d; above 2 ounces and not exceeding 4 ounces, 4d. When posted unpaid, the letters will be liable to an additional charge on delivery. The postage upon newspapers, book packets, and patterns must in all cases be prepaid, or they cannot be forwarded.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The wheat trade ruled steady at Mark lane to-day, though the transactions were restricted in consequence of the limited arrivals of English. Monday's advanced rates were fully maintained for both English and foreign descriptions. Flour was also firm, but supplies are still in excess of the immediate requirements of consumption. The export inquiry was dull. There is no change to note in the value of maize, beans, or peas, but oats improved 6d per quarter under the influence of a more active demand. This week's imports into London have amounted to 22,460 quarters of wheat, 7,340 oats, 2,540 maize, 670 beans, 300 peas, 2,170 sacks and 3,110 barrels of flour.

At Liverpool and Wakefield this morning the demand for wheat was more active, and the tendency of the quotations was upwards.

The Liverpool cotton market has been quiet during the past week, business being interrupted by the holidays. Prices, however, show very little alteration since last Thursday. The total sales for the four days have been 47,390 bales, of which the trade have taken 38,190 bales, speculators and exporters, 9,200 bales. The imports for the week are 125,750 bales, the actual exports 25,790 bales, and to-day's stock is 813,430 bales. Quotations are unchanged, except for some descriptions of East Indian, which show a decline of $\frac{1}{16}$d to $\frac{1}{8}$d per lb. To-day the market closes quiet. Sales, 10,000 bales.

At New York, on April 13, middling Upland cotton was quoted at 14¾ cents per lb.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended April 13, 1871:—

	Imported.	Exported.
American.....bales	44,688	7,841
Brazilian	2,218	350
East Indian	16,730	9,763
Egyptian	3,993	898
Miscellaneous	1,064	294
Total.....	68,693	19,146

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, March 18:—In the early part of the week the telegrams received by means of Reuter's agency were unfavourable to cotton, although no actual decline was apparent in Liverpool quotations. Here, however, the adverse news did not influence any downward movement, owing principally to the dearth of suitable selection, and in some measure

to the stubborn attitude which daily advices from up-country reported the ryots as preserving. On Wednesday telegrams came to hand reporting a falling off in the American receipts, and a firmer tone in Liverpool consequently. Although it was reasonably to be expected that a marked reduction would take place in the weekly arrivals at the ports about this time, the information was immediately seized upon by holders of stocks as a pretext for advancing rates, and subsequent messages from home being not unfavourable, the market has advanced about 10 rs to 15 rs per candy in the districts, and fully 5 rs to 7 rs on the spot. Latterly there is almost nothing doing, as the increased rates place a check up business. The business of the week is comparatively small, being only about 6,000 candies, as compared with over 9,000 last week. From our correspondents in the districts we have very disappointing accounts. The Broach holders resolutely refuse to part with kuppas at present rates, and it is quite impossible to obtain cotton in any but the most trivial quantities. The same may be said of the Dhollerah ryots, who are doing all in their power to hold out until it would almost seem compelled by want to realise. In Berar also purchasers are at the moment quite unable to make any progress, and unless a change for the better takes place soon, exporters with freight engagements to fulfil will find themselves very awkwardly situated. The quantity of Khamgaum and Oomrawuttee shows a good deal of falling off, but Akote is still very fair, although difficult to obtain in any quantity. Machine-ginned Broach is coming forward very much mixed with Baroda cotton, and much care is required to ensure a right selection. Dharwar in small hand samples is now to be seen, but it would be premature to pronounce an opinion upon the crop from these, as it is just as likely as not that they may be from selected pods, and not at all representative of the season's average. From Tinnevelly we have a telegram dated 10th, quoting 5¼d per lb, c. and f.

Actual exports since last mail left, 34,382 bales.

Messrs E. B. Liddell and Co., of Alexandria, have forwarded the following report, dated March 31:—Our last cotton report was dated 24th inst. The business transacted since then has been but limited, at an advance of ¼d per lb upon fair and good fair descriptions. The higher grades maintain previous values, those however of Gallin being quite nominal owing to want of supply. We quote:—Fair, 7¾d to 7¾d per lb, f.o.b.; good fair, 8¼d to 8¼d, ditto; fully good fair, 8¼d to 8¾d, ditto; Gallin, 9½d to 11¼d, ditto (nominal). Freight, $\frac{1}{16}$d per lb for steam-pressed bales. In cotton of the new crop, November delivery, various operations have taken place, last prices paid being 9¼d to 9½d per lb, f.o.b., for fair.

Business in colonial produce this week has been much interrupted by the holidays; nevertheless, an active demand has prevailed for sugar, and an advance of 6d per cwt has taken place in both raw and refined goods. Coffee has sold quietly at the rates lately current. Black teas have changed hands more readily, but there is no change to notice in cocoa or rice. Spices generally remain unaltered.

Messrs J. D. Campbell and Co., of Mauritius, writing on March 10, observe:—No great amount of business has been done in sugar since the date of our last. For a short time after holders were all very firm, and for the very finest whites even more than 88 25 was asked. Since then, however, for no apparent new reason, there has been a decided weakness in whites and grey Vesou, and resales have been made at from 20s to 30s reduction. The feeling is not universal, and concessions have been readily met. No doubt the tone has been given to the market chiefly by many holders being desirous to close accounts by the end of March; but the special element of weakness in whites arises from the fact that stocks are too heavy for this time of the year when the Bombay shipping season is near its close, and apparently no inclination on the part of the shippers to enter the market except at a considerable reduction. It is thought just possible that what Australia cannot absorb Europe may take, and a parcel has been bought for shipment to London. The quantity of grey Vesou remaining is very small, and all the business for a long time has been in resales. Grey syrups, on the contrary, are very plentiful, and are quite neglected. These and whites, form the great bulk of the present stock of about 360,000 bags, yellows of all sorts, crystals, counters, and rations, being very scarce indeed. It is improbable that they can be affected to any extent by the course of other sugars. At present the market is quite inactive, there being no vessels of suitable tonnage available, and we do not make special quotations, as they would be quite nominal. Statement of sugar shipped from 9th February to 9th March:—To France, 657 tons; to the United Kingdom, 1,485; to Melbourne, 2,056; to Sydney, 1,338; to Adelaide, 201; to New Zealand, 374; to Cape colonies, 76; to other places, 711 tons. Exchange—There has been no quotable alteration in rates. For Australian documents rather better than par might be obtainable, but we append the Bank closing quotations:—Buying rates: London, 90 days, 3½ per cent. prem.; Bombay, 60 days, 1 per cent. dis.; Australia, 60 days, par. Selling rates: London, 90 days, 5 per cent. prem.; Calcutta, 30 days (demand), 2 per cent. prem.; Australia, 60 days, 2 per cent. prem. Freights—Business is now at a standstill for want of suitable tonnage, of which our harbour is bare. One or two vessels now discharging prefer waiting the arrival of the mail before fixing. The Jane Anna, just taken for Cork, being off the line, had to accept a rate lower than those recently current.

The annexed is dated Rangoon, March 6:—Supplies of Natsain rice continued large till about a week ago, when the same fell off somewhat on account of the neap tides which were setting in then. As purchasers showed much eagerness to secure rice, prices rose very soon to 127 rs to 129 rs per 100 baskets, equal to 5s 7¾d to 5s 8¾d per cwt, free on board, at the exchange of 1s 11¾d per rupee. We have to-day to quote these rates still, and although very large supplies of rice are shortly expected to arrive, we do not look for lower prices as long as the demand for shipment to Europe continues as active as it is now. The tonnage in port loading rice for Europe amounts to 37,000 tons burden, and 41,936 tons have already been exported to that quarter since the 1st January.

Mr Helmuth Schwartze observes:—The second series of London colonial wool sales commenced on Thursday last. There was a large attendance of home buyers, the foreign trade being also well represented. Competition was animated, and prices, as compared with the closing rates of last series, ruled for Australian washed without change, for Australian grease ¼d, and for Cape 1d per lb higher. The arrivals in time for these sales comprise—17,481 bales Sydney, 93,065 Port Phillip, 1,664 Van Diemen's Land, 35,459 Adelaide, 952 Swan River, 15,991 New Zealand, 31,810 Cape—total, 196,422 bales, and the series, as at present arranged, is to last till the 15th May, to be followed as usual by sales of low wools. The third series of sales will commence on the 22nd June.

The following is Messrs William Moran and Co.'s indigo report, dated Calcutta, March 14:—We have nothing of interest to report in this market, there being only a few odd lots of indigo left unsold, chiefly composed of gaud and ordinary Rungpore qualities, for which sellers are not disposed to accept the market value. With reference to the new crop, we are glad to be able to say that the October plant is generally well reported on all over the Lower Bengal districts, and the rain which fell during the early part of this month has greatly assisted planters in putting in their spring cultivation. In Tirhoot and Chuprah, where the sowings were effected early, the fall of rain necessitated the redrilling of a portion of the lands, but the loss from this cause appears to have been but slight, as the bulk of the lands were only sown down after the weather had cleared up again. The advices from the Benares and North-West provinces, as usual at this early date, are devoid of interest. Exports of indigo from 1st November, 1870, to 11th March, 1871:—To Great Britain, 16,320 chests; to France, 483; to Trieste, 2,781; to foreign Europe, 250; to America, 2,219; to Gulphs and Levante, 1,691—total, 23,744 chests.

The annexed is dated New York, March 29:—The trade in first hands was not especially animated in foreign domestic goods, but fair movements were reported in some classes of dress fabrics, which are in especially active demand from retailers, and the sales cannot be considered small for this period of the season when it is remembered that jobbers in the interior have scarcely had time to break their assortments as yet, while a majority of them have laid in the opening stocks. The current movements are, in consequence, almost wholly to city dealers, and in the present condition of the jobbing trade here the demand from this quarter cannot be heavy. Importers are doing a moderate business in white goods, though the sales are smaller than was noted a few weeks since. We hear of small invoices of goods in transit, but the importations will be very light, the early orders being limited to unusually small amounts in consequence of the unprofitableness of the trade last season.

THE COTTON TRADE.

LIVERPOOL.—April 13.

The cotton market reopened on Tuesday with a fair demand, which has since continued, but holders still offer their stocks freely, and prices in some instances are barely maintained. The Bank rate has this day been reduced from 3 per cent. to 2½ per cent. In Sea Island only a small business has been done, but at full prices. American continues very freely offered, and prices are slightly in favour of buyers. New York advices to the 13th instant quote middling Upland 14⅞ cents, costing to sell in Liverpool 7⅞d per lb, by steamer. Brazil is heavy of sale, but without quotable change in price. Egyptian has been in moderate request, and is without alteration. For East Indian the demand has been limited, and only a small business has resulted, but last week's quotations are generally maintained, with but little variation.

In cotton to arrive the business has been small. The latest quotations are—American, basis of middling, not below good ordinary, from any port, April-May shipment, 7¼d; New Orleans, ship named, $7\frac{7}{16}$d; not below strict ordinary, March-April shipment, $7\frac{7}{16}$d; Broach, good fair, machine ginned, shipping or shipped, *via* Cape, 6½d per lb.

The sales of the week (four days), including forwarded, amount to 47,390 bales, of which 2,040 are on speculation, and 7,160 declared for export, leaving 38,190 bales to the trade.

April 14.—The sales to-day will probably amount to about 10,000 bales, the market without change.

Imports, Exports, Consumption, &c.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	555,760
An increase of quantity taken for consumption of	89,360
An increase of actual exports of	165,010
An increase of stock of	336,430

In speculation there is a decrease of 66,220 bales. The imports this week have amounted to 125,750 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to April 7) is 320,000 bales, against 200,000 bales last year. The actual exports have been 25,790 bales.

Sales to arrive:—100 bales Timnevelly, at 6¼d, February-March shipment, for good fair; 200 bales Dholleerah, at 5⅝d, April-May shipment, to Liverpool, for fair; 260 bales Oomrawuttee, at 6d, March-April shipment, to Liverpool, for fair; 1,000 bales Bengal, at 5¾d to 5¾d, January-February-March shipment, 564 February, Suez, for fair; 250 bales Orleans, at 6¾d, shipping or shipped, for good ordinary—total, 2,050 bales.

NEW YORK.—MARCH 29.

The market still fails to develop any particularly new or exciting features. Late last evening exporters, on a little spurt took a considerable amount of stock, but to-day the demand has again been comparatively moderate and business with it snug. Neither the domestic or foreign advices contain anything of a nature calculated to have a direct influence, and both buyers and sellers appear to be holding off on large movements awaiting something to develop itself upon which the position can be either depressed or stimulated, and in the meantime operating upon such parcels as may seem to show a margin. Values have shown a feverish, unsettled tone, resulting in a reduction of the official quotations on the low and high qualities, though present figures are plenty high enough for any grade. We quote nominally as follows:—

	Uplands, Florence.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Low middling, or ordinary	11 @ ...	11 @ ...	11¼ @ ...	11¼ @ ...
Middling	13 ...	13 ...	13¼ ...	13¼ ...
Good middling	14 ...	14 ...	14¼ ...	14¼ ...
Middling fair	15 ...	15 ...	15¼ ...	15¼ ...
Fair	16 ...	16 ...	16¼ ...	17 ...

For future delivery business still rather dragging and generally unsatisfactory, prices remaining about as before, and neither buyer nor seller claiming any great advantage, though on the whole, the tone was soft. The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year:—Receipts at cotton ports **since Sept. 1, 1870:—New Orleans,** 1,167,013 bales; Mobile, 350,183; Charleston, 304,617; Savannah, 651,940; Memphis, 217,734; **Galveston, 211,703;** Wilmington, 80,553; Norfolk, 279,485; **other ports, 27,223**—total, 3,290,401 bales. Foreign exports Southern ports and New York:—New Orleans, 852,706 bales; Mobile, 213,054; Charleston, 143,032, Savannah, 375,090; Galveston, 112,920; New York, 490,519; other ports, 35,411—total, 2,222,732 bales. Stocks at principal ports:—New Orleans, 259,233 bales; Mobile, 60,146; Charleston, 22,834; Savannah, 61,049; Galveston, 56,890; Norfolk, 5,573; New York, 116,000; Boston, 12,000—total, 594,625 bales.

NEW YORK, April 7.—According to Messrs Moffat, Dowdle and Co's report, **the week's receipts of cotton at all** United States' ports have **been 68,000 bales, and since the** 1st of September, 3,381,000 bales. Shipments to England, 1,000 bales; to France, 6,000 bales; and to the continent, [illegible] bales. Total since the 1st of September, 2,356,000 bales. Stock at all ports, 560,000 bales. Middling Upland, 7d, cost and freight, per steamer.

NEW YORK, April 11.—The receipts of cotton at all United States' ports for the last four days have been 35,000 bales. Shipped to Great Britain, 2,000 bales, to France, none; and to the continent, 14,000 bales. Middling Upland, 7d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, April 13.—The business transacted during the past week has been necessarily small, Good Friday, Saturday, and Monday being almost complete holidays. Since business was resumed on Tuesday, the demand for all kinds of yarns and goods has been extremely languid, yet prices continue remarkably firm, as producers are under no pressure to sell from the heavy contracts they have still on hand; yet they are more willing to entertain offers which they refused a little while last week. Our business merchants are only operating for small lots for actual wants. The news from China is less favourable than formerly for Manchester productions. For other Foreign markets there is nothing doing worthy of note. For the home trade a fair business continues to be done of a general character. The market closes dull, with the tendency of prices slightly in favour of buyers.

COMPARATIVE STATEMENT OF THE COTTON TRADE.

Messrs Alexr. Collie and Co. received the following telegram from Manchester yesterday:—There is a good demand to-day for China yarns, and full prices are easily obtainable where delivery can be obtainable in a moderate time. Cloths are quiet, but without change in price since Thursday.

BRADFORD.—The wool market shows a more hopeful tone. There is much more inquiry, and the transactions for immediate consumption are numerous. The demand is not so limited in range as it was, and there is more or less doing in nearly all classes of wool, with greater firmness in prices, and in some cases with a stiffening tendency. Good wethers, in both lustre and demi-lustre wools, are most in favour, and there is a fair amount of business doing in hogs of good quality. In the worsted yarn market the same improved tendency is apparent. In the piece market the chief business doing is for Germany. Prices are stiff.

LEEDS.—The markets in the cloth-halls were but thinly attended, there being no buyers but those representing Leeds houses present. A few sales of Meltons, coatings, Victorias, tweeds, and ordinary plain cloths were effected, but the aggregate quantity of goods sold was small.

NOTTINGHAM.—The lace trade continues in a healthy and satisfactory condition. There is a good demand for cotton fancy edgings. Lace yarns in fine and medium numbers are firm, low counts being without quotable change. Raw silk is quiet. The hosiery trade also continues active.

BIRMINGHAM.—The principal quarterly meeting of the South Staffordshire iron trade was held on Thursday. There was a large and influential attendance of this and neighbouring districts, and many merchants, manufacturers, and brokers from a distance. For hæmatites the demand appeared to exceed the supply, though steel is not a staple manufacture of this district, and the leading qualities of native pig were scarce, and proportionately firm at from 3*l* 15s to 4*l* 5s for No. 1 all mine, 3*l* to 3*l* 5s for cinder, and 4*l* 10s to 4*l* 15s for refined metal. Shropshire pig was quoted 3*l* 17s 6d hot blast, and 4*l* 15s cold, and west coast hæmatites 4*l* 10s to 4*l* 15s. Ores were in active request, at 16s to 18s for hæmatites, and 6s 9d to 7s 6d oolitic. The transactions were mostly for home consumption or local manufacturing purposes, and the bulk of the foreign specifications now in hand have been negotiated at the works or by correspondence.

BELFAST.—Flax—Supplies again limited; demand generally was quiet at unaltered rates. Yarns—Transactions entered into on home and continental account were of a limited character. Stocks continue to increase. Linens (brown) handloom—Demand active for good makes of linen handkerchiefs and light linens for bleaching. Transactions in heavy linens and cambric handkerchiefs were to a fair extent; prices very steady. Powerloom—Demand moderate for heavy linens and drapers. Stocks stationary. Bleached and finished linens—Taking the season of the year into account, home transactions reached an average amount. Stocks stationary. Prices give symptoms of slight advance.

DUNDEE.—The flax market has continued steady, and although the amount of business doing has been of a limited nature, prices are well maintained, and holders look for an improvement taking place shortly. In tows there is little passing. The jute market here is somewhat depressed by the large arrivals that have taken place during the past week. The yarn market has been very quiet, and the amount of business doing has been limited, and prices of flax and fine tow yarns are rather easier. The demand for linens is scarcely so good as it was, but manufacturers are upon the whole pretty well employed with previous orders.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—MARCH 29.

There was only a moderate trade in Western and State flour to-day, but prices are without essential change. Shippers are still holding off. Rye flour quiet and steady. Southern moderately active. In St Louis and Southern Illinois there was

more doing. The general market was very dull. The wheat market opened dull, but firm. Nothing was done until near the close of 'Change, when 25,500 bushels were taken at $1.58 afloat for No. 1 new spring; $1.69 in store and $1.69 afloat for Ohio winter red; $1.55 afloat for Pennsylvania winter red; nominal for white at $1.90 to $2 for Diehl Genessee. Corn ruled firm, with a fair business, in part for export.

The following shows the visible supply of grain, including stocks in store at the undermentioned places, March 18, 1871:—

	Wheat.	Corn.	Oats.	Barley.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

A fair tone has prevailed in the grain trade during the week, and the tendency of values has been decidedly upwards. Supplies sent forward by farmers have been small, and the stocks of English wheat on hand are considered to be below the average for the time of the year. At the same time, stocks of foreign wheat in granary have been much diminished; and although shipments have been resumed from the Baltic ports, some time must elapse before they can be greatly added to. The reduction in the rate of interest will also enable speculators to hold produce in the hope of influencing prices. The arrivals of grain-laden vessels have not been numerous, but there is still a considerable quantity of produce afloat for the United Kingdom. Very much depends upon the progress of events in France as, should present troubles be overcome at an early date, large shipments from this side must ensue to make up for the deficiency which is already felt in that quarter. Wheat may be quoted at an advance of 1s per quarter on both English and foreign descriptions, at which improvement the market closed firmly to day. Flour ruled steady in value in sympathy with the wheat trade, but the supply offering is still in excess of the demand.

Oats have risen 1s per quarter on the week, owing to short supplies, and increasing demand. Maize, beans, and peas have ruled quiet, but firm in value. The export demand for all kinds of cereal produce has been dull. The annexed statement shows the imports and exports of breadstuffs, &c., into and from the United Kingdom since the commencement of the season, compared with the corresponding period in 1869-70:—

	Imports. 1870-71. Cwt.	Exports. 1870-71. Cwt.	Imports. 1869-70. Cwt.	Exports. 1869-70 Cwt.
Wheat	20 038,330	2,272,072	26,911.890	178,067
Barley	4.963.811	62.315	4.872,165	15.557
Oats	4.742,034	1,048.423	5,989,194	75,340
Peas	464,346	40.875	789.527	10.149
Beans	1.111.941	14.640	1.119.174	1,225
Indian corn	9.361.092	56.296	12.578.831	13.144
Flour	2.859,529	1.276,858	4.060.082	13.561

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 42 grain and seed-laden vessels have arrived at ports-of-call, viz., 21 wheat, 7 maize, 2 beans, 1 linseed, 3 cottonseed, 3 flour, also 1 valonea, 1 locust beans, 1 ground nuts. The floating grain trade has been firm in tone. Wheat, fine cargoes have fetched an advance of 6d to 1s, but inferior have been neglected. Maize has been slow to sell. Barley has been in steady demand, and prices exhibit an upward tendency. Rye has been in sluggish demand. The reported sales are as follows:—Wheat—13 arrived cargoes: Ghirka Odessa, 48s to 53s; Marianopoli, 55s 3d to 55s 9d per 492 lbs; Polish Odessa, 53s 9d; yellow ditto, 53s 9d; Sandomirca, 56s 7½d per 480 lbs. On passage, 1 cargo Ghirka Odessa at 52s, and a lot Polish Odessa, 54s per 480 lbs. To be shipped, a cargo Berdianski, 55s per 492 lbs. Maize—5 arrived cargoes: Odessa, 35s 9d to 36s 6d; Galatz, 36s 9d per 492 lbs. To be shipped, about 3 cargoes: Danubian, 33s per 480 lbs. Barley—3 arrived cargoes: Taganrog, 29s 6d; Danubian, 30s per 400 lbs. Rye—Shipped or to be shipped, about 3 cargoes: Azow, 35s 9d; Odessa, 38s per 480 lbs. Linseed—Spot and near at hand, scarce and steady at late rates. Calcutta, spot or warehouse, 64s; ex ship, 63s 3d per 410 lbs. Rapeseed quiet but steady at last week's rates; ordinary brown Calcutta to arrive, 65s 6d to 66s per 416 lbs. Cotton-seed unaltered and quiet. Some 700 tons shipping sold at 9*l* 3s 9d; for an arrived cargo 9*l* 5s is asked.

The London averages announced this day are:—

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

[During the early part of the week business was suspended in consequence of the Easter holidays, and comparatively few public sales have been held. Towards the close the markets have shown rather more steadiness.]

SUGAR.—The improvement last referred to has made further progress, the sales being upon a more extended scale, and at 6d per cwt advance. Several parcels of crystallised Demerara have changed hands, closing at above recovery. Refining kinds of West India have met a steady inquiry since the Easter holidays, the sales amounting to 1,481 casks, and the importers now require higher rates. Several parcels of Manila and other brown sorts have changed hands at firmer quotations. Several floating cargoes of British West India have sold for the United Kingdom at 24s to 25s per cwt; also several of Cuba, and some parcels of French beet to arrive. Official returns of the Board of Trade to the end of March show that the duty was paid upon 32,500 tons more sugar than to same date of 1870. This increase is chiefly upon raw. The stock of sugar in the four ports of Great Britain is now about 19,000 tons less than the previous season. For London the decrease amounts to 24,000 tons.

Mauritius.—1,350 bags brown descriptions have changed hands at 23s 6d to 27s.

Bengal.—1,000 bags low brown have changed hands at 18s, and 500 bags brown Dulloah at 23s to 24s.

Madras.—1,500 bags brown native sold at 24s to 24s 6d.

Penang.—1,700 baskets low brown are reported at 19s.

Manila.—About 16,000 bags have changed hands: clayed, 24s to 25s; unclayed, 20s 6d. 200 tons Taal to arrive at 21s 6d.

Siam.—500 bags brown have sold at 20s to 22s.

Other Foreign.—Three floating cargoes of Cuba are reported for the United Kingdom at 26s 6d to 27s; one of brown Bahia at 22s. On the spot, 300 casks Cuba at 27s. 800 baskets grainy Java at 37s to 37s 6d.

Refined.—A steady demand prevails for dry goods at rather higher rates than previously obtained. Common titlers, &c. now quoted 42s 6d to 43s, the better qualities in proportion. Pieces and crushed find more ready buyers.

Molasses.—30 puncheons Demerara have sold at 12s per cwt.

Rum.—An active inquiry existed yesterday, and the week's sales amount to about 1,100 puncheons, the bulk Demerara, at 1s 10d; a small portion of fine at 1s 11d. Pale Leewards at 1s 6d to 1s 7d, with fine at 2s per proof gallon. The operations were said to be partly on account of the Government.

Cocoa.—A few sales of Trinidad have changed hands by private contract, partly for exportation, at steady rates. Other kinds are inactive. There have not been any public sales. The export deliveries of foreign have been 16,600 bags, against 4,510 bags last year, and 480 bags in 1869. Much of the Guayaquil usually shipped direct to the continent has been sent direct here. The home deliveries of colonial are large, and the stock moderate.

Coffee.—The market is inactive, and prices have not experienced any change for the rather small quantity brought forward. Native Ceylon is held more firmly, with business at 55s to 55s 6d for good ordinary quality. 431 bags by auction were taken in rather above the present value. 121 casks 59 barrels 110 bags plantation Ceylon found buyers at former rates: grey, 58s to 63s 6d; low middling to middling colory, 62s to 65s; rather bold, 74s. 864 cases 167 bags East India, just arrived per steamer, sold at about the valuations, from 63s to 81s for middling rather small to bold Wynaad; and 87 bags new crop Mysore at 87s to 93s. By private contract some parcels of Rio are reported at the recent decline, ranging from 48s to 55s. A small quantity of washed at 61s. One floating cargo of Rio has sold for the North of Europe; no particulars given. One of Santos for a near port at about 51s per cwt. The export clearances have exceeded those of last year by 3,500 tons, for export by 1,450 tons, and the stock is 2,020 tons less.

Tea.—Since the Easter holidays there has been some increase of demand, but only a moderate business transacted from recent arrivals, chiefly in the common to fair descriptions of congou. The market is now rather quiet. A public sale is advertised for Tuesday next, the last instant.

Rice.—Transactions of fair extent have taken place at full prices, including white Bengal at 11s 6d to 11s 9d; Ballam, 9s to 10s 7½d; Rangoon, 9s 4½d; Field Siam at 8s 9d cash. 700 tons Saigon have sold afloat at 9s 3d, and one of Necrassio Arracan at 10s, open charter, or 10s 4½d landed. One at 10s 3d for the continent. 1,100 tons Bengal at 10s, ex quay. Dacca and low quality at 9s 3d to 9s 6d.

Imports and Deliveries of Rice to April 8 with Stocks on hand.

Spices.—The market for black pepper is firmer. Small sales reported by private contract. Singapore, 5¼d to 5⅜d; Penang, 4⅞d to 4¾d. Rather higher rates have been refused for arrival. A contract has been made for delivery to the end of the year at 4d per lb for Penang or Singapore. White remains dull. Prices the same as last quoted. There have not been any public sales of spice this week, and the transactions by private contract are limited.

Saltpetre.—A few parcels have changed hands at firmer prices, including refraction 14½ to 6s at 25s 6d to 26s. A small quantity, refraction 14, at 25s. The market is firmer than last quoted. 50 tons have sold to arrive at 26s per cwt.

Imports and Deliveries of Saltpetre to April 8, with Stocks on hand.

Delivered last week 245 tons.

Drysaltery Goods.—Gamboge is steady, with sales at 16s to 16s 1½d. Cubebs 20s to 22s. Chilli quiet. Safflower has been more in demand, and sales made in common qualities of Bengal, also a small lot of fine.

Indigo.—The next quarterly sales of East India are fixed for the 8th proximo and the quantity of account declared is 11,200 chests. There have been some inquiry for East Indian descriptions this week.

Metals.—The changes in these markets have been unimportant, and the general tone of business remains rather quiet. Sales of fair extent have been effected in Scotch pig iron at 55s to 55s 6d cash. Railway bars continue in demand, and the makers are well supplied with orders. Spelter is held firmly, but the sales have been limited in extent. Sales at 19l on spot. Lead quite maintains the late advance upon English and Spanish, with a steady demand. Foreign tin is unsettled and lower. Straits sold in the early part of the week at 127l to 129l 10s, and subsequently at 126l 10s to 127l cash. One sale reported for arrival as low as 125l 10s. Large supplies have come in. Banca quoted 129l to 129l 10s. Transactions of some extent have occurred in copper, including Walaroo at 84l; Chili, &c., at 64l 5s to 66l per ton, according to brands. No alteration can be quoted in English copper.

Jute.—Few sales have been effected, and the market is quiet. Business in Dundee has been somewhat unsettled by very heavy arrivals. During the week prices have been without alteration for the few contracts made. Public sales are declared for Wednesday next.

Linseed.—The market is firmer, and prices have slightly advanced. Calcutta has sold at 63s 9d to 64s, ditto to arrive, 63s to 63s 6d per quarter.

Oils.—Olive is dull on the spot. A cargo of Gallipoli has sold for Russia at 42l 5s per tun. There has been a slight reduction accepted for shipment. Present quotations 41s 9d on the spot. Rape weaker in price for English brown. Sales at 43l to 43l 5s, for delivery during April. Last four months of the year 44l 10s. Quotations of refined rather lower, chiefly from last week's. Cocoanut steady. Cochin, 40l to 40l 10s. Ceylon, 40l. Palm quality has sold at 46l per ton. Fine palm unaltered. Other kinds dull. Fish oils have been almost neglected. Sperm, 84l. Colonial 1l less. Pale seal, 37l 10s. Cod. 35l 10s per tun.

Petroleum.—American refined dull, as 1s 4½d per gallon.

Tallow.—The market is quiet, and rather easier rates have been accepted for Russian. Continental affairs and the good supply of Australian also has some influence. Petersburg, 43s 3d; April to June, 43s 3d to 43s 6d; June, 43s 9d; October to December, 45s 3d per cwt. There will be about 1,650 casks Australian offered by auction this afternoon.

Particulars of Tallow—Monday, April 10, 1871.

POSTSCRIPT. Friday Night.

Sugar.—The market continues firm, refining sorts of West India being 6d to 1s dearer for the week. Sales to-day 506 casks, making 2,030 casks during the week. Crystallised Demerara, by auction, realised 36s to 36s 6d. Soft St Vincents, brown and yellow, 25s to 32s 6d. 189 baskets Penang part sold at 18s to 19s for low brown. Privately 6,300 bags low unclayed Manila are reported at 20s 6d. 1,400 bags grainy Mauritius at 35s to 36s 6d. A floating cargo of Cuba at 26s 6d per cwt for the United Kingdom.

Coffee.—461 casks 49 barrels 166 bags plantation Ceylon by auction sold: colory, 65s to 82s; pale and greyish, 58s 6d to 64s. 2,649 bags Rio were partly disposed of at 59s 6d to 61s 6d for washed; and 738 bags Santos at 51s 6d to 56s.

Rice.—2,049 bags Bengal by auction part sold at 11s per cwt for good middling white hard grain.

Spices.—Penang black pepper sold at 4¾d per lb cash.

Saltpetre.—About 130 tons Bengal sold, to arrive, at 26s 3d to 26s 6d, and a portion at 24s per cwt, without allowance for quality under 20 per cent. refraction.

Oil.—At auction 275 casks palm were taken in at 35l per ton for Accra. 320 tuns Southern whale, from Havre, sold at 32l to 33l 5s per tun.

Tallow.—1,445 casks 284 cases Australian chiefly sold: beef, 37s to 41s; sheep, 41s to 42s 3d per cwt.

ADDITIONAL NOTICES.

Refined Sugar.—The home market continues very firm, with improved rates upon last week's rise. Dutch crushed is higher, at 36s to 36s 6d. April delivery; and large sales have been made at 33s 5d for October-November delivery, for Amsterdam.

Green Fruit.—Azores and Valencia oranges in good demand, the Easter holidays being favourable to the sale. Sicily lemons, from increased importations, have rendered prices easier. Barcelona nuts, from a short supply, make the market firm. Black Spanish and Brazil without alteration. West India cocoa-nuts in request, and nearly cleared off the market.

English Wool.—A steady demand; prices firm.

Flax.—Market firm.

Hemp.—Market for Russian very dull; good Manilla scarce, and full prices demanded.

Silk.—Market flat; tendency downwards.

Seeds.—The seed trade remains as last week. Prices are well supported, with a moderate demand.

Tobacco.—Business has been very dull during the week, and there is nothing to report.

Leather.—There has not been much doing in leather during the past week, and at Leadenhall on Tuesday no market was held. The transactions that have taken place show no change from our report of last week.

Metals.—We find very little change to report, a heavy market prevailing still in most branches. Copper is kept firm in quotations by the limited charters from the West coast, but demand is slack. Iron is quiet. Tin has receded in value by 20s to 40s a ton on foreign. Spelter is steady. Lead is firm, and in fair demand. Tin plates continue to be in request.

Tallow.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian ditto	44	9
Mottled stuff	31	6
Rough stuff	17	0
Graves	10	0
Good dregs.....	0	0

Imports for the week, 138 casks.

METROPOLITAN CATTLE MARKET.

Monday, April 10.—The total imports of foreign stock into London last week amounted to 12,736 head. In the corresponding week in 1870 we received 6,421; in 1869, 10,469; in 1868, 4,131; and in 1867, 9,705 head.

Considerable steadiness has been apparent in the cattle trade to-day, and prices have had an upward tendency. There has been a moderate supply of beasts on offer, including about 270 Spanish. The demand throughout was steady, and prices improved fully 2d per 8 lbs. The best Scots and crosses sold at 5s 8d, and in some instances 5s 10d per 8 lbs. The Oporto stock realised 5s 2d to 5s 4d per 8 lbs. At the waterside about 300 beasts were detained. The show of sheep was only moderate. There was a healthy demand, and prices had an upward tendency. The best Downs and half-breds in the wool sold at 6s 4d to 6s 8d, ditto shorn 5s 6d to 5s 10d per 8 lbs. Lambs met a slow sale, but prices were steady at from 7s to 8s 6d per 8 lbs. Calves changed hands quietly on former terms. Pigs were dull, at previous quotations.

Veal	5	0		5	4	Small pork	4	4		5	0

Lamb, 7s 0d to 8s 6d.

HOP MARKET.

BOROUGH, Friday, April 14.—This market remains inactive. The inquiry for all descriptions is dull, and to force sales in inferior grades less money is accepted. Mid and East Kents, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, April 14.—Fair supplies have been on sale. The demand has been quiet, as follows:—English Shaws, 80s to 100s; English Regents, 55s to 90s; Scotch Regents, 60s to 90s; and Rocks, 50s to 70s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 14.—The chief feature of interest in our market this week has been the sales by auction on Wednesday last, when 1,300 ballots Peru, 860 bales Turkey, Georgian, &c., 700 bales River Plate, 250 bales North African, 230 bales Egyptian, and about 900 bales sundry kinds of low wools were offered, and fully one-half of them sold at satisfactory rates, though some descriptions did not quite realise late current prices.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 14.—The market was thinly attended, and consequently the amount of business in wheat was restricted, but the full prices of Tuesday last were obtained. Flour in more request, at previous rates. Barley, beans, and peas, unchanged. Oats and oatmeal slow of sale, without change in value. Indian corn, 3d to 6d per quarter lower, and a moderate business done at the decline.

WAKEFIELD, April 14.—The supplies of wheat continues small, and factors hold firmly for an advance of 1s per quarter on last Friday's rates, but the trade is quiet. Barley steady, at late rates. Other articles unaltered.

The Gazette.

BANKRUPTS.

TUESDAY, April 11.

John Grimes, Shanklin, Isle of White, late lieutenant-colonel in the army.
William Harrocks, Bolton, tailor.
Edward James, Southgate, Middlesex, builder.

PERRY DAVIS' VEGETABLE

PAIN KILLER.

FOR INTERNAL AND EXTERNAL USE.

DEPOT—17 SOUTHAMPTON ROW, W.C. Price 1s 1½d, 2s 9d, 4s 6d, and 11s per bottle. Inhaler, 2s 6d each.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

EDUCATION IN GERMANY.—

ANGLO-GERMAN ESTABLISHMENT, Bonn-on-the-Rhine, founded in 1847.—The Principal, Herr THOMAS, prepares Gentlemen's Sons for the Army, Civil Service, and Mercantile pursuits. German and French are constantly spken in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS Heer Strasse, Bon-on-the-Rhine.—Frequent escorts

OXYGENATED WATER HOLDS IN

Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.
Laboratory, 36 Long Acre, and all Druggists.

TEETH.—MR WEBB (MANY

years with Mr Eskell, of 8 Grosvenor st., Bond st.) supplies ARTIFICIAL TEETH which cannot be surpassed for use, comfort, appearance, and durability. Painless treatment guaranteed throughout, as with all other operations; all consultations free. Terms moderate. N.B.—Any number of teeth made in two or three hours, and repairs effected whilst waiting. At home daily until eight, at 27 New Bond st. His treatise, which is well worthy of perusal, free for two stamps.

MESSRS GABRIEL'S

CELEBRATED PREPARATIONS
FOR CLEANSING, PRESERVING, AND BEAUTIFYING THE TEETH AND GUMS, AND PREVENTING TOOTHACHE.

Sold by all Chemists and Perfumers (with directions for personal use), and by
MESSRS GABRIEL, DENTISTS
(Established 1815),
64 LUDGATE HILL, CITY, and 56 HARLEY STREET, W., } London,
Where they practice their painless system of DENTISTRY.

MESSRS GABRIEL'S OSTEO-ENAMEL STOPPING, warranted to remain white and firm as the tooth itself. This beautiful preparation restores front teeth, and can be easily used. Sufficient to stop Six Teeth. Price 5s.

MESSRS GABRIEL'S ODONTALGIQUE ELIXIR. This celebrated Mouth Wash is most refreshing, it strengthens the gums, eradicates tartar and all injurious secretions, sweetens the breath, and for cleansing artificial teeth is invaluable. Price 5s.

MESSRS GABRIEL'S CORALITE TOOTH PASTE, for cleansing and improving the Teeth, imparts a natural redness to the gums, and gives brilliancy to the enamel. Price 1s 6d.

A word in season on the teeth may be had upon application free of charge.

DR LOCOCK'S WAFERS.—MORE

cures (Feb. 27, 1871) of bronchitis, voice, chest, cough, and throat complaints.—From Mr Earle, M.P.S., 22 Market place, Hull.—"Your wafers are invaluable for the voice, throat, and chest. All sufferers from bronchitis, hacking cough, and deprivation of rest should take them—hundreds would find quick relief." Dr Locock's wafers rapidly cure asthma, consumption, coughs, and all disorders of the breath, throat, and lungs. Sold by all druggists at 1s 1½d per box.

HOLLOWAY'S OINTMENT AND

PILLS.—Reliable remedies.—In wounds, bruises, sprains, glandular swellings, enlarged veins, neuralgic pains, and rheumatism, the application of this soothing ointment to the affected parts not only gives the greatest ease, but likewise cures the complaint. The pills wonderfully assist in banishing the tendency to rheumatism and similar painful disorders, whilst the ointment cures the local ailment. The pills remove the constitutional disturbances, and regulate every impaired function of any organ throughout the human body. The cure is neither temporary nor superficial, but permanent and complete, and the disease rarely recurs, so perfect has been the purification performed by these searching yet harmless preparations.

FINE FLAVOURED, STRONG BEEF

TEA at about 2½d a pint. ASK FOR LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

Agents—CROSSE & BLACKWELL, London, and sold by all Dealers in Sauces throughout the World.

BRINDISI OVERLAND ROUTE TO

THE EAST.—The Mails to and from Egypt, India, China, Japan, Australia, &c., are now forwarded viâ Dover, Ostend, Brussels, Cologne, Mayence, Aschaffenburg, Munich, Innsbruck, the Brenner Pass, Verona, Padova, Bologna, Ancona, Brindisi, and Alexandria.

A weekly Express Train leaving London from S. E. and L. C. and D. Stations every Friday—1st class service, 8.35 p.m.; 2nd class service, 7.10 a.m.

The PENINSULAR and ORIENTAL COMPANY'S Steamers leave Brindisi every Tuesday, at 4 a.m., and arrive at Alexandria on the following Friday, performing the passage in 75 hours (contract time).

Beyrouth, Jaffa, and Caifa regularly, viâ Brindisi and Alexandria.

The AUSTRIAN LLOYD'S Steamers leave Brindisi every Friday for Corfu, Sira, Athens (Piree), Smyrna, Constantinople, and the Black Sea, and every second Friday from the 10th March for Salonica, viâ Sira.

The shortest and quickest route to Naples, viâ Foggia, and Rome, viâ Folconara, is viâ Bologna and Ancona, by the SOUTH ITALIAN RAILWAY.

The Great East India First-class Hotel, at Brindisi, is now open.

For further information apply to the South Italian Railway Company's Sole Agents, Lebeau and Co., 6 Billiter street, London, E.C.

OVERLAND ROUTE

viâ MARSEILLES.—COMPAGNIE DES MESSAGERIES MARITIMES DE FRANCE.—French Mail Steam Packets leave Marseilles as follows:—

Every four weeks from March 19. } For { Port Said, Ismailia, Aden, Suez, Mauritius, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Batavia, Saigon, Hong Kong, Shanghae, and Yokohama (Japan).

To ALEXANDRIA fortnightly from December 8.

For passage, freight, and information apply to the Agents, 97 Cannon street, London; G. H. FLETCHER and CO., Liverpool; at the offices of the Compagnie des Messageries Maritimes de France in Paris, Lyons, Bordeaux, and Marseilles; or to Smith and Co., Rotterdam.

* Passengers Eastward of Suez, securing their berths in London, are entitled to the conveyance of their luggage free to Marseilles.

NOTICE.—THE PACKETS OF THE

UNION STEAMSHIP COMPANY will NOT in future CALL at PLYMOUTH.

CAPE OF GOOD HOPE,

ALGOA BAY, and NATAL.—The UNION STEAMSHIP COMPANY'S ROYAL MAIL PACKETS SAIL from SOUTHAMPTON on the 10th and 25th of the month, calling at Madeira. A surgeon and stewardess in each ship.

RATES OF PASSAGE MONEY.

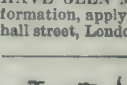
	First Class.	Second Class.
To Cape Town and St Helena..	30 guineas	20 guineas
To Algoa Bay and Mossel Bay	33 guineas	22 guineas
To Natal and East London ...	37 guineas	25 guineas

Including a free pass by rail from London to Southampton for passengers and baggage, also dock and agents' charges.

N.B.—The packet leaving Southampton on the 10th calls at St Helena; the packet leaving on the 25th corresponds with Natal.

Apply to Falconer and Mercer, 23 Leadenhall street, London; or Thomas Hill, Southampton.

OVERLAND ROUTE.—



The PENINSULAR and ORIENTAL STEAM NAVIGATION COMPANY book Passengers and receive Cargo and Parcels by their Steamers for—

	From Southampton.	From Brindisi.
GIBRALTAR ... MALTA	Every Saturday, at 2 p.m.	—
ALEXANDRIA.. ADEN ..... BOMBAY	Every Saturday, at 2 p.m.	Every Tuesday, at 2 a.m.
GALLE..... MADRAS..... CALCUTTA ... PENANG..... SINGAPORE ... CHINA ..... JAPAN	Saturday, Apr. 1, 2 p.m. And every alternate Saturday thereafter.	Tuesday, Apr. 11, at 2 a.m. And every alternate Tuesday thereafter.
AUSTRALIA ... NEW ZEALND.	Saturday, Apr. 15, 2 p.m. And every fourth Saturday thereafter.	Tuesday, Apr. 25, at 2 a.m. And every fourth Tuesday thereafter.

And all Ports touched at by the Steamers of the British India and the Netherlands India Steam Navigation Companies.

An abatement of 20 per cent. from the charge for the Return Voyage is made to Passengers to or from ports eastward of Suez reimbarking within six months of their arrival, and 10 per cent. to those reimbarking within twelve months.

For Rates of Passage Money and Freight, WHICH HAVE BEEN MUCH REDUCED, and all other information, apply at the Company's Offices, 122 Leadenhall street, London, or Oriental place, Southampton.

STEAM SHIPS.—

The GENERAL STEAM NAVIGATION COMPANY'S powerful and first-class STEAM SHIPS leave from St Katharine's Wharf for—

HAMBURG—Every Wednesday and Saturday. April 19 at 11 a.m.; 22 at noon. Saloon, £2; fore cabin, £1 5s. Extra vessels, carrying cargo only, leave also every Thursday and Sunday morning. For particulars of freight apply to F. Stahlschmidt and Co., 90 Lower Thames street.

HAVRE—Every Thursday. April 20 at 10 a.m. Saloon, 11s; fore cabin, 8s.

ROTTERDAM and the RHINE—Every Wednesday and Saturday. April 19 at 3 p.m.; 22 at 9 a.m. Chief cabin, £1 fore cabin, 15s. Return Tickets, 30s and 22s 6d.

ANTWERP, BRUSSELS, COLOGNE, and the RHINE—Every Tuesday and Thursday at noon. Chief cabin, £1; fore, 15s. Return Tickets, 30s and 22s 6d. Brussels, 17s 3d; Cologne, 30s 6d. Leaving Antwerp for London every Sunday and Friday at noon.

OSTEND, BRUSSELS, COLOGNE, and the RHINE—Every Wednesday and Saturday. April 19 at noon; 22 at 2 a.m. Leaving Ostend for London every Tuesday and Friday night. Chief cabin, 15s; fore, 12s. Brussels, 18s 10d; Cologne, 32s.

From Irongate Wharf for:—

BOULOGNE—Every Tuesday, Thursday, and Sunday. April 16 at 11; 18 at noon; 20 at 1; 23 at 3 a.m. Chief cabin, 11s; fore, 8s.

CALAIS—Every Wednesday and Saturday. April 19 at noon; 22 at 2 a.m. Chief cabin, 11s; fore, 8s.

EDINBURGH—Every Wednesday and Saturday, at 10 morning. Fares: Chief cabin, 15s; fore, 12s; dec 7s.

NEWCASTLE—Every Wednesday and Sunday at 10 morning. Saloon, 12s; fore, 8s.

YARMOUTH—Every Wednesday at 3 afternoon. Saloon, 8s; fore cabin, 5s.

From Custom House Quay.

HULL—Every Wednesday and Saturday, at 8 morning. Chief cabin, 8s; fore, 5s.

Offices, 71 Lombard street, and 37 Regent's circus Piccadilly.

On April 1 was Published, No. III., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for March, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to March 29.

Advertisements for next Number, to be published on April 29, must be sent to insure insertion on or before April 27.

OFFICE—339 Strand.

THE INCREASED TAXATION.

This year Mr Lowe is exactly in the reverse position to that in which he was placed last year. We happened then to travel with a grave-looking, ordinary gentleman, who said, apropos of nothing—"A wonderful man, sir! the Chancellor of the Exchequer is a wonderful man! see what a surplus he has!" Having made some study of finance, we tried to explain that many things might affect a surplus besides the ability of the Finance Minister. We mentioned the state of the revenue, and the inevitable expenditure of the country. But we preached to unwilling ears. our friend had got into his head that the test of a good Chancellor of the Exchequer was to have a surplus, and that the quality of his merit was to be measured by the magnitude of that surplus. This year, on the other hand, Mr Lowe has a deficit, and his reputation will suffer accordingly. He himself says that it will. But we doubt if he, living exclusively in a very clever and intelligent world, can estimate how much it will suffer, how much the common and average man, whose breath is fame, is guided exclusively by the "test of results."

We led our readers, contrary to the pleasant illusions of some of our contemporaries, to expect that this deficit would be about its real magnitude, and that it would be met by a serious increase of taxation. It arises thus—

	£
The expenditure for the coming year, of which we give a table below, is	72,308,000
Estimated revenue	69,595,000
Deficit to be provided for	2,713,000

And upon this Mr Lowe is at once met by two objections. First, Mr Fawcett says that you ought not to spend the money. But the reply to this is that on a Budget night it is not a practical objection. The expenditure has been settled by other votes—by Army votes, Navy votes, and votes affecting policy—and it is no longer open to discussion what shall be the year's outlay. The expenditure, wise or not wise, has been already ordered by Parliament, and unquestionably will be made. The only question therefore now business-like is—How to provide for it? But the second class of objectors meet this. They say—"You do not need to "provide for it, you have already the money in hand; the "revenue which you estimate for next year is much less "than that which you will in fact receive; the deficit "therefore which you exhibit is one of theory only; it will "not really happen." But the reply is—How is it known that it will not really happen? The only basis for an estimate of the future is our experience of the past. Ten years ago Mr Gladstone had a great warning in this matter. Now there has been an enormous increase in the last financial year in the most important part of our indirect taxation; and the revenue then, as now, was in a state of great elasticity.

	£
For 1859-60, the Customs were	24,461,000
— Excise was	20,361,000
	44,822,000

—being an increase of 2,803,000/ upon the previous year. And accordingly for 1860-61 Mr Gladstone, being, as he afterwards explained, advised so to do by the responsible permanent heads of the revenue departments, estimated on this basis. But in fact the—

	£
Customs were less than the estimate	125,000
Excise — —	1,926,000
Together	2,051,000

—and a great deficit was the consequence. And the reason was very simple. The main cause of difference of revenue in different adjacent years is the harvest. Now in 1860 the harvest both for wheat and barley was very bad, and the revenue fell off as we have seen. We hope that we shall have a good or fair harvest in 1871, but it would be madness to be sure of it. We must not speculate on the seasons, though this is really the effect of taking the revenue yielded by a period of cheap corn, and using it as a *datum* of expectation for what *may* be a period of dear corn.

Then, as the deficit is real, we have to ask how it is to be provided for, and here Mr Lowe refers to two suggestions—

one from ourselves, made when all the expenditure of the last financial year was published, except the expenditure of the last five days, when there was a surplus of 2,394,000*l*, and we said some of it might be carried forward to the deficit of this year. But, as Mr Lowe explains, in the last week there was "a race of the departments to get the public money," which we had not expected, and the surplus was reduced to 396,000*l*. But on another occasion we should like to investigate whether such a race can be right, and whether, when there is such a great and competing departmental desire to pay away the public money, some of it may not at times be paid away when it ought not. Still no doubt for this year the money we, not quite without reason, expected is certainly not to be found. The second suggestion is that we should borrow, and to that Mr Lowe answers in words of real wisdom. "If," he says, "it is important to "pay off a National Debt, it is still more important not to "contract it." And to persons who have not much attended to the subject this may seem a trivial observation; but in truth it is far otherwise. The payment of the debt is a pleasant popular doctrine, which people will always cheer in the abstract, though they may not always vote for it when it competes with something they like better. But popular as the payment of debt sometimes is, incurring debt is always much more popular. When there is a surplus people do not much object to use it in repayment—even if they may not wish it; but when there is a deficit every one at heart would be glad to borrow, because he would so escape the taxes that would otherwise be imposed. In such a case as the present, when the revenue is flourishing, but when on a sudden our defensive outlay has increased, a weak Government would have been tempted to borrow; but nobody can say that the present is a weak Government, or that Mr Lowe is a Finance Minister who evades stern facts, or wishes "to make "things pleasant."

Dismissing these suggestions, the mode in which Mr Lowe meets the deficit is this:—

	£
By tax on matches	550,000
By augmentations of probate, legacy, and succession duties, in the end to produce 1,020,000*l* per annum, but this year only	300,000
By increase of income tax	1,950,000
Total additional revenue	2,800,000
Deficit unprovided for	2,713,000
Final surplus	87,000

A large part of these new taxes are not those Mr Lowe said, or almost said, which he would himself have chosen. He would have preferred to remove the exemptions from various taxes, which he estimates at more than 2,000,000*l*. And we own that we wish he had done so. The present is a very strong Government, and could afford to propose what a weak Government never could attempt. But we have heard a shrewd observer of things say—"You must wait till you "get a Tory Government in a minority before you can be rid "of these exemptions. Many of them are advantageous "to agriculturists, and the Whig county members—the part "of the Liberal party who sit for the shakiest seats—would "certainly not be returned again, however they might "themselves vote, if a Liberal Government were to "abolish this local plunder. But Mr Disraeli, when he "is next in office, will persuade all his friends to "abolish them, and the real Tory counties will have "no remedy, for they can only revenge themselves by electing "Whigs; and that they never will." We do not say that this is precisely true; but there is much truth contained in it. Every species of exemption from taxation is objectionable not only financially, but politically. It creates a favoured interest, who die hard, and strive to prolong their undue advantage. And scarcely any Parliamentary Government can safely attack a coalition of favoured interests.

Mr Lowe has therefore relinquished the policy which he would have preferred, and imposed three taxes which, taken together, are in his mind only second best.

The first—the tax on "matches"—has to an English mind great novelty, and if it is found to be practicable we shall much approve of it. Every proposal which makes the more numerous class of society—collectively a very wealthy class—pay any part of the taxation, is in the present day most valuable. As things stand, at every period of surplus and remission of taxes we divide that surplus equally between direct taxes and indirect. But when, for a temporary purpose, new taxes have to be imposed, we almost always add exclusively, or nearly so, to the direct. It is much easier and, on the whole, better to do so. We gave up 2,350,000*l* of sugar duties last year. But to impose those duties again would be exceedingly difficult. It would derange trade and impoverish the country to do so. Still in abstract theory it is right that the lower classes should pay their quota not only to the permanent minimum, but to the variable increments, of our taxation; and if by a tax on matches, which the poorer classes buy as well as richer, something can be extracted from the immense body who escape so easily, every sound financier will rejoice.

But we own that we are not altogether sure that such a tax is practicable. It is true that it has been imposed and succeeds in America; but it is with some fear and trepidation that we hear of America being taken as a financial model. The internal revenue there was unknown before the Civil War, and was then created by a single Act, which, in Sidney Smith's phrase, "taxed every act of man from the cradle to the grave." Part of this has now been repealed, but the amount still received is very large, and is levied in ways which an Englishman would think excessively arbitrary. Here too, as everywhere, Americans go straight to the main point, without considering lesser objections. If the revenue is raised they do not care about the evasions it causes, or the trade it stops. The American House of Representatives has little financial authority, and it is difficult for individual complainants to be heard; but the English House of Commons is financially omnipotent, and many of the members are always wanting a grievance to remedy. A tax here cannot bear a fiftieth part of the "objectionableness," so to speak, that it can in America. And we own we do not well see how, with our nicer habits, the tax on matches can be worked.

First. There is an export trade in certain kinds of matches. If there is not to be a drawback the trade will be killed, for it will have to compete with foreign matches, which pay no such duty. The tax proposed is cent. per cent. upon the price, so that a trade so taxed cannot compete with one untaxed. But if there is a drawback great difficulty will arise. The tax is to be on a box of a hundred matches; but suppose the box to be exported contains only fifty, in that way an ingenious person may get two drawbacks.

And this will be the more likely to happen because such a tax will raise the value of the article not only by the amount of the tax, but a fraction more. Much more capital must be employed in the trade, and there will be an interest on this as well as the cost of the stamp. But to charge ½d a box to compensate for that interest would be excessive, and would reduce unnecessarily the number sold. The easier way would be to reduce the number of matches in the box—to let it be, as Mr Lowe says, "not more than 100, but as many "less as you please." But if the manufacturers please, they may obtain the drawback on a hundred matches, export fifty, and sell fifty here substantially without duty.

It will be said—"Make it penal to sell or export a box con-"taining any number of matches save a hundred, or "multiples of a hundred." But there would be the greatest difficulty in working this, and the greatest disposition to evade it. Almost the only way in which such a tax can be worked is by diminishing the number in each box. Besides the duty there is the interest on the capital locked up in paying the duty; something must be added to the price of the article for this. But a halfpenny a box would be too much for this purpose, and would exceedingly diminish the number sold, and there is practically no less coin than a halfpenny. The best and almost the only practicable expedient is to vary the number of matches in a box, and if that number varies the "drawback" on exportation will be a nice source of fraudulent business.

Again, there is an import trade in certain kinds of matches. Who is to know the number of matches in the in-coming box? Suppose a clever person can put 150 lean matches into a box intended for 100 common matches, then he will sell the 50 extra matches at a profit, as compared with the honest home manufacturer, who pays on the entire hundred.

We own that the tax seems to us defective in principle. It is requisite for a good tax that the article on which it is imposed should be easily ascertainable. But here the duty is on a box of 100 matches. And practically it is not possible to find out what the number of matches in a box is. And

besides there is the great question—What is a "match?" Is a piece of wood with igniting matter at both ends one match or two. If one, what is a "fusee," which has many igniting parts? If it is two, how can you ever know, except by accurate counting, the number of matches in a box?

We own, too, that we much dislike the idea of a tax entailing these minute considerations. The actual operation of it is sure to create many vexations which no one could foretell, and the tax is therefore sure to be more unpopular than anyone would imagine. And especially will it be so in this case, because the magnitude of the match trade will be greatly lessened, and the number of those employed in it will fall off. As many of the persons so employed are very poor, or are children, there will be a coalition of objectors. The philanthropist will object on the part of those who cannot speak for themselves, and the capitalists will object for themselves because their own profits are decreased.

Secondly. As to the duties payable on the devolution of property, Mr Lowe's changes are rather technical, and cannot be fully understood without a careful comparison of the new and old rates of duty, which we print elsewhere. But the main changes are two—

1st. He assimilates the probate duty on wills and that on letters of administration—that is, he imposes the same duty whether people die testate or intestate; and the new scale is for ordinary estates (say under 50,000*l*) less in case of intestacy than before, but in case of testacy much as before, though rather more nicely adjusted. Above 50,000*l* the new scale is higher than the old in cases of testacy, though much as it was in cases of intestacy. Roughly speaking, under 50,000*l*, the old scale for testacy has been adopted and made universal; above 50,000*l*, the old scale for intestacy has been adopted, and also made universal. On this we have little to say, except that all uniformity is good, but that as the reduction in cases of intestacy is great, we doubt its bringing much money.

Secondly. As to the legacy and succession duties, Mr Lowe doubles the duty on property descending to the nearest class of relatives, and adds one-half per cent. to the duty on property descending to the next nearest. The duties on all other property he leaves as they were. To this, in itself, we do not object, though perhaps we would rather have let the legacy and succession duties remain as they were until they were handled as a whole and philosophically. At present they are full of anomalies, and we should not have been disposed now to alter this particular one. The object, of course, is to get money by taxing the large amount of property which descends straight from father to son. But this class of duties is not one of which the yield can be very certainly relied upon. As Mr Lowe mentions, the original estimate of the succession duty was utterly erroneous. And the part of the duties now dealt with is particularly incalculable, because father and son are exactly the persons most likely to make such arrangements by way of gift while the father is yet living, and so defeat the tax. The heavier the tax the more likely it is to be so defeated. As a money-getting expedient its yield may perhaps be considerable, but the reaping that yield is dubious.

The third resource—the increase of the income tax—every one expected, but not the amount or the mode. Having exhausted the other resources, Mr Lowe wants 1,950,000*l*, and as this cannot be exactly obtained by charging the income tax in *pennies*, he is obliged to look out for some other way of charging it. His difficulty is in great part new. Mr Gladstone invented an ingenious plan of keeping the income tax for the first half of the financial year, and taking it off only on the second half. But as it is now all collected at once, this cannot be done. Unless some new mode is adopted only *one penny*worth of income tax can be collected at once; and that is now as much as 1,525,000*l*, which is clearly too great a unit for the most shifting and variable of all our taxes. He therefore proposes to charge it not at a particular poundage, but at a certain rate per cent., and thinks this will augment the ease of calculation. He says—"We are familiar with the "calculation of interest, having had to receive a great deal of "money as interest, and, I dare say, having also had to pay "interest. It is not a very difficult rule that to ascertain the "amount of interest you should multiply the sum on which "you have to pay interest by the amount of the interest, and "divide it by a hundred. Substitute for the word interest "the words income tax, for the purpose of ascertaining the "amount of income tax you have to pay. There are numerous interest tables which will inform you of the amount of "your income tax." But it is evident that Mr Lowe is here thinking only of a man who is computing what he will have to pay on his own income. But this is a very small part of the income tax calculations, and one, moreover, which it is unnecessary to do for yourself, as the tax-collector does it for you. The really difficult calculations are where deductions have to be made—say where a mortgagor has to pay 26*l* 5s 9d half-yearly to a mortgagee, and wants to know what income tax to deduct from it. It is not a very easy sum to say what should be the deduction at 2½ per cent.—the rate Mr Lowe proposes for next year; and none of the common tables would assist the calculator, for they do not contain that percentage. Such deductions are innumerable, for, not to mention other cases, every company which has borrowed must make them.

The best way of meeting the difficulty would be to charge farthings in the income tax if necessary. 1¼d in the pound is not a difficult sum to common persons, and much easier on small amounts than 2½ per cent. Mr Lowe says he wants 8,000,000*l*,—5¼d on the income tax would give it him almost exactly.

To sum up, we are sure that Mr Lowe is most right in estimating for a deficit, and that he is most right in not borrowing for it. We believe that there is much that is good and excellent in his proposals for meeting it, though we think also those proposals might, without much difficulty, be improved in several important respects.

Estimated Expenditure, 1871–72.

	£
Interest of debt	26,910,000
Other consolidated charges	1,820,000
Army (including abolition of purchase)	16,452,000
Navy	9,756,000
Civil service	10,726,000
Revenue departments	5,076,000
Packet service	1,148,000
Telegraphs	420,000
Total expenditure	72,308,000

First Estimate of Revenue 1871–72.

	£
Customs	20,100,000
Excise	22,420,000
Stamps	8,750,000
Taxes	2,330,000

Post office	4,670,000
Telegraphs	750,000
Crown lands	375,000
Miscellaneous	4,100,000
Total revenue	72,395,000
Final surplus	£87,000

THE BUDGET RESOLUTIONS.

Lucifer Matches.

Motion made, and Question put, "That, towards raising the Supply granted to Her Majesty, there shall be charged and paid for and upon every box or other enclosure of Lucifer Matches, Fusees, or other Matches prepared so as to be capable of being ignited by friction or otherwise than by the application of actual fire or heat (hereinafter called "Matches") whether manufactured in or imported into the United Kingdom, which shall be sold, or exposed to sale, or be offered or kept ready for sale in the United Kingdom, on or after the 10th day of May, 1871, a Duty of Excise as follows (that is to say):—

	£	s	d
Where the box or other enclosure contains Matches which, independently of the substance for ignition, are composed wholly of wood—			
If the number of Matches therein contained does not exceed 100	0	0	0½

	£	s	d
If the number of Matches therein contained exceeds 100, then for every 100, and also for any fractional part of 100, of such number	0	0	0½
Where the box or other enclosure contains matches which, independently of the substance for ignition, are composed wholly or partially of a material other than wood—			
If the number of matches therein contained does not exceed 50	0	0	0½
If the number of Matches therein contained exceeds 50, then for every 50, and also for any fractional part of 50, of such number	0	0	0½

And the duties upon boxes or other enclosures of Matches shall be denoted by, and collected by means of, Labels to be affixed upon such boxes or other enclosures.

Succession Duties.

1. That it is expedient in lieu of the Duties now payable to Her Majesty, to grant to Her Majesty in respect of every succession, according to the value thereof, the Duties following (that is to say):—

Where the successor is the lineal issue or lineal ancestor of the predecessor, a Duty at the rate of two pounds per centum upon such value;

Where the successor is a brother or sister, or a descendant of a brother or sister of the predecessor, a Duty at the rate of three pounds ten shillings per centum upon such value;

Where the successor is a brother or sister of the father or mother, or a descendant of a brother or sister of the father or mother of the predecessor, a Duty at the rate of five pounds per centum upon such value;

Where the successor is a brother or sister of the grandfather or grandmother, or a descendant of the brother or sister of the grandfather or grandmother of the predecessor, a Duty at the rate of six pounds per centum upon such value;

Where the successor is in any other degree of collateral consanguinity to the predecessor than is hereinbefore described, or is a stranger in blood to him, a Duty at the rate of ten pounds per centum upon such value.

Legacy Duties.

2. That it is expedient, in lieu of the Duties now payable to her Majesty, to grant to her Majesty in respect of every legacy, residue, and share of residue, of the personal estate of any deceased person, the duties following (that is to say):

Where any such legacy, or residue, or share of such residue, has been given, or has devolved to or for the benefit of a child of the deceased, or any descendant of a child of the deceased, or to or for the benefit of the father or mother, or any lineal ancestor of the deceased, a Duty at the rate of two pounds per centum on the amount or value thereof;

Where any such legacy, or residue, or share of such residue, has been given, or has devolved to or for the benefit of a brother or sister of the deceased, or any descendant of a brother or sister of the deceased, a Duty at the rate of three pounds ten shillings per centum on the amount or value thereof;

Where any such legacy, or residue, or share of such residue has been given, or has devolved to or for the benefit of a brother or sister of the father or mother of the deceased, or any descendant of a brother or sister of the father or mother of the deceased, a Duty at the rate of five pounds per centum on the amount or value thereof;

Where any such legacy, or residue, or share of such residue has been given, or has devolved to or for the benefit of a brother or sister of a grandfather or grandmother of the deceased, or any descendant of a brother or sister of a grandfather or grandmother of the deceased, a Duty at the rate of six pounds per centum on the amount or value thereof;

And, where any such legacy or residue, or share of such residue has been given, or has devolved to or for the benefit of any person in any other degree of collateral consanguinity to the deceased than is above described, or to or for the benefit of any stranger in blood to the deceased, a Duty at the rate of ten pounds per centum on the amount of value thereof.

Probate Duties.

3. That, towards raising the Supply granted to her Majesty in lieu of the Stamp Duties now chargeable upon

Probate of a Will and Letters of Administration to be granted in England or Ireland;

Inventory to be exhibited and recorded in any Commissary Court in Scotland of the estate and effects of any person deceased:

Stamp Duties shall be charged and paid according to the following scale (that is to say):—

Where the value of the personal estate and effects of the deceased person

And where such value shall exceed 50,000*l*, then, in addition to the said duty of 900*l*, for every full sum of 10,000*l* of such excess, and also for any fractional part in the amount of such excess				.....	200	0	0

Income Tax.

4. That, towards raising the Supply granted to Her Majesty, there shall be charged, collected, and paid for one year, commencing on the sixth day of April, one thousand eight hundred and seventy-one, for and in respect of all Property, Profits, and Gains mentioned or described as chargeable in the Act passed in the sixteenth and seventeenth years of Her Majesty's reign, chapter thirty-four, for granting to Her Majesty's Duties on Profits arising from Property, Professions, Trades, and Offices, the following Duties (that is to say):—

For every one hundred pounds of the annual value or amount of all such Property, Profits, and Gains (except those chargeable under Schedule (B) of the said Act), the Duty of forty-four shillings.

And in respect of the occupation of lands, tenements, hereditaments, and heritages chargeable under Schedule (B) of the said Act,

For every one hundred pounds of the annual value there of
In England, the Duty of twenty-two shillings, and
In Scotland and Ireland respectively, the Duty of sixteen shillings.

And a Duty at the like rates respectively for any fractional part of such annual value or amount, or such annual value, exceeding one hundred pounds, or any multiple of one hundred pounds.

Subject to the provision contained in section three of the Act of twenty-six Victoria, chapter twenty-two, for the exemption of persons whose whole income from every source is under one hundred pounds a year, and relief of those whose income is under two hundred pounds a year. [*Monday, 24th April.*]

THE OLD PROBATE DUTIES.

For the sake of comparison we subjoin a statement of the Probate Duties under the existing law:—

We had intended here to discuss the scheme for the liquidation of the public debt, but are obliged to defer it till next week.

THE INCONSISTENCIES OF THE COMMUNE.

The worst sign for the ultimate pacification of the agitation in France is this,—that while the agitators are evidently possessed of a wonderful energy, an energy that will not flinch from the greatest sacrifice—the wholesale sacrifice of life itself,—they are not only not masters of their own designs, but are even filled with passionate aspirations after the most contradictory aims, aims which a very little of that reflection which ought to precede, instead of following, revolution, would show them to be mutually antagonistic, nay, absolutely destructive of each other. Take especially the feeling of Parisians about Paris. An able, and as the *Daily News* tells us, a thoroughly scientific man, "some of whose works have 'been translated into half-a-dozen European languages," is quoted in the *Daily News* of Thursday last, as having expressed this view of the origin of the civil war:—"This "terrible, this fratricidal war is the work of the Assembly. "It would have sufficed to have definitely proclaimed the "Republic, instead of accepting it provisionally, and hampered with innumerable conditions—to have removed the "Assembly at once to Paris, and recognised its municipal "rights; and by a single law upon the vexed questions of "*échéances* and rents to have called upon the provinces "which had escaped from the invaders to bear some part of "the burden thrown upon Paris during its long siege..... "Instead of this, the Assembly has let slip no opportunity of "manifesting its hatred of Paris and of the Republic. It "prevented Garibaldi from speaking; it howled down Victor "Hugo; it let it be known, by the mouth of those whom it "allowed to speak, that its intention was to decapitalise Paris; "and when in the Committee rooms it was replied to those "overbearing orators—'You wish, then, for civil war?' "They answered—'If civil war arises, if Paris rebels, we "'will crush her.'"

Now this sounds highly reasonable and moderate; but it evades the great difficulty. No doubt if Paris had been in general harmony with the feeling of the country, the wish to choose a new capital, and the want of forbearance shown to the Deputies of Paris would have been pure insult. But is it so? What are the motives which chiefly animated the Parisians in their wish to have the National Assembly at Paris? Two at least,—legitimate pride in their own city as the great capital of France; and also, in a great measure no doubt, the very natural and legitimate desire for the commercial advantages of this great position as the centre of all the financial and economical operations of one of the greatest countries of Europe. Now we have no fault at all to find with either of these motives. They are quite right and inevitable states of feeling, and we should condemn the Assembly most severely if it had been indifferent to these perfectly legitimate aspirations of the Parisians without any adequate cause. But surely the writer of the letter from which we have quoted knew that the Assembly, by adjourning to Paris and following the course he proposes, would have placed itself under influences most dangerous, if not certainly fatal, both to the national and to the commercial eminence of Paris. Paris no doubt wishes to be recognised as the first city of France, and as her inevitable capital. Paris also wishes to have all the wealth of France circulating through her banks and counting-houses. But unfortunately Paris also wishes for two other political objects sufficiently dissimilar from these. She wishes for a *federation* of the great cities of France amongst each other and with the various country districts. And she wishes for a series of communistic or quasi-communistic experiments on the distribution of wealth. Now, how are these objects to be reconciled with those others? If Paris is to be capital of France, she cannot be the leader of a great federation of cities with guaranteed local liberties. An independent and impartial Government clearly could no more reside within the most powerful of all the confederated cities and districts of France, than an independent and impartial King in mediæval times could reside within the castle and under the power of his most imperious and powerful baron. If there is to be federation among equals, the Government that pretends to be a Central Government must act like the Government of the United States,—remove to a comparatively unimportant place, where it can act freely without any fear of undue influence. If Paris is to be the capital in the old sense,—the central point of France, morally and politically,—it must be subject to the will of France. You might almost as well transplant the Government of Great Britain across the Channel, as place the Government of France in the city which was least in unison with the thoughts and hopes of France, and yet deny that Government all power to control the city whenever that city came into collision with the views of France at large. Yet that is precisely what the revolutionists in Paris wanted. They desired to keep the Central Government in Paris, but to deny it all power of disputing with Paris concerning the will of France. They demand to see Paris mistress of herself, and chief propagator of the Federal idea, and yet to have the Legislative Assembly of France—France that has such different and opposite views—at the feet of Paris. If the Danish Government had been requested to remove to Kiel, when Kiel became the great naval harbour of North Germany, there would have been hardly anything stranger in the request than in the demand that the Government representing the French peasants should wish for no protection beyond that of the Parisian National Guards, and submit to be indoctrinated by the citizens of Belleville with their conceptions of the rights of proletaires. The very conception of federation which Paris has put forth, implies the removal of the seat of Government from any overwhelming local influence. Why, if even in Canada the jealousy felt by Quebec of Toronto and by Toronto of Quebec were far too great to admit of having the capital of the Dominion permanently in either city, it is simply ludicrous to call out for a federation of the great cities with the country districts of France, and ask at the same time that the Federal Government should reside in the one great city which has been wont to carry its way against all the rest of France, even when there was a great army to throw its sword into the opposite scale. The proposal to decapitalise Paris would have been both cruel and mad if Paris had been decently homogeneous

in political creed with the rest of the country. But when Paris is propounding a bran new creed of its own, of which the first article is the necessity of giving greater weight to local centres, and assigning to the central government the duty of uniting those centres, there is something strikingly grotesque in the proposal to place that central government in the midst of influences overwhelmingly and fanatically local. This is the first great inconsistency in the wishes of the Parisian leaders.

But the second is even more serious. Paris revolts at the prospect of ceasing to be the economical and commercial centre of France, and yet Paris is bent beyond everything on trying communistic experiments in relation to the ultimate division of the products of labour. Now can any two cherished aims be more certainly destructive of each other than these? If a small village or a small rural district likes to try a bran new system of proprietary principles, we should be very sorry to see it deprived of the power. Such experiments are often quite as instructive in their failure as more conservative experiments are in their success. No doubt it is a matter of great importance that society should not feel itself absolutely and finally limited to economical arrangements which, though they are far the best we have yet discovered, leave so much sense of grievance behind them as do the present arrangements of commercial Europe. But then to propose that the very spot on which the new experiments should be tried should be the centre of all the complicated fabric of a great nation's manufactures and commerce—the very spot where any failure or derangement of machinery is sure to cause wide-spread ruin through the whole nation—is a proposal of colossal and amazing folly. If Paris wants to try new experiments on the distribution of wealth, to have new laws of her own which will discourage the accumulation of great capitals in a few hands, and even strike, perhaps, at the idea of strict individual property in anything except wages and income, we do not positively say that it should never be allowed; but we do positively say that it should never be allowed till Paris has ceased to be the meeting point of all the streams of wealth by which France is fertilised. If you have a very doubtful experiment in telegraphy to try, do not at least let it be tried for the first time where, if it fails, it will put all the telegraphic lines of the whole kingdom out of gear for months to come. If you wish to try a new and very dangerous explosive power do not try it for the first time at a spot where, if it proves very destructive, it might destroy an army and ruin a city. Yet this is just, as it seems to us, what the Parisians wish. They are incensed to the last degree at any question as to a new commercial capital for France, and yet in the old commercial capital they want to try an experiment that might annihilate French commerce. Surely this extraordinary contradiction of purposes, this antagonism of the central ideas at work in the Paris Commune, is anything but a good omen for the future of France. The cities of France, and especially the greatest city of all, *cannot* be contented, because the most inconsistent wishes and hopes are fermenting there, and fermenting with a display of heat and force which is full of danger. Even if some of them were gratified, the others would be painfully thwarted; and with any of them painfully thwarted, Paris, and Lyons, and Marseilles, would still be centres of unrest, and leaders of revolution.

THE CONDITION OF WESTMEATH.

The Westmeath Blue Book more than confirms the statements upon which the Government based its motion for a Secret Committee. In Westmeath, and one or two neighbouring districts, the laws of the country are undoubtedly overruled and modified by the action of one or more secret societies. And these societies govern every transaction of life. Landlords cannot evict, and employers cannot dismiss a servant, except under the revisal and sanction of these irresponsible associations. If they attempt to act otherwise their own lives are in danger, and they are additionally frustrated by the difficulty of finding agents to enforce their will, or persons to succeed a tenant or servant who has been got rid of. When crimes are committed at the bidding of these secret societies, evidence is not procurable, and juries, if they have evidence, will not convict. The facts as to such a social state are well worth putting on record, if only for historical purposes, and it would have been much to be regretted if the inquiry, as at first intended, had been secret.

The fact of the existence of a secret government in Westmeath is fully brought out. The evidence contains long catalogues of the unpunished murders and outrages which have taken place during recent years, and curious statements as to the recent cessation of open crimes, because the predominance of the secret societies is now practically undisputed; but one or two instances of the affairs which the societies regulate will show best the nature of the intimidation. Perhaps the most striking is that furnished by Mr Morris Reade, a county magistrate, resident at Kilbeggan, in Westmeath, as to the vacancies in the occupancy of three farms in the neighbourhood. One, he said, had been vacant for 12 or 14 years. A tenant was evicted for non-payment of rent in 1857, but first one successor—Edward Kelly—was shot dead on the 6th of February, 1858, and a second successor, named Jessop, on the 30th of April, 1859—both after receiving warnings. Since then the landlord had been unable to let the farm, and it is now used for "agistment "purposes." In another case — the third mentioned— the tenant was evicted in 1868, also for non-payment of rent. The farm "was then let to a neighbour, who handed "it over to his brother, and he, or rather his mother-in-law, "immediately got a threatening letter about it; an armed "party went to his house, and ordered him to give up the "farm." The farm had not been let since, and as it was too small to turn to agistment purposes, it was "growing nothing "but weeds." The second case mentioned by Mr Reade however is perhaps the most significant of the three. It is the case of a farm which became vacant in 1863 from the non-payment of rent. First of all the agent got threatening letters, telling him to pay more money to the outgoing tenant, and afterwards, when the tenant went to Australia, a succession of letters, dictating "who he was to give the farm to, not "mentioning any person, but speaking of a person in his "parish and a neighbour." Afterwards people came to look at the farm and were threatened, and a man had possession of it a short time in 1869, and was shot at. The agent was also fired at. The rest of the story we must give in the witness's own words:—

Chairman]—In the meantime, what has become of the farm?—The agent endeavoured to take in grazing cattle, not only from people in the neighbourhood, but from the surrounding district, and he immediately got threatening letters, and threatening notices were posted, telling the inhabitants of the neighbourhood that the farm was solely for the immediate neighbours, and that nobody else should be allowed to send their cattle there; so he had a few cattle taken in on agistment, and has received about 15s or 18s an acre all round.

Which, I presume, is far below its value, I believe?—That is far below its value.

What would be about the value?—I think he has been offered 25s or 27s an acre for it.

He has been actually offered that rent?—Yes, but it was by a certain party.

A party who knew that he would not be objected to?—Yes.

And who knew that he could take it with impunity?—Yes.

This case of the succeeding tenant nominated by the secret association furnishes the most singular proof of the association's power; but the whole three cases are remarkable.

But the terrorism is not confined to land. The same witness mentions the case of a man, Dowling, who was murdered because he had succeeded a care-taker employed by a miller in the neighbourhood, who was put away. The employer in this case received threatening letters, saying that the new man's life was in danger; but the man himself received none. Another striking instance is furnished by Mr Cusack, the Chairman of the Midland Great Western Railway of Ireland. The railway runs for 40 miles through Westmeath, and the company are hindered in the selection of their local servants by the regulations of a secret body. The murder of Mr Anketell, the station-master at Mullingar, will be remembered, and the cause, as Mr Cusack explains, was his dismissal of unsuitable servants. There have been numerous minor outrages, beatings, and the like; and at the present moment there is the case of a labouring man who was arrested in January by the authorities under the Peace Preservation Act, and whose place no one will take:—

We cannot fill the place now; he has only been out of gaol a fortnight. At the 68th mile the inspector was reported unfit for his work, and the place was offered by the engineers to several others, but they were all warned that they should not take it, and we could not get any other to take his place, and this inefficient man is still inspector over that portion of the line.

The same witness states that threatening letters are often

sent to the employés of the company, and the existence, or supposed existence, of a conspiracy interferes very much with the management.

Finally, as regards the fact of intimidation, there is one matter which is rather gingerly dealt with by the witnesses and the Committee, but behind which we fear there is a good deal. The secret associations of Westmeath, whatever they are, levy a species of blackmail upon the more respectable classes. Not only are some of the farmers made to contribute half-crowns at fairs, but there is a suspicion of blackmail being levied on landowners. Mr Reade, whose evidence we have already quoted, states that he does not know whether gentlemen pay anything for protection to the associations; but he adds significantly:—

The only thing I know is, that a gentleman has found recently, after the lapse of 17 or 18 years, that it was a reasonable thing to pay a man compensation for a farm from which his father had been evicted 17 or 18 years before.

That was a conclusion, I presume, to which he was brought by a threatening letter?—Certainly; he could have come to that conclusion by no other means, I think.

And if landlords do not pay blackmail in money, it would certainly appear that the equivalent is exacted from them. Mr Mooney, the clerk of the Crown for Westmeath, asserts it to be "commonly supposed" that men of considerable influence "retain persons who are supposed to be Ribbonmen in "their confidential employment." This is done to ensure their own protection, and so that if there is anything going wrong they will hear about it. Mr Mooney states that the acts of the magistrates are subject to the system of terror. It is supposed that in small offences—assault cases, and the like—the Ribbonmen frequently get off more tenderly than people who are not tainted with Ribbonism. The witness does not say of his own knowledge that the supposition is well founded, but he has "not the slightest doubt in "the world" that it tends to increase and strengthen the secret organisations.

It would be useless to add anything to this picture of Westmeath society, although much could be added about the devices of the secret associations to maintain secrecy, the custom of bringing men from a distance to commit particular outrages, the knowledge which the police acquire as to the leaders, but are quite unable to use from the utter want of "legal" evidence. An active society banded against the law, supported by a natural prejudice against informers, and a certain amount of real sympathy, is able to diffuse terror over an entire community. It is unnecessary to add that as a consequence of the destruction of confidence, the employment of labour is checked, and landed property in Westmeath is now become almost unsaleable.

Secondly, as to the causes of this state of things, the Blue Book contains ample materials. The main cause is the land. It is true that the landed gentry who gave evidence deny that the Westmeath tenantry have been worse treated or are more miserable than the tenants in other parts of Ireland where secret associations do not exist. Apparently, also, the Bishop of Meath, who spoke severely of wholesale eviction and landlord oppression, accusing personally some of the landed gentry who had been examined, indulged in not a little exaggeration. But witnesses, whose impartiality may be trusted, do not hesitate to speak of the land grievance. Mr Mooney, the clerk of the Crown, has no doubt that the organisation was first intended to control the acts of the landlords, and secured the sympathy even of the large tenants. "My opinion," he says, "is that those large tenants, and those "persons of whom I have spoken, a great many of whom had, "most unquestionably, nothing in the world to do with the "organisation, considered that not having any redress by law "in the event of their own landlords either dispossessing them, "or raising the rents, the acts of the organisation had the "effect of preventing their landlords from exercising the "strict rights of property in their own regard.—They con-"sidered it a check upon eviction?—They considered the "acts of the organisation a check upon eviction or the raising "of rents."

But this will hardly account for the extension of the terrorising system to railway companies and other employers, and the intensity of the system in Westmeath. The truth appears to be that in Westmeath we have at once an extreme illustration of the antagonism of classes in Ireland, and of the persistence in the Irish mind of the ancient notion of a *status* for each man in society, instead of the modern notion of freedom of contract in dealing. The only matter for surprise is that what has happened in Westmeath has not happened in many other parts of Ireland. Still it is probable that very slight accidents in past times, a little extra severity on the part of a few landlords, a little excess in violence of treatment, may have sufficed in some particular district to intensify the jealousy and distrust of the lower classes towards their superiors in station. Hence the disposition to enforce "tenant right" would be keener and more unscrupulous; and the association remaining more vigorous there than elsewhere down to a time when employment has become more varied, would be more likely to extend to these employments than in other parts of Ireland where the habit of association is weaker. At any rate, such an association could have no leverage unless among a people which had not yet received the elementary notions as to the expediency of freedom of contract. We have already mentioned Mr Cusack's difficulty with the railway, but the extension of the action of "secret association" to other employments is not new. It has been in existence for many years on a canal owned by the railway—the men having a secret society, and "having been allowed for years to have "all the appointments to themselves." They signify their wish it seems to the engineer, who makes the recommendation to the directors, and that is all they know about it. Mr Cusack tried to change the system, but there was no alternative:—

The reason I wish to change it is that they named a man who had been dismissed upon a former occasion; I objected to his appointment, but the engineer said, you must appoint this man, or you will have the canal over the country.

I suppose they could cut the canal in the night without any difficulty, if they choose?—Yes, they might cut the canal; the man could ruin us in a night, so that we could not pay a dividend.

Such an odd arrangement could only have sprung up in a community where the notion of capital freely seeking employment was unknown, and the jealousy felt by the labourer towards his employers was extreme. In a community where sympathy between the two classes existed, the Irish labourer or small farmer would naturally have been a retainer of some great man; but the sympathy not existing, and the Irish ideas being still those of an old state of civilisation, the result is a singular species of communism supported by terror.

The question of remedies must be full of difficulty, and we do not wonder that it has puzzled the Government so much. It seems to be very doubtful however whether there is that extensive Ribbon organisation, which some of the witnesses believe in, the disease being most probably local; and if so the chance of improvement is more hopeful. There is a good deal of testimony that the Land Bill is working well, beginning now to be popularly understood; and as the breach between classes is gradually healed by this and other measures, the aliment of the so-called Ribbonism will be removed. The material progress of the whole country, acted on by English markets for produce on one side, and the American demand for rude labour on the other, must very soon conduct Irish society to a position in which dismissal from employment and eviction will be no such penalties as they are now. These are the permanent causes to which we must trust for a remedy. But there is also some good evidence that the process may be accelerated by anything that would break the bad traditions of the past, and give a clear space for a little to the new influences. Such a remedy would be the temporary suspension of the Habeas Corpus Act, enabling the police for a time to meet terror with terror. It would possibly be sufficient to arm the Irish executive with the power of proclaiming a suspension of the Act within certain districts. The great thing is to give the executive power to act promptly—the continual reference to Parliament causing most fatal delays. This is the special remedy which is clearly pointed at by the evidence, and the public committee will not have been useless by showing to all what the necessity is, and that it is really most exceptional. These things would not have been so apparent if the Government had asked for farther powers upon its own statements alone.

BUSINESS NOTES.

Local Taxation.—A discussion, which mainly turned on one point of considerable interest, took place on Tuesday evening at the reading before the Statistical Society of Mr Palgrave's able paper on local taxation which has just won the Tayler prize essay awarded through the agency of the

Society. On account of its length the paper was only partly read, and we must defer our notice till we have it before us in a complete form; but as several Members of Parliament who have taken part in the discussion of the question, including Sir Massey Lopez, Mr Read, and Mr Pell, were present and took part in Tuesday's debate, the treatment of the point we refer to deserves some notice. Sir Massey Lopez and others complained that Mr Goschen in his recent report had "mixed up" town and rural rates to the prejudice of the country. He had attempted, they said, to show that the increase of rates was only in towns, but he could only do so by including general district rates and others which were locally beneficial. If, they said, he had dealt with the Poor and County rates—the rates which are not locally beneficial—a different result would have been shown. We fear that the gentlemen who make this complaint have not read Mr Goschen's report. It is true that in one part of the report he does mix up the rates, in order to show that the general increase, of which so much has been heard in recent years, is mainly in the class of rates which are locally beneficial. But so far from mixing up the rates everywhere in his report, Mr Goschen has, for the first time, made a clear distinction of the kind now contended for by Sir Massey Lopez, and has shown both that the rate in the £ of the old rates has diminished, and that the increase in the amounts levied has been in the towns. As we showed in our recent article, the rates per £ (1) of the expenditure for poor relief, and (2) of the Poor rates with Church and Highway rates* have diminished as follows:—

	Rate per £	
	Poor Relief.	Poor Rates, Including County and Police and Church and Highway Rates.
	s d	s d
1803	3 4½	4 5¼
1813-15 (average)	2 4¼	3 1¾
1817	...	3 10¾
1827	2 5¾	3 8
1841	1 6¼	2 7
1847	1 7	...
1850	1 7	2 7
1856	1 8	...
1866	1 4½	...
1868	1 6	2 6¼

As compared with the period before 1841, the decrease in 1868 is very striking—all the more so that in the old times the rates were not fully ascertained, while in 1868 the account is complete. Since 1841 there has, at any rate, been no increase of the rates in the £. These figures are certainly enough to prove that Mr Goschen has taken care to show the effect of separating the rates, as well as of mixing them up. But this is not all he has done. He compares 1868 with 1841 still more closely as regards the Poor and County rate, and finds (1) that

	£	£	
Rateable value has increased from	62,540,000	to 100,668,000,	or 61%
Poor and County rates have increased from	6,351,000	to 10,440,000,	or 64%

—showing a merely nominal increase of the rate in the £ from 2s 0¼d to 2s 1d. But (2) this increase is demonstrably in the four counties where towns have mainly increased—Lancaster, Middlesex, Surrey, and the West Riding of York—the rates having actually diminished in all the rest of England and Wales. In these four counties

	£	£	
Rateable value has risen from	17,812,000	to 35,565,000,	or 100%
Poor and County rates have risen from	1,681,000	to 3,777,000,	or 125%

—the rise in the rate per £ being from 1s 10¾d to 2s 1½d. But in the remainder of England and Wales—

	£	£	
Rateable value has risen from	44,727,000	to 65,103,000,	or 46%
Poor and County rates have risen from	4,670,000	to 6,663,000,	or 43%

—the *fall* in the rate per £ having been from 2s 1d to 2s 0¼d. The small apparent increase therefore in the rate per £ of the Poor and County rates is due to a real increase within very narrow limits, the remainder of England and Wales having rather gained. Of course reckoning earlier years, as Mr Goschen also does, the results are still more astonishing; but the proof is incontestable that, even comparing 1868 with the low rates of 1841, the so-called old rates have "as a "whole" hardly changed, and in the rural parts of England have been diminishing. Mr Goschen farther shows that comparing 1861 with the present time, the average rates in town unions, whether as respects all rates, or Poor and County rates only, or the rate of expenditure on poor relief, have increased, but in rural unions have diminished. Lastly, he furnished very striking evidence of the diminution in the burden in the rural parts of England. The amounts of Poor and County rate actually levied on lands at various times are believed to be as follows:—

	£
1826	4,795,000
1833	5,434,000
1841	3,316,000
1851	3,002,000
1868	3,466,000

—which shows practically no change since 1841, although the value of land has so much increased, while the diminution in the burden, as compared with 1826 and 1833, is enormous. All this is in respect of the old rates, and whatever may be made of the figures it will not do to repeat the charge that Mr Goschen has "mixed up" the rates. He has devoted much labour in his report to the separation of them, and the evidence most clearly proves both that they have diminished greatly during the last half-century, and that the diminution in the rural parts of the country has been very marked.

* Including the County and Police rates, both when levied with the Poor rates and when separately levied.

Railway Accidents—The South-Eastern Railway System of Precaution, as Described by Mr Alfred Watkin.—In the course of a short and exceedingly well-written pamphlet, Mr Alfred Watkin—a gentleman who speaks from large practical experience of train working and supervision—thus describes the outlines of the plan of signalling trains on the South-Eastern Railway—a plan so efficient that for three years it has enabled that railway to be almost alone in its exemption from even minor casualties:—

The true objects to be attained in unimpeachable train signalling, are,—I presume to consider,—first, that no train shall be allowed to leave one signal station until that signal station has asked leave from the signal station in advance, and such second signal station has replied in the affirmative; second, that when the train has been so allowed to leave, the sending station shall inform the receiving station that the train has left, and the receiving station shall acknowledge that he has been so informed; third, that the signals of danger shall not be lowered until this process has been gone through; fourth, that a record, taken down at the moment, shall be kept in each signal box of the time of all signals.

These four conditions complied with, will secure safety from collision so far as it can be secured by human agency. These conditions can only be realised in our modern practice by the use of the telegraph and the absolute "Block" system. They are, and have long since been, realised on every part of the South-Eastern system. I know of no other railways where the *whole* of the system is in application, except on the South-Eastern and London, Chatham, and Dover. These two railways had no accident to report last year; whereas the greatest and most prosperous of our railways, the London and North-Western, Lancashire and Yorkshire, and North-Eastern, contributed 64 out of the 122 accidents which disfigured the railway calendar of the whole empire. Again, an electrical means of communication—electrical because in no other way can an instantaneous and certain signal or message be conveyed—should be established, in the case of trains running long distances, between the driver and the guard. I now proceed to describe the system by which the four essential conditions which I have laid down are and have been secured. On the South-Eastern, the personnel of the signal box, or station, consists not merely of the "ministering," but also of the "recording" angel. The signalman, specially selected for intelligence and paid good wages, is accompanied by a youth who must understand, having been carefully taught, the use of the telegraph signal and speaking instruments; who records, with the clock before him, the exact time of all signals given and received.

The signal box is specially constructed, and placed so as to give a full view of the line and outside signals. It is made comfortable and warm; it is well lighted at night; it contains a clock, the telegraphic instruments, the levers of the points, connected with the signals by the "locking" apparatus, and is furnished with a box of fog signals, and with hand signal lamp and signal flags.

The Liability of Past Shareholders.—The Court of Appeal in Chancery has now given its decision upon the important point raised in Brett's case—*re* the Blakely Ordnance Company—respecting the liability of persons who had ceased to be shareholders of a company within a twelve-month previous to the order for its winding-up. The peculiarity of the case, it will be remembered, was that in order to evade liability for the general debts of the company, some of the past shareholders preferred paying off the debts which were in existence when they ceased to be shareholders—the *continued* existence of such debts, they alleged, being a condition of their liability. It was contended however by the official liquidator that such payment of the old debts was not permissible,—that although the existence of debts at the winding-up which had been left from the time when the

past shareholders were still partners was necessary to the liability of the latter, yet the liability when once established extended to all the debts of the company, and could not be got rid of by paying off some particular obligations. The Master of the Rolls supported the view of the past shareholders, and the Court of Appeal has now affirmed his decision, laying down expressly a principle which seems to limit most materially the liability of past shareholders. The Lord Chancellor stated that according to the interpretation of the Statute, the liability of the past shareholders was "to contribute only to those debts which were in existence when they ceased to be members." Subsequent creditors could therefore have no equity against retired shareholders. Thus a most important principle is laid down, making the rule in Brett's case consistent, but upsetting the rule which has hitherto been believed in, and was so confidently relied on by the official liquidator—that the liability of the past shareholders, against whom the condition of liability had been established, was for all debts. The new rule, it is plain, will be much less valuable to creditors than the one which has been upset was found to be. In many cases the general creditor will have hardly anything to gain, and it is conceivable that when a crash is foreseen a little ingenuity in propping up an unsound company and gaining time for the substitution of new debts in place of the old ones, will enable wealthy shareholders to free themselves of very serious liabilities. The true principle, as we formerly contended, is to fix a definite limit of time, say three or six months, during which a retiring shareholder will remain liable for all debts. No doubt in this manner he might become responsible "for reckless or improvident acts of the company" after he had retired, but it is impossible to do anything more than lay down a rough rule, and this inconvenience is a smaller one than that which is likely to result from fixing no limit.

THE STATISTICAL SOCIETY'S JOURNAL.—We are sorry to observe what we consider a very grave fault in the "proceedings" of the Statistical Society, which has justly earned a high character among our learned associations for the facts which have been collected and arranged in the papers read before it on many topics of great popular as well as scientific interest, and for the light which its proceedings have also thrown on the method of investigation in the particular department of science which it cultivates. These two objects—the discussion and study of facts, and the improvement of the method of investigation—are materially aided by such associations, and there is great waste of power when the time of any one of them and the pages of its journal are given up to other subjects. And there has most certainly been such waste in the paper on "Currency and Pauperism," by Mr Ernest Seyd, which was read at a recent meeting of the Society, and occupies the first place in the last number of the Society's Journal. The paper in question has nothing to do with statistics, does not even profess to throw any light derived from statistical facts on the subject it professes to deal with, and hardly "inquires" into facts of any sort. It is a mere exposition of the author's theoretical views as to the supposed connection between currency and pauperism—one of those wonderful currency pamphlets in which the attempt is made to show how society will be enormously enriched by some ingenious manipulation of the instruments of exchange. A publication like this in the pages of a scientific journal, and with the approval of the Council of a learned body as regards its literary and scientific merits, if not its opinions, is not a little mischievous, and will not advance the credit of the Society's proceedings. Fortunately the credit of the particular number of the journal is relieved by Mr Purdy's excellent criticism on the defects of Parliamentary returns, and suggestions for their removal; but the offence is still flagrant enough to justify the members of the Society in calling their Council into account for accepting the paper in question.

NATIONAL DEBTS.—We noticed a few months back a paper read by Mr R. Dudley Baxter before the British Association at Liverpool, on the subject of National Debts, which had the peculiar merit of summing up the statistics of the principal national debts of the world, and comparing them as respects their amount, rate per head of population, and other points. We are glad to see that Mr Baxter has returned to the subject, has amplified his statistics so as to present in the compass of a short work a tolerably exact view of the national debts of the world, has extended his comparative statements, especially as respects the burden of the debts, and has otherwise amended and added to his work. The result is an extremely useful volume of statistics, containing much novel information, not only on the debts but on the comparative wealth of the various nations of the world, and their progress both in wealth and indebtedness.* The general view of the debts of the world is exceedingly interesting. This is how the figures sum up:—

NATIONAL DEBTS, 1869-70.

	Amount.		—Annual Charge—		Per Head.
	£		£		s d
United Kingdom	800,000,000	...	24,270,000	...	15 9
Continent of Europe—France	£ 550,000,000	...	16,000,000	...	8 8
Austria	310,000,000	...	13,120,000	...	7 3
Russia	300,000,000	...	11,500,000	...	3 3
Italy	285,500,000	...	15,000,000	...	12 0
Spain	237,400,000	...	6,735,000	...	8 0
German Empire	170,800,000	...	7,342,000	...	3 9
Turkey	92,000,000	...	5,000,000	...	4 6
Holland	80,640,000	...	2,298,000	...	12 1
Portugal	58,335,000	...	1,801,000	...	9 0
Belgium	27,360,000	...	1,041,000	...	4 2
Smaller States	50,395,000	...	2,131,000	...	...
	2,165,430,000	...	107,538,000	...	7 0
America—United States and State debts	532,400,000	...	27,280,000	...	4 2
British Colonies	20,920,000	...	1,044,000	...	...
Latin America	212,000,000	...	12,176,000	...	...
	765,320,000	...	40,500,000	...	9 5
Asia—British India	103,000,000	...	5,025,000	...	0 8
Japan, Ceylon, Hong Kong	1,716,000	...	133,000	...	...
	104,716,000	...	5,158,000	...	0 6½
Australasia	35,744,000	...	1,975,000	...	21 6
Africa (Egypt, Morocco, &c.)	39,655,000	...	2,748,000	...	3 2
Total	3,910,000,000	...	187,000,000	...	5 2

This statement appears to be as accurate as the figures in such matters can be. Mr Baxter must have had no little difficulty in piecing together his information, and the real indebtedness of several countries may still be understated—we should judge that both France and Russia, for instance, are entered for too small amounts—but in general the result is accurate enough for all purposes, since the few States which are successful in hiding a portion of their indebtedness have an alarming enough total of avowed debt. The United Kingdom, it will be observed, is at the head of the list as the largest debtor, though that place will now be taken by France, but according to other figures which Mr Baxter gives the relative magnitude of our debt has been much changed. Our debt is now the fifth of a total of 4,000,000,000*l*; but in 1815, when it was 902,000,000*l*, it was greater by a half than the total debts of the world then, viz., 1,530,000,000*l*; and in 1848, when it was 820,000,000*l*, it was still very nearly one-half of the total debt of 1,731,000,000*l*. The debt of the United Kingdom has, in fact, remained stationary, and the new debt of more than 2,000,000,000*l* which has been incurred during the last twenty years belongs to other countries. But a still more interesting point is the comparative burden, regarding which Mr Baxter summarises the best available information. The mode of reckoning hitherto current has been very imperfect. Statisticians have been quite satisfied to place the amounts of the debt and of the annual charge alongside the numbers of the population, and calculate the rate per head of the debt and of the charge. Mr Baxter, besides doing this, endeavours to form a rough estimate of the much more pertinent fact—the aggregate income of a nation, and states how the burden of the debt is proportioned to that income. Reckoning in this way, the United Kingdom does not come out so badly, though the charge per head is about the highest of the great nations of the world. The comparison is:—

BURDENS OF NATIONAL DEBTS, 1869-70.

Nation.	Estimated Income per Head.		Annual Debt Charge per Head.		Percentage of Debt Charge on Income.
	£ s		s d		
United Kingdom	28 0	.....	15 9	.....	2·8
United States (with State debts)	26 0	.....	14 2	.....	2·7
Russia (with railway guarantees)	7 6	.....	3 8	.....	2·5
France — —	21 0	.....	9 9	.....	2·3
Austria	16 15	.....	7 3	.....	2·2
German Empire	19 0	.....	3 9	.....	1·0

And the facts, we believe, are in reality still more favourable to the United Kingdom. The aggregate incomes credited to

* National Debts. By R. Dudley Baxter, M.A. Partly read before the British Association at Liverpool, September, 1870. London: Robert John Bush. 1871.

the United States and to France—1,000,000,000*l* and 800,000,000*l* respectively—appear to be quite too high, while the English figure is too low, though Mr Baxter it must be allowed has taken no little pains to sift and estimate the imperfect data available; but apart from any error of this sort, it must be remembered that a comparison of the debt with the aggregate income of the nation will be itself almost as imperfect as a comparison with the population only. An aggregate income of 800,000,000*l* distributed among a population of 40,000,000 will leave a smaller taxable resource than the same income distributed among a population of 30,000,000. The necessaries of the latter people will cost a good deal less, and properly speaking it is only the balance of income after the purchase of necessaries which should come into comparison. It would be difficult however to take account of this fact statistically, and Mr Baxter indicates clearly enough the exceptional condition of the United Kingdom in the matter. There are numerous interesting points in the book besides those we have mentioned, such as the gradual diminution in the burden of debts, and especially of the English debt, through the increase of wealth and population, but we trust we have said enough to give some notion of the value of the work which Mr Baxter has accomplished.

THE EXPENDITURE OF NATIONAL DEBTS.—We have noticed above some of the interesting topics embraced in Mr Baxter's new work on National Debts, but the following estimate of the amount borrowed for reproductive purposes out of the total 4,000,000,000*l*, to which the debts sum up, demands a place by itself :—

USEFUL EXPENDITURE.	£	£
Capital—Germany		68,300,000
United States (Federal and State debts)		50,000,000
Australasia		23,000,000
Belgium		20,000,000
Spain		10,400,000
Sweden		6,000,000
Denmark		5,000,000
	£	182,700,000
Annual Guarantees—France	2,000,000	
Italy	4,000,000	
Russia	1,500,000	
India	1,600,000	
	9,500,000	
Equal to a capital of		200,000,000
Total		382,700,000

Mr Baxter calculates that, adding 120,000,000*l* for expenditure under guarantees, the total productive loans would be 500,000,000*l*, or about 12 per cent. of the total. The remainder, roughly speaking, has been spent on "war" or "army" estimates." In fairness however it should be considered that local debts, which are not included in the above statement, have been incurred for reproductive purposes.

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, April 15, 1871 :—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS :—	£ s d	£ s d
In money and interest credited	11,183 18 5	144,363 8 1
To transfer certificates from Post Office Savings' Banks to Savings' Banks	300 10 11	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	2,337 13 5
Total	11,484 9 4	146,701 1 6
POST OFFICE SAVINGS' BANKS :—		
In money and interest credited	187,398 9 0	...
To transfer certificates from Savings' Banks to Post Office Savings' Banks	2,337 13 5	...
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...	300 10 11
Total	189,736 2 5	300 10 11

Total amount on April 15, 1871, at the credit of—	£ s d
The fund for the Banks for Savings	37,742,343 17 2
The Post Office Savings' Banks fund	15,703,628 3 10
Total	53,445,972 1 0
Ditto—by last monthly account	53,361,753 1 8

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending April 15 :—

	Receipts of Week Ending April 15.
	£
Customs	309,000
Excise	422,000
Stamps	250,000
Taxes	40,000
Income tax	163,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	nil.
Total	1,184,000

The total receipts of the previous week were 993,147*l*.

The Exchequer issues of the week on account of expenditure were 600,000*l*, viz. :—

	£
Interest of debt	500,000
Other charges on Consolidated fund	nil.
Supply services	100,000
Telegraph services	nil.
	600,000

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on April 8	1,985,001	778,911	2,763,912
— April 15	2,548,001	803,371	3,351,372
Increase	563,000	24,460	587,460

The other receipts to date were 3,460*l*, the other payments were *nil*.

Agriculture.

RESTRICTIONS ON CULTIVATION. TENANT-RIGHT.

WHILST English and Scotch landowners are wasting the resources of their property by game-preserves and deer-forests, and preventing improvement and development by restriction and mismanagement, there is gradually growing amongst farmers and others notions altogether repugnant to some existing rights of property. Thus at a meeting of the Brampton, &c., Agricultural Improvement Societies, on the subject of tenant-right, as to which Mr Rogers "trusted that it might not be long before the existing evils shall be done away with by the passing of a Bill which shall secure to us tenant-right." So Mr Nott said :—"They must have Legislative protection for their capital invested in unexhausted improvements; farms must be let at a fair commercial value, and not strung up to the highest possible rack rent." Again, the chairman "desired to see a Tenant-right Bill, and if, as it had been proved, it worked well for Ireland, why not for England?"

Now all this tends to a scheme by which the Legislature should interfere to "protect" the capital of farmers which with their eyes open they may have laid out on land of which they had not taken the precaution to obtain secure tenure. Such are the results of the existing mismanagement of their property by English landlords; and Mr Smithies was not far wrong when he said—"He did not think they were yet reduced to the level of English farmers.....At present the public looked upon it as a question between landlord and tenant only, and without public sympathy it was all moonshine to talk about legislation.....If they would persist in laying out their money foolishly, they could not reasonably expect the Legislature to help them."

And assuredly it is undeniable that the English farmers who take farms on yearly holdings do foolishly place themselves at the mercy of their landlords. The remedy for all the farmers complain of is a long and rational lease. What occurred when the late Mr Philip Pusey tried to pass a Bill for the payment to tenants of unexhausted improvements, proved conclusively that it would be easier for farmers to obtain leases by arrangement with their landlords than to get a Tenant-right Act. But even leases, when obtained, must be rational and commercial contracts, not merely *quasi*-feudal grants. In Scotland, where leases have long been general, with great benefit to both landlords and tenants, complaints are

made of the restrictive stipulations they so commonly contain. For instance, at the Kelso Farmers' Club a discussion took place on the subject of restrictions in leases, in which Mr Douglas, who introduced the subject, very pertinently said:—"One way in which these restrictions may injure a tenant is by preventing him from investing more capital in his farm in a way to yield a good return; when only a certain portion is allowed to be under tillage, he can only keep a certain amount of money employed. Sometimes, no doubt, it may be increased to any extent by breeding stock, but when meat is low and corn is high this cannot be done. This is the reason of the great demand for farms, as people seek for other farms to employ their own spare capital, which was beneficially invested in high farming at home. In the last sentence I adverted to another objection to the system of restrictions, viz., that it prevents a man from following the times. If we find that at one time to grow grain and potatoes is more remunerative than to raise beef and mutton, it is very hard that we are still forced to produce the latter. It is only fair to allow a tenant to offer for sale the most marketable goods. Again, these restrictions make the letter of the soil in a great measure dependent on circumstances. Everybody knows that past and present weather may be such as to prevent a crop being put in as one would like, or we may find again that a wet season has destroyed our seeds by lodging the corn crop. We could easily remedy these things, but our lease steps in and forbids us, and the result is great loss."

It has been frequently and conclusively shown that a tenant who fairly manures and cultivates his farm cannot injure the landlord by various modes of cropping according to seasons and circumstances, and that even the more apprehensive of landlords may be rendered easy in their minds on this point by a few simple regulations applicable to the last two or three years of the lease.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, April 19.

The Commune has discussed at considerable length the question of the payment of bills. Three distinct projects were submitted to it: 1, that of M. Beslay, described last week, for establishing a special bank charged to pay bills, in notes of its creation, and to receive the amount in instalments extending over three years; 2, one of a Citizen Tridon, proposing purely and simply to postpone payment for three years, subject to interest of 2 per cent. being allowed; and 3rdly, one of Citizen Jourde for allowing payment by instalments. The first was rejected because the formation of the proposed bank would render the Commune, and through it the taxpayer, responsible for the bills not received, and would besides make it "give aid to a great number of operations of a doubtful character which have encumbered the market with a considerable quantity of accommodation bills." The second was rejected because it was "entirely in favour of the debtor, and by leaving him in complete security might become fatal to his future credit and commercial honour;" because, too, it "took no account of the rights and wants of the creditor, leaving him without any guarantee against the ill will, or even the fraud, of the debtor, though his rights were as sacred as those of the debtor, he having delivered merchandise or money for his bill." The third was adopted because it seemed to conciliate in the measure circumstances called for the interest both of creditor and debtor; but instead of two years being allowed for complete payment, as proposed by the latter, three years were fixed. This third scheme was finally promulgated as law on the 16th. The following is the text of it:—

"The Commune decrees:—

"Art. 1. The payment of debts of all kinds subscribed up to this day and falling due at certain date (*certaine échéance*)—that is, drafts to order, bills of exchange, regulated invoices, composition debts, &c.—shall be made within a delay of three years from 15th, 1 per cent. but without interest.

"Art. 2. The total of the sums due shall be divided into twelve equal parts (*coupons*), payable quarterly from the same date.

"Art. 3. The holders of the credits above mentioned, may, whilst retaining the original security, obtain the reimbursement of the coupons by drawing drafts, or bills of exchange, guaranteeing the nature of the debt and the guarantee, in conformity with Art. 2.

"Art. 4. Proceedings in case of non-acceptance or non-payment shall only be allowed on the portion due.

"Art. 5. Any debtor who, profiting by the delays accorded, may turn aside, alienate, or destroy his assets in fraud of the rights of his creditor, shall, if a trader, be considered guilty of fraudulent bankruptcy, and if not a trader, as guilty of swindling, and he may be prosecuted for one or the other either by the creditor, or by the public prosecutor."

In the objections made in the Commune to the scheme of M. Beslay, there is great justice, and others might be found to it. But his project possessed the merit of paying the bill-holder at once in notes the public would have been obliged to accept, and of thereby enabling him to resume operations. The adopted measure of M. Jourde only gives the holder long-dated bills for overdue ones, and leaves him without resources. The application of it (if it ever be applied) will present numerous difficulties, especially as regards bills bearing the signatures of people residing abroad or in the country.

Although the Commune was established mainly by the Socialist party—the workmen—and though it at once pledged itself to apply Socialist doctrines, by making the Republic a *veritable* one, as understood amongst the working-class, it has thus far only adopted one measure of a decidedly Socialist character—those relative to the payment of rent and to the confiscation of the property of the religious orders, and that given above concerning bills, being, strictly speaking, though extremely Radical, not in the domain of Socialism. The one measure that is undoubtedly Socialist appeared on the 17th, and is thus conceived:—

"The Commune of Paris,—considering that a great number of workshops have been abandoned by those who directed them, in order to escape civic obligations, and without taking into account the interest of workmen,—considering that in consequence of this cowardly abandonment works essential to commercial life are interrupted, and the existence of workmen is compromised—decrees:—

"The Syndical Chambers of Workmen are convoked for the purpose of instituting a Commission of Inquiry, having for object—to draw up statistics of the workshops abandoned, and an exact inventory of the state in which they are, and of the instruments of labour they contain; 2, to present a report setting forth the practical means of promptly putting these workshops into activity, not by the deserters who have abandoned them, but by the co-operative association of the workmen employed in them; 3, to draw up the draft of a constitution of such co-operative societies; 4, to establish a jury of arbitration to decide, on the return of the masters, on the conditions of the definitive cession of the workshops to the workmen's societies, and on the amount of indemnity the societies will have to pay to the masters.

"This Commission of Inquiry must address its report to the Communal Committee of Labour and Exchange, which is required to present to the Commune, with brief delay, the draft of a decree giving satisfaction to the interests of the Commune and of workmen."

It will be curious to see how the workmen thus put in possession of the premises and plant of masters will continue to manage without their capital, and how consequently they will procure the raw materials they need to work up; how, too, without the capacity, experience, and connection of the employers, they will find markets for the products they will manufacture. The decree, it will be observed, does not say what is to be done in the event of the masters "on their return" positively refusing to "cede definitively" their establishments to the men.

PARIS, April 20.

In a declaration addressed to the French people, the Commune at last does what has long been demanded,—makes known in plain and distinct terms the objects it is seeking. These terms are in substance the recognition and consolidation of the Republican form of Government, and the "absolute autonomy" of the Commune or Municipality not only of Paris, but of all other localities; the Commune to possess as "inherent rights" the vote of its Budget, the levying of taxes, the direction of its police, the education of the people, the administration of its property, the election of magistrates and officials, liberty of person, liberty of conscience, liberty of labour, and the organisation of its own defence, and its own National Guard. Paris, it is affirmed, demands nothing more, but expects the Central Government, which is to represent all the Communes, in virtue of a compact between them, to adopt and practice the same principles. In virtue, however, of its independence, the Commune declares that Paris reserves to itself the right of effecting for itself, and as it may think fit, "the administrative and economic reforms required by its population, of creating and developing institutions calculated to spread instruction, production, exchange, credit, and of universalising power and property according to the necessities of the moment, the wishes of interested parties, and the lessons of experience." This programme, it will be seen, gives the Communes, that is towns and other localities, not only the fullest municipal franchises that exist anywhere, but the power of legislating in matters that concern directly or indirectly the whole community—a power heretofore reserved to the national parliament. The programme consequently repeals entirely the system of excessive centralisation established in France for some seventy years, and replaces it by extreme decentralisation: in the room of an iron unity it puts something very like anarchy. At the same time it announces the intention of applying in Paris the

doctrines known as Socialist. What, in a word, it demands is a revolution in favour of the working class as complete and radical as was that of 1789, in favour of the middle-class. The justice of such a revolution may be questioned, seeing that the middle class is not privileged as the nobles were; and even if just it cannot be effected without terrible convulsions.

The Assembly at Versailles has been for the last two or three days discussing the Bill on rent in Paris, presented by the Government. It will no doubt be adopted without serious amendments. It proposes, as you were informed some weeks' back, to require all rents to be paid in full, but gives a tribunal composed of two landlords and two tenants, presided over by a justice of peace, power to make reductions, or to give time for payment. Now this measure will of course be a dead letter as long as the Commune stands, and when the Commune falls it cannot be applied. It cannot be applied for the reason that people have got no money to pay. The working-men, who are the major part of the population, have been living for six months and more on daily doles from the public purse, and to expect them to settle down to work with the obligation of paying nine months arrears of rent, or the largest part of it, is absurd. The shopkeepers, clerks, and professional men, who are the next greatest part of the community have been earning nothing, and have had to live on savings: to make them pay is unjust. What would have been reasonable would have been to let the city pay, wholly or in part, in paper, and recoup itself by taxation. But to expect a wise and prudent measure from the Government and Parliament of this unhappy country is like crying for the moon. One would almost imagine that their object is not to remove but to aggravate difficulties. Witness their law on commercial bills: it made matters worse than they were, and cannot be executed. Witness their bombardment and besieging of Paris, when a little tact and the timely concession of just demands would have kept the Parisians quiet.

In the Assembly the other day, the Minister of Finance, M. Pouyer-Quertier, in answer to a question, stated that in preparing its financial measures, the Government "would endeavour to procure the resources that were indispensable without affecting labour and production." A more precise declaration would have been satisfactory. He added that "real property had nothing to fear, and he would avoid taxing the raw materials necessary for production." The latter part of the statement may be accepted as disposing of the rumour that heavy taxes on wool and cotton, and also on coal, were contemplated. The former is incomplete. It makes known that the direct burdens of real property are not to be augmented; but the great bulk of the holders of such property are agriculturalists, and they are not told that the Treaty of Commerce with England, which has opened that country to their products, and that the other commercial reforms of the Empire which have been advantageous to them, are to be left untouched. On these points, therefore, they have something to fear. And that the fear is not unfounded is proved by the last, that notwithstanding the anxiety caused by the civil war, some influential persons in different parts of the country are seeking the co-operation of members of the Assembly to "combat the Protectionist policy which the Government of M. Thiers may be expected to adopt."

The Bourse continues to be thinly attended, and to present transactions very few in number, and extremely limited in amount. The Threes, which on the 13th were 51f 35c for time, are to-day 51f 55c; and Italian, which was 54f 85c, has risen to 55f 75c. In the other quotations of to-day are the Orleans Railway, 735f; Austrian, 847f 50c; Parisian Gas, 750f; Immobiliere Company, 50f.

The Credit Foncier has fixed its annual meeting for the 29th, and the Credit Agricole for the 28th.

COMMERCIAL AND MISCELLANEOUS NEWS.

The American trade returns for the year 1870 have been made up by the statistical bureau of the Treasury Department at Washington, and, as compared with the returns for 1869, show a considerable increase in the volume of trade. Thus, during 1870, the imports were, in gold value, $486,780,018, and during 1869 but $463,424,421, while the exports in gold value in 1870 were $453,905,409, and during 1869 but $365,458,770. In the transportation of this merchandise the relative positions of American and foreign vessels—the latter always heavily in the majority—show no change in favour of American shipping, the comparison being the following:—

	American Shipping. dols.		Foreign Shipping. dols.
Imports of 1870, gold value	154,912,888	.....	331,867,130
Imports of 1869, gold value	146,343,209	.....	317,081,212
Exports of 1870, mixed gold and currency	187,206,426	.....	319,742,088
Exports of 1869, mixed gold and currency	160,910,815	.....	303,963,461

The increased traffic was unequally divided between American and foreign bottoms; the latter, which carried 73 per cent. in 1869, carrying 79 per cent. in 1870. While American shipping to some extent still carry merchandise across the Atlantic, yet the bulk of the traffic in American bottoms is to West Indian and South American ports and on the Pacific Ocean. Were these separated from the rest it would be found that the Transatlantic trade, which is probably three-fourths of the whole, is almost entirely carried under foreign flags. The specie and bullion trade, which is counted in the above, amounted in 1870 to $25,664,931 imports, and $61,096,317 exports, compared with $24,888,427 imports, and $40,467,417 exports in 1869. On Dec. 31, 1869, there remained in bonded warehouses goods to the value of $51,762,413, which was increased on Dec. 31, 1870, to $55,620,635. The balance of trade, which was against the United States to the amount of $68,692,422 excess of imports in 1869, was almost even in 1870, the imports exceeding the exports by the comparatively small amount of $2,214,493. In 1870 the leading imports were—Coin and bullion, $25,573,363; coffee, $27,215,652; cotton goods, $25,910,361; $25,910,361; flax manufacturers, $16,791,368; hides and skins, $14,528,988; iron and steel, $37,421,230; leather and leather goods, $10,189,502; silk and silk goods, $27,113,367; sugar and molasses, $65,826,128; tea, $15,053,465; tin, $11,141,736; and wool and woollens, $35,525,198. The chief exports were — Raw cotton, $219,373,805 (in 1869, $187,693,477); breadstuffs, $64,929,459; coin, and bullion, $65,097,317; iron and steel, $16,208,208; petroleum, $33,237,014; provisions, $29,001,441; tobacco, $18,090,923; and wool and woollens, $13,285,624.

The Trade and Navigation Accounts of the Dominion of Canada for the year ending the 30th of June, 1870, show a considerable increase over the preceding year. The grand total of imports was $74,814,339, of which $21,809,168 entered free, and upwards of $4,000,000 were in coin and bullion. The value of the exports was $73,573,490, including coin and bullion eight millions, and goods not the produce of the Dominion six and a half millions. The aggregate reaches $148,387,829. The returns show tonnage engaged in carrying on that trade, including in such tonnage the vessels engaged in the inland trade with the United States,—entered inwards, 5,796,125 tons; cleared outwards 5,619,745 tons; rather more than two-thirds of which consists of British vessels. In imports the largest increase has been in importations from Great Britain, the value having risen from $35,764,470 in 1868–69 to $38,595,433 in 1869-70, showing an increase of about 8 per cent. From the British and foreign West Indies the ratio of increase is considerably larger. The trade with the United States shows imports thence $24,728,166, being a decrease of $750.000; exports thither $32,984,652, an increase of above five millions. These returns are regarded as showing that the trade with the United States has not been materially, and certainly not injuriously, affected by the abrogation of the Reciprocity Treaty. The aggregate amount of the trade between the two countries has been pretty steadily maintained, indeed increased, while the relative positions as importers and exporters have been reversed. The United States, under the Reciprocity Treaty, were, as a general rule, the larger exporters to the British North American provinces; while Canada has, since the abrogation of the Treaty, imported less from the United States, and exported to that country considerably more. As regards exports generally, the returns furnish evidence of the rapid development of the natural industrial resources of the country; the increase, as regards value, in each of the six classes into which the products of Canada are divided in the tables being as follows:—Products of the mine, 12 per cent.; products of the fisheries, 11 per cent.; products of the forest, 6 per cent.; animal products, 38 per cent.; agricultural products, 12 per cent.; manufactures, 21 per cent. Coal oil has become a staple article of export, and advanced in the year to 4,748,557 gallons. The exports of products of the forest reached $20,940,434 in the year 1869-70; agricultural produce, $13,676,619; animals and their produce, $12,138,161; fisheries, $3,608,549. The value of foreign goods passing through the United States in 1869-70, under bond, to Canadian importers as the direct consignees, was $11,593,495. This amount, which is little more than one-fifth of the Canadian importations from sea, and one-seventh of the gross importations, represents the goods in transit though the neighbouring country to ports in Ontario and Quebec. The value of goods actually purchased in bond in the United States for Canadian markets was nearly $3,000,000, showing an aggregate amount of transit trade through that country to importers in Canada exceeding $14,500,000.

Subjoined are the returns of the Irish banks of issue for the four weeks ending the 25th March:—

Name and Title as set forth in Licence.	Circulation authorised by certificate.	Average circulation during Four Weeks ending as above.		
		5*l* and upwards.	Under 5*l*.	Total.
	£	£	£	£
The Bank of Ireland	3,738,428	1,759,100	1,321,025	3,080,125
The Provincial Bank of Ireland	927,667	529,148	518,406	1,047,554
The Belfast Banking Company	281,611	221,855	354,986	576,841
The Northern Banking Company	243,440	139,868	361,937	501,805
The Ulster Banking Company	311,079	296,703	419,117	715,821
The National Bank	852,269	749,977	669,055	1,419,032

AVERAGE AMOUNT OF COIN HELD DURING FOUR WEEKS ENDING AS ABOVE.

The Northern Banking Company	300,383	21,267	321,650
The Ulster Banking Company	450,115	31,214	481,329
The National Bank	810,985	46,682	857,668

Encouraging intelligence is again received from the Darien Canal Surveying Expedition. The latest reports, which are to the 19th March, state that the Atrato and Tuyra rivers route has been demonstrated to be perfectly practicable for a canal route. The distance from ocean to ocean is 125 miles, 75 miles being through navigable waters. Fifty miles of canal are to be constructed, 30 miles being along a level surface. In the remaining 20 miles the highest elevation is reported at not over 150 feet, and Captain Selfridge hopes to find a point in the dividing ridge as low as 75 or 100 feet elevation. The cost of the canal over this route is roughly estimated at $130,000,000.

The mail from South Australia brings dates to 1st of March. The harvest was nearly completed. Three cargoes of wheat had left for Europe, although the market price was generally known to be above the *maximum* fixed for English orders. The Government had published its balance sheet to 31st of December, 1870, with a deficiency of 123,000*l*. The revenue from Customs' receipts and rents of land showed a decrease, but it may improve without fresh taxation, although the railways, far from being reproductive, show an excess of expenditure over receipts of 23,000*l*, and land sales are less by 50,000*l*—facts leading to the conviction that improved legislation is necessary, and a feeling of regret that it was attempted but abandoned during the recent Session. The gross expenditure of 735,000*l* is only less by 65,000*l* than that of 1869, while fixed establishments are maintained apparently suitable for progressive prosperity rather than a struggling community so small in population as South Australia. The overland telegraph was known to have been carried 90 miles inland from the north. The approaching end of the northern territory scheme is foreshadowed. The Press seems of opinion that, after seven years' trial, the surveyed acres are not likely to be subject to selection. Population is not attracted; even coolie labour is not available, and the strongest advocates of the settlement now denounce the "costly Government establishment," where there is "nobody to govern," as "a farce too absurd" to be continued. The result of the abandonment would be a gain of at least 10,000*l* per annum. The local insurance companies, in reporting upon the marine business of 1870, announce considerable losses; yet in some cases dividends continue to be paid. A whale fishery at Encounter Bay was to be resumed this season. It was announced that coal had been found in Kangaroo Island, and gold and bismuth at Lobethal. Wheat was 5s 6d per bushel; flour, 12*l* to 13*l* 10s per ton. The banks sold draughts on London at 60 days' sight at 1¼ pm., and bought at ⅜ discount.

After many years of really bad trade Preston seems to be looking up again. All the cotton mills, with the exception of two or three, have been reopened, and are now in full operation, and other branches of trade appear brisk. In nearly every instance the operative cotton spinners have obtained the advance of wages they sought, and the weavers have been successful in obtaining an increase of 5 per cent. from 14 firms, and others are expected to give it immediately. The flourishing state of three building societies recently re-established furnishes gratifying proof of the improved condition of trade. The reports show a rate of progress at once startling and encouraging. That of the Seventh Improved Benefit Building Society, re-established only about a month ago, states that nearly 29,000*l* worth of shares have been taken up, and a large increase is confidently reckoned upon at the next meeting. The Prince Albert shows a share list of 16,000*l*, and the Preston and District one of nearly 24,000*l*. Altogether, then, nearly 70,000*l* worth of shares have been taken up within a few weeks. These facts prove that not only is there a great revival of trade, but that a very large number of the working population are of provident habits.

The Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs a copy of a despatch from Her Majesty's Ambassador at Versailles, calling attention to the following article of a law passed by the National Assembly on the 6th inst., appointing a Commission to investigate the contracts entered into by the French Public Departments with regard to the war:—"Copies of all contracts concluded with persons, other than those agents authorised for this purpose by laws, decrees, ordinances, or regulations, shall be on the responsibility of the parties interested, and under pain of forfeiture, addressed, within two months from the promulgation of the present law to the proper Minister, who will transmit them to the Commission with his observations;" and the following translation of a law of the Portuguese Government, dated 30th ult., relative to the abolition of transit duty:—"Art. 1, the transit of all goods and merchandise and articles of commerce for exportation to foreign countries, between Elvas and the Cities of Lisbon and Oporto, and between the two latter and the former, is free; Art. 2, the transit duty of 1 per 1,000 *ad valorem*, levied in virtue of the 3rd Article of the law of February 22, 1861, and which was extended to the railways in virtue of the 17th Article of the regulations of November 28, 1864, is hereby abolished; Art 3, the abolition of the transit duty does not exempt merchandise from the fiscal supervision to which it is subject in accordance with the regulations in force; Art. 4, all legislation to the contrary is hereby revoked."

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the second week of April, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children	Adults	Children under 16	2nd week April, 1871.	Corresponding Total in 1870.
West District	5,430	7,795	5,422	18,647	21,502
North district	6,628	11,415	8,939	27,050	29,805
Central District	6,621	7,669	5,641	19,931	22,513
East District	7,015	10,581	9,221	26,817	34,517
South District	8,539	17,115	15,180	41,034	44,895
Total of the Metropolis	34,233	54,514	44,311	133,447	153,291

Of these indoor paupers, 1,067 are men and 41,507 are women.

TOTAL PAUPERISM OF METROPOLIS.—Population in 1861, 2,803,989.

Number of Paupers.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 19th day of April, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued...	36,817,660	Government debt.....	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	21,817,660
		Silver bullion	...
	36,817,660		36,817,660

BANKING DEPARTMENT.

	£		£
Proprietors' capital ..	14,553,000	Government securities	12,938,549
Rest	3,124,224	Other securities	20,584,916
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts...	8,441,172	Notes.....	12,599,590
		Gold and silver coin...	655,458
Other deposits	20,092,554		
Seven-day and other bills	567,563		
	46,778,513		46,778,513

GEO. FORBES, Chief Cashier.

Dated the 13th April, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

LIABILITIES.	£	ASSETS.	£
Circulation (including Bank post bills).....	24,785,633	Securities	33,970,465
Public deposits.....	8,441,172	Coin and bullion	22,473,118
Private deposits	20,092,554		
	53,319,359		56,443,583

The balance of Assets above Liabilities being 3,124,224*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.		Decrease.
	£		£
Circulation	56,131	.....	...
Public deposits	400,254	.....	...
Other deposits	...	.....	1,259,363

Price of Consols	92	93¼	93	94	93¼
Average price of wheat	56s 9d	73s 8d	46s 9d	42s 10d	57s 6d
Exchange on Paris (short)	25 12½ 20	25 12½ 20	25 15 25	25 17½ 27½	...
— Amsterdam ditto...	11 15½ 16½	11 17½ 18½	12 1½ 2	11 18 18½	11 19½ 19½
— Hamburg (3 months)	13 6½ 7½	13 9½ 10½	13 11 11½	13 10½ 11	13 10½ 11½
Clearing-house returns	...	75,645,000	81,761,000	90,463,000	98,376,000

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending April 19, 1871.		Week ending April 12, 1871.		Week ending April 20, 1870.
	£		£		£
Thursday	11,689,000	.....	19,007,000	.....	17,912,000
Friday	20,055,000	.....	...	.....	...
Saturday	17,199,000	.....	12,053,000	.....	12,580,000
Monday.....	13,804,000	.....	10,379,000	.....	9,362,000
Tuesday	14,075,000	.....	12,005,000	.....	10,489,000
Wednesday	11,393,000	.....	11,026,000	.....	10,150,000
Total.....	98,376,000	.....	64,470,000	.....	60,493,000

The total since the 4th of January, 1871, is 1,251,433,000*l*, compared with 1,163,047,000*l* for the corresponding period last year, showing an increase of 88,386,000*l*.

In 1861, there had been some little apprehensions owing to the renewed shipment of gold to the continent on account of the deficient harvest of the previous autumn. But money still continued abundant from the great contraction of business. Mr Gladstone's new Budget, and the deficiency in the yield of the revenue compared with the estimate of the previous year, were being sharply criticised.

In 1868, money was easy at and under 2 per cent., there being little sign of a change from the long depression which had prevailed. The Abyssinian Budget was under discussion.

In 1869, money was easy, but the recent rise in the Bank rate from 3 to 4 per cent. had apparently produced but little effect on the Bank account. This was accounted for by one of the consequences of the Overend failure, which had caused foreign bankers to distrust the English market—a distrust which still continued. The usual effect of a high rate of interest in attracting money from abroad had not therefore been experienced—at least not to the ordinary extent. Spain had just introduced a new loan for a nominal amount of 10,000,000*l*.

In 1870, money was somewhat scarce in the open market, but the Bank was freely meeting the demands upon it. The time for taking the last Imperial plebiscitum in France was now approaching. The principle of Mr Gladstone's Land Bill, giving "damages for eviction," was being keenly criticised.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,352,044*l*; in 1868, an excess of 2,516,193*l*; in 1869, an excess of 289,272*l*; and in 1870, a deficiency of 1,365,680*l*. In 1871, there is a deficiency of 492,362*l*.

DISCOUNT AND MONEY MARKET.—Money has been rather easier this week than last. The rates of long-dated paper are quoted rather lower, and the tendency in the dealings for short-dated paper is to be rather under than above the figure quoted. To-day there is a slightly improved demand, both at he Bank and in the open market, but not enough to have any effect on the rates. The impression in some quarters is that this demand, which is mainly commercial, indicates the probability of an approaching rise in the value of the money; but though trade is undoubtedly brisk we see little reason to expect that it will be sufficient of itself, in the absence of political changes in France, to produce at all soon an upward movement in the rates for money. There is still a large accumulation in Lombard street, and money can hardly be dearer till this store has sensibly begun to diminish. As regards changes in France, the aspect of events this week has certainly been more favourable to the Versailles Government than was the case for several weeks; but the conditions of final and immediate success do not appear yet to exist, and a success obtained by the storming or starvation of the capital, which appear to be the only alternatives, would not conduce to the solidity and duration of the Government. The distrust must cause a great deal of foreign money to remain here for an indefinite time.

The position of the Bank has been rather strengthened this week. While the "private securities" have been reduced from 21,630,000*l* to 20,584,000*l*, or 1,046,000*l*, and the banking liabilities from 29,921,000*l* to 29,101,000*l*, or 820,000*l*, the reserve of notes and coin has risen from 13,023,000*l* to 13,255,000*l*, or an increase of 232,000*l*. At the same time the stock of bullion in both departments has increased 249,000*l*.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months	2½		per cent.
Do 4 —	2½		per cent.
Do 6 —	2⅝	2⅞	per cent.
Trade bills—3 months	2½		per cent.
Do 4 —	2⅝	3	per cent.
Do 6 —	3	3½	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1¾ per cent.
Do fourteen days	1¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6*	2	...
Vienna	5	5	5	5
Berlin	4	4	3½	3½
Frankfort	4	3½	2½	3
Amsterdam	3½	3½	3½	3
Turin	5	5	5	5
Brussels	2½	4	2½	3¼ ½
Madrid	5	5	5	5
Hamburg	...	...	2½	3¼
St Petersburg	5	8	4½	7

* Nominal.

THE STOCK MARKETS.—The movements in the market this week have been various, the general influence of the cheapness of money, which is still operative, being counteracted in some instances by other influences, especially by the heavy realisations to be looked for in the stocks, where a rise has recently taken place. There has been a considerable advance in almost all descriptions of foreign securities, and Consols also improved a good deal early in the week; but the railway market, in which the most important advances have recently taken place, has been weak, assisted perhaps, as we notice below, by some disappointment in the traffic returns of the week. In the miscellaneous markets, the dealings have been of a mixed kind, though the upward movement incidental to the continuance of cheap money, along with improving trade, is most marked. A somewhat different tone has been produced later in the week by the report of events from Paris, showing, as is believed, the probability of an early defeat of the Commune, and especially by the report that the Prussians will evacuate the northern forts so as to enable the Versailles Government to besiege the insurgents. Should this intelligence be confirmed, and the Versailles Government have energy and skill enough to re-establish its authority quickly, without subjecting Paris to any extremity, the effect on our markets will be most material. The foreign money in London will again begin to go abroad, and some of the effect of the great borrowings and payments which France will begin to make will be felt.

ENGLISH GOVERNMENT STOCKS.—Early this week Consols advanced from ⅛ to ¼ above the high closing figure of last week, which was 93⅛ ¼. Combined with other causes, the announcement of intended purchases this week by the Government broker on account of the sinking fund caused the market to be very firm. Later in the week, partly from realisations, and partly from renewed expectations of an early termination of the Parisian troubles, the market was again flat, and the price on Thursday was again that of last Friday, viz., 93⅛ ¼. To-day the market has been rather flat, but the quotation maintained has still been 93⅛ ¼ for the account.

The purchases by the Government broker have been 18,000*l* per day since Tuesday; and as the amount available is 737,000*l*, it is inferred that the purchases, as usual, will be of an equal amount for four days in the week.

Subjoined is a list of the highest and lowest prices of Consols every day :—

	CONSOLS. Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93	93¼	93¼	93¼	par to 5s pm
Monday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Tuesday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Wednesday	93⅛	93¼	93⅛	93¼	par to 5s pm
Thursday	92⅞	93⅛	93	93⅛	par to 5s pm
Friday	93	93¼	93⅛	93⅜	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

Ditto New 5 %	102 3	102 3	... ...

FOREIGN GOVERNMENT SECURITIES.—As we have already stated, the foreign market has been good, with hardly any downward fluctuations, the improvement extending prin-

cipally to Spanish, Italian, Turkish, Egyptian, and similar stocks. Argentine have also advanced a good deal, the new loan, in spite of the original disfavour with which it was received, having subsequently been largely dealt in. The French National Defence loan has also improved, as we have stated, under the influence of the Paris news—the quotations having advanced from 92⅜ ½ on last Friday to 93⅜ on Thursday. Special circumstances are also mentioned for the improvement of Spanish stock, including the adoption of new financial measures at Madrid, and the adhesion given by Monarchists in the Cortes who voted for other candidates to the dynasty which has been set up. The general improvement in the foreign market, however, appears to be less due to special causes than to the recent comparative neglect of these securities, and the temptations offered by the great cheapness of money. It appears to be exceedingly doubtful whether the present advance can be carried far in the face of the numerous financial operations which are threatened, and the chance of the French demands coming suddenly on the market. To-day the tone in the market which has prevailed during the week has been maintained. As will be seen from the usual table which we subjoin the advances for the week are considerable.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

English Railway Securities.—The market this week has again been rather dull, the reaction which set in at the end of last week on account of realisations, though not sufficient to destroy the rise for that week, having since continued. Up to Wednesday and Thursday there had been a general fall all round, and though there was greater steadiness on Thursday, it was not sufficient to make up for the depression. London and North-Western, Midland, Great Eastern, South-Eastern, Great Western, London, Chatham, and Dover, and Lancashire and Yorkshire, all showed a decline. Great Northern and Caledonian, on the other hand, advanced a little. To-day the markets have been rather better, but little business has been done.

The reaction appears to be quite natural after the recent advance, and is hardly to be accounted for otherwise; some of the causes assigned, such as the unfavourable traffic returns for the week, being obviously insufficient, seeing that the reaction began during last week under the influence of the Good Friday returns. The disappointment at the returns for last week appears also to be unfounded, as it compares with a Good Friday week of last year, and it is in fact rather a good sign that so many of the companies, notwithstanding this circumstance, should show so large an increase as they do. The position of the London and North-Western, Great Western, and North-Eastern in this respect appears to be especially favourable. The reports from the manufacturing districts, especially Lancashire, still continue of the most favourable description, and it is hardly doubtful now that a great advance in the real value of almost every description of home property or business will take place during the next few months. Apparently the continued anarchy of France, as at the beginning of the war, assists our manufactures, as France produces little and buys little, and the competition is diminished both ways; and this immediate effect on our trade cannot but be noticed, although in the long run we shall suffer from the diminished purchasing power of our neighbours.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	89¾ ½	.....	89¾ 90 xd	+ ¼
Great Eastern	43¼ ½	.....	42¼ ½	− 1
Great Northern	125 6	.....	125 6	... ...
Ditto A	135½ 6	.....	135½ 6	... ...
Great Western	89¾ 90½	.....	89¾ ½	− ¼
Lancashire and Yorkshire	140½ 2	.....	140½ 1½	− ½

Ditto Preferred	114 16	.....	114 16	... ...
Ditto Deferred	56 ½	.....	55¾ ½	− ¼

The quotations for the leading debenture stocks compare as follows with last week :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Great Eastern A 5 %	109 11	.....	110 12	+ 1
Ditto 1867 Redeemable	108 10	.....	108 10	... ...
Great Western 5 %	112 13	.....	112½ 13½	+ 1½
London and Brighton 4½ %	100 2	.....	100 2	... ...
London, Chat., & Dover Arbitration 4½ %	95 ½	.....	95 6	... ...
Metropolitan District 6 %	116 18	.....	116 18	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending April 15 to 746,681*l*, being an increase of 14,953*l* on the corresponding week of last year. The corresponding week of last year was Good Friday week. The aggregate receipts of the current half-year to date are now 9,715,349*l*, or an increase of 562,201*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 8,572*l*; Great Western, 4,085*l*; North-Eastern, 3,413*l*; and Caledonian, 2,085*l*. On the other hand, the following companies have decreased—Great Eastern, 2,019*l*; Midland, 1,987*l*; South-Eastern, 2,270*l*; and London, Chatham, and Dover, 1,502*l*. The following shows the increase or decrease in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

With regard to the funding scheme, Messrs Jay Cooke and Co., in their last weekly circular, dated April 4, state :—

Subscriptions to the United States Funding loan continue at about the same rate as hitherto. The total amount of the Five per Cent. bonds subscribed for thus far is $53,000,000. Of this aggregate, only about $5,000,000 has been taken by private investors, the remainder having been subscribed for by national banks in exchange for their Five Twenties deposited with the Government against circulating notes, the larger portion of which conversions have been made directly or indirectly by our instrumentality. Experience has proved that it was an error of policy to divide the first instalment of $200,000,000 between the home and foreign markets, and the Secretary of the Treasury has therefore opened the whole of that amount for subscriptions at home or abroad. It remains, however, to remedy the present inefficiency of the agencies by reducing their number to the few who have been prominent as dealers in Government securities; and there is reason to expect that this condition of complete success will ultimately be adopted; although for the moment the Secretary of the Treasury is disposed to allow matters to drift on their present course. The past success of the negotiation cannot be regarded as discouraging, although it may be below the enthusiastic anticipations of some. It is not easy to conceive a condition of affairs in Europe more unfavourable to the operation; and the absence of subscriptions there can hardly be a disappointment, except to those who placed confidence in the unfounded rumour that arrangements had been made, in advance, for taking a large amount of bonds in Europe.

BANKS.—In bank shares a moderate business has been transacted, and the tendency generally has been favourable. Alliance have risen 1½; Anglo-Egyptian, ¾; and Anglo-Austrian, Chartered of India, Australia, and China, Joint-Stock, and London and Westminster, ½.

TELEGRAPHS.—The changes in the telegraph market have been important. Anglo-American shares have risen 4; Anglo-Mediterranean, 1; British Australian, ⅛; British Indian Extension, ½; British Indian Submarine, ⅝; China Submarine, ⅛; Falmouths, ⅜; Reuter's, ½; French Cables, 2; and Submarine, 3. In Construction companies the alterations have been an advance of ½ and ¼ in Hooper's and Telegraph Construction respectively, and a fall of 2 in Silver's India Rubber shares.

MISCELLANEOUS.—As regards miscellaneous securities, the movements have not been important. An advance of ¼ has taken place in Anglo-Mexican Mint, of ½ in Commercial Union Assurance, of 2 in Darjeeling, of 1 in General Steam Navigation, of ¼ in North British Australasian, and of 1 in Rhymney Iron. On the other hand, Ebbw Vale Steel and Iron and Coal shares have declined 3.

SPECIAL SETTLING DAY.—Friday, the 28th inst., has been appointed special settling day for the Argentine loan, Midland Railway new 20*l* 5 per cent. preference bonds, Eberhardt and Aurora Mining Company, 3,500 new shares, Telegraph Construction and Maintanence, Trust Certificates, and Val de Travers Asphalte Paving Company.

EXCHANGES.—Bills upon Amsterdam, Rotterdam, Antwerp, and Brussels have been more in demand.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—There is no change in our market to report; there not being the slightest demand for abroad, all present arrivals go to the Bank, the amount sent in since the 13th inst. being 392,500*l*. The Queen has brought 10,000*l* from New York; the Lacydon 2,500*l* from Brazils; and the Athenian 7,000*l* from Africa. The Overland Mail steamer has arrived at Galle with 420,375*l* gold for England; this amount will be due about the end of next month.

Silver.—Some large amounts have come to hand during the week, amounting to about 182,000*l*. This sum has been taken chiefly for Holland at 60 3/16d to 60¼d per oz. standard, but the market may now be considered as quiet at the quotation mentioned below. The Tasmanian has taken 10,200*l* to the West Indies.

Mexican dollars have been firm, especially the old coinage, which being in good demand for China have improved in price to 59½d per oz standard. The Candia took out 215,650*l* to the East on the 16th inst. We have received about 64,000*l* during the week, chiefly from New York.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10⅜d to 1s 10⅝d. The Council bills on India were allotted yesterday; the minimum, as before, was 1s 10¼d per rupee. Tenders on Calcutta and Madras, at 1s 10⅜d, will receive about 3 per cent., and on Bombay, at 1s 10⅜d, about 30 per cent.; those above in full.

India Government loan notes are as last quoted by us, viz. :—4 per Cents., 92 to 92¼; 5 per Cents., 100 to 100½; and 5½ per Cents., 107 to 107½.

Quotations for bullion.—Gold—Bar gold, 77s 8⅞d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0 3/16d per oz std; ditto containing 5 grains gold, 5s 0⅝d to 5s 0 11/16d per oz std; Mexican dollars, 4s 10⅝d to 4s 11⅛d per oz, last price.

The *Gazette* return states that the imports of the precious metals into the United Kingdom during the week ended April 19 amounted to—gold, 258,482*l*; silver, 309,758*l*. The exports were—gold, 15,888*l*; silver, 365,735*l*.

FAILURES AND EMBARRASSMENTS.—It is stated that the stock of Messrs J. and W. Jeffery and Co., of Compton House, Liverpool, whose suspension was recently announced, has been disposed of for about 60,000*l*, having been valued at 120,000*l*. The *Manchester Courier* mentions the failure of Messrs Hocken, Bird, Cole, and Co., merchants, of Manchester. Liabilities, 93,819*l*; assets, 80,541*l*.

Italian Tobacco Monopoly, general, Florence.
Western of France Railway, general, Paris.

NOTICES AND REPORTS.

STOCKS.

Egyptian—Viceroy's 7 per Cent. Loan, 1865.—The numbers of 3,172 bonds, representing 92,569*l*, have been drawn for redemption at par on the 7th July.

Egyptian 7 per Cent. Loan, 1868.—The numbers of 3,600 bonds, amounting to 72,000*l*, have been drawn for repayment at par on the 15th July.

Queensland 6 per Cent. Loan for 765,600l.—The sum of 565,600*l* of this loan has been subscribed for in the colony, and the balance, 200,000*l*, is offered here by the Union Bank of Australia. Tenders will be opened on the 26th instant. The principal is repayable in 1896.

RAILWAY COMPANIES.

Alabama and Chattanooga Bonds.—It is stated that provision was made for the payment of the overdue coupons in New York on and after the 5th instant.

Belgian Eastern Junction.—A dividend of 2s per share is announced.

Demerara.—The gross earnings for the half-year were 15,625*l*, being the largest amount yet realised in a half-year; and the returns continued to show a steady increase. To the balance from the preceding half, 362*l*, there was a net balance of revenue to be added of 7,150*l*, making 7,512*l*. The dividend on the preference stock absorbed 4,025*l*, and the directors recommended a dividend at the rate of 4½ per cent. per annum on the ordinary stock, leaving a balance of 449*l*.

Highland.—The gross traffic for the half-year ended 28th February amounted to 104,449*l*, and the working expenses to 42,369*l*. After adding 3,515*l*, the previous surplus, and after deducting preference charges, a dividend at the rate of 4 per cent. per annum is notified, absorbing 14,599*l*, and leaving as surplus 114*l*. The traffic increase was 4,610*l*. Capital expended, 2,962,118*l*.

London, Chatham, and Dover.—The directors are issuing 200,000*l* of the "4½ per Cent. B Debenture Stock," the preference shareholders having the first option of taking the same at the price of 85 per cent.

Mexican.—The numbers are published of class A mortgage bonds, which were drawn for payment at the second half-yearly drawing on the 15th instant.

St Andrews.—Dividend recommended at the rate of 6½ per cent. per annum, free of income tax.

Zealand.—The directors have resolved to distribute an excess dividend of 2 per cent. on the share capital.

BANKS.

Alliance.—An agreement for the transfer of the Liverpool and Birkenhead branches to the National Bank of Liverpool has been entered into.

Bank of Victoria.—At the meeting in Melbourne the six months' profit was announced at 31,167*l*, and after paying a 10 per cent dividend, 2,500*l* was applied to the reduction of the premises account.

Chartered Mercantile Bank of India, London, and China.—The adopted report stated the profit for the year, after deducting charges, at 49,479*l*. A dividend of 4 per cent. was paid in July last, and a further dividend of 2 per cent. has now been declared, leaving 4,479*l*, which has been carried to reserve fund. The sum of 117,411*l*, representing the aggregate amount of losses during the last few years, has been debited to the reserve fund account, which stands at 37,068*l*.

Delhi and London.—The adopted report showed a net profit of 5,189*l*, making the available total 6,189*l*. After making partial provision for an estimated loss of 3,800*l* in connection with the failure of two firms in the East India trade, a dividend was declared at the rate of 2½ per cent. per annum.

Oriental Bank Corporation.—At the meeting a dividend at the rate of 12 per cent. per annum was declared; surplus, 10,096*l*.

Standard Bank of British South Africa.—The accounts for the half-year show an available profit of 15,201, which it is proposed to dispose of as follows:—To rebate on bills, 6,743*l*, to dividend of 10s per share on the shares with 2*l* paid, and of 4s on those with 10*l* paid, 8,167*l*; and to balance carried forward, 291*l*. A large portion of property, previously taken over against debts, has been realised during the past six months, and provision has been made for the losses thereon out of current profits and the appropriation of 14,000*l* from the reserve fund.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Australian Mortgage, Land, and Finance.—Year's net profit, 25,424*l*, including 331*l* brought into the account. The year's dividend is announced at the rate of 10 per cent.

ASSURANCE COMPANIES.

London and Lancashire Life Assurance.—The adopted annual report stated that 426 new policies had been issued, assuring 144,414*l*, and giving a new income of 5,047*l*.

Merchants Marine, Limited.—The prospectus states that the capital is 1,000,000*l*, in 10*l* shares, of which 1*l* is to be paid on allotment, and no further call is intended. The special object is to cultivate the eastern trade, and the company will establish agencies in the eastern ports. The prospectus also states that —"During each year it is proposed to pay the shareholders half-yearly, upon their paid-up capital, interest at the rate of 5 per cent. per annum; and, so soon as practicable, after the expiration of each year, a profit and loss account will be made up, showing the results of the business, due provision being made for all outstanding risks. Out of the profits will first be paid an additional 5 per cent. on the paid-up capital, making, with the interest to be paid, as explained in the last paragraph, 10 per cent. to the shareholders. Before any further division of profits takes place among the shareholders, one-fourth, say 25 per cent., of the residue, will be rateably divided amongst those insurers out of whose business profits have been made during the year."

North British and Mercantile Insurance.—At the annual meeting held in Edinburgh the business for 1870 was thus described:—The fire premiums amounted to 555,179*l* net, being an increase upon the preceding year of 49,750*l*. 879 new life policies were issued, insuring 810,632*l*, the premiums on which amounted to 24,348*l*. The fire reserve funds now amount to 745,123*l*, and the accumulated funds of the life department to 2,313,777*l*. A dividend of 15s per share for the half-year ending 31st December last, making, with the 10s per share paid for the half-year to the 30th June last, 20 per cent. on the paid-up capital, was declared, together with a bonus of 10s per share, or 8 per cent., in all 28 per cent. for the year, free of income tax.

Prudential Assurance.—The gross surplus for the year was 84,909*l*, from which 14,000*l* was written off for the purchase of business; net surplus, 70,909*l*.

Standard Life Assurance.—At the annual meeting the new life policies were stated to have been 1,936 for a total of 1,181,399*l*, yielding in premiums 42,725*l*. The assurances in force are upwards of sixteen millions, the revenue is more than 700,000*l*, and the invested funds are more than four millions.

MISCELLANEOUS COMPANIES.

Bahia Gas.—There has been a net profit for the half-year of 3,276*l*, and recommends the payment of the usual dividend at the rate of 10 per cent. per annum on the preference shares, and 3 per cent. per annum on the ordinary shares, leaving 152*l* at the credit of profit and loss account.

Hop and Malt Exchange and Warehouse, Limited—(Issue of Debentures).—The directors invite applications for an issue at par of 1,400 debentures of 50*l* each, redeemable at par in five, seven, or ten years, at the option of the applicant, and secured by mortgage upon the company's freehold land and buildings in Southwark. 30,000*l* consists of Series A, bearing interest at the rate of 6 per per cent. per annum, and 40,000*l* of Series B, bearing interest at the rate of 7 per cent. per annum. Nearly the whole of the latter issue, it is stated, has already been taken.

Nerbudda Coal and Iron.—The railway from the collieries is expected to be completed, 10½ miles in July, and the remaining 1½ miles two months later. The delivery of coal to the Great Indian Peninsula has nearly reached the contract quantity, and that company has inquired how soon an additional quantity could be supplied.

Queensland Sheep Investment.—A dividend of 15s per share is declared; surplus, 2,374*l*.

Southall, Ealing, and Shepherd's Bush Tramway, Limited.—A prospectus of this company is issued. Capital, 25,000*l*, in shares of 1*l*. The purpose is to construct a tramway on the Uxbridge road, commencing at the Red Lion Inn, Southall, passing through Hanwell, Ealing, Acton, and Shepherd's Bush, and terminating, after forming a junction with the London Street Tramways, at the Uxbridge Road station of the West London Railway. A minimum dividend of 15 per cent. is reckoned on.

Tamar Fire-brick and Clay, Limited.—Capital, 20,000*l*, in 2*l* shares. The object is to purchase a thirty years' interest in a valuable bed of fire-clay on Hingston-down, Calstock, Cornwall.

MINING COMPANIES.

Allt-y-cerb Silver Lead Mining, Limited.—Capital, 36,000*l*, in 1*l* fully paid shares. A 21 years' lease of these mines is to be acquired for 26,000*l*, of which 18,000*l* will be in shares. The property is situated about 7 miles from Aberystwith, and there

is a royalty of one-fourteenth. The Champion lode is stated to run through the entire estate, and the directors believe that it will be a very paying property.

Morfa Iron Ore, Limited.—Capital, 40,000*l*, in 8,000 shares of 5*l* each. It is proposed to work two iron ore properties situated about 14 miles from Carnarvon, one of which on the sea-shore is said to contain a great vein of magnetic ore. The purchase price is 5,500*l* in cash, and 2,400 shares.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

At Mark lane to-day the supply of English wheat was only moderate, but there was a fair show of foreign produce. Owing to the improved aspect of agricultural affairs, there was less animation in the inquiry; nevertheless, prices have been without material alteration. As regards barley the receipts have been on an average scale. Transactions have not been exhaustive, but prices have been steady for all qualities. Malt has been quiet, on former terms. Oats have been in fair average request, and prices have been rather higher. Beans and peas have been steady in value and inquiry. Flour has been firm, but not active. This week's import into London have amounted to 10,480 qrs of wheat, 110 barley, 15,760 oats, 1,160 maize, 300 qrs beans, and 1,860 sacks 28,770 barrels flour.

At Liverpool and Wakefield this morning the demand for wheat was only to a moderate extent, but prices were without alteration.

The Liverpool cotton market has been quiet during the past week, and prices show a decline of $\frac{1}{8}$d to $\frac{1}{4}$d per lb since last Friday. The total sales are 71,140 bales; of which the trade have taken 54,930 bales; speculators and exporters, 16,220 bales. The imports for the week are very heavy, being 177,231 bales; the actual exports, 12,854 bales; and to-day's stock is 923,590 bales. Quotations for American descriptions have receded $\frac{1}{8}$d to $\frac{1}{4}$d per lb; East Indian, $\frac{1}{8}$d per lb; and Bengals are unchanged since this day week.

To-day the market closes dull: sales, 10,000 bales, prices tending in buyers' favour.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, March 25:—The dull accounts from the home markets had little if any effect, owing to the continued scarcity of suitable cotton, and prices during the first half of the week ruled very much on a par with those current when our last report was written, with the exception perhaps of sawginned Dharwar, which declined about 5 rs to 7 rs per candy. The favourable news, however, had a very quickening effect, dealers became less willing to sell, and the pressure of March freight engagements compelling a number of exporters to purchase ready cotton, enabled holders to exact very full rates. The aggregate of sales advised last mail was small when it is considered how far the season is advanced; but for this week a still lesser total has to be noted. Not more than 4,600 candies have changed hands, comprising about 400 candies of Broach, 600 candies of machine-ginned Broach, 1,700 candies of Barsee, Khandeish, and low Oomras, 700 candies of Akote, 400 candies of Dhollerah, and the remainder Dharwar, Veravul, &c. In the up-country markets prices have been maintained at a very extravagant range. The cultivators were holding out resolutely against the rates offered last week, and late accounts from home have caused a further advance. Although the immediate effect may be disappointing to exporters, we are hopeful that the increased prices now being offered will attract abundant supplies to the various markets, and ultimately lead to a scale of prices which will show some margin upon home values. From Tinnevelly we have a telegram dated 23rd instant, quoting $6\frac{3}{16}$d per lb.

In the rice market only a moderate business has been concluded, but prices have been steady. For tea the demand has been inactive. Raw sugar has changed hands slowly, but at full prices, whilst refined goods have well maintained previous quotations. In the coffee market an increased amount of steadiness has prevailed, and notwithstanding large supplies, prices have risen 1s per cwt. Cocoa and other articles have been in limited request.

The annexed is dated Akyab, March 16:—Nakrenzie rice have been very regular of late. On the 4th and 5th instant, we experienced some heavy showers of rain, which interrupted them for a day or two, but after that, they continued pretty large both of rice and paddy, up to the last few days, since when a falling off is again to be noticed. Regardless of the heavy demand which prevailed, prices ruled steady at 53 rs to 54 rs per 100 baskets of 28 lbs for good three parts shipping quality, equal to 5s 7½d per cwt, free on board; and as buyers operate most carefully at present, we do not expect to see prices move upwards for some time to come. On the other hand it will be difficult to establish a decline as long as the demand shows itself so strong as at present. The system of sifting the rice up to three parts at the expense of the seller is still being carried on, and the consequence is that the rice now being brought in shows a much superior quality, as far as admixture of paddy is concerned, than what was being offered in the beginning of the season. Advices from all districts unite in stating that the late rains have done no harm to the stocks of rice in the country. The tonnage in the port aggregates 15,000 tons burthen, against 16,000 tons same period in 1870, and 18,000 tons in 1869.

The following report, dated March 21, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—We are able to report a continuance of the activity previously noticed in the shipping business of our port, for which the weather remains very favourable. The clearances outwards are again liberal, maintaining exports at an advance on those of last year. To date the distribution of our coffee crops is as under —

	1871. cwts.		1870. cwts.
To Great Britain	52,571	.....	39,507
Foreign ports.....	12,082	.....	21,003
Australia and India ...	1,764	.....	1,697
	66,417	.....	62,207

During the fortnight the business in parchment coffee has been almost entirely confined to medium qualities, from outlying districts arrivals from Kandy estates and gardens having ceased. We hear of nothing doing in finest high-grown plantation kinds, for which extreme rates are demanded by growers. The supplies of native are very light, and of this quality all is taken at rates fully equal to our last quotations.

Annexed is Messrs Moran and Co's indigo report, dated Calcutta, March 22:—We have no transactions to notice in indigo since last mail, nor have we any change of importance to report in the prospects of the new crop. With the exception of some few factories where the late rains had necessitated re-sowing to a small extent, as mentioned in our last issue, sowings have been progressed in Tirhoot and Chuprah under most favourable circumstances. We continue to get very satisfactory accounts of the October plant in the districts of Lower Bengal, where they have also excellent moisture for the completion of the spring sowings. Exports of indigo from 1st November, 1870, to 16th March, 1871:—To Great Britain, 16,395 chests; France, 483; Trieste, 2,781; foreign Europe, 250; America, 2,235; Gulphs and Levante, 1,714—total, 23,858 chests.

The annexed is dated New York, April 7:—The volume of trade continues moderate, the demand for most kinds of manufactures, raw materials, and necessaries being pretty accurately gauged in accordance with the exigencies of distributors and consumers. With the Northern lakes and rivers in navigable condition, and the 24th inst. fixed as the date for opening the State canals to navigation, an improved demand for many kinds of merchandise is confidently looked for, as buyers have been holding off for cheaper transportation and "bargains" on the score of market values. But with the same financial and commercial causes which have long had a restraining influence upon trade still operative, no very great degree of business activity is probable. The wants of consumption are not likely to be anticipated to any considerable extent, but will rather be supplied as they arise, since there are no inducements to engage in speculative operations, in the absence of a reliable basis for commercial calculations. So far as prices of the leading staples are concerned, there is very little change to note, though in a majority of instances the advantage is with buyers. This is especially true of many imported commodities, the supply of which has of late largely exceeded the demand. The gold premium has shaded a little, and the market has been quite devoid of speculative activity or excitement. The money market has continued rather close, the rates for call loans varying from 6 to 7 per cent., and discount rates of prime mercantile notes 7 to 7½ per cent. Foreign exchange continues strong under a light supply and the unsettled aspect of financial affairs on the other side of the Atlantic. The Bank of England rate remains unchanged, but an upward movement seems inevitable on account of many impending new undertakings and loans, some of them being of an important magnitude.

THE COTTON TRADE.

LIVERPOOL.—APRIL 20.

The cotton market has been depressed throughout the week, and with increased pressure to sell, prices have in many instances given way ⅛d to ¼d per lb. In Sea Island the business has chiefly been in the better qualities, which have commanded full prices; common grades continue to be neglected. American has been irregular, and a decline of ¼d per lb has generally been submitted to; but cotton with good staple and even colour is more firmly held. New York advices to the 20th instant quote middling Upland 14¾ cents, costing to sell in Liverpool 7¾d per lb, by steamer. Brazil continues heavy, at a decline of ¼d per lb. Egyptian has been pressed for sale, and is about ¼d per lb lower. East Indian has only been in limited demand, the lower qualities of American attracting the attention of consumers of these descriptions, holders have consequently shown great anxiety to sell, and prices are ¼d to ⅛d per lb lower. In cotton to arrive the transactions have been comparatively limited at declining rates. The latest quotations are—American, basis of middling, not below low middling, New Orleans, ship named, 7⅛d; Mobile, ship named, 7 1/16d; low middling, New Orleans, ship named, 6¾d; March-April shipment, 6¾d; Broach, good fair ginned, ship named, Cape, 6¼d; Dhollerah, fair new merchants, Cape, April-May, 5¾d per lb.

The sales of the week, including forwarded, amount to 71,140 bales, of which 3,870 are on speculation, and 12,340 declared for export, leaving 54,930 bales to the trade.

FRIDAY, April 21.—The sales to-day will probably amount to about 10,000 bales, the market without change.

IMPORTS, EXPORTS, CONSUMPTION, &c.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	679,900
An increase of quantity taken for consumption of	104,690
An increase of actual exports of	171,140
An increase of stock of	439,809

In speculation there is a decrease of 69,410 bales. The imports this week have amounted to 177,231 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to April 14) is 249,000 bales, against 216,000 bales last year. The actual exports have been 12,854 bales.

NEW YORK.—April 5.

The market for this staple on the spot has ruled dull and heavy throughout, but prices are not quotably lower. The receipts at the supply ports continue largely in excess of last year, and Liverpool advices have been unfavourable to a sufficient extent to render exporters quite cautious. For future delivery the market has ruled quiet at slightly easier rates. We quote :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary per lb	10⅞ @ ...	11 @ ...	11⅛ @ ...	11⅜ @ ...
Good ordinary	12⅜ ...	12¾ ...	13 ...	13¼ ...
Low middling	14 ...	14⅛ ...	14⅜ ...	14⅝ ...
Middling	15⅛ ...	15⅜ ...	15⅝ ...	15⅞ ...
Good middling	16¼ ...	16⅝ ...	16⅝ ...	16⅞ ...

The quotations are based on cotton running in quality not more than half a grade above or below the grade quoted. The receipts have been from—New Orleans, 3,213 bales: Savannah, 832; Charleston, 903; North Carolina, 490; Virginia, 1,672; per Railroad, 2,417; total, 9,257 bales. Total import since 1st inst., 9,257 bales; total import since 1st September, 813,870 bales. Export from New York from 1st to 4th of April, 1871, 11,740 bales against 2,757 in 1870.

New York, April 18.—The receipts of cotton at all United States' ports for the last four days have been 34,000 bales. Shipments to Great Britain, 24,000 bales; to France, none; and to the continent, 6,000 bales. Middling Upland, 7d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

Manchester, April 20.—Our market has remained very tame throughout the week, with a very sluggish demand for both yarns and cloth; consequently the trade of the week has been but small. Prices have continued remarkably steady, with only here and there a slight giving way, and chiefly in fabrics made from low-priced cotton. Buyers, however, are indisposed to renew their contracts at current rates, fearing that the large supplies—present and prospective—of cotton will ere long produce a lower range of prices. Sellers, on the other hand, having heavy contracts on hand, and foreseeing the possibility of troubles with their hands unless higher wages and reduction in the hours of work are conceded to them, are averse to selling for forward delivery unless at full rates. The home trade in yarns is but small, and for present wants. In shipping yarns there is hardly anything doing, especially for the East, as latest telegrams are still unfavourable. For cloth there has been some inquiry for the large staple makes suitable for the East, but at prices too low to result in much business. Fine printing cloths are still in good demand, and firm in value. Nearly all light goods are well under contract. Heavy goods, however, as domestics, T cloths, long cloths, are quiet; and unless an increase in the demand springs up stocks will soon accumulate. Market closes tame; little doing; prices barely steady.

Messrs Alexander Collie and Co. have received the following telegram from Manchester, dated yesterday :—The market is dull to-day all round, and the tendency of prices continues to be in favour of the purchaser.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

The grain trade during the week, influenced by the wet weather and the favourable accounts at hand from the agricultural districts respecting the growing crops, has been in a quiet state, and prices have been with difficulty maintained. Fair supplies of wheat have been on offer. Sales have progressed quietly, and the tendency of prices has been towards lower rates. There have been some parcels taken for export, but the shipments are beginning to show signs of falling off. Barley, of which a moderate supply has been on offer, has

sold slowly, but at unaltered currencies. Oats have commanded a fair amount of attention, and prices have risen fully 1s per quarter. Beans have been steady, but not active. Peas and maize have been disposed of at late quotations. Flour has been purchased less freely, still prices show no change.

Mr Geo. Dornbusch thus reports on the state of the floating grain and seed trade:—During the last eight days 33 grain and seed-laden vessels have arrived at ports-of-call, viz., 17 wheat, 5 maize, 4 barley, 1 rye, 1 beans, 1 linseed, 1 flour, 2 beans, 1 oilcake. The floating grain trade has this fortnight been dull in tone. Wheat slow to sell, and prices 1s to 1s 6d lower on the week. Maize also inactive, and prices favouring buyers. In barley business has been difficult to effect but closing steady for want of good-conditioned cargoes. Rye at first appeared in improving demand, but later 2 lots returned. The reported sales are as follows: Wheat —9 arrived cargoes: Gharka Odessa, 51s to 53s; Berdianski, 56s, Walla-bian, 48s 6d; Taganrog winter, 54s 9d per 492 lbs, yellow Polish, 53s 9d per 480 lbs; Californian, 62s per 500 lbs. Shipping one cargo Marianopoli, Berdianski, and Gharka, 55s 6d per 492 lbs. Maize—7 arrived cargoes: Odessa, 37s 9d to 38s, Galatz, 36s; Danubian, 34s 6d per 480 lbs, and 38s 6d per 492 lbs. Barley—2 arrived cargoes: Odessa, 27s 7½d, and Taganrog, 28s 7½d per 400 lbs. On passage, 2 lots Odessa at 28s per 400 lbs. Rye—shipped or to be shipped, 2 cargoes Azow and Taganrog at 36s per 480 lbs. Linseed dull and prices stationary. Shipped or to be shipped, 1,021 tons Bombay at 63s, and 1,500 tons E.I. Calcutta, 62s 6d per 420 lbs. Rapeseed 6d to 1s lower on the week. Arrived in London, 250 tons ordinary brown Calcutta at 67s 6d. Shipped or to be shipped, 200 tons ditto at 65s. Cottonseed quiet at late prices. An arrived cargo Egyptian at 9l. 450 tons on passage at 9l 5s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

(See Report of the Day's Markets and Prices copy.)

Wednesday Evening, Last, Friday Morning.

Sugar.—The demand has been more steady, and the better kinds of raw sugar have realized the currency of previous week, but the inferior kinds are rather lower. Low brown Mauritius and Java Manilla. Prices have been [illegible] Mauritius, which realized extreme rates, supporting [illegible] market. A good business is reported in refining sugars at [illegible] Refined goods have met a fair demand at late rates. Crystallized Demerara is not [illegible] Refined goods steady. Grocery [illegible] Molasses.—Trinidad [illegible] Rum.—There has been a limited inquiry this week, and the market is quiet. Some fresh arrivals have occurred. A few sales are reported, including Demerara at 1s 9d to 1s 11d, pale Leewards 1s 6d per proof gallon, being rather lower.

Cocoa.—A large quantity of Trinidad has arrived. At the public sales 1,240 bags sold irregularly: middling to fine, 61s to 82s; a few lots, 88s to 120s: grey and mixed, 51s to 60s. 1,659 bags Grenada, about one-third part sold at 45s to 51s: good, 52s to 55s. 151 barrels, 84 bags other West India part sold: St Lucia, at 42s; Dominica, 44s 6d. 910 bags Guayaquil "salvage" were withdrawn. 162 bags sound Caracas were taken in. Privately a limited quantity of Guayaquil has changed hands. The deliveries both for home use and export keep large, and the total stock amounts to 35,690 bags, against 25,450 bags last year, and 34,980 bags in 1869 at same time.

Coffee.—There has been some improvement in the demand, the sales of plantation Ceylon having passed off with spirit at higher rates, especially for colory kinds, and the increased supply. 2,231 casks 251 barrels 716 bags all sold: low middling to middling, 63s to 69s; good middling to fine, 70s to 83s 6d; a few lots, 85s 6d to 86s 6d; pale and grey, 58s to 72s for small to bold. Native is firmer. 800 bags by auction were taken in rather above the value. A parcel to arrive at 54s 6d. 216 half-bales, &c., Mocha went at 87s to 89s 6d for low and mixed long berry, 99s for fair ditto, and 99s to 99s 6d for small berry. 282 bags Cochin were taken in at 56s. 212 mats Manila sold at 53s. 2,204 bags Singapore were chiefly bought in. A few lots sold at and after the sale at 57s to 60s. 515 bags washed Rio found buyers at 56s to 63s 6d. 1,284 bags not washed part sold at 49s to 53s 6d for ordinary to fine ordinary. Two floating cargoes of Rio is reported sold at 49s 9d and 50s 3d for the Mediterranean. The sale of Java, &c., to be held by the Netherlands Trading Company on the 26th instant, will contain 69,500 bags, against 92,400 bags last year. The arrivals from Ceylon and Brazil have caused some increase in the stock, but it is still below that of last year.

Tea.—The market continues rather quiet, the dealers restricting their operations, and further arrivals have taken place. New make Ceylon congou has met with some inquiry, and business done. Other grades remain inactive. The trade are not buying common grades very freely. At auction, 3,665 packages went at low prices for low green tea, and low congou "without reserve." Sales of Indian tea are declared for next Tuesday.

Rice.—At the public sales 2,205 bags Bengal were taken in and close partly sold at 9s 9d for low Dacca kind. The sound portion of 10,527 bags Rangoon was bought in at 14s. Privately, the sales on the spot have been very moderate in extent, including good white Bengal at 12s 3d to 12s 6d; Ballam, 9s 3d to 9s 9d; Madras, 10s. 1,950 tons Bengal &c., to arrive: Cuba, 8s 9d, ex quay; Scinde, 9s 3d to 9s 6d; and Arracan at 9s 9d to 10s. A floating cargo of 1,500 tons Newchwang Arracan at price reported. One of Chittagong at 9s 6d per cwt for the continent.

Imports and Deliveries of Rice to April 15 with Stocks on hand.

	1871	1870	1869	1868
Imports	tons 2,500	... 3,000	.. 2,000	.. 1,000
Deliveries	1,000	.. 1,000	.. 1,000	.. 1,000
Stock	1,500	... 1,500	.. 1,000	.. 1,000

Sago.—The heavy supply tends to depress prices. 3,173 bags small grain, partly sold at and after the sales at 1s decline, from 14s 6d to 16s 6d, but some were bought in above the value. 434 bags load grain, part sold at 18s 6d per cwt.

Tapioca.—440 bags were chiefly taken in. A few lots sold at 2d to 2¼d for good Penang. 100 barrels Rio partly found buyers at 3¼d per lb.

Pearl Tapioca.—Of 705 bags brought forward 399 bags sold; large grain, 17s 6d to 18s 6d per cwt.

Black Pepper.—The market is firmer, with few parcels offering to 37s 6d. Arrivals have been upon a more extended scale. Total sales, 952 casks. Several large parcels of beet sugar have changed hands. The home deliveries keep large. Last year the clearances had fallen off, owing to the uncertainty attending a reduction of the duties; therefore the great increase apparent during the present season does not show the actual rate at which consumption has progressed. The stock in London is 24,750 tons less than in 1870 at the same period.

Mauritius.—At auction 13,951 bags sold readily, also about 2,700 bags by private contract: grainy white, 38s to 39s 6d: grainy and crystalised grey and yellow, 34s to 37s 6d; brown, 31s to 33s 6d; soft brown, 28s 6d to 27s per cwt.

Bengal.—190 bags soft yellow Dumma sold at 28s.

Madras.—Privately, 3,400 bags soft Date kind are reported sold at 21s to 22s. 4,500 bags Jaggery at 18s to 19s, and 1,800 bags grainy at 20s 6a.

Penang.—550 baskets low brown have sold at 19s 6d. By auction 2,632 bags from Bombay were partly disposed of at 25s to 31s 6d for soft brown and yellow.

Natal.—622 bags found buyers at 33s to 35s 6d.

Zanzibar.—995 bags brown realised 27s to 29s 6d.

Manilla.—During the week about 11,000 bags changed hands. Unclayed, 21s; clayed, 25s to 26s. There is now less inquiry. 3,111 bags low brown by auction were taken in above the value.

Floating Cargoes.—Two of Cuba are reported sold at 26s 6d and 28s; three of Porto Rico at 27s 6d and 28s; one of brown Bahia, chiefly in bags, at 23s; two of Havana, No. 10½, at 28s 6d to 29s; one grainy at 30s 9d; one of 2,317 baskets Java at 32s 3d—all for the United Kingdom; one of Havana, No. 12½, at 31s, for the Baltic.

Beet Sugar.—4,178 bags Belgian by auction were all sold to the refiners at 31s to 32s 6d for grainy yellow. Several contracts have been made for future delivery.

Refined.—The market is less active, but quotations have not undergone any material change. Dry goods, 41s 6d to 43s for common to middling, and fine in proportion. Pieces meet with a steady demand.

Molasses.—About 80 puncheons Trinidad have sold at 11s. At auction yesterday 101 casks 402 barrels Sandwich Island were taken in at 11s.

400 barrels Treacle from New York part sold at 16s 6d per cwt.

Rum.—There has been a limited inquiry this week, and the market is quiet. Some fresh arrivals have occurred. A few sales are reported, including Demerara at 1s 9d to 1s 11d, pale Leewards 1s 6d per proof gallon, being rather lower.

Cocoa.—A large quantity of Trinidad has arrived. At the public sales 1,240 bags sold irregularly: middling to fine, 61s to 82s; a few lots, 88s to 120s: grey and mixed, 51s to 60s. 1,659 bags Grenada, about one-third part sold at 45s to 51s: good, 52s to 55s. 151 barrels, 84 bags other West India part sold: St Lucia, at 42s; Dominica, 44s 6d. 910 bags Guayaquil "salvage" were withdrawn. 162 bags sound Caracas were taken in. Privately a limited quantity of Guayaquil has changed hands. The deliveries both for home use and export keep large, and the total stock amounts to 35,690 bags, against 25,450 bags last year, and 34,980 bags in 1869 at same time.

Coffee.—There has been some improvement in the demand, the sales of plantation Ceylon having passed off with spirit at higher rates, especially for colory kinds, and the increased supply. 2,231 casks 251 barrels 716 bags all sold: low middling to middling, 63s to 69s; good middling to fine, 70s to 83s 6d; a few lots, 85s 6d to 86s 6d; pale and grey, 58s to 72s for small to bold. Native is firmer. 800 bags by auction were taken in rather above the value. A parcel to arrive at 54s 6d. 216 half-bales, &c., Mocha went at 87s to 89s 6d for low and mixed long berry, 99s for fair ditto, and 99s to 99s 6d for small berry. 282 bags Cochin were taken in at 56s. 212 mats Manila sold at 53s. 2,204 bags Singapore were chiefly bought in. A few lots sold at and after the sale at 57s to 60s. 515 bags washed Rio found buyers at 56s to 63s 6d. 1,284 bags not washed part sold at 49s to 53s 6d for ordinary to fine ordinary. Two floating cargoes of Rio is reported sold at 49s 9d and 50s 3d for the Mediterranean. The sale of Java, &c., to be held by the Netherlands Trading Company on the 26th instant, will contain 69,500 bags, against 92,400 bags last year. The arrivals from Ceylon and Brazil have caused some increase in the stock, but it is still below that of last year.

Tea.—The market continues rather quiet, the dealers restricting their operations, and further arrivals have taken place. New make Ceylon congou has met with some inquiry, and business done. Other grades remain inactive. The trade are not buying common grades very freely. At auction, 3,665 packages went at low prices for low green tea, and low congou "without reserve." Sales of Indian tea are declared for next Tuesday.

Rice.—At the public sales 2,205 bags Bengal were taken in and close partly sold at 9s 9d for low Dacca kind. The sound portion of 10,527 bags Rangoon was bought in at 14s. Privately, the sales on the spot have been very moderate in extent, including good white Bengal at 12s 3d to 12s 6d; Ballam, 9s 3d to 9s 9d; Madras, 10s. 1,950 tons Bengal &c., to arrive: Cuba, 8s 9d, ex quay; Scinde, 9s 3d to 9s 6d; and Arracan at 9s 9d to 10s. A floating cargo of 1,500 tons Newchwang Arracan at price reported. One of Chittagong at 9s 6d per cwt for the continent.

Imports and Deliveries of Rice to April 15 with Stocks on hand.

	1871	1870	1869	1868
Imports	tons 2,500	... 3,000	.. 2,000	.. 1,000

Sago.—The heavy supply tends to depress prices. 3,173 bags small grain, partly sold at and after the sales at 1s decline, from 14s 6d to 16s 6d, but some were bought in above the value. 434 bags load grain, part sold at 18s 6d per cwt.

Tapioca.—440 bags were chiefly taken in. A few lots sold at 2d to 2¼d for good Penang. 100 barrels Rio partly found buyers at 3¼d per lb.

Pearl Tapioca.—Of 705 bags brought forward 399 bags sold; large grain, 17s 6d to 18s 6d per cwt.

Black Pepper.—The market is firmer, with few parcels offering

Privately sales of Penang are reported at 4¼d to 4⅛d; Singapore 5 1/16d. 160 bags of the former by auction realised 5d, and 419 bags of the latter part sold at 5⅜d per lb. A speculative contract has been made at 4d per lb for delivery for Penang or Singapore.

WHITE PEPPER.—At some further decline there is more inquiry. 341 bags Singapore by auction sold, chiefly at 7⅜d. 400 bags have sold for delivery at the end of the year at 7d per lb.

OTHER SPICES.—125 packages Zanzibar cloves part sold at 3⅞d for fine quality. 21 cases nutmegs were taken in. 6 cases mace sold at about the previous value, viz., 3s 3d for ordinary quality. 56 bales Ceylon cinnamon chiefly sold at irregular prices: 1st sort, 2s 7d to 3s 4d; 2nd, 2s 5d to 2s 11d; 3rd, 2s to 2s 9d; 4th, 1s 4d to 1s 10d. 61 bags bark and chips, 2½d to 5¼d per lb. 1,100 bags pimento were chiefly sold at 1⅞d to 2d per lb, being about the previous value. 39 boxes Japan cassia sold at 35s. 334 cases Cochin of the new crop were partly disposed of at rather lower rates: ordinary and small to middling, 42s to 64s; bold, 85s to 95s. 60 cases of old import bought in. A few lots of middling Jamaica sold at 44s to 49s per cwt.

SALTPETRE.—The market is firmer. A few parcels of Bengal have sold at higher rates: refraction, 18⅛ to 10¼, 26s 6d to 27s; 4 to 3, 29s to 29s 6d. 200 tons have been reported for arrival at 26s 3d to 26s 9d, and 24s to 24s 3d per cwt, without allowance, unless refracting 20 per cent.

IMPORTS and DELIVERIES of SALTPETRE to April 15, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	3690 ...	2270 ...	1280 ...	2100
Total delivered	3280 ...	4920 ...	2840 ...	3760
Stock	2800 ...	2180 ...	2630 ...	6460

COCHINEAL.—The quantity of Teneriffe brought forward at Wednesday's sales was again large, viz., 1,159 bags, but barely one-third part sold at easier rates for silvers, viz., 2s 2d to 2s 5d; black without material alteration, from 2s 4d to 3s 1d. 85 bags Honduras were chiefly bought in.

INDIGO.—There has been a steady market. The quantity declared for the next public sales now amounts to 11,560 chests.

OTHER DRYSALTERY GOODS.—Gambier has continued firm. Business has been done at 16s ex ship. The quotation for block landed is still 16s 3d to 16s 6d. Cutch is inactive. There have not been any public sales of safflower, but more doing privately. 311 cases China galls were taken in at 48s to 50s.

SHELLAC.—At the public sales 287 cases went at easier rates: orange 5*l* 7s 6d to 5*l* 12s 6d; livery orange, 5*l* 5s; garnet and good button, 5*l* 10s per cwt.

METALS.—The market has been inactive, but quotations remain steady. Copper is about stationary in value. Sales of Walaroo have been effected at 73*l* 15s to 74*l* 5s, now more demanded, and Chili, &c., at 65*l* to 66*l*. No alteration in English. Tin is steady, with a moderate demand. Straits, 127*l* to 127*l* 10s. To arrive, 126*l* 10s paid. Banca quoted 129*l* to 130*l*. The iron trade shows symptoms of improvement, and the makers have increased orders on hand. Railway bars quite maintain the recent advance, the American and home demand being good. Scotch pig has fluctuated in price a little, closing at 55s 6d cash. The deliveries are large. English and Spanish lead meet a moderate inquiry. Spelter dull. Silesian, 18*l* to 18*l* 10s. A sale, ex ship, made at 17*l* 15s per ton.

JUTE.—The public sales yesterday were larger than for some time past, comprising 8,589 bales; but the demand is not at all active, and about one-third of that quantity sold: low to middling, 19*l* to 23*l* 15s; good and fine, 24*l* to 26*l*; rejections, 17*l* 15s to 18*l* 5s. The very large supply in Dundee has not affected quotations, and manufactured goods remain without material alteration.

HEMP.—No change can be quoted in this market. Petersburg clean by auction was taken in at 34*l*. Tenders are required for 2,000 tons by the Admiralty, to be sent in on the 25th inst., the bulk Petersburg and Riga hemp. Manila quiet. Good and fine qualities have obtained full prices for small parcels.

LINSEED.—The market has been inactive. Calcutta, 63s to 63s 6d; to arrive, 62s 6d. Bombay, 61s; to arrive, 63s. Black Sea, to arrive, quoted 62s per quarter.

OILS.—The demand for sperm is slow at 83*l*. Since the auction of southern whale (when pale declined to 33*l* to 33*l* 10s) 1*l* more has been asking. Olive remains dull. Gallipoli, 49*l* 10s. Zante, Mogadore, &c., 47*l* to 48*l* per tun. Linseed oil is rather cheaper, viz., 31*l* 10s to 31*l* 15s on the spot. At a further decline there are buyers for arrival. English brown rape has further declined in value, viz., to 42*l* 10s to 42*l* 15s, and it can be bought for the last four months at 43*l*; refined, 44*l* 10s to 45*l*; foreign, quoted 48*l*. Palm continues dull, and prices rather lower. Cocoa nut in good demand: Ceylon 40*l* 5s to 41*l*. Several hundred tons sold to arrive at and about 40*l* 10s per ton.

PETROLEUM.—Refined, 1s 4¼d to 1s 4¾d. Sales for September delivery at 1s 5d per gallon.

HIDES.—The public sales of East India yesterday went off at ¼d to ½d reduction, but 192,865 hides, &c., rather more than two-thirds sold. For the better qualities former rates were in many instances obtained.

TALLOW.—The market continues to be influenced by the large supply of Australian here and on the way. A decline has been accepted for Russian. Petersburg, 42s 9d; April and June the same; October to December, 44s 6d to 44s 9d per cwt. About 1,500 casks, chiefly Australian, are declared for public sale to-day.

PARTICULARS OF TALLOW—Monday, April 17, 1871.

POSTSCRIPT. FRIDAY NIGHT.

SUGAR.—The public sales were large, but the various parcels were chiefly bought in, including 1,730 bags Mauritius, 1,169 bags native Madras, 2,262 baskets low Penang, 826 baskets Java, 10,806 bags unclayed Manila, and 140 casks Porto Rico. 1,787 bags refined grocery Barbadoes sold at 31s to 32s 6d. 1,057 bags Bengal part sold: brown Dulloah, 26s; low, 20s 6d. 498 bags native, 27s 6d to 34s; low brown, 23s. 2,200 bags low brown Java sold at 18s 6d to 19s 6d. Of 2,046 bags beet only a few lots grainy white sold at 37s to 37s 6d. The market continues firm. Sales of West India, including some parcels by auction—653 casks sold, making 1,706 casks for the week. A floating cargo of Cuba sold for the United Kingdom at 27s 3d. 170 casks Porto Rico to arrive at 28s for the Baltic.

COFFEE.—1,631 casks 117 barrels 456 bags plantation Ceylon by auction, all sold steadily at full prices. 183 half-bales Mocha were part sold at 86s for low.

RICE.—1,701 bags white Bengal sold: middling white, 11s; Askoolie, 10s.

DRYSALTERY GOODS.—570 bales block gambier part sold at 16s 6d. 1,520 packages cubes at 19s to 19s 6d; good bought in at 22s, 2,700 packages cutch part sold at easier rates—from 19s to 20s 6d. 512 bags Bengal turmeric sold at 18s 9d to 19s.

OILS.—367 casks cocoa-nut by auction part sold: Ceylon, 40s 3d to 41s; Sydney taken in. 303 casks palm part sold brought 28s to 33s per cwt.

TALLOW.—Y.C. declined to 42s 6d. At auction 1,437 casks, &c., Australian chiefly sold at 40s 6d to 42s for mutton, being about the former value; beef at 37s to 41s, being rather lower for the latter.

ADDITIONAL NOTICES.

REFINED SUGAR.—There is less doing in the home market, and prices are 6d lower. Dutch crushed is not so active as last week, and sales are made 35s 6d for first marks, prompt delivery.

GREEN FRUIT.—The report from Messrs Keeling and Hunt states that the last shipments of oranges from the Azores has been received, and improved the value of Valencias. More doing in Sicily lemons, with an upward tendency as to price. Black Spanish nuts in demand. A good inquiry for West India cocoa-nuts. Arrivals per steamers of new Lisbon potatoes, which have had a good sale at a high figure.

DRY FRUIT.—Currents are very firm in price, but business is quieter than last week. Stocks are gradually being reduced, and dealers hold very little. Raisins are quiet but firmly held, and an improvement is confidently anticipated,

HEMP.—Market very dull and drooping.

SILK.—Prices for most silks merely nominal. Market very quiet.

SEEDS.—There is no alteration in the seed trade.

TOBACCO.—During the past week there has been rather more inquiry for North American tobaccos, which has however only resulted in some trifling sales; prices continue without alteration. For continental and other growths suitable for substitutes a good business has been done at advancing prices.

LEATHER.—The leather trade has shown rather more activity during the past week. The supply at Leadenhall on Tuesday was considerable, and there was a good average demand. Some of the articles which had made the greatest advance, more especially shaved hides, barely supported late rates, and bellies were less urgently wanted; but light crop hides, light English butts, shoulders, calf-skins, and horse hides sold freely at fully former prices.

METALS.—The week has been uniformly quiet. Copper has been in small demand, but quotations are pretty well maintained. Iron is steady. Tin has become weaker from considerable arrivals having been offering in the market. The decline in Straits is 10s to 20s a ton. Spelter is quieter, and prices rather favouring buyers. Lead is well maintained. Tin plates continue to find a ready sale.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian ditto	44	0
Melted stuff	32	0
Rough stuff	16	0
Greaves	19	0
Good dregs	6	0

Imports for the week, 6,406 casks.

METROPOLITAN CATTLE MARKET.

MONDAY, April 17.—The total imports of foreign stock into London last week amounted to 8,599 head. In the corresponding week in 1870, we received 8,396; in 1869, 13,895; in 1868, 5,183; and in 1867, 8,412 head.

The cattle trade, influenced by the wet weather and the heaviness prevalent in the dead meat market, has been depressed, and prices have relapsed. About an average supply of beasts has been on sale, and some prime stock has been exhibited. For all qualities the demand has been restricted, and prices have declined 2d to 4d per 8 lbs. The best Scots and crosses have realised 5s 4d to 5s 6d per 8 lbs, but many good beasts have been sold at 5s per 8 lbs. Fair supplies of sheep have been on offer. In all qualities sales have progressed slowly, at a decline of 2d per 8 lbs. The best Downs and half-breds, clipped, have sold at 5s 6d to 5s 8d per 8 lbs. Lambs have been dull, and the best qualities have not made more than 8s per 8 lbs. Calves have met a slow sale. Pigs have been neglected. At the waterside there are about 500 beasts and between 7,000 and 8,000 sheep.

SUPPLIES ON SALE.

	April 18, 1870.	April 17, 1871.
Beasts	2,816	3,100
Sheep and lambs	20,560	17,700
Calves	92	70
Pigs	35	130

METROPOLITAN MEAT MARKET.

Veal	5	0	5	4	Small pork	4	4	5	0

Lamb, 7s 0d to 8s 0d.

HOP MARKET.

BOROUGH, Friday, April 21.—The market continues to exhibit much quietness. Business of all qualities is conducted within very narrow limits, and the value of choice grades, which up to the present time has been maintained, is slightly easier. Mid and East Kents, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 20s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, April 21.—These markets have been fairly supplied with potatoes. The demand has been quiet at late rates. English Shaws, 50s to 90s; ditto Regents, 55s to 85s; Scotch Regents, 55s to 85s; Rocks, 50s to 70s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 21.—There is fair inquiry for all current descriptions, and as stocks of them continue light, prices show a hardening tendency. River Plate sheepskins, which have of late come in largely-increased quantities to this market, and now form a very important item of supplies for the fellmongers here and in the north and elsewhere, will be brought forward here at auction on Wednesday and Thursday next to the extent of 4,500 bales.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, April 21.—There has been a moderate attendance at this market to-day, but the business done was on a small scale. Wheat was slow at a 1d decline; flour was rather easier. The lowest quotation for prime American maize was 33s. Barley was far from plentiful and sold for a little more money. Beans were unchanged. Peas very scarce, and 2d per quarter advance. Oats and oatmeal steady.

WAKEFIELD, Friday, April 21.—Factors generally hold wheat for last Friday's prices, but there was very little disposition for business on the part of millers, and the few sales made were at prices in favour of buyers. English barley fetched extreme rates. Foreign met with a fair sale at late rates. Beans and oats rather dearer.

The Gazette.

BANKRUPTS.

TUESDAY, April 18.

Edwin Gunston, Potobello road, Notting hill, cheesemonger.
David Herman Hesse and Herman Van Raalte, Fenchurch street, merchants.
William Joslin, Knight's hill, Lower Norwood, baker.
Henry Smith, Exmouth street, Clerkenwell and elsewhere, baker.
Joseph Armishaw, Cheadle seed merchant.
Samuel J. Cohen, Manchester, merchant.
William Earnshaw, Shelley, Yorkshire, innkeeper.
William Hall, Bradford, stuff manufacturer, and Langholme, Scotland, wool manufacturer.
John Philip Stevens Holton, Lydney, Gloucestershire, coal merchant.
Alfred Percy Jacob, Liverpool, auctioneer.
Arthur Jukes, Rock Ferry, Cheshire, merchant.
David Griffith Price, Cardiff, builder.
William Thomas Sharp, Lakenheath, Suffolk, brewer.
Frederick William Springall, Norwich, and Heigham, Norfolk, grocer.
Richard Stretton, Newton Heath, Lancashire, beerhouse keeper.
William Thurston, St John's hill, Wandsworth, builder.
Thomas Williams, sen., Jenkin Williams, and Thomas Williams, jun., Golynfaenol and Pencoed, Glamorganshire, cattle dealers.

SCOTCH SEQUESTRATIONS.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

EDUCATION IN GERMANY.—ANGLO-GERMAN ESTABLISHMENT, Boon-on-the-Rhine, founded in 1847.—The Principal, Herr THOMAS, prepares Gentlemen's Sons for the Army, Civil Service, and Mercantile pursuits. German and French are constantly spoken in his establishment, where the comforts of an English home are provided by an English lady (Mrs Thomas). The highest references given.—Apply to Herrn Director THOMAS Heer Strasse, Boon-on-the-Rhine.—Frequent escorts

SPANISH FLY IS THE ACTING ingredient in ALEX. ROSS'S CANTHARIDES OIL, which speedily produces Whiskers and thickens Hair. 3s 6d, sent by post for 54 stamps.—ALEX. ROSS, 248 High Holborn, London, and all Chemists.

HAIR-CURLING FLUID. 248 HIGH Holborn, London.—ALEX. ROSS'S CURLING FLUID curls Ladies' or Gentlemens' Hair immediately it is applied. Sold at 1s 6d, sent free for 54 stamps. Had of all Chemists.

GREY HAIR. 248 HIGH HOLBORN, London.—ALEX. ROSS'S HAIR DYE produces a perfect colour immediately it is used. It is permanent and perfectly natural in effect. Price 3s 6d, sent by post for 54 stamps, and all Chemists.

CHARTERED BANK OF INDIA, AUSTRALIA, AND CHINA, Hatton court, Threadneedle street, London.

DIRECTORS' REPORT (presented at the Seventeenth Ordinary General Meeting, 19th April, 1871).

The Directors, in submitting to the shareholders the balance sheet of the Bank for the year ending 31st December, 1870, regret that they are unable to recommend the payment of a dividend.

In their circular dated 5th October last, the Directors informed the shareholders that provision would have to be made for losses, then estimated at £72,000—viz., £22,000 caused by a fraud committed at Shanghai, and £50,000 arising from depreciation in the value of securities held in connection with overdue bills and advances.

The severe depression in the markets experienced last autumn was aggravated during the remainder of the year by the continuance of the war; but notwithstanding these unfavourable circumstances, the whole of the produce held by the Bank, with the exception of a small quantity (valued at £8,300), has been realised. The result is, that after taking credit for the profits of the year and the amounts held in reserve, a sum of £59,022 9s 11d has to be carried forward as a deficiency to be met by future earnings; but that sum, representing 7½ per cent. of the capital, is fully believed to be a most ample provision for all losses known or apprehended, and does not justify the recent depreciation of the shares.

It will be observed that the profits for the past 12 months are considerably below the average of previous years. The Directors deem it important, therefore, to state that this falling off arose, not only from the exceptional causes referred to in their last circular, but in a still greater degree from the disturbance of the exchanges, more especially in China, on the sudden outbreak of the war in Europe, and from the restrictions which the Directors, as a measure of precaution, then imposed upon the transactions of the various agencies Although these restrictions necessarily curtailed the profits of the Bank, their effect has been to maintain the business on a perfectly sound footing; and judging from the advices already received, the operations of the agencies during the present year are of a satisfactory character.

The shareholders are assured that the Directors are more than ever alive to the necessity of enforcing at all the establishments of the Bank the strictest economy consistent with efficient management.

In consequence of the continuous decline during the last few years in the value of money in the East, the rates of interest allowed on deposits, both at home and abroad, have been reduced.

The Directors have to report that Mr George Ure Adam, who ably filled the post of Manager from the commencement of the Bank's operations, has been compelled, through impaired health, to retire on superannuation, and has been succeeded by Mr John Howard Gwyther, lately the Sub-Manager.

A vacancy in the Board has been created since the last annual meeting, in consequence of Mr John Allan resigning his seat on account of ill health. The Directors have provisionally elected in his place Mr Andrew Cassels, lately a partner of Messrs John Peel and Co., of Manchester, and of Messrs Peel, Cassels, and Co., of Bombay, and the shareholders are now invited to confirm this election. Mr Ludwig Wiese, formerly a partner of Messrs Siemssen and Co., of China, has also consented to join the Direction; but in terms of the Deed of Settlement his election must be postponed until he has been a shareholder for a period of six months. The Directors believe that these gentlemen will form valuable acquisitions to the Board.

Mr John Jones and Mr William Macnaughtan now retire by rotation, and being re-eligible, offer themselves to the choice of the shareholders.

The two Auditors, Mr Jonathan Thorp and Mr Owen Lewis, having completed their year of office, likewise again tender their services.

MINUTES of the SEVENTEENTH ORDINARY GENERAL MEETING of the Shareholders, held at the London Tavern, Wednesday, the 19th day of April, 1871;

THOMAS ALEXANDER MITCHELL, Esq., M.P., in the Chair.

The advertisement convening the meeting and the Directors' Report, with the General Balance Sheet and Profit and Loss Account closed to the 31st December last, having been read, the following resolutions were successively put and carried unanimously:—

Moved by the Chairman, and seconded by John Jones, Esq.:

1st. That the Report now presented, together with the Balance Sheet and Profit and Loss Account be approved and adopted.

Moved by the Chairman, and seconded by the Right Hon. the Lord Mayor;

2nd. That the election of Mr Andrew Cassels as a Director of the Bank in the place of Mr John Allan, who has resigned, be confirmed.

Moved by the Chairman, and seconded by Joseph R. Morrison, Esq.;

3rd. That Mr John Jones, who now retires by rotation, be re-elected a Director.

Moved by the Chairman, and seconded by James Fraser, Esq.;

4th. That Mr William Macnaughtan, who now retires by rotation, be re-elected a Director.

Moved by James Slater, Esq., and seconded by Alexander Morrison, Esq.;

5th. That Mr Jonathan Thorp be re-elected an Auditor for the ensuing year.

Moved by James Slater, Esq., and seconded by Alexander Morrison, Esq.;

6th. That Mr Owen Lewis be re-elected an Auditor for the ensuing year.

A cordial vote of thanks to the Chairman and Directors for their services was moved by C. B. Skinner, Esq., seconded by Thomas Bett, Esq., and carried unanimously; a vote of thanks to Mr John Howard Gwyther, the Manager, was moved by James Slater, Esq., seconded by C. B. Skinner, Esq., and was also carried unanimously; whereupon the proceedings terminated.

T. A. MITCHELL, Chairman.

16.	Persia.		

The Exhibition will be opened by a State Ceremony and by Command of Her Majesty the Queen, in the Royal Albert Hall, on the 1st May. Admission by Season Ticket and by Guinea.

Applications for Space for Objects should be addressed to the undersigned, at the Offices of Her Majesty's Commissioners, Science Kensington Gore, London, W., to whom Postal Orders must be made payable at the Post Office, Charing Cross, London, W.C.—By order,

HENRY Y. D. SCOTT, Lieut.-Col. R.E., Secretary to H.M. Commissioners.

THE MORFA IRON ORE COMPANY (Limited), Carmarthenshire.—Registered under the Companies Act, 1862 and 1867, which limits the liability to the amount subscribed for. Capital, £100,000, in 5,000 shares of £5 each, fully paid up. £1 per share to be paid on application, £2 per share on allotment, and the remaining £2 per share at three months thereafter.

Directors.

J. Collis Browne, Esq., M.D., The Cedars, Hampton Wick, S.W., and Naval and Military Club, W.

Joseph Fry, Esq., 21 Great Ormond street, W.C., Director of the Vancouver Island Coal and Land Co. (Limited.)

Capt. R. W. Pelly, R.N., Upchester, Essex, Director of the Mawddy Iron Ore Co. (Limited.)

(With power to add two to their number.)

Solicitors.

Henry Charles Elliot, Esq., 10 Regent street, Waterloo Place, S.W.

Bankers.

The National Provincial Bank of England, Bishopsgate street, E.C.

Engineer.

Henry Smith, Esq., 3 Bucklersbury, E.C.

Secretary—David Duncan Craven.

Offices—No. 31 Parliament street, London, E.C.

There is nothing speculative in this undertaking, as the Company can obtain orders when in a position to execute them, the cost of working which will more than equal the entire ordinary expenses of the Company.

The prospectus may be forwarded on application, and every information may be had at the Offices.

MORFA IRON ORE COMPANY (Limited).

Notice is hereby given, that the LIST of APPLICATIONS for SHARES will be CLOSED for London on Wednesday, the 26th, and for the country on Thursday, the 27th April inst.—By order,

D. E. COMYN, Secretary.

PRUDENTIAL ASSURANCE COMPANY.

CHIEF OFFICES—62 LOMBARD HILL, LONDON.

Extracts from the Twenty-second Annual Report for the Year ending 31st December, 1870.

The results of the operations of the year ending 31st December, 1870, show that the Company has attained a remarkable degree of solidity and strength.

The New Business—the progressive source of the Income—and the increase of the Assurance Fund, are all greater than in any previous year.

The following are the returns of the New Premium Income since the last valuation:—

	£	s	d
1867 ...	54,819	5	3
1868 ...	87,748	16	11
1869 ...	102,323	15	2
1870 ...	118,769	7	2

The Premium Income for the same period is:—

	£	s	d
1867 ...	161,997	13	10
1868 ...	229,078	0	10
1869 ...	241,156	12	6
1870 ...	285,022	18	2

The Assurance Fund for the same period is:—

	£	s	d
1867 ...	172,959	14	6
1868 ...	241,307	12	5
1869 ...	278,897	2	3
1870 ...	349,576	3	2

These facts afford the most conclusive evidence that the Company has supplied a want generally felt, and it is satisfactory to know that its operations have been continued in a department of business previously unworked.

The claims paid during the year amount to £91,200 2s 5d, raising the whole sum paid to claimants to the large amount of £661,881 9s 7d.

The accounts are rendered in accordance with the "Life Assurance Companies Act," a measure which, at the time, received the Directors' cordial approval, although some of its provisions will so far as this Company is concerned, involve more than ordinary trouble and expense.

With a view to inform the shareholders of the new Investments of the year, the Directors append a detailed list of the Assets of every description; and the Directors would call attention to the fact that no less than £[illegible] are in Cash, or immediately convertible Investments.

Subscriptions, £3 a year; or £2 with Entrance Fee of £6: Life Membership, £26.
Fifteen volumes are allowed to country and ten to town members. Reading room open from Ten to Half-past Six. Prospectus on application. Catalogue, price 15s; to members, 10s 6d.
ROBERT HARRISON, Secretary and Librarian.

THE LONDON LIBRARY.—MEMBERS are informed that a SET of the TIMES NEWSPAPER from 1785 to 1844 is now placed in the Reading Room for Consultation.

HOLLOWAY'S PILLS WILL BE found to be the most reliable remedies, when spring, after a long and inclement winter, reopens the the pores of the skin, and an alterative is required to transfer impurities from the body through these natural outlets. These pills can be confidently recommended as the surest, safest, and easiest means of attaining the desirable end without weakening the most delicate or incommoding the most feeble. When from frequent chills and impure air the blood becomes foul and the secretions vitiated these pills present a ready and efficient means of cleansing the former and correcting the latter. It may fairly be said of this celebrated medicine that it radically removes all corrupt and disordering elements from the system.

LONDON AND ST KATHARINE DOCKS COMPANY.

The Directors are prepared to receive Loans on Debenture Bonds, bearing interest at 4½ per cent. per annum, for 3, 5, or 7 years, to replace Bonds which have to be paid off.
They are also prepared to issue, under the provisions of the Company's Act, a limited amount of 4½ per Cent. Preferential Stock, to be applied to the reduction of the debenture debt.
The net income of the Company, after payment of all working expenses, exceeds £325,000 per annum, being nearly thrice the amount of the debenture interest; there is also an accumulating Reserve Fund, which now exceeds £105,000.—Application to be made at the Dock House, 109 Leadenhall street.
Dock House, 10th April, 1871.

LANCASHIRE AND YORKSHIRE RAILWAY.

At a Special General Meeting of the Proprietors of the Lancashire and Yorkshire Railway, held pursuant to the Standing Orders of Parliament, at the Company's Offices, Hunt's Bank, in Manchester, on Wednesday, the 19th day of April, 1871,
THOS. DUGDALE, Esq. (Chairman of the Board of Directors), in the Chair,
The advertisement convening the meeting having been read, the following Resolution was unanimously passed, viz:—
That the Bill now submitted to this meeting, entitled—
"A Bill to revive and extend the powers granted by 'The Fleetwood Docks Act, 1864,' and to enable the Lancashire and Yorkshire Railway Company to exercise these powers, and for other purposes,"
be and the same is hereby approved.
THOMAS DUGDALE, Chairman.

THE SOUTHALL, EALING, AND SHEPHERD'S BUSH TRAM-RAILWAY COMPANY (Limited).
Capital, £25,000, in 25,000 shares of £1 each.
5s to be paid on Application, 5s on Allotment, and remainder as may be required.

DIRECTORS.

Lord William P. Lennox, Prince of Wales' terrace, Kensington Palace, W.

Messrs Davidsons, Carr, Bannister, and Morriss.

AUDITORS.
Messrs Broom, Son, and Hays, Auditors to the London Tramways Company.

SURVEYOR—George Billington, Esq.

SECRETARY.
James W. Thomas, Esq., 1 Circus place, Finsbury circus, London, E.C.

PROSPECTUS.

This Company is established for the purpose of constructing and working a tramway on the Uxbridge road, commencing at the "Red Lion" inn at Southall, passing through Hanwell, Ealing, Acton, and Shepherd's Bush, and terminating, after forming a junction with the London Street Tramways, at the Uxbridge Road station of the West London Railway.
The inhabitants on this line of route suffer great inconvenience from the very inadequate means of transit for passengers and goods to and from the Metropolis. This is more especially felt in Ealing and Acton, the former having no direct communication with the north of London, and the latter, with the west end.
The returns from the working of the line will doubtless be large; an estimate based on the number of passengers now travelling by omnibus, between Ealing and Shepherd's Bush, and other data, has been prepared, and shows that a minimum dividend of 15 per cent. may be reasonably calculated upon from this portion of the line.
The provisional order has been granted by the Board of Trade, and the local authorities having given consent as required by the Tramways Act, 1870, the construction of the line will be proceeded with as soon as possible.
A large amount of the capital has been subscribed in the locality, and the remainder is now offered to the public.
No promotion money will be paid, and the preliminary expenses prior to the first allotment of shares have not exceeded £250.
Prospectuses and forms of application for shares can be obtained at the Offices of the Company, No. 1 Circus place, Finsbury circus, London, E.C., where can be seen the plan and section of the line, copies of provisional order, and the estimate of the probable profit.

THE QUEEN, THE KING, AND THE VIRTUOUS LADY.

Mr THOMAS J. BARNARD'S Mining Offices, 175 to 178 Palmerston buildings, Old Broad street, London, E.C. Registered Offices of the Queen Silver and Copper Mining Company (Limited), the King Silver and Copper Mining Company (Limited), the Virtuous Lady Mining Company (Limited). Prices of Shares this day:—Queen, 50s; King, £1 2s 6d; Virtuous Lady, 30s. The almost unprecedented success of the Virtuous Lady for tin and copper, and the Queen and King for silver, tin, and copper, blended with the amalgamation works, introduced for the extraction of silver from the lowest class silver ores upon the most scientific principles, place these properties before the public not as a speculation, but as a mining investment, and the best medium now extant for the employment of capital to the greatest advantage, and where at least 100 per cent. may reasonably be expected to be realised before the close of this year. The following are the proofs:—104 tons of copper from the Virtuous Lady has just realised £737 4s, or over £7 per ton; whereas 4,000 tons sold from the other English mines averaged but £3 18s. At the General Meeting, held the 22nd inst., at the above Offices, a rock of silver ore from the Queen Mine, weighing three-quarters of a cwt, was exhibited, 25 per cent. of which is pure silver, together with 206 ounces of refined silver extracted at the model amalgamation works upon the Mine, which can be increased to any extent, from twenty tons of the lowest class silver ores, of which there is an unlimited quantity, at a net profit of over 100 per cent. Mr B. will be happy to furnish any desired further information, either by letter or person, at the above Offices, where can be seen his small museum of the specimens referred to; together with others of silver, copper, tin, and mundics from the different Mines.

THE ALLT-Y-CRIB SILVER-LEAD MINING COMPANY (Limited).
(To be incorporated under the Companies Acts, 1862 and 1867.)
Capital, £36,000, in 36,000 shares of £1 each.
Deposit, 10s per share on Application, and 10s on Allotment.

PROSPECTUS.

This Company is formed for the purchase of, and extending the workings of, the celebrated Allt-y-Crib Lead Mines, situate in the village of Talybond, in the County of Cardigan, seven miles from Aberystwith. These mines have been worked for about two years under a "Tack Note" and agreement for twenty-one years' lease on demand, at a Royalty of one-fourteenth.
The sett is about one mile in length, and more than half a mile in width.
The rich Champion Lode of the district, as shown on the ordnance map, runs east and west through the entire estate, and is visible on surface for many hundred fathoms in length. There are also other parallel loads opened and proved to be of great value.
An Adit Level has been driven half a mile in length from the foot of the mountain, commencing close to the dressing floors. It has already intersected the Champion Lode, and when driven further, it will intersect the other parallel loads at a depth of about forty fathoms, thus opening several mines at one cost.
From a shallow adit a shaft has been sunk 22 fathoms upon the underlay of the Champion Lode, carrying with it a good course of ore, now worth 2½ tons of lead to the fathom, and constantly improving, and should it continue, of which there is every appearance, until it unites with the deep adit, there will be from 40 to 50 fathoms of backs proved by many hundred fathoms in length.
A steam engine has been fixed in the shallow adit to carry on the operations in this part of the Mine. Below the deep adit a shaft has been sunk some few fathoms, where the lead was found to be two feet thick; it is proposed to erect an engine and continue this shaft. The South Lode on this sett is also proved to be of great value. It unites with the central lodes on the north-west side of the mountain, and the early miners evidently raised large quantities of lead from merely surface scratchings. It is the opinion of experienced and practical miners that it only requires the necessary appliances to make this Mine equal to any in Wales.
All necessary buildings, powerful water-wheel, stamping and crushing machines, are completed and in work.
The local advantages of this Mine can hardly be equalled. It is only three miles from a station on the Cambrian Railway, a river runs by the washing-floors, and there is ample accommodation on the spot for the workmen.
It is proposed to take the Mine over from 31st March, 1871. In its present undeveloped state, the production from the various levels being driven may be estimated at from five or ten tons of ore per week. As soon as the shaft, now being sunk in the Champion Lode, is connected with the deep adit level, the production may be calculated at twenty tons per week. In about four months' time this communication will be effected. As the Mine becomes further developed, the yield will increase in proportion.
The ore sold during the present workings has averaged £12 per ton.
The proprietors have agreed to accept the sum of £20,000 (£8,000 in cash, and the remaining £18,000 in fully paid-up shares), leaving £10,000 as capital, which the Directors feel assured will be sufficient to make it not only a self-paying Mine, but an investment equal to any in Wales.
Prospectuses, with full particulars and reports, may be had on application to the Brokers and the Secretary.

WOULD NOT A 1½D INCOME TAX BE ENOUGH?

As we last week led our readers to expect, the financial proposals of Government have not been satisfactory either to Parliament or to the country, and great improvements have been made in them. The Match Tax was found to be impracticable without causing a greater destruction of trade, and a greater cessation in the demand for labour than it was worth. The alteration in the "death" duties, though probably good as part of a great scheme of altering such duties—a scheme of which an adjustment of the scale so as not to press too hardly on small fortunes would have been a main part—was not good as a solitary proposition. By itself it was sure to offend the feelings of mankind, and it has offended them. The alteration in the mode of calculating the income tax is not actually withdrawn, but hangs suspended for the expression of "candid "opinions." As we have never heard, though we have taken some pains to inquire, of any practical man who did not prefer the old plan to the new, we cannot doubt what the result will be.

We have now to consider the new and very simple proposition of Government to add 2d to the income tax; and if this had been proposed a week ago, it is certain that by this time it would not only have been accepted, but, at least in the political world, forgotten. But the measure-carrying power of the Government has been much weakened by this change of proposal, and therefore what they now ask us to do will be criticised more strictly than any measure of theirs before.

Two main objections are offered against it. First.—That it throws the main burden of the augmented taxation on the propertied classes; and unquestionably it does so. But almost all our recent fiscal legislation has so consistently tended to produce that result, that it is not fair to deal with it as if it were the isolated defect of a single proposition. We have now almost established the proposition that all moderate augmentations of expenditure must be met by an augmentation of the income tax. And to the objection that this is an injustice, because it throws too heavy a burden on a single class, the reply is that it is less an injustice than the opposite remedy—a sudden increase of indirect taxation. This amounts to a large fine on particular traders. In the match trade, for example, the plan of last week would have diminished very largely the consumption of the manufactured article, and would therefore have been an immense sudden diminution of both manufacturers' profit, and of labourers' earnings. It is common to speak abstractedly of dislocation of trade and disturbance of industry; but practically this means taking from persons by law profits and wages which they expected to receive, and which the law had encouraged them to expect to receive. The injustice of singling out particular trades for sudden taxation is far greater than the injustice of a moderate augmentation in the income tax: the inequality is less, and the harm done is less. If indeed such duties as those on tea and sugar are constantly shifted, capital would be slow to embark in those trades, and the price would rise in consequence, and all the nation would suffer. The practical way of keeping our taxation roughly fair is to let indirect taxation bear more than its due burden in ordinary times, and to let direct taxation exclusively bear the temporary addition necessary to meet the exceptional demands of peculiar occasions.

And believing, what the events of last week prove, that this is not only the best policy, but the sole policy—the sole policy, we mean, that a statesman can propose or that the nation will accept—we cannot quarrel with the present proposal because it is a part of that policy.

Secondly. It is said that we ought to suspend the payments we now make by way of "terminable annuities" to the National Debt. It puzzles some people to think how we can suspend them. The debt is reduced by changing "Consols," which are a perpetual annuity, into "terminable annuities," which are a larger but, as the name implies, temporary annuity. And if Government has once done this, it seems natural to reason that it must keep to its bargain. As it has agreed to pay the larger temporary sum, it must pay it, and cannot "suspend" it. And if the Government had sold these annuities in the market, no doubt so it would be. Government could not go round to a vast number of

holders and ask to be off its bargain. But in this case Government has sold the terminable annuities *to itself*. The Saving Banks' deposits of 40,000,000*l* make the English Government the largest English banker; and as such banker, the Government is an immense holder of "stock." This tock it turns into terminable annuities, and as these are in its own hands, it can, if it likes, "suspend the operation,"—that is, turn the terminable annuities back again into perpetual annuities, and so pay the lower yearly charge only as long as it likes.

But from the description of this operation it is plain that it ought to be resorted to only on the gravest occasions. We created these annuities in order to pay off our National Debt steadily and systematically; we are making thus a constant impression on its size. But if we on every slight increase of other expenditure choose to stop redeeming our debt, we had better abandon altogether the pretence of doing so. If debt is to be paid off, it can only be by devoting a certain sum annually to that object, and if we on every temptation confiscate the "debt-paying" sum, we are doing nothing at all. There is necessarily a sacrifice in the case, and that sacrifice is felt not only in years of marked financial prosperity like last year, but in years of financial want like this year. If we only diminish our liabilities at our pinnacles of prosperity, we shall diminish them so little that for ages the practical burden will remain altogether as it is.

And upon this principle it is certain that this year is not one in which we ought to suspend the payment of debt. There is no costly foreign war no ruinous collapse of English industry; there is only a moderate increase in our optional expenditure, and it would be reducing our debt-paying machinery to a pretence and "sham" if we suspended it at a time so easy, and on an occasion so slight. The best proof is the alternative. It is only proposed to raise the income tax to 6d; a moderate rate—the rate it bore so lately as 1868. tI is an income tax of ten or fifteen pence in the £ that marks an extreme financial necessity.

We think therefore that if the money is to be spent it can only be raised by income tax. Whether under the altered circumstances of the times the Government might not somewhat diminish their military outlay, we own we doubt. The army estimates were framed in January, when the French war was still going on, when battles were in the air, when the public mind was in a sort of fever because it did not think England had as many soldiers and as many guns as some other nations. But now that the war is over, that we are returned to our ordinary state of mind, we cannot but ask ourselves—Is it necessary to augment our military outlay so much and so suddenly? There is an increased expenditure this year as compared with last of 1,600,000*l* for stores and provisions—need all these be bought before April 1872? Besides, and independently of the cost of purchase, the army estimates are 2,800,000*l* more than last year—need this be spent at once and so rapidly? Is there anyone who believes that if the Government were framing their estimates at this moment, and in assured peace, they would not somehow manage to ask for less?

We believe that 500,000*l* might well be saved from these large totals, and if so 1½d in the £ in the income tax would suffice. The figures would stand thus:—

	£	£
Yield of 1½d income tax		2,287,000
Deficit as stated by Mr Lowe	£2,713,000	
Less diminution of Army Estimates ...	500,000	
		2,213,000
Surplus		74,000

and considering that our estimates are very moderately taken, this surplus is enough to reckon. 2d in the £ gives Mr Lowe 337,000*l* more than he wants now, and would give him a great deal too much if only the military expenditure could be a little reduced.

THE CIVIL WAR ROUND PARIS.

The true problem of the situation of France, as it appears to us, is to find out the reason why neither party wins. An avowed condition of civil war has now existed round Paris for six weeks. Armies have come into collision. Versailles has been threatened, if not attacked. Parisian quarters have been bombarded. Many suburban villages, hitherto exceptionally prosperous, quiet, and gay, have been destroyed by the contending forces as utterly as they could have been destroyed by any invading army. The contending armies are swayed by Assemblies known to be actuated by a bitter spirit of hostility to each other, and guided by leaders believed to be wholly adverse to compromise. Nevertheless, after weeks of fighting, neither side has made any serious advance, and neither side can with any approach to truth claim a decisive victory. It is clear from the patent facts that both sides are weak, and in the explanation of that weakness must lie much of the future of France. It is almost beyond controversy that the contending powers are not equal, that one is supported by the whole of France outside Paris—that is, by 34,000,000 of people, and the other only by Paris—that is, by 2,000,000 of people at most, and their apparent equality in the field becomes a question of the most serious kind.

We believe that the answer to this inquiry, as suggested to us by very serious and impartial Frenchmen, is the true one, and that it is one which for the present must greatly imperil the possibility of any strong government in France. It is simply that both armies—the army of the Commune and the army of Versailles—are exceedingly bad, scarcely capable of offensive operations at all. The men on both sides, the Guard and gendarmes excepted, are tolerably equal—that is to say, they are a mass of half-drilled soldiers, very willing to die when they can fairly get at the enemy, but incapable of enduring shells from invisible positions, of obeying orders which seem to involve useless danger, or of resisting a nervous apprehensive expectation of being taken at disadvantage. Marshal Macmahon's force is made up of soldiers of the beaten army, who, the Guard excepted, are most of them middle-aged men or *remplaçants*—that is, substitutes bought by the Imperial Government out of pot-houses—and of Gambetta's new levies, the rawest of raw troops, quite brave enough but not soldiers in any sense. Cluseret's army, on the other hand, is made up of some 3,000 linesmen, who are as good as their opponents; some 25,000 fanatics, who would be better than their opponents if they had the physical training for a severe out-of-door life; and about 100,000 new recruits, half-drilled for six months, who might become soldiers if they had time, but are not soldiers now. Great operations with either of these armies are nearly impossible, even if they had officers, and they have for practical purposes very few. On the Versailles side are some few experienced but discredited general officers, a few very fair colonels, and a great crowd of subalterns, in whom, partly from experience, partly from a feeling that there is no sympathy between them, the men do not confide. They obey them very badly, and they are not stirred by them at all. On the Parisian side are a few fairly good revolutionary generals, with some experience of great warfare and a multitude of entirely inexperienced officers, who know, "company drill" well enough, and could lead in the streets, but who do not know what to do with their men in the open and in their ignorance hesitate till they are accused both by their men, and, implicitly, by their commander-in-chief, of wanting physical dash. On the one side is a deficiency of moral unity, which makes even good officers powerless; on the other a deficiency of knowledge, which makes command useless. This is above all the weak point of the armies, for without officers large movements occupying many hours cannot be made. A crowd can march many miles without leaders, but it cannot march miles under fire without getting into positions in which defeat becomes massacre, and one incident of that kind will destroy the self-confidence of 50,000 men.

We suppose that, as the greater number of trained officers must exist on the Versailles side, Versailles must win; but we warn our readers not to depend too implicitly upon this, or upon the results of bombardment. Before Versailles can win, Versailles must conquer in a street fight, in which officers are scarcely necessary, and the local knowledge of Cluseret's battalions will greatly tell; while, in spite of all denials, we fear there is some truth in the reports of disaffection. If the army of Versailles were beaten in the great attack, or a single regiment wheeled round, the General of the Commune might in twenty-four hours be raised by a decree of a coerced Assembly to the legal dictatorship of France. Such a result is very improbable, but the dangers of both parties are very much more considerable than it is customary in this country to believe, and they are greatly increased by the certainty felt since Prince Bismarck's speech that the Germans will not interfere in an intestine quarrel, as well as by the indignation of all Parisians at a bombardment which they think wanton, and which has certainly been cruel. It is very doubtful

indeed whether victory, if secured, will not be followed by an immediate dissolution of the Government which has thus treated Paris.

THE RECENT RISE IN ENGLISH RAILWAYS.

During the last few weeks a very remarkable advance has taken place in the prices of the ordinary stocks of our home railways. Since the outbreak of the insurrection in Paris, or, at least, as soon as it became apparent that the French demands on the money market would be indefinitely postponed, one home railway after another began to move up, till there was hardly one which had not advanced materially. For about a fortnight there has been a reaction, but even the prices as still quoted show a striking improvement. The question cannot but arise whether the advance is not, to a large extent, artificial, and how far it may be prudent for investors to put their money into railways at present prices. There is need, we believe, for grave caution, and the grounds of our opinion may be very briefly stated.

The suddenness of the rise is very observable. Railways have, no doubt, been improving for a long time, but the present level, we find, has mainly been reached by a sudden leap. To show this we subjoin a statement of the advance,—*first* as compared with the last week of April last year, and next, as compared with the last week of January this year.

	Price			Present Increase of Price Above	
	1870. April 27.	1871. Jan. 28	1871. April 27.	April, 1870.	Jan., 1871.
Caledonian	79½	88¼	90½	11⅜	2¼
Great Eastern	42⅜	40⅜	42⅛	(−)⅛	2
Great Northern	121	125½	125	4	(−)½
Do. A	127	136	135½	8½	(−)½
Great Western	72¾	72½	89½	16¾	17
Lancashire and Yorks.	131	136	141	10	5
London & Brighton	46¼	43	52½	6¼	9½
Chatham & Dover	16¼	14¼	17½	1	3
London & N.-W.	128¼	130½	133½	5¼	3¼
London & S.-W.	91½	93	97	5½	4
Manchester & Sheff.	52½	46½	52½	(−)⅛	6
Metropolitan	77½	63¼	69	(−)8½	5¾
Do District	38¼	28½	33½	(−)4⅝	4¾
Midland	126⅜	129½	129½	3	¼
North Eastern	135⅜	146½	154	18⅝	7½
South Eastern	78⅜	76¾	84	5¾	7¼
Do. A	45½	41½	55	9½	13½

In the majority of cases, it will be noticed, either the improvement since last January constitutes the larger part of the improvement during the twelve months, or that improvement has occurred notwithstanding a fall between April, 1870, and January, 1871. Thus in Great Western the advance for the twelve months is 16¾, for the three months, 17; in South-Eastern for the twelve months, 5¾, for the three months, 7¼; and South-Eastern A for the twelve months, 9½; for the three months, 13½; in London and Brighton for the twelve months, 6¼, for the three months, 9½. In all these instances the price in January was lower than it was in April last year, and consequently the improvement in the three months is greater than if we make a comparison with April, 1870. In several other cases—Great Eastern, Sheffield, Metropolitan, and Metropolitan District — there is even a fall for the twelve months, though the advance in the three months is considerable. When it is taken into account that this mode of comparison is disadvantageous for the period of three months, since in January there was an accrued dividend, we may see how great and how sudden the rise has been. In this fact itself there would be some cause for distrust. Railways have not really changed in value during the last three months so much as this sudden change of price would indicate. The speculation which has carried up the quotations may be justified in the long run by the traffics, but it is still a speculation on the future, and the chances are, in any such sudden movement, that the future is for a long period anticipated. Very likely, with the usual exaggeration of the Stock Exchange, the prospects of the future have been discounted at too high a figure. If there were no other reason, prudent investors should exercise great caution in selecting their investments.

There would appear in fact to be some reason for believing that the prospects of the future are being discounted too highly. In general, the increase of traffic this year is not at any greater rate than it was last year. In a few companies there has been for some weeks an important difference in the rate of increase, compared with last year, but this change is not universal. There is no reason then for a sudden upward movement so great as what has taken place, however much it may be justified in the case of some lines which have peculiarly good traffics, or which had been for some time neglected. The speculation, moreover, appears to be based on the assumption that the high average increase of the first few weeks in the year will be maintained indefinitely, which is a wide assumption to make. The trade of the country was certainly never better than it is now, but apart from political accidents, which are perhaps not likely at present, the disaster of a bad harvest, which is always a possibility, would be more than sufficient to check the present increase of traffic, and consequently upset the speculation based on a future increase. At the present moment we are experiencing the good effects of the cheap corn caused by the harvests of 1868 and 1869; but we are probably getting the best of these effects now, and a change would soon be wrought if there should be a bad, or even a moderate harvest. The check to cultivation in France would assist in making a moderate harvest this year as injurious as a bad harvest in other seasons. Too much, therefore, may easily be assumed now as to the character of the business of railways during the next twelve months.

There is a third reason for caution in the peculiar state of the money market at the present time. The accumulation of money in Lombard street, which sustains the speculation for a rise, is exclusively due to the prolongation of the civil war between Paris and Versailles. As soon as Versailles triumphs, and it is now at last gathering strength, a large part of the accumulation must leave us. Matters will no doubt be unsettled in France for some time, and French credit may not at once be so good as it promised to be before the Paris insurrection, but it is at least a contingency to be taken into account that there may soon be a military government of some sort able to preserve order and with credit enough to cause considerable demands. In any case, even if the French Government should not be able to borrow much, a great deal of French money now in London would leave us. This would be sufficient to upset the combinations of speculators, and combined with the accumulating demands for new undertakings, which are now introduced every day, might produce a very sharp reaction in almost all the Stock markets. No doubt such a reaction may be speedily recovered from, and in more than one railway there is a large margin for possible future improvement; but in general it would not be wholly recovered from. In the face of dearer money, the attraction presented by the return to be obtained from investments in the ordinary stocks of railways would be diminished—perhaps for a considerable period. Even with greatly improved traffics, the quotations of our principal lines may not reach or go much above the high level now attained.

Of course it will be understood, that while we think these cautions necessary, we are not giving indiscriminate advice against investments in English railways. There may be one or two lines in which, from a combination of favourable circumstances —the imminent conversion of a large unproductive into productive capital, the nature of the increased traffic they are carrying, and the smallness of the proportions borne by their ordinary to their preference capital—it would be safe for the investor to purchase at a price which anticipates a large amount of future gains. What we wish to point out is the necessity of extreme caution, and the expediency of acting only upon intimate knowledge of the lines selected. Even when the investor is quite sure, it would be prudent for him to settle beforehand how long he means to hold, since the state of the market is such that even a well-selected investment may for some time become depreciated below its present market value. The saleability of an investment, at or about the purchase price, is usually an important object; and as the investor may have to forego that advantage for an indefinite period, if he takes up stock in the present state of the market, the possibility is one which he ought carefully to consider.

HOW CAN THE FUNDS OF THE COURT OF CHANCERY BE USED TO REDEEM THE PUBLIC DEBT?

Mr Lowe made many startling announcements in his Budget speech, but perhaps none of them more confused the public than the statement that he proposed to take the funds in the Court of Chancery into the national Exchequer—to make the "Consolidated Fund"—that is, the nation—answerable

for them, and that by so doing he hoped to make a "sensible "impression," on the amount of our National Debt. "It "seemed," we have heard it said, "rather like creating a new "National Debt than diminishing the present one." Yet unquestionably Mr Lowe is right, and his plan will be a great public benefit.

The Court of Chancery has now some 60,000,000*l* of deposits which are at the pleasure of the Court, invested in the public funds. These are in fact the subject matter of litigation. The Court "loves a fund," is a very old saying as to the Court of Chancery. But it does not manage its funds very well. Anyone who has had "money" in Chancery will have been aware that nothing is more difficult than to get it out again—nothing more difficult than to find out what is being done with it—nothing more expensive than to make any motion with regard to it. The mode in which the accounts are kept is most costly and yet most inefficient; the mode in which they are rendered is most prolix and yet most uninstructive; and the necessity of managing all investments and all sales of investments by a meeting of the solicitors of all concerned is costly beyond example. The truth is that the Court of Chancery, which is excellently fit to decide what shall be done with money, is utterly unfit to keep money; and its having undertaken to do this, which it cannot do, is one great reason of its great unpopularity. If no good use could be made of the suitor's money, to get it out of Chancery, to remove it from lawyer's management, and to put it under the management of men of business, would be an important public improvement, and a real benefit to all concerned.

But a great deal of good can be done with the suitors' money. At present, after lying idle for a time, it is invested upon an application (which costs money) by the Court in Consols or other securities. Instead of this cumbrous process Mr Lowe proposes that all money paid into Court should be *at once* placed with the Commissioners for Reducing the National Debt on deposit at 2 per cent.

As far as the suitor is concerned this will be a great gain. A commission inquired into the matter in 1864, and the result of this investigation was this, as we described it at the time:—"First. No suitor gets any interest on the sums "which he pays in unless he applies to have them invested in "the public funds, and then he runs the risk of such invest- "ment. If the funds fall, he loses the difference. This sys- "tem was years ago condemned by Lord St Leonards, who is "no extreme or theoretical reformer. 'Suppose,' he says, "'I am a suitor, and 5,000*l* of my money is paid into Court; "'it may not at all suit me as an individual that the money "'should be invested in the 3 per Cents., and that I should "'by and by be found a loser; and I do not want to be a "'gainer. I want my exact money.' The principal of small "properties ought never to be risked; and yet the Court of "Chancery will not permit a suitor to derive an income un- "less he is willing to run a risk.

"Secondly, on a large part of the funds in court the "suitor has hardly a chance of an income. Money is "often paid into court by parties to whom it certainly "does *not* belong, and who only wish to be quit of the "responsibility of keeping it. The parties entitled are "not discovered for a long time, and during the interval of "investigation no interest is paid them. On this 'derelict' "money, as Lord St Leonards calls it, the court seizes, and "makes a source of income *for its own benefit*. In old "times this was very convenient. A large establishment "is most easily supported out of imperceptible resources. "If the Court of Chancery had been forced to come "to the Treasury to support all its sinecures, many of those "sinecures would never have existed. But any one, however "useless might well be supported out of an income which be- "longed to nobody, out of the silent proceeds of the suitor's cash. "At present the Court of Chancery has been weeded of sine- "cures, but the pecuniary system upon which they were built, "and which was only of use to support them, still exists. The "court ought to give an interest to all suitors for all moneys "paid into it, and the court ought to be supported by fees "or taxes. It is not fair to the suitor who has money in court "that the income of his money should be taken to lessen the "fees paid by the suitor who has no money in court. The in- "telligible system is that the court should make no profit of "moneys, should have no *quasi* property of its own, but that it "should be supported by fees from litigants, and by revenue "from the Exchequer.

"Thirdly, great profits are now derived by this system of in- "vestment, partly for the benefit of the applicant suitor, and "partly for the benefit of the court. Each sale of stock and "each purchase is made quite separately. If the court have "to sell 1,000*l* Consols and to buy 1,000*l* on the 1st Jan., they *do both*; they have no power to set one off against the other. They are obliged to sell the stock in the morning and buy it "back in the evening. Accordingly the court is a very "favourite customer to the Stock Exchange. What it contri- "butes to the jobber's profits can of course not be known, but it "must be considerable, and it must be made at the expense of the suitors whose money has been invested. Under the head "'judicial statistics' the Court of Chancery forward to the "Home Office an account of the *movement* of its finances, "The last published is for the year ending 1st October, 1862. "and is as follows:—

Cash Securities and other Effects Paid and Transferred—

	Into Court. £	s	d		Out of Court. £	s	d
Cash	9,119,368	17	1	...	8,957,308	2	5
Bank 3*l* per Cent. Annuities...	5,447,058	16	4	...	4,254,552	13	10
Reduced Annuities	674,284	13	10	...	569,140	6	9
New 3*l* per Cent. Annuities...	1,048,794	11	9	...	1,033,399	6	2
Bank Stock	124,823	19	10	...	20,866	1	10
East India Stock	43,653	17	7	...	14,764	18	2
Exchequer Bills	496,200	0	0	...	454,600	0	0
Other Securities	14,175	4	10	...	1,152	14	2
Total amount of cash securities and other effects paid and transferred	16,968,360	1	3	...	15,305,784	3	4

"The annual brokerage on these vast transactions neces- "sarily amounts to a very large sum, and is so much *waste* "to the suitor."

And the gain to the nation will be very great.

1st. Operation A., as Mr Gladstone would say,—Government will pay 2 per cent. on 60,000,000*l*., and it can invest that sum in Consols so as to pay 3¼. There is therefore an annuity of 1¼ per cent. on 60,000,000*l*, or 725,000*l* annually, to accumulate at compound interest, to be invested in reducing the National Debt. And in twenty years this will come to about 20,000,000*l*. And this operation inflicts no new burden on the taxpayer; the money with which it is effected is simply that now wasted in delays, and upon lawyers and brokers in Chancery.

2nd. Operation B.—This 60,000,000*l* being invested in the public funds, being in fact held by the Government, any portion which the Government pleases can be changed into terminable annuities. Generally speaking, the great and conclusive answer to speculative philosophers who recommend borrowing in terminable annuities, is that the operation is impossible. No one will buy those annuities in at all large quantities, except at a very low price; that mode of borrowing is in fact the dearest way of borrowing. But when the Government is the buyer as well as the seller, when it can lend to supply its wants in one capacity money which it holds in any other capacity, the difficulty is at an end. The Government can buy the terminable annuities with one hand while it sells them with the other, and so this most beneficial made of decreasing the national debt can be used.

Mr Gladstone introduced this plan into the management of the funds of the Post Office Savings Bank some years ago, and it has answered very well. There is, indeed, a difficulty in that case, which does not extend to the funds in Chancery. The Savings Banks may be run upon, may have to sell securities, and if they did, would not find terminable securities readily saleable, and if they did dispose of them, could only do so at a great loss. The proportion of the Savings Banks funds which can be invested in terminable annuities is, therefore, strictly limited. But there is no similar limit on the use of the Chancery funds; the amount of funds subject to litigation is entirely independent of the chances of the money market, or of the fluctuations of credit. And consequently it is better and safer to use in this way the Chancery funds, as Mr Lowe now proposes, than to use the Savings Banks funds in the same way as is now legal, and as Mr Gladstone was the first to invent.

Whenever terminable annuities are used instead of stock—that is, perpetual annuities—the National Debt is in consequence reduced. The rate of interest being the same, the higher annual payment in the terminable annuity is simply a repayment of so much principal on the debt. But it is evi-

dent that this operation, differing from the first operation A., inflicts a corresponding burden on the taxpayer. He has to pay a larger sum annually, because he is paying not only the interest on his debt, but a certain part of the principal as well.

To this excellent plan there are several curious objections—some which are really ancient prejudices—which are seldom stated distinctly, but are not on that account at all the less powerful, and have on many minds even a greater influence. 1st. There is the legal notion that the courts of law are to be trusted, but that the Executive Government is not to be trusted. Lord St Leonards, who combines so many prejudices with so much mind, has on many occasions expressed this feeling most distinctly—we hardly know what extremity of breach of faith he has not foretold as a probable consequence of the "Chancellor of the Exchequer" getting hold of the "Funds in Chancery." But why the English State, which has the best credit of any State in the world—why this State, which can borrow any amount it likes—why this State, which in its relation to the Savings Banks of the poor is the greatest banker in the country—why this State, which is trusted with all other money—should not be trusted with this particular Chancery money is inexplicable. We understand why the lawyers do not like to lose the money; but we do not understand why the State should not keep the money. On the contrary, we believe it would keep it better than the lawyers.

2ndly. There is a strong tradition among certain rich lenders of money that the Finance Minister should be kept weak, and not have too much money, as they say, to "play with." Formerly—before the rise of the Savings Bank system—the English Government was at the mercy of a few City capitalists. The way in which the directors of the Bank of England used to write about a few millions to Mr Pitt in the plenitude of his power is most surprising to a student of the present day The Chancellor of the Exchequer is now the holder of some 40,000,000*l* sterling, and therefore, although for large loans of new money, he must of course appeal to the general public, yet for the details of ordinary finance he is independent; he is at no one's mercy. He can now, for example, place 1,000,000*l* of Exchequer bonds if he liked among the securities he holds as a banker, though these bonds might not be popular in the market. He would of course have to sell an equal amount of stock or Exchequer bills, but these being favourites of the market, the market will always take. And this is very advantageous to the country, because it enables it to borrow on better terms, and makes it altogether independent of great banks and capitalists, who are the natural rulers of the money market. But exactly for that very reason the possession of these funds by the English Finance Minister makes him unpopular with the richest lenders, who would like to lend to him, because it enables him to hold out for better terms.

Lastly, there is Mr Hubbard's objection that the Chancellor of the Exchequer will be able to pay off the debt too fast. He says that in fourteen years Mr Lowe, with the Chancery funds and the Savings Banks funds, could reduce the National Debt 280,000,000*l*. We own we wish he could and would. But Mr Hubbard well knows—indeed, soon after he says—that this is impossible; the creation of such an immense sum in terminable annuities would so much augment the annual charge for the debt, that the public would not bear it. Where then is the danger? Surely Mr Hubbard has not passed through a long and useful Parliamentary career without knowing that every Chancellor of the Exchequer wants a surplus—that no one would even propose, and no House of Commons would ever permit oppressive sums to be expended on the payment of debt.

Thus the financial use of this scheme is great, and we hope eventually the legal use may be greater still, because it will tend to confine Courts of Law to their proper task of judicial functions, and will tend to exclude them from the administration of property and the management of money, which they can never do well, and which they now do excessively ill.

THE SUPERVISION OF CRIMINALS.

The reply of Lord Morley to the Earl of Carnarvon on Tuesday night in relation to the Habitual Criminals Act of 1869 was very far from satisfactory. The Government appear to us to be falling into the fatal mistake of adopting half of one system and half of another, and fitting the two together, in order to conciliate as far as possible the supporters of both. The very essence of the system of tickets-of-leave is a careful supervision of those who hold them till the term of the ticket has expired. If this supervision is not to be exercised, there is no advantage in granting the ticket-of-leave at all. It would be better to keep the criminals in prison to the extreme term of their sentence than to let them out of prison with a ticket-of-leave which is in no way available either for the protection of the public, or for their own protection against the temptations to which every released convict must be subjected. The object of Sir Walter Crofton's plan of granting tickets-of-leave to the Irish convicts after the expiration of a certain proportion of their sentence, during which they were carefully taught the means of getting an honest livelihood and to take pleasure in amusements of a higher kind than any they had hitherto known, was no doubt chiefly reformatory. He preferred giving them a certain period of comparative freedom, during which they would have special safeguards against falling back into crime, to throwing them all at once on their own responsibility in a world of so much temptation. His idea was, and facts have everywhere confirmed it, that released prisoners—knowing that they were out only on good behaviour, that the supervision of the police would be strictly exercised over them, that that supervision would be wholly an advantage if they conducted themselves well, and even be of a kind to help them in getting honest employment, but would be fatal to their liberty if they fell back into their old habits and returned to their old associates,—would have a very strong motive for starting themselves in an honest and laborious career to which, upon the expiration of the original sentence, they would be so well accustomed as to render the danger of a relapse comparatively trifling. This was, we say, Sir Walter Crofton's original motive for granting revocable licenses for a considerable fraction of the sentence, and for requiring those who take the license to report themselves every month to the police. In England now we have a secondary motive for the same course. Since the complete abolition of transportation we have had no choice but either to increase indefinitely the severity of the sentences by compelling the whole length of the time to be worked out in prison—a course which would of course be likely to crowd our prisons—or to remit a part of the sentence under conditions which would give the prisoner a certain amount of freedom at home. But if we are to do this, it is obvious we ought so to guard that freedom as not to let loose upon society enemies as dangerous as they were before their conviction. The very considerable freedom granted to convicts in Australia, was granted under conditions so favourable to honest industry, and in scenes so far removed from the old scenes and confederates of former crimes, that there was sufficient reason for hoping that it would often be not abused. But in such a world as England at the present time, with the fierce competition for labour, and the nearness of old haunts and temptations, this is really not a matter concerning which to feel sanguine,—unless the greatest and most anxious care is taken to keep the liberated convict from his old associates and to smooth his path to honest employment. To let loose a considerable number of convicts yearly before the time without taking the steps to keep them under surveillance and to enforce upon them the imminent risk of forfeiting their new liberty, would be simply to expose society wantonly to a great and most certain peril.

Yet this is what the false tenderness of the House of Commons did in relation to the Habitual Criminals Act of 1869. The provision in the Act of 1864 for a monthly report to the police of the released convict's residence was struck out, as bearing too hardly on the convict,—(you might as well talk of bearing too hardly on a broken leg when you put it between splints).—and in the place of it an utterly useless provision was substituted, according to which the prisoner was required to report any change of residence in regard to the police district. This was perfectly useless; because many police districts, especially those in which convicts are likely to take refuge, are places so populous that the prisoner is quite lost in them. This applies to the old ticket-of-leave men. Again, the "habitual criminals" under the Act of 1869 are not compelled even to state whither they are going, though they may if they please. The consequence is that they are almost always lost sight of, or if not, only kept in view by a sort of unofficial espionage infinitely worse in its effects than the old rule requiring them to report themselves

straightforwardly every month to the police. Thus *both* the objects of releasing criminals on good behaviour before the expiration of their sentence, are absolutely lost sight of. The system is of no use to the criminal. He knows he can, if he is cautious, completely escape all observation, and sink back into the obscurity of the most infamous haunts. And the system is no safety to the public. The criminal thus released is left quite at liberty to commit a new crime, and not until he *has* done so will he be liable to any new restraint. There is absolutely no influence left at work which would tend to pull him up before he fell into absolute crime.

And yet though neither of the objects for which the license system was devised is in any respect answered under the Act of 1869, the Government, if we may judge by Lord Morley's reply to Lord Carnarvon, hesitate to make the revocable license *real* by insisting on the periodic reports to the police, and they do so because certain members of the House of Commons raised an outcry—which is contrary to all the evidence of actual experience,—that the relation of the convict with the police will deprive him of his fair chance of obtaining honest work. Now every man intimately conversant with the system who has looked into that assertion has we believe found out its falsehood. The late Sir R. Mayne, as Lord Carnarvon stated on Tuesday, was one of those who believed that it would be very inimical to the interests of the convicts to be compelled to keep up their relations with the police; but when he himself had had experience of the working of the system, he retracted that view, and declared that he did not believe the convicts were injuriously affected by the system. Indeed, in Ireland, and wherever the plan has been properly worked in connection with an Association for obtaining employment for released criminals, it has so far from injuring, immensely benefited the prospects of the ticket-of-leave men. The police who know the character with which they are discharged, and are cognisant of their mode of life and industry, become the best friends of the reformed convicts, and the best referees with the Association for the employment of these men. Properly worked the license system is the greatest benefit to reformed or reforming convicts that has ever been discovered.

And at all events whatever we may fear for the convict, surely the society against which he has sinned is entitled to even more consideration than the convict himself; and we do maintain that the remission of these sentences, without any regard at all to the safety of that society, is an abuse which ought not to be tolerated for a moment. Either the sentences should be made nominally what they really are to be, and the convict discharged only on their complete expiration,—a system which offers no safeguard for either the convict or society,—or the revocable ticket should be made a reality, and the convict feel that he is liable at any moment to have his leave withdrawn if he falls into any mode of living inconsistent with the conditions imposed upon him. Nothing can be more foolish or mischievous than to provide a nominal aid to the convict and a nominal safeguard for the public, which is neither one nor the other, and make that the excuse for inflicting much shorter terms of imprisonment than the public interest would, without any such excuse, desire and even insist on.

BUSINESS NOTES.

THE RESOURCES OF FRANCE.—At the close of two articles in the "Revue des Deux Mondes" on the financial condition of France, M. Victor Bonnet, whose writings on French finance are so well known, sums up the means by which France will be able to meet, as soon as a settled Government is re-established, the enormous new charges which the war has brought upon her. The deficits of 1870 and 1871 he thinks must be met exclusively by loans (that of 1871, exclusive of the capital payment of the Prussian indemnity, being reckoned at 16,000,000*l*), but in 1872, an attempt should be made to meet all the new charges by supplementary resources. The sum required he estimates will be 17,480,000*l*, thus calculated:—

	£
Interest on 320,000,000*l* for German indemnity and war deficits at 5½ per cent.	18,480,000
Sinking fund for ditto at 1½ per cent.	5,000,000
Taxes paid by departments ceded to Germany	2,000,000
	25,480,000

	£	£
Brought forward		25,480,000
Deduct anticipated economies in 1871, viz.:—		
Dotation of Crown and Senate suppressed	1,320,000	
Economies in military and naval expenditure	4,000,000	
Other reductions of expenditure	800,000	
	6,120,000	
Do. additional savings in 1872	1,880,000	
		8,000,000
Net amount required		17,480,000

—and the following are the resources by which M. Bonnet believes it will be most expedient to meet this large new charge:—

	£
1. Addition of 15 per cent. to Registration and Stamp duties (excepting sales for value); an equal addition to Customs' duties, to the excise on liquors, and on home-grown sugar, and to the miscellaneous indirect receipts; and an addition of 10 per cent. to price of tobacco	7,360,000
2. Reimposition of ⅔rds of salt duty reduced in 1849	2,640,000
3. Reimposition of Customs on woollen and cotton manufactures, &c., reduced in 1860 at a cost of	1,560,000
4. New taxes on commercial receipts, as in England, upon sales for the account at the Bourse, and other documents	1,200,000
5. Income tax at 3 per cent. on incomes above 48*l*	4,800,000
	17,560,000

This sketch by an eminent French financial authority amply justifies the account we gave two or three months ago, and our conclusion that France would not be able to find the means for new charges without formidable additions to its taxes, and the resort to expedients like the income tax, which amount to a fiscal revolution. At the same time we doubt whether several of the suggestions of M. Bonnet are not most objectionable in themselves, and whether he does not take too hopeful a view of the deficit to be filled up. The proposed reimposition of the salt duty and of the Customs reduced in 1860, will especially strike English financiers as contrary to good sense. By the former the total amount of the duties on salt in France will be brought up to 4,000,000*l*, and such a tax on a necessary of life, though it may yield what is required, will certainly be most oppressive. By the latter—the reimposition of the Customs on manufactures—the usual effect of a protective, if not a prohibitive, tariff will be produced; the impoverished peasant and workman of France will be stinted in the necessary of clothing as well as of salt, with the additional aggravation that besides the duties he pays to the State he will be paying duties to the manufacturers of Rouen and Roubaix. It will be a pure misfortune for the French people if necessity is thought to compel them to such taxes. With regard to the other ways and means suggested, there is little to object to in principle, as they are mainly taxes on luxuries of general consumption and an income tax—expedients which in England have been found least oppressive to the taxpayer in proportion to the amount they yield. But the impositions will be very heavy. Notwithstanding the very proper exception of one part of the registration duties from the additional centimes, the remainder will be heavy; the excise on liquors and sugar and the price of tobacco are already far from low; and an income tax at 3 per cent. is a charge of nearly 7d per £, a rate which is never endured with much patience in England, and would, we fear, be intolerable in France on the small incomes proposed to be subject to it. Fancy a workman with 50*l* a year having to pay a direct tax of *thirty shillings* besides all the other charges, direct and indirect, which he must bear. And this brings us to our second doubt regarding these proposals—Will they yield the money? and will no more be required? Considering how heavy the additions to the old taxes are, and how speculative are all new taxes, we should doubt very much whether in any circumstances such proposals would bring in the money wanted; but the crisis through which France has just gone makes the matter still more problematical. M. Bonnet again seems to assume that in 1872 all the old taxes, with the exception of the 2,000,000*l* paid by Alsace and Lorraine, will be yielding at the old rate, and it is almost certain that for a time they will be less productive. In both ways the financial prospect in France on the basis of M. Bonnet's sketch becomes exceedingly gloomy for a time. We should not wonder if not only almost all the taxes he suggests are found necessary,

but also an addition to the existing direct taxes, which he vehemently opposes.

Stamp Act Exemptions.—A curious instance of the mischievous effects of exemptions as respects the Stamp Acts has just come before the Court of Exchequer. The Legislature, with a benevolent intent, has thought fit to make certain exemptions as to the documents of Building Societies. That they may have larger profits, their members are not to pay the stamps which other people pay. As a consequence, the Crown has found it necessary to submit to the Court, in the case we refer to—the Attorney-General *v.* Gilpin and others—the question whether the following document, addressed to the trustees of the National Permanent Mutual Building Society, is liable to a stamp duty :—

"Be pleased to pay to the bearer 10*l* 15*s* 2*l* out of the money standing to the credit of my shares and payable to me pursuant to notice of withdrawal.

Such a document is clearly a cheque, the words after the statement of the amount being purely explanatory ; but because it is a Building Society document there is a dispute whether it is liable to duty. The Court have reserved the case for consideration ; but if the exemption is held to exist, it will be a great scandal to our revenue laws. As we have often pointed out, there is no reason whatever for the special favour shown to Building Societies, which are profitable institutions, and well able to take care of themselves. It is notorious that many of them now transact an immense business, and have added that of deposit banking to their other branches ; and in this particular case it was stated that the Society was really a Banking Society not a Building Society, money lodged with them being the same as money lodged with bankers on deposit withdrawable on notice. If the exemption is found to exist, it will only have come about through accident, as the Legislature could never have intended to favour one sort of banking at the expense of another. But that such a case should even be possible from the attempts to establish exemptions is an argument against the latter. Exemptions began when stamp duties were high and oppressive, being a rough mode of correcting a blundering tax. Now that the error is substantially corrected by the very general substitution of moderate duties, though there is yet great room for improvement, the only reason for exemption ceases, and the Chancellor of the Exchequer should at once bethink himself of putting the law on a proper footing.

The Customs Fund and the Bill of Entry.—The President of the Manchester Chamber of Commerce made a striking statement at the quarterly meeting of the Chamber on Monday, respecting the destination of the profits derived from the Customs Bill of Entry. The whole of the profits of the Bill of Entry office, he said, now went to a Life Assurance Association in connection with the Customs Benevolent Fund, which had purchased the patent of the Bill of Entry.

The money accruing to that Life Assurance Association by virtue of the possession of this patent amounted in one year to the sum of 38,000*l*. The return, as laid in his hand was for the year ended January, 1868, the returns for the past year not being yet published. The 38,000*l* was made up in the following way :—Accrued from poundage and presentation fees on bills of entry, 21,000*l* ; interest of money invested, 10,000*l* ; interest on money advanced on mortgage, 5,000*l*, making a total of 36,000*l*. This office had money invested in the public funds to the amount of 200,000*l*, and money out on mortgage to the amount of [illegible]. From the income of this life assurance was enormous, and when it was considered that no officer of Customs was allowed to insure for a larger sum than 2,000*l*, the question naturally arose—how does the money go? He was enabled to state that the benevolent grants made from the fund did not amount, for the last 30 years, to more than 2·0/ per annum. The premiums paid on the original insurance of course made a very large amount which remained at the disposal of the assurance office, and it was appropriated in this way. The sum insured was increased without any premium, and in a very short time the 2,000*l* or 1,000*l*, as the case might be, was doubled, or trebled, or quadrupled, and no extra premium was charged ; so that a man who started with a policy for 2,000*l*, if he lived a moderately long life, might leave 10,000*l*, 15,000*l*, or 20,000*l* to his wife and family at his death out of this fund. In other words a very large sum was levied upon the trade of this country for the benefit of gentlemen who were so fortunate as to be assurers in the Customs House Life Assurance Office.

The Alleged Guarantees of Foreign Governments.—The Nassjo-Oscarshamn Railway. — In reference to the recent affair of the Roumanian State Railway bonds, we remarked a few weeks since that, notwithstanding the case made out for the Roumanian Government as respects the want of authority to issue the bonds in its name, yet it was not wholly freed from responsibility, because agents who had authority of some kind were permitted to issue the bonds without any such warning to the public as the Government could easily have given. The opposite course just followed by the Swedish Envoy in regard to the Nassjo-Oscarshamn Railway is worthy of all commendation. The points to be corrected do not appear so important as in the affair of the Roumanian bonds : but the precedent is important, and should be followed, if occasion arises, by other foreign Governments who have any care for their credit. The following is the document communicated by "Hochschild, Envoy of Sweden and Norway," to which we have referred :—

"Among the reports concerning the Nassjo-Oscarshamn, or (as it calls itself by a self-assumed name) Eastern Railway of Sweden, and recently in a prospectus issued on the 30th of March, certain statements as to facts are made which require a fuller explanation, in order to prevent any misunderstanding as to the relations of that railway enterprise with the Swedish State and Government.

"Thus it is said 'that a free donation of one million Swedish rix dollars (55,000*l*) has been granted by the Government of Sweden to the company as a contribution by the State towards the construction of a line of such importance to the interests of the company.' The prospectus neglects to add that this contribution, which can be claimed only after the completion, survey, and final approbation of the line, was in 1869 voted by the Riksdag and sanctioned by the Government, not merely on account of the importance of the line, but also in order to provide work for the population of those parts of Sweden which, owing to the failure of crops in 1868, was then in distress, and had no means of getting employment.

"No other contribution but the aforesaid has ever been given or promised by the Government to the Nassjo-Oscarshamn Railway.

"An assertion was contained in a 'statement of traffic' for the said railway, published some time ago, concerning 'a law passed in 1868, binding the Government to make a free gift of a quarter of the capital of all railways approved by Parliament, as this has been.' There is no foundation for that assertion.

"The case stands thus :—A proposition was being made during the Riksdag of 1869, and has been conditionally supported as well by a special committee in 1870 as by the Committee of Finance of the Riksdag now sitting, that such private railway enterprises as might be considered particularly important and beneficial should be encouraged by the grant of a State subvention not exceeding a quarter of the total cost of construction. The Nassjo-Oscarshamn Railway is not among those recommended by the special committee to receive a subvention, and the Committee of Finance has not yet reported on that subject.

"It is at present unnecessary to enter into an examination of the estimates of costs of constructions and supposed profits of the Nassjo-Oscarshamn Railway, as given by the aforesaid prospectus, and to utter an opinion thereon."

Taking over an Old Business.—The Master of the Rolls this week has had under consideration a petition for winding-up, in the case of Witt and Williams' Brewery, Limited—a company, the prospectus of which was issued so recently as the 1st of March last, to acquire and carry on a brewery at Hamburgh. The debts, it was stated, were 9,000*l*, due to creditors of the old concern, for which the company had made themselves liable, though they had not commenced business. An alternative offer was made on the part of the company to submit to a winding-up under supervision ; but the Master of the Rolls said the circumstances required investigation, and the company must be wound up by the Court. He would not, however, draw up the order till Saturday, to give the company time to pay the petitioners' debt. The case is another warning to intending shareholders in a company established to take over an old business.

Suspicious Proceedings in Liquidation.—The action of the Master of the Rolls *in re* Berlin Great Market and Abattoir Company, Limited, should operate as a warning against attempts to have the conduct of liquidations placed in friendly hands. The peculiarity of the case was that the petitioner who had brought the case into Court was now willing to have the company wound up voluntarily, and desired the petition to stand over for a meeting of shareholders to be held ; but two shareholders intervened, commenting strongly on the circumstances under which the company was formed, inferring that there was collusion between the company and the petitioner, and asking that the company might be wound up by the Court. In assenting to the demand of these shareholders, and giving them the carriage of the liquidation, the Master of the Rolls stated some more facts illustrating the way in which companies are got up. He had no reason to doubt, he said, the *bonâ fides* of the petitioner ; "but some awkward facts had "come to light respecting the company, such as the placing "of 20*l* obligations at 11*l* 4*s* discount, minus a heavy commission, and the distribution of 450 fully paid-up shares of "20*l* each among the promoters, which was said to have been "made. In that state of things, after the petition had "already stood over some time, it was asked that it might

"stand over again, in order to enable the shareholders to "agree to wind up voluntarily. That would be to give the "promoters the complete control of the winding-up. The "conduct also of the petitioner, in opposing the order prayed "by his own petition, wore a very suspicious appearance. If "he did not choose to support his own petition, any other "shareholder might do so."

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending April 22 :—

	Receipts of Week Ending April 22.
	£
Customs	397,000
Excise	727,000
Stamps	175,000
Taxes	55,000
Income tax	96,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	807
Total	1,450,807

The total receipts of the previous week were 1,184,000*l.*

The Exchequer issues of the week on account of expenditure were 444,962*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	225,337
Supply services	149,625
Telegraph services	70,000
	444,962

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on April 15	2,548,001	803,371	3,351,372
— April 22	3,272,796	892,171	4,164,967
Increase	724,795	88,800	813,595

The other receipts to date were 14,200*l*, the other payments were 206,450*l*.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, April 27.

A piece of news of great importance has reached Paris. It is that serious difficulties have arisen in the negotiation at Brussels of the Customs' stipulations of the treaty of peace, Germany wanting for her products, including therein those of Alsace, a more favourable tariff than the Protectionist Government of Versailles thinks fit to accord. Cut off as we are from postal communications, and all Ministers and diplomatists being absent, we have no means of verifying the truth of statements made to us. But this one is probable enough, M. Thiers and M. Pouyer-Quertier being so fanatically Protectionist as to be perfectly capable of raising paltry questions about Customs' duties, even in the midst of a grave crisis. With such a stern negotiator as Bismarck, however, and with German armies on French soil, it is not easy to see how they can hope to elude what he is bent on having.

We have also learned that the German Minister in the Parliament at Berlin has complained that the Versailles Government has fallen into arrear in the payments it has to make for the maintenance of German troops in France, and that in consequence he contemplates paying himself by means of requisitions in the provinces. Yet for more than a week M. Thiers has been making his newspapers proclaim that he had borrowed, or was on the point of borrowing, 500,000,000f in London, with which to offer the Germans a payment on account; and in order to give the allegation a character of precision some of the journals said that the loan was to be raised by the London and County Bank—others, by Mr Lange of the Suez Canal, acting in the name of the Rothschilds, the Barings, and other financial grandees, and in that of—Queen Victoria! Experience has demonstrated, and is demonstrating every day, that M. Thiers, like all other French statesmen, has not the slightest regard for truth when he has any interest in deviating from it; but really he might have been expected to do his fibbing more cleverly than this.

The Versailles Government has also been befooling the public by making it believe that the Prussians were about to evacuate the northern and eastern forts of Paris and to let it occupy them, so as to enable them to reduce Paris either by bombardment or starvation. But we learn that Prince Bismarck has declared that the Germans will not leave the forts until the treaty of peace be signed. This is a great relief both to the Commune and the population—to the former by giving it the assurance that it has no aggression to fear from the east and north, to the latter by showing that at least two of the great railways will be kept open for the introduction of food.

The attitude of the Berlin Cabinet towards the Versailles Government, so different to what was represented, has led, I hear, the Commune to entertain the idea that Prince Bismarck may, notwithstanding its political doctrines are hateful in his eyes, be induced to treat with it. "If he would do so," some of its *fortes têtes* have been heard to say, "he would get his five *milliards*, and all the extras due, in much shorter time than he can hope to obtain them from Versailles. And why? Versailles will try to raise the money by borrowing, and that will be extremely difficult, not to say impossible, after a civil war; whereas the Commune would procure it in a very simple and very expeditious manner,—by selling forests, lands, jewels, palaces, pictures, public buildings, and other properties of the nation, and by putting an onerous tax on the rich, notably on the adherents of the defunct Empire. No doubt there would be a heavy loss on the sales, but what would that matter? No doubt too the rich and the Bonapartists would make away with a considerable part of their personal property; but we could get at all their real possessions and at what remained of the personal, and that would present a vast resource."

The Commune professes to be under the control of the people in all things, and yet it gives no account to them of its financial affairs. What its expenditure is and what its resources are no one knows. As to the latter they are supposed to consist mainly of advances by the Bank of France on security of municipal obligations. There are to be sure octroi and other civic dues, but they cannot be very productive just now, and are besides negligently collected. There are also the ordinary taxes, but very few people pay them. Even requisitions have ceased to be profitable, all having been made that could be attempted. One of 183,000f was effected some days back in the office of the Gas Company, but under a threat to stop the lighting of the town the sum was restored.

In the application of Socialist doctrines, the Commune is decidedly less energetic than was hoped by its adherents and feared by its adversaries. Does it find that theory is one thing and practice another? The only matters of any importance it has dealt with during the past week are the work of journeymen bakers and petty pledges in the Mont de Piété. On the first point it has decreed that men shall not labour at night, but as the doing so is voluntary on their part it has manifestly no right to dictate to them. The Mont de Piété motion was that pledges under 50f should be restored gratuitously. One might have imagined that such a measure would have been voted without hesitation and unanimously, seeing that it accords with proletarian ideas, and that the Commune is composed of *proletaires* or their representatives. But objections were made to the effect that the gratuitous restoration of many thousand pledges would present immense difficulty, from the formalities to be observed, that it would not be the people making the pledges but speculators who bought tickets from them at a low rate (8 or 10 sous for tickets of from 10f to 50f) who would chiefly profit, that a good many people, counting on the proposed measure, had pawned goods without necessity, and that it would be folly to let them pocket the sums they had obtained, and, finally, that the expense of the proposed restitution would be considerable—one speaker said 30,000,000f. Then arose the question whether that expense was to be borne by the Mont de Piété or the Commune. One member said that as the establishment was in part worked by capital furnished by private persons, or as caution money by its agents, and as such people had realised great profits, it would be right to make them suffer a little. Another protested that to do so would be a violation of the principle of private property, which was not to be tolerated; and he showed, besides, that the Commune on its part was not able to pay such a large sum. One speaker maintained Monts de Piété ought, purely and simply, to be suppressed; but another represented that that would be a wrong to capitalists who had money invested in them, and another said that they could not go until they should be replaced by new credit institutions, which would relieve the working class from the necessity of borrowing, and would, at the same time, would permit the suppression of hospitals, bureaux of charity, and other charities. The result of the discussion was that the matter was surrounded with greater difficulties than had been imagined, and it was postponed for further consideration. This is the first time that the working men of the Commune have given to the public a full report of a deliberation on a question specially affecting their interests; and we must confess that it proves that they are not mere visionaries, unable or refusing to see the obstacles that impede social reforms. But it is odd that some of them started the idea that as pawnbroking is necessary (*et at-*

tendant, at all events, the happy period when every man will have enough and to spare), it would be better to make it an open industry, as in England, instead of, as in France, a close monopoly. Under this monopoly, borrowers have to pay in Paris more than 12 per cent. which is an exorbitant rate: private traders would assuredly consent to lend at less, and could at the same time be made to pay something to the State or municipalities for licenses.

The Bill on the payment of rent at Paris adopted by the Assembly at Versailles is as much in favour of landlords as the decree of the Commune was in favour of tenants, and is, like it, considered unjust. The Commune declared that nobody should pay anything for the last nine months; the Assembly says that landlords shall be paid in full, but it authorises juries to compel them to make reductions in rents of low amount (under 600f), and subject to being reimbursed at the expense of the State and the municipality, and to grant delays for high rents. Between the two extremes there was a medium, and it is to be regretted that the Assembly did not find it. The general opinion is that as everybody has suffered from the war and the siege, there would have been no injustice in requiring landlords to make a sacrifice, consisting either in a direct reduction, or in the acceptance of obligations given by the city, and payable in after years—the city levying a special tax for the payment.

From documents presented to the National Assembly at Versailles, it appears that no less than 112,742,799f are paid annually in salaries to Government officials of different degrees, and that it is proposed to reduce the amount by about 10,000,000f. by a levy of from 5 to 25 per cent. A greater saving might be made by cutting down the number of placeholders, which is excessive.

A tax on lucifer matches has been repeatedly proposed in France, but no Finance Minister would ever entertain it, thinking it unproductive, liable to fraud, and somewhat puerile withal. Another tax frequently recommended, but always condemned in France, may perhaps find favour with Mr Lowe, if not with the public—one on pianos.

By the cession of territory to Germany, the Eastern Railway Company loses 733 kilometres (458 miles) out of 2,375 it possessed.

The great "Credit Societies" are accustomed to issue monthly returns of their situation, and they did so even during the siege. But none for the month of March last has yet appeared.

The Omnibus Company makes an announcement which will please its share and bond-holders. It is that the balance of dividend ordered by general meeting to be paid from 1st July, and the interest of bonds falling due on that day, will be paid at once, without deduction for discount.

The payment from 1st May of 10f as half-a-year's interest on the Russian obligations of 1867 and 1869 is announced by the Comptoir d'Escompte and Messrs Hottinguer.

The Northern, Eastern, and Western Railways announce that a sufficient number of shares not having been deposited the annual meetings called for the present month have had to be postponed, and that the date of them will have to be fixed hereafter. Other companies which had summoned meetings have had to make similar announcements. This delay is of course extremely inconvenient to shareholders, as it will prevent them from learning the true situation of their respective companies, and from getting the dividends that may have to be distributed.

As to the Lombard Company, it is expected to give for 1870 2f 50c. of which 7f 50c have already been paid. It will also have to make a new issue of obligations.

The Bourse for several days past has been occupied by armed troops of the Commune, and they have adorned it with a red flag. In taking military possession of it in the name of the Commune, an officer delivered a speech, in which he called it the "Temple of Plutus." Transactions during the past week have been limited—in fact only two or three a day, and those of small amount. The Threes, which on the 20th were 51f 55c, are to-day 51f 65c, and the Italian has risen from 56f 75c to 55f 85c. The other quotations of to-day are Orleans Railway 730f 50c, Lyons-Mediterranean 800f, Parisian Gas 740f.

In almost all branches of Paris trade, with the exception of food, there is complete stagnation; and so great is the flight of the population, that numerous cafes are closed.

COMMERCIAL AND MISCELLANEOUS NEWS.

The appropriations made at the last Session of Congress for the support of the United States' Government during the fiscal year ending June 30, 1872, amount in all to $174,485,902. This is exclusive of appropriations for the payment of interest upon and the repayment of the principal of the public debt, and the chief items of these appropriations are the following:—Pensions, $29,050,000; Diplomatic and Consular Service, $1,406,134; Civil List, $19,508,409; deficiencies of former appropriations, $14,013,131; Army, $27,719,580; Navy, $19,832,317; Public Works, $4,407,500; Indians, $5,112,240; Post Office Department, $26,032,898; Fortifications, $1,627,500; and Miscellaneous Expenses, $11,261,208. By the reduction of the public debt during the 25 months that have elapsed since the beginning of President Grant's administration, the interest charge has already been reduced by about $12,000,000 a year in gold. The subscriptions that have been received for the new 5 per cent. funding loan, it is said, will further reduce the interest charge about $600,000 a year.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the third week of April, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children	Adults.	Children under 16	3rd week April, 1871.	Corresp'nding Total in 1870.
West district	5,418	7,720	5,416	18,554	20,776
North district	6,997	11,260	8,044	26,901*	28,854
Central district	6,738	7,301	5,778	19,817	21,899
East district	7,002	10,511	9,129	26,642	33,493

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 26th day of April, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	37,211,130	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	22,211,130
		Silver bullion	...
	37,211,130		37,211,130

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	12,938,549
Rest	3,128,464	Other securities	19,916,088
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts	8,728,110	Notes	13,086,100
		Gold and silver coin	690,490
Other deposits	19,666,557		
Seven-day and other bills	555,096		
	46,631,227		46,631,227

GEO. FORBES, Chief Cashier.

Dated the 27th April, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

LIABILITIES.	£	ASSETS.	£
Circulation (including Bank post bills)	24,680,126	Securities	33,301,637
Public deposits	8,728,110	Coin and bullion	22,901,620
Private deposits	19,666,557		
	53,074,793		56,203,257

The balance of Assets above Liabilities being 3,128,464, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending April 26, 1871.	Week ending April 19, 1871.	Week ending April 27, 1870.
	£	£	£
Thursday	12,681,000	11,680,000	11,552,000
Friday	12,680,000	29,655,000	11,586,000
Saturday	14,225,000	17,199,000	12,598,000
Monday	13,028,000	13,804,000	11,124,000
Tuesday	14,991,000	14,675,000	9,652,000
Wednesday	12,279,000	11,363,000	9,595,000
Total	79,884,000	98,376,000	66,087,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, April 27, 1871.

The total since the 4th of January, 1871, is 1,331,317,000*l*, compared with 1,229,134,000*l* for the corresponding period last year, showing an increase of 102,183,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week.	May 1, 1861.	April 29, 1868.	April 28, 1869.	April 27, 1870.	April 26, 1871.
	£	£	£	£	£

Clearing-house return	...	67,656,000	64,678,000	66,087,000	79,884,000

In 1861, there was renewed pressure in the money market, consequent on the continued progress of American troubles, but there was no change in the Bank rate. Mr Jefferson Davis, it was reported, had issued letters of marque, and American shipping was in great danger. At home the incidence of the income tax was under discussion, in consequence of the high rate at which it was fixed in the year's Budget.

In 1868, there was rather a better demand for money than had prevailed for a long time, arising chiefly from the unusually large spring import trade, assisted by imports on account of the deficient harvest of the previous year. A small rise in the value of money was anticipated. News of the fall of Magdala has just been received.

In 1869, there was little pressure in the money market, except for short loans for Stock Exchange purposes, but the rate of 4 per cent. was sustained. It was now considered that the period of plethora which followed the panic of 1866 was over, and the improved trade demand, coupled with the demands for foreign loans, was expected to cause the state of Lombard street to be a matter of more daily interest than it had been for many months. Mr Sumner had just made an exceedingly violent speech on the Alabama claims.

In 1870, money was in good demand for the week, partly on account of a heavy Stock Exchange settlement. A loan for the Pasha of Egypt for 7,142,860*l* nominal, and a loan for Japan for 1,000,000*l* were this week introduced in the market, and further foreign borrowings were anticipated. There was great excitement about the murder of a party of Englishmen by Greek brigands at Marathon. The French Emperor had just issued a proclamation on the eve of the last plebiscitum, making the issue one of acceptance or non-acceptance of the dynasty.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 6,705,306*l*; in 1868, an excess of 1,833,118*l*; in 1869, a deficiency of 114,912*l*; and in 1870, a deficiency of 1,499,227*l*. In 1871, there is a deficiency of 249,581*l*.

DISCOUNT AND MONEY MARKET.—The ease in the money market which we noticed last Friday continued in the beginning of the present week; but later there has been more firmness, and to-day there has been an active demand both at the banks and the discount houses, and also at the Bank of England. The rate quoted for the best short-dated bank paper, instead of being 2¼, with an inactive demand, as was the case last week, is now 2¼ to 2⅜, with a good demand. The improvement is partly due to the fortnightly settlement on the Stock Exchange, which has been a very heavy one, but the trade demand is likewise good. There is still, however, a most abundant supply of money, and the bullion in the Bank has largely increased during the week. As yet there is no sign that the improvement noticeable is more than temporary, and the market is still kept in suspense by the continued civil war in France.

As regards financial affairs in France, however, it seems worthy of remark that, even before the close of the present civil war, a large payment has either just been made, or is being made, by France to Germany. Speaking last Monday in the Reichstag on the subject of the arrears due by France, both for the indemnity and the keep of the German army of occupation, Prince Bismarck is reported to have said that his Government had been promised payment on the 25th current, of all arrears, and that the instalment payable on the 1st of May would be provided for in due time. He added that he did not press for payment in coin, but would be satisfied with the productions of the ever-available banknote press. Perhaps Prince Bismarck, when he speaks of all arrears, refers only to the keep of the troops; but the sum to be thus paid would be considerable, and the negotiation of the paper thus obtained would have an appreciable financial effect. If the arrears of the indemnity are also referred to, the negotiation of the paper which the German Government has obtained would have a very great effect indeed.

The principal changes in the Bank account for the week are an increase of bullion by 428,502*l*, and of the reserve by 521,542*l*, the private securities having been reduced 668,828*l*, the private deposits 425,997*l*, and the public deposits 286,938*l*. The position of the Bank is thus greatly strengthened, even as compared with last week, the reserve being now nearly 50 per cent. of the banking liabilities. The improved demand at the Bank, however, has occurred after the making up of this account.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 & 3 months	2¼	2⅜	per cent.
Do 4 —	2¼	2⅜	per cent.
Do 6 —	2⅞		per cent.
Trade bills—3 months	2½		per cent.
Do 4 —	2¾	3	per cent.
Do 6 —	3¼	3½	per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1½ per cent.
Do with seven days' notice	1¾ per cent.
Do fourteen days	1¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	2½	6*	2¼ ½	...

Brussels	2½	4	2½	3½
Madrid	...	5	...	5
Hamburg	...	...	2⅝	3¼
St Petersburg	5	6	5	6

* Nominal.

THE STOCK MARKETS.—The upward movement which we noticed last week in foreign stocks has continued this week, and is the characteristic feature of the market. In several of the most speculative descriptions, such as Turkish and Egyptian, the advance, as we notice below, is most important, and the market, especially since the beginning of the fortnightly settlement, has been exceedingly buoyant. As was the case last week, too, the miscellaneous market has been good. The exceptions to the general buoyancy have been English Government securities, which fluctuate within narrow limits at the high level reached a few weeks ago, and English railways, in which the depression which is natural after the recent rise has continued, assisted once more by a disappointment in the traffic returns. The account we have to give is thus very similar to that of last week, except that the upward movement in foreign stocks and in the principal

miscellaneous securities has been more general and considerable: while the actual movement downwards in railway shares, though there has been great dulness, is but little. We have little to add, therefore, to our comments of last week on the situation. The present high prices are undoubtedly somewhat dangerous, being greatly dependent on the accidental accumulation of money at the present moment. The termination of the present war between the Assembly and Paris by the complete triumph of the Assembly, appears at last to be more of an imminent probability than could have been expected a few weeks ago, and such an event, by restoring some order in France and so drawing off the surplus money here, would take away completely the basis of the present speculation. The advance in some descriptions of foreign securities also indicates the preparation of the market for new issues.

English Government Securities.—Consols, notwithstanding the continuance of purchases by the Government broker this week, have fluctuated about the level of 93⅛ and 93⅜ ½. This level is certainly a very high one, and as the cheap money which sustains it is due to a peculiar state of suspense which may terminate quite suddenly, it is not surprising that the market should be sensitive, and a considerable fall may be threatened at any moment by very slight incidents. The prospects of a triumph of Versailles during the last fortnight have increased this sensitiveness, though it seems quite possible that on account of the preponderance of sales a slight advance may take place at the settlement should the suspense be continued till then. To-day the market has been rather better than in the middle of the week, and the closing quotation is 93⅜ ⅛, or ⅛ under last Friday. In other Government stocks there is a similar fractional improvement.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Monday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Tuesday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Wednesday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Thursday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Friday	93⅛	93⅜	93⅛	93⅜	par to 5s pm

Victoria 6 %	108	109	110	11	+ ½
Ditto 5 %	102	¼	102	¾	... ...

Foreign Government Securities.—The buoyancy of the market, though principally manifested in Turks and Egyptians, as we have noticed, extended to almost every description of stock. Among the most important besides these two principal classes were Argentine, in which the rise up to Thursday was 1 per cent., a corresponding advance taking place in the new loan, consequent on the heavy rates for instalments; Japanese, in which there was a rise of 2 per cent.; Portuguese, ¾; Spanish Quicksilver loan, 1¾; and Chilian ¼ per Cent. 1. But Italian, Spanish (3 per Cents.), and Russian securities, besides other stocks, also improved materially. The movement was thus a very general one, and was maintained almost all through the week, a slight reaction on Wednesday caused by sales for realisation being followed by another advance on Thursday. To-day although there has been no great amount of new business owing to the magnitude of the settlement, prices have been fully sustained, and the closing quotations are generally at the highest point of the week. The improvement in Turkish and Egyptian stocks as will be seen from our usual comparative table, is very conspicuous.

The advance in Egyptians, which has taken the lead in the improvement, is partly connected with the announcement that Messrs. Oppenheim, Nephew, and Co., of Alexandria, have concluded a financial arrangement with the Viceroy of Egypt to the extent of six or seven millions sterling, to enable the Government to pay off their floating debt. As it is added that there will be no public issue, and the operation will not involve any new creation of Egyptian securities, but will chiefly comprise the conversion of all existing Treasury bonds into new ones having two or three years to run, it is inferred both that the new operation is in no way a breach of the engagement by the Khedive not to bring out any new loan for five years from 1868, and that the obligations of Egypt will for some months be sufficiently provided for. The effect has, however, been greater in the present peculiar state of the market, which is favourable to any pretext for a rise.

In Turkish securities, where the rise has been almost as important as in Egyptian, the reason also appears to be the circulation of reports, which we believe to be well founded, respecting the progress of a financial operation similar to that by which Egyptian securities have benefited. Turkey, like Egypt, is understood to be preparing for its obligations by consolidating its floating debt, and adding to its amount—the expectation being that by the time fresh embarrassments have been created, in consequence of the accumulating deficit, something may have turned up to improve the chance of floating a new loan. At any rate the belief is common that difficulties are tided over for a time, and this appears to suffice in the present state of the money market to induce forgetfulness of the chronic difficulties of Turkish finance.

Another event in what may be considered the foreign market has been the announcement this week, as we mention below in our notices and reports, of a third issue of the Foreign and Colonial Government Trust. The aggregate issue is proposed to be 1,000,000*l*, in 6 per cent. certificates of 100 at the price of 92. Taken in connection with the great buoyancy in the foreign market, the issue is a fresh sign of the public impatience at the low rates now obtainable on investments. At the price, the interest yielded it is reckoned will be 6*l* 10s 5d.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.

English Railway Securities.—Beyond the fact of the continuance of the dulness which we noticed last week there is nothing to notice in this department. Business has been greatly restricted, and a rally, which would probably have been attempted if the trading had been favourable, has been checked by their unfavourable nature. There is nothing in the returns to suggest any real limitation in the business of the country, the comparison being made with Easter week of last year, and a break in the weather having also been momentarily unfavourable; but the actual diminution in several instances, and the smallness of the increase in the others, prevents that buoyancy of the markets which had been the rule for a good many weeks. To-day the depression has been rather less felt than it was during the week, and

prices at the close, after narrow fluctuations, are in some cases a shade firmer than they were last Friday.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	89⅜ 90 xd	90⅜ 1	+ 1
Great Eastern	42½ ½	43⅜ ⅝	+ 1⅛
Great Northern	125 6	124½ 5½	− ½
Ditto A	135½ 6	135 ½	− ½

London and Brighton 4½ %	100 2	100 2	... ...
London, Chat., & Dover Arbitration 4½ %	95 6	95 6	... ...
Metropolitan District 6 %	116 18	116 18	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending April 22 to 727,509*l*, being an increase of 12,567*l* over the corresponding week (Easter week) of last year. The aggregate traffic of the current half-year to date is now 10,442,858*l*, or an increase of 574,768*l* on the corresponding period of last year. The principal increases of the week are—London and North-Western, 6,959*l*; North-Eastern, 6,009*l*; Caledonian, 2,200*l*; and Great Western, 2,231*l*. On the other hand, London and Brighton have fallen 3,261*l*; South-Eastern, 2,694*l*; London, Chatham, and Dover, 1,344*l*; and London and South-Western, 1,023*l*—all lines liable to be specially affected by the occurrence of Easter. The following shows the details of the increase or decrease in each case for the week and for the whole period:—

RAILWAY TRAFFIC RETURNS.

Madras 5 %	104⅜ 6½	105 ¼	+ ⅛

AMERICAN SECURITIES.—There has been a firm tone in the market for American securities, and the absorption of Government bonds goes on steadily. A further slight upward movement is noticeable this week in the quotations. Advices from New York state that the new Five per Cent. bonds are being taken up more freely by the national banks, but there have been no sales of importance in England. The changes for the week are given below:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90½ ¾ xd	90⅝ ¾	+ ⅛
Ditto 1865 Issue	89 13/16 15/16 xd	90⅛ ⅜	+ 1/16

Pennsylvania Gen. Mort. 6 % Bonds, 1910	92⅛ 3⅛	92⅛ 3⅛	... ...
Virginia 6 % Bonds	57⅛ 8⅛	57⅛ 8⅛	... ...

Messrs Robinson, Fleming, and Co. have this week invited applications for 2,000,000 dols Louisiana State 8 per cent. bonds to bearer, with interest from the 1st ult., and the principle repayable in five years. The price of subscription is 75 in instalments extending to the 5th of July. The prospectus states that for the payment of the principal and accruing interest of these bonds, the special Act of the Legislature pledges the faith of the State of Louisiana unconditionally, and levies a special tax of one quarter of one per cent. upon the estate, real and personal, throughout the State subject to taxation, to continue until the principal and interest of these bonds are fully paid. The first coupon is due on the 1st of September, and the principal and interest are payable both in the currency of the United States.

JOINT STOCK BANKS.—The tendency of prices in this department has been favourable on the whole, though no very important movement is apparent. The leading changes for the week have been:—An advance of 2 in London and Brazilian; 1 in Imperial Ottoman and Hong Kong and Shanghae; ¾ in Anglo-Egyptian; and of ½ each Anglo-Italian, English, Scottish, and Australian Chartered, Imperial, Oriental, Union of Australia, and Union of London; Chartered Mercantile of India, London, and China shares have given way; Alliance, Bank of Otago, and British South Africa, ½.

The German Bank of London, a company with a nominal capital of 2,000,000*l*, of which 600,000*l* has been allotted, and is intended to be paid up in six months, has commenced business in London. The business of the bank, which has no branches on the continent or abroad, is stated to be "to negotiate approved securities, and generally to attend to transactions appertaining to foreign banking business."

Mr T. A. Mitchell, M.P., has retired from the chairmanship of the Chartered Bank of India, China, and Australia, and is succeeded by Mr Andrew Cassels.

TELEGRAPHS.—The fluctuations in the value of cable shares have been limited in number and extent, but the result of the week's operations has been a slight advance in the leading lines, Anglo-Mediterranean and Submarine shares show a rise of 1; Great Northern, ¾; and Great Northern China and Japan Extension of ¼. French Cable shares, however, have given way ¼; while British Indian Submarine and China Submarine close slightly weaker. Silver's India-rubber shares have been sought after, and close at an improvement of 2; while Telegraph Constructions show an advance of ¼ on the week.

MISCELLANEOUS.—There have been few changes in this department, though a fair average business has been concluded. There is a rise of 2 in Boston (United States) City loan, Rhymney Iron, and Roumanian Iron Bridges Annuities and of ¾ in Ebbw Vale. Foreign and Colonial Government Trust bonds have given way 2, and Royal Mail Steam shares 1 on the week.

MINES.—A fair amount of activity has prevailed in the mining share market. In British mines there has been a revived demand for East Lovells, which close at an advance of 2. Assheton are 1¼ better; South Wheal Frances, 3; Wheal Seton, 2½; Tankerville, 2; and Van 1. West Chiverton have given way 4; Providence—Uny Lelant—2; and East Caradon, ¼. The changes for the week in the foreign market are a rise of 3 in Eberhardts, and ½ in Almada Silver; while St John del Rey shares show a fall of 1.

EXCHANGES.—There is no material change to note from last week.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold continues to flow into the Bank, the amount sent in since the 20th inst. being 578,000*l*. There is no demand whatever for abroad, and all arrivals are purchased by the Bank. The Ceylon has brought 357,330*l* from Australia; the Oneida has brought 35,750*l* from the Brazils; the Cambrian has brought 10,000*l* from the Cape; the City of Paris has brought 190,000*l* from New York; total, 593,080*l*.

Silver.—From India and New York we have received during the week about 224,000*l*, which has been sold for the continent. The price at the commencement of the week was firm at 60¼d per oz standard, but may now be quoted as 60 1/16d to 60½d per oz standard; buyers at the former rate, sellers at the latter rate.

Mexican dollars have again improved in value, owing to the demand for China; and may now be quoted as 58¾d per oz for new, and 59¼d per oz for the old coinage, the former price is, however, not now so firm, owing to the somewhat limited market for that coin.

We have received about 43,000*l* during the week, chiefly from New York.

Exchange on India for bank drafts at 60 days' sight is 1s 10 3/16d to 1s 10 5/16d per rupee.

India Government loan notes.—We quote 4 per Cents., 92 to 92¾; 5 per Cents., 100 to 100¼, and 5½ per Cents., 107 to 107½.

Quotations for bullion.—Gold—Bar gold, 77s 8¾d to 79s 9d per oz std ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0 1/16d to 5s 0 5/16d per oz std; ditto containing 5 grains gold, 5s 0 3/16d to 5s 0 7/16d per oz std; Mexican dollars, 4s 10¾d to 4s 11¼d per oz, last price.

The sum of 51,000*l* in bar gold was sent into the Bank of England to-day.

The *Gazette* return states that the imports of the precious metals into the United Kingdom during the week ended April 26 amounted to—gold, 713,068*l*; silver, 386,768*l*. The exports were—gold, 15,563*l*; silver, 165,200*l*.

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, May 1.

Liebig's Extract of Meat, general, London Tavern.
General Mining (Ireland), special, Dublin.
Poole and Bournemouth Railway, special general, 10 Victoria street.

TUESDAY, May 2.

Cearg, extraordinary general, 8 Leadenhall street.
Equitable Gas, general, 21 St John street.
West Middlesex Waterworks, general, 19 Marylebone road.

WEDNESDAY, May 3.

Reuter's Telegram, general, 24 Old Jewry.
Devon and Cornwall Railway, special general, 2 Westminster chambers.
Trust and Loan of Upper Canada, extraordinary general, 7 Great Winchester street buildings.
United Mexican Mining, general, 3 Great Winchester street buildings.
Northern Railway of Buenos Ayres, general.

THURSDAY, May 4.

London and South African Bank, general, City Terminus Hotel.
London and South-Western Railway, special general, Waterloo Station.
Antwerp and Rotterdam Railway, general, Brussels.
Cambrian Railway, general, Salop.
Vauxhall Bridge, general, Radley's Hotel.
West Flanders Railway, general, 61 Moorgate street.

SETTLING DAYS.

Ticket Days—May 11th and 30th.
Account Days—May 12th and 31st.

NOTICES AND REPORTS.

STOCKS.

Cape of Good Hope.—By the mail just arrived from the Cape of Good Hope, it is stated news has been received that the Government of that colony had just contracted a small (20,000*l*) Five per Cent. loan at Cape Town, repayable at the option of the borrowers only on three months' notice being given at any time after the expiration of one year. The whole was taken up at an average of nearly 100½, showing that the colonists have full confidence in their own security.

Louisiana State 8 per Cent. (Levee) Bonds.—Messrs Robinson, Fleming, and Co. receive subscriptions for $2,000,000, out of $3,000,000 of 8 per cent. (Levee) bonds created last year, which are to be redeemed on the 1st March, 1875. The principal and interest are payable in New York in currency, and the issue price is 84*l* 7s 6d per $500 bond. The interest is payable on the 1st March and 1st September. It will be understood that the bonds have four years only to run, that they pay a high rate of interest, and should the United States resume specie payments shortly, they will have to be redeemed in gold. A special tax of ¼ per cent. is *levied* in Louisiana for the service of the loan.

Queensland.—The tenders for 200,000*l* Six per Cent. Queensland debentures were opened at the Union Bank of Australia this week. The total amount tendered for exceeded 720,000*l*, and all tenders at and above 106*l* 1s 6d were declared to be accepted, being above the sealed *minimum*, which was not opened.

RAILWAY COMPANIES.

Antwerp and Rotterdam.—A dividend of 6.6 per cent. has been announced for the year 1870.

Dunaburg and Witepsk.—The annual report states that the gross receipts amounted to 1,927,107 roubles, against 1,584,282 roubles for 1869, and the net receipts to 840,109 roubles, against 769,817 roubles in 1869, showing an increase of 70,292 roubles. The net profit on the working amounted to 105,013*l*, to which was added 37,655*l* required from Russia under the guarantee—total, 142,668*l*. From this was deducted 10,501*l*, or 10 per cent. on the amount of profit, leaving 132,167*l*, being the amount of the annual guarantee. Prospects were stated to be highly encouraging.

Northern of Buenos Ayres.—The gross revenue for 1870 amounted to 55,922*l*, against 49,682*l* in the year 1869, showing an increase of 6,240*l*. The ordinary working expenses were 23,822*l*, as against 25,067*l* in the year 1869, showing a decrease of 1,245*l*. The directors expended 10,351*l* on new special works in the year 1869, and charged the amount to capital; in 1870 they expended 9,650*l* under that head, and they also propose to charge the amount to capital. A dividend at the rate of 7 per cent. per annum on the guaranteed preference shares is proposed for one year and a-half to the 31st of December, 1869, payable in cash, and the meeting will be adjourned for the declaration of a further dividend for the year 1870, contingent upon receipt of subscriptions for the 10,000*l* of 6 per cent. debenture stock, yet to be placed.

Southall, Ealing, and Shepherd's Bush Tram-Railway.—It is announced that the share list of this Tram-Railway Company will close on Wednesday next, the 3rd of May.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Australian Mortgage Land and Finance.—At the meeting a 10 per cent. per annum dividend was declared.

Credit General Ottoman.—The dividend falling due on the 30th instant has been fixed at 85 piastres, or 15s 5d per share.

South African Mortgage and Investment, Limited.—It has been resolved to wind up the undertaking voluntarily.

ASSURANCE COMPANIES.

City of Glasgow Life Assurance.—748 new policies issued in 1870, assuring 370,832*l*.

London and Provincial Law Assurance.—The adopted report stated the new policies of the year to have been 161, for a total of 312,240*l*, yielding in premiums 11,401*l*. The total funds of the society are 618,405*l*, invested at an average rate of 4*l* 16s 8d per cent.

[CONTINUED FROM PAGE 509.]

Reliance Mutual Life Assurance.—New policies issued in 1870 to the number of 734, assuring 243,322*l*, and producing in new annual premiums 8,835*l*. Total income, 77,525*l*.

MISCELLANEOUS COMPANIES.

Anglo Romano Gas.—Dividend declared at the rate of 10 per cent. per annum.

Foreign and Colonial Government Trust—Third Issue.—Applications for a third Trust of 1,000,000*l* in 100*l* certificates are invited, the issue price being 92*l*. The certificates will bear 6 per cent. interest, and will be redeemable in twenty-five years at par out of the surplus receipts of the Trust. At the end of that period the Trust will close, and the securities then held will be sold. The money will be applied first to the redemption of outstanding certificates, and then a *pro-rata* division amongst the holders of the coupon of reversion. The advantages of the investment are thus summarised:—1. Interest at 6*l* 10s 5d per cent. on the amount subscribed. 2. A bonus of 8*l* per cent. by the repayment of capital at par. 3. A reversion, eventually divisible among the holders of the coupons of reversion. 10*l* is to be paid on application, 20*l* on allotment, and 62*l* on the 15th June.

International Contract, Limited.—A second dividend of 2s in the pound has been declared to the creditors.

London and Colonial, Limited.—A further dividend of 1s 6d in the pound is payable to the creditors by Messrs Theodore Jones and Co.

Omaha Bridge 8 per Cent. Bonds.—The Union Pacific Railroad Company, through their agents, the London and San Francisco Bank, are offering an issue of $2,500,000 (500,000*l*) in 8 per cent. bonds for subscription in this country. The Omaha bridge will be constructed forthwith across the Missouri river, at which point there is now a gap in the great trans-continental route, and the bonds will be specially secured by the tolls of the bridge. The prospectus states:—

The bonds (the principal and interest of which are payable clear of all taxes in the United States) are to bearer, each representing 200*l* sterling, or 1,000 dollars gold, with half-yearly interest coupons attached, each coupon being for 8*l* 5s 9d sterling, or 40 dollars gold.

The interest runs from 1st April, 1871, and is payable half-yearly, on 1st October and 1st April at the option of the holder, in London, at the London and San Francisco Bank (Limited); and in New York, at the office of Messrs Dabney, Morgan, and Co.

The bonds will be paid off by annual drawings by an accumulative sinking fund within 25 years at par, with a premium of 10 per cent. on the nominal value, viz., at the rate of 220*l* sterling, or 1,100 dollars gold per bond.

Regent's Canal.—Half-year's dividend of 8s 6d per share, free of income tax.

Reuter's Telegram Company.—The report of the directors that in consequence of the war, and of the subsequent events in Paris, Messrs Hevas and Co. have found it impracticable to close the accounts in time for the meeting. A dividend of 2½ per cent. has been already distributed, and a further dividend of 7½ per cent. is recommended, making a total distribution of 10 per cent. for the year.

Royal Mail Steam Packet.—The accounts showed continued improvement. The working account for the year 1870 showed that 646,207*l* had been received, and 446,024*l* expended, leaving a surplus of 200,183*l*. The repair and renewal fund showed a balance in favour of the company of 23,404*l*, and the insurance fund a balance of 228,660*l*. A dividend of 2*l* 5s per share out of profits, and another of 1*l* 15s per share from the insurance fund, were declared at the meeting as the half-year's distribution. This is equal to 13½ per cent. per annum, free of income tax.

Singapore Gas.—Dividend announced at the rate of 6 per cent. per annum.

MINING COMPANIES.

Nant-y-Ffrith Lead Mining, Limited.—With a capital of 15,000*l*, in 1*l* shares, this new undertaking has been started to work some mines in Derbyshire, in close proximity to the celebrated Minera mine. The lodes have been partially explored, and are stated to be of a promising character. Part of the capital has already been taken up.

STAMPS, &c., ON LOANS.

The following "notice" from the Committee has been posted in the Stock Exchange:—

Members have already been made aware that, in cases of loans, the nominal consideration transfer deed should be accompanied by a document recording the loan, and bearing the mortgage stamp.

As the result of representations made to the Government, the duty payable under the Stamp Act of 1870 has, in the Amendment Act (34 Vict., chap. 4, March 30, 1871), been so far modified that the ordinary loan business of the country will not be prejudicially affected. With a view to uniformity of practice, the Committee have agreed upon the annexed form of "memorandum," as suitable for loan transactions in securities deliverable by deed of transfer.

The Secretary of the Share and Loan Department will keep a supply, properly stamped, for the use of the market.

MEMORANDUM.—[34 Vict., Chap. 4—Passed 30th March, 1871.]

In consideration of an advance of £ until the day of 187 have deposited with you, as security, the undermentioned Stocks, together with the necessary Transfer deed:—

[Space reserved for recital of Securities and special conditions of the Loan.]

M.....

The Committee have further ordered that, in case of lo ans the borrower shall pay the nominal consideration transfer stamps of 10s, the registration fees, and the mortgage stamp 10s per £5,000 borrowered).

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The general weather, and the favourable accounts received of the growing crops have caused a dull tone to prevail on the grain trade, and the tendency of prices of wheat to-day was downwards. Very few sales were effected, and an occasional decline of 1s per quarter was submitted to. Flour sold slowly at a reduction of 1s per sack. In spring corn there was little doing. Oats ruled the turn in favour of buyers, while maize, barley, and beans supported late rates. This week's imports of foreign and colonial produce into London amounted to 19,050 qrs of wheat, 11,880 barley, 39,750 oats, 12,710 maize, 2,980 beans, 2,460 peas, 4,040 sacks, and 6,220 barrels of flour.

At Liverpool and Wakefield this morning wheat sold at a decline of about 1s per qr on the week.

The Liverpool cotton market opened very dull on Friday last, and continued so until Tuesday, when there was rather more demand, and a fair business has since been done at rather hardening rates. The total sales for the week are 81,700 bales; of which the trade have taken 57,830 bales; speculators and exporters 23,870 bales. The imports have been 99,792 bales; the actual exports 14,418 bales; and to-day's stock stands at the high figure of 951,620 bales. Quotations for all descriptions receded about ¼d per lb in the early part of the week, but at the close American descriptions are the same as on Friday last, while East Indian and Bengals have declined ¼d per lb. Market closes firmer. Sales 15,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended April 27, 1871:—

	Imported.		Exported.
American	bales 43,888	.....	9,306
Brazilian	24,679	.....	187
East Indian	31,645	.....	9,544
Egyptian	6,072	.....	191
Miscellaneous	5,691	.....	414
Total	111,975	.....	19,642

At New York, on April 27, middling Upland cotton was quoted 15½ cents per lb. Bombay advices to April 26 quote the cotton market firm at 165 rs for Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, April 1:—The amount of business done in cotton has not been sufficiently extensive in itself to afford any support to existing spot values, and were it not for the continued paucity of cotton suitable for selection, prices would most likely have declined towards the close especially. Our latest messages from Liverpool are dated 30th ultimo, and quote 6¾d and 6¾d for "fair" Dhollerah and Oomrawuttee respectively, or an increase of ¼d per lb upon the home currencies known to us when our last report was written. Continental exporters have done the bulk of the week's business, and as before, low Oomras, Nuggur, Julgaum, and Barsee have formed the descriptions principally run upon. Broach native and machine-ginned have attracted a good deal of attention also, but the former is only to be found in small lots, while the mixture of Baroda and other harsh short-stapled growths makes selection of the latter very unpleasant and disappointing. In the machine-ginned Broach, even of a high average quality, we have found that the staple is rather tender. Probably the dry hot winds which have prevailed in the Guzerat districts for some time past may in some measure be responsible for this failing. Stain also to a slight extent is apparent in most of the parcels now coming forward. The increased limits which exporters have lately been enabled to give, have tended to attract freer supplies to the up-country markets; but comparatively speaking arrivals are still on a disappointing scale, and prices necessarily are being maintained at an excessive level. From Tinnevelly we have a telegram, dated 30th ultimo, quoting 6¼d per lb.

Export of Cotton from Bombay to March 31.

Actual exports since last mail left, 11,647 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated April 14:—Partly owing to the holidays, and partly also to the dull Liverpool accounts, we have another week of inactivity in cotton. Holders still evince no disposition to give way, and for the better sorts, which become each day more difficult to meet with, enhanced rates are asked. Our quotations continue unchanged, as follows:—Fair, 7¼d to 7¾d per lb, f.o.b.; good fair, 8¼d to 8½d per lb, ditto; fully good fair, 8½d to 8¾d per lb, ditto; Gallin, 9½d to 11¾d per lb, ditto (nominal). Freight about ¼d per lb for steam-pressed bales.

The colonial produce markets have not been active during the past week. The demand for sugar has ruled quiet, and supplies having come forward somewhat freely the tendency of prices has been in favour of buyers. The parcels of coffee offered at auction have changed hands at steady rates. The tea market shows no change of importance; advices for Hong Kong to April 19 state that the total export (China and Japan) to that date amounted to 132,000,000 lbs. Rice and rum have sold on former terms.

The annexed is dated Havana, April 8:—Clayed sugars, being comparatively less inquired after, have but little improved in value. Shippers in general are acting with great caution, limiting their operations to the most pressing wants, but owing to the great firmness of the holders, and to an active demand on the part of speculators, prices advanced to 10¼ rs to 10½ rs No. 12, for both common Train and Derosne sugars. Choice lots of unexceptionable quality, as also handsome yellow sugars, suitable to the Spanish markets, which are scarce and much sought after, command ¼ rl to ½ rl above these figures. Low-graded descriptions of good strong quality have also been in very active demand, commanding a fraction above the current quotations. The transactions during the last week, now under review, have been rather unimportant, the market closing on the whole quieter here, as well as at outports, which must partly be attributed to the latest less encouraging advices from abroad, and partly owing to the approaching holidays. From the 1st of this month an additional export duty has come into force, amounting to—25c per box of sugar; 22c per hhd of sugar; 25c per hhd of melado; 50c per 120 gallons of molasses; 25c per 1,000 cigars. The duty on tobacco is fixed at $3.45 per 100 lbs. Our general quotations, which are based upon the last sales effected, must be placed as follows, viz.:—Nos. 7 to 10, 25s 2½d to 27s 5½d; 11 to 12, 20s to 28s 7d; 13 to 14, 29s 1½d to 29s 8½d; 15 to 17, 30s 3d to 31s 11d; 18 to 20, 32s 5½d to 34s 8½d; whites, inferior to superior, 34s 8½d to 41s 5½d—all at 18 per cent. premium, f.o.b., per cwt. The stock here and at Matanzas amounts to 330,809 boxes, against 432,725 boxes in 1870. The export from here, Matanzas, Cardenas, and Sagua le Grande, during the last month, were distributed as follows:—To the United States, 48,104 boxes 32,227 hhds; Great Britain and a market, 54,853 boxes 6,745 hhds; Hamburg, 101 boxes; Belgium, 1,942 boxes; France, 2,897 boxes; Spain, 26,862 boxes 202 hhds; Central and South America and other parts, 857 boxes 111 hhds—total, 135,616 boxes 39,285 hhds, against 190,883 boxes 78,847 hhds same month last year, and the aggregate of exports from the

above-mentioned ports sum up to 269.135 boxes 84,294 hhds, against 443,798 boxes 133,941 hhds in 1870.

Messrs Mohr Brothers and Co. write under date Rangoon, March 18:—The demand for Natsain rice has been very active throughout the fortnight under review, and as supplies have fallen off somewhat on account of the rain, about which we reported in our last, our market has continued its upward tendency, and prices have risen to 132 rs to 134 rs per 100 baskets, 5 to 6 parts Natsain rice, equal to 5s 9¾d to 5s 10¾d per cwt, free on board. Supplies are still smaller than usually at this time of the year, and as the shipping in port loading rice for Europe amounts to 38,000 tons burthen, the inquiry for our staple will continue active for some time to come, and a decline of prices is therefore not probable to take place soon. The demand for other qualities for the Straits and China has suddenly become very active, and prices for soft kinds of rice have been rising rapidly, being presently as high as for Natsain. Exports of rice from 1st January up to date amount to 74,315 tons, viz., 65,129 tons to Europe, and 9,186 tons to the Straits, China, and Indian ports.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, March 28:—A few small lots of Rungpore and ordinary Oudes have been placed during the week. The new crop continues to be well reported on from the districts of Tirhoot and Chuprah, where the seed is generally coming up well. From Lower Bengal our accounts are also good, but a few good showers would be very acceptable. We have nothing of interest to report from the Benares or north-western provinces. Exports of indigo from 1st November, 1870, to 25th March, 1871:—To Great Britain, 16,416 chests; France, 483: Trieste, 2,788; foreign Europe, 250; America, 2,280; Gulphs and Levante, 1,725—total, 23,942 chests.

The public sales of colonial wool have been well attended, and an average rise of ½d to 1d per lb is noticeable in the quotations.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on March 17, thus refer to the Cape wool trade:—The arrivals of wool still continue limited, but large quantities of new season's clip are advised as being on the road from the interior. There has been more demand for Uitenhage snow-whites, which have been selling at 15d to 15½d per lb, a few very choice parcels having been disposed of at 16d per lb. The small lots of country-scoured recently to hand have changed hands quickly at extreme rates, principally to finish orders. The stock of fleecewashed is very small, and there is little or nothing doing in this class. Long grease wools for America are still much sought after, and 5¾d for fair to 6½d for superior quality are readily obtained. There is very little short wool for washing, and prices range from 4½d to 5½d per lb, according to quality and condition. Our quotations for this mail are as follows, but there is a strong tendency upwards, which will only be checked if we have unfavourable news by next mail:—Grease—Full grown, superior, 6d to 6½d; fine, light, for scouring, 5d to 5½d; heavy and inferior, 4d to 4¾d. Fleecewashed—Superior, clean, 9d to 9¾d; good average, 8¼d to 8¾d; inferior and seedy, 7¼d to 7¾d. Snow-white—Prime Uitenhage scoured, 15d to 15½d; second quality ditto, 14¼d to 14¾d; superior country-scoured, 13d to 14d; inferior to good country-scoured, 11d to 12¾d.

The annexed is dated New York, April 14:—Business continues slow, and the markets present no new features. The general conditions of trade are about as favourable as they have been at any time during the spring, the stringency of the money market being confined to temporary loans, thus affecting none but the stock cliques; yet buyers of goods are inflexible in their purpose not to exceed absolute necessities. The imports are not so heavy as they have been, though some goods are still arriving freely; but those which are not perishable, or not wanted for immediate use are mostly stored in bond. The export trade in domestic produce continues slow, on account of a continued lack of margin. The gold market is firmer, but not more than usually active. The money market remains in much the same position as during the early part of the week. There are indications of a more favourable bank statement, and with the necessity for further contraction obviated, lower rates for call loans next week are regarded as among the probabilities. The active "bull" movement in stocks promotes an active demand, thus keeping the temporary loan market firm at from 5 to 7 per cent., the most general rate being 6 per cent. where dividend-paying securities are given as collateral. Discount rates are rather easier at 6 to 7 per cent. for prime short mercantile acceptances. The commercial demand for money is not very brisk, owing to the sluggish state of trade, and business men have no difficulty in obtaining ample accommodation. Foreign exchange remains steady, the supply of commercial bills, owing to the dulness of the export trade, showing no improvement.

THE COTTON TRADE.

LIVERPOOL.—April 27.

The cotton market was heavy in the beginning of the week, and some further decline was submitted to. On Tuesday holders began to show more confidence, and though yesterday the market was heavy, to-day it has again assumed more firmness. For Sea Island there has been a good demand, almost exclusively for the better grades of Florida and Island cotton, at previous rates. American continued pressed upon the market in the early part of the week, and gave way fully ⅛d per lb; but though still freely offered, has become firmer, and prices scarcely show any decline. New York advices to the 27th inst. quote Middling upland 15½ cents. costing to sell in Liverpool 8d per lb, by steamer. Brazil is still freely offered, and, with the limited inquiry, has given way quite ⅛d per lb. Egyptian has been in fair request, without change in prices. East Indian descriptions have been slow of sale, the trade being still attracted by the relative cheapness of the lower grades of American, and quotations generally have again to be reduced ⅛d per lb, with some irregularity.

In cotton to arrive there has been a fair amount of business. The latest quotations are—American, basis of middling, from Savannah, March shipment, not below good ordinary, 7¼d; low middling, stained, from Savannah, shipping or shipped $6\frac{7}{16}$d; Broach, good fair, machine ginned, Cape, April-May shipment $6\frac{5}{16}$d; shipping, 6⅜d; April-May sailing, via Canal, 6½d; Dhollerah, fair new merchants, May shipment, via Cape or canal, 5¾d; April-May shipment, via Cape, 5¾d; Oomrawuttee, fair new merchants, May shipment, via Cape or canal, $5\frac{11}{16}$d; April-May shipment, via Cape, 5¾d per lb.

The sales of the week, including forwarded, amount to to 81,700 bales, of which 8,180 are on speculation, and 15,690 declared for export, leaving 57,830 bales to the trade.

562790	951620	803040	915300

The above figures show:—

	bales.
An increase of import compared with the same date last year of	644,130
An increase of quantity taken for consumption of	112,260
An increase of actual exports of	178,340
An increase of stock of	388,830

In speculation there is a decrease of 68,830 bales. The imports this week have amounted to 99,792 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to April 21) is 267,000 bales, against 163,000 bales last year. The actual exports have been 14,418 bales.

LONDON.—APRIL 27.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

A fair amount of business has been done during the week, holders having generally accepted a decline of ¼d per lb on the spot, for cotton afloat, previous rates have been maintained.

LIVERPOOL.—APRIL 14.

By special telegrams received by us to-night from the Southern ports we are in possession of the returns showing the receipts &c., of cotton for the week ending this evening, April 14. From the figures thus obtained it appears that the total receipts for the seven days have reached 64,164 bales, against 67,543 bales last week, 71,744 bales the previous week, and 81,426 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,448,730 bales, against 2,440,307 bales for the same period of 1869-70 showing an increase since Sept. 1, this year, of 959,583 bales. The exports for the week ending this evening reach a total of 68,207 bales, of which 46,561 were to Great Britain, 3,391 to France and 18,255 to rest of the Continent, while the stocks at the close of this evening are now 529,177 bales. Below we give the receipts and stocks for the week, and also for the corresponding week of last season, as compared to us from the various ports to-night :—

Week ending April 14	Receipts to		Export to	Shipments to	Stock	
	Same week 1871.	Same week 1870.	Same week 1871.	Same week 1871.	1871.	1870.

Total						
Total last week						

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 34,936 bales, while the stocks to-night are 149,219 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to April 7, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph :—

The market the past week has continued dull, with prices in buyers' favour. There has been neither an active nor a general demand, while holders have shown increased disposition to supply any inquiry there might be. The finer grades have been (in absence of any spinning demand sufficient to absorb the offerings) particularly heavy, and middling Uplands closed to-night at 14¼c, against 15⅛c last Friday, and low middlings at 13¾c, against 14c a week ago; the grades below low middling remain unchanged. The cause of the dull feeling may be found in the continued large receipts at our ports, with a belief that the planting this year is not to be materially decreased, while the disturbed condition of France prevents any industrial recovery there. Under these circumstances holders begin to lose heart, fearing that the long expected upward movement in prices during the spring or early summer months may fail to be realised. This feeling is further reflected in the business for forward delivery. Prices, on the basis of low middling, closing to-night at 13⅞c for April; 13⅛c for May; 13⅜c for June; 13⅞c for August; August and September together, 13¾c; and for September, 14c. The total sales of this description for the week are—19,350 bales, including 400 free on board. For immediate delivery the total sales foot up this week 16,633 bales, including 11,149 for export, 2,901 for consumption, 240 for speculation, and 2,343 in transit. Of the above, 301 bales were to arrive. The following are the closing quotations :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c	c	c	c
Ordinary per lb	10¾ @ ...	11 @ ...	11¼ @ ...	11¼ @ ...
Good ordinary	12¾ ...	12¾ ...	13¼ ...	13¼ ...
Low middling	13¾ ...	14 ...	14¼ ...	14¼ ...
Middling	14¾ ...	15 ...	15¼ ...	15 ...
Good middling	15¾ ...	16 ...	16¼ ...	16 ...

For forward delivery the sales (including 400 free on board) have reached during the week 19,350 bales, all low middling or on the basis of low middling.

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Apr. 14, 1871.			Week ending Apr. 14, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	1071	2257	2[illegible]	1775	2[illegible]	18[illegible]
Columbus	412	1470	68[illegible]	44[illegible]	1[illegible]	11[illegible]
Macon	377	902	2[illegible]	401	1[illegible]	11[illegible]
Montgomery	600	1074	53[illegible]	381	1[illegible]	7[illegible]
Selma	11[illegible]	1148	3077	376	4[illegible]	[illegible]
Memphis	6842	9702	19[illegible]	4143	2[illegible]	13[illegible]
Nashville	7[illegible]	1[illegible]	7[illegible]	1215	1[illegible]	27[illegible]
	10[illegible]	18[illegible]	6[illegible]	8[illegible]	[illegible]	7[illegible]

These totals show that the interior stocks have decreased during the week 7,974 bales, being now 8,545 bales less than for the same period last year; while the receipts are 1,577 bales more, and the shipments 7,525 bales more than for the corresponding period of 1870.

There are some points established with regard to the next crop which are very satisfactory. 1. There has certainly been more cotton planted throughout the South this year than last year. We hear this from almost all the correspondents, and think there can be no doubt of it. It is mostly true of Louisiana, but is nearly if not quite universal. 2. The experiment of putting the cotton crop later the ground has been much less than last year. This has arisen from the remonstrances of the planter. He has had neither the money nor the credit to do otherwise. As a consequence very much less has been spent for fertilizers. 3. Bacon, lard, and all "hog products" are now from 3c to 4c per pound lower than they

were last year at this time, and the market for products of this description has at present a downward tendency, whereas a year ago it had an upward tendency. 4. These three facts, together with the further one (which is only true to a limited extent, however), that better terms have been made with the freemen, ensure, we think, a cheaper cotton crop than any since the war. It is hardly necessary to say that "hog and hominy" enter very largely into the price of cotton, and with these articles low the cost of the crop to the planter will be very materially reduced.

The following are the receipts of cotton at New York, Boston, Philadelphia, and Baltimore, for the last week and since September 1, 1870:—

Receipts—	New York.		Boston.		Philadelphia.		Baltimore.

—*New York Commercial and Financial Chronicle.*

NEW YORK, April 21.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 64,000 bales, and since the 1st of September, 3,510,000 bales. Shipments to England, 64,000 bales; to France, 4,000 bales; and to the continent, 13,000 bales. Total since the 1st of September, 2,540,000 bales. Stock at all ports, 486,000 bales. Middling Upland, 6⅞d, cost and freight, per steamer.

NEW YORK, April 25.—The receipts of cotton at all United States' ports for the last four days have been 32,000 bales. Shipments to England, 21,000 bales; to France, 6,000 bales; and to the continent, 6,000 bales. Middling Upland, 7⅛d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, April 27. — We have again passed a dull and inactive week in nearly all departments of trade. The actual business transacted has been meagre in the extreme, and generally only to supply immediate wants. There is a prospect of the differences between mill-owners and their hands, resulting in strikes in Oldham and other districts, which causes producers to be chary of taking orders for forward delivery, which they may be unable to execute. This feeling is the source of much firmness in prices, which buyers will not meet, as the raw staple continues weak, and tending downwards. Were producers more anxious sellers, doubtless a large business would be the result. India shirtings are exceptionally quiet, and to effect sales lower prices would have to be submitted to. There is no accumulation of stocks as yet, but the contracts on hand are not so heavy as formerly, and those whose orders are near completion are easier to deal with. The market closes quiet, and without much change in values.

Messrs Alexander Collie and Co. received the following telegram from Mancehster yesterday:—The market continues quiet and Tuesday's quotations unchanged, but the business doing is too limited to test prices fairly.

BRADFORD.—There is considerable activity in the wool market, and transactions are freely effected. Quotations are extremely firm, and in some cases show an upward tendency. Good wethers are still most in favour, particularly in demi-lustre and lustre of the finer description. A good business is doing in the yarn market, both for export and home consumption, although the high rates current tend to obstruct operations. The piece market is also much more active than it has been for some weeks past. Prices are stiffer.

LEEDS.—The markets in the cloth halls were of a very quiet character. There were few but the representatives of Leeds houses present, and they made only small selections of goods. There was no change to note in prices. Wools keep very firm in price, being rather strengthened by the rates obtained at the current sale of colonial wool in London.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—APRIL 14.

The markets for flour and grain the past week have been variable in tone, though the fluctuation in prices have been inconsiderable. The close, however, is pretty uniformly in favour of buyers. The receipts of flour have continued moderate, but there has been little done for Europe, and except for the West Indies the export demand would be hardly worth referring to. The West India orders have been mainly for grades worth $7 to $7.25, and have been partially filled with Southern flours. The shipping extras from spring wheat close somewhat nominal at $6.50 to $6.75, with holders seeking bids. The trade demand has been fair, and the Minnesota brands have brought very full prices. At to-day's market good lines of shipping extras from spring wheat sold at $6.65 delivered, but the bids were generally limited to $6.60, which sellers were unwilling to accept. The wheat market shows very little change. Receipts have been moderate, and foreign accounts have reported an advance; but a disposition to realise, and the scarcity and higher rates of ocean freights, have operated to prevent any general advance, although rather more money was paid in special instances. We shall be in receipt of large supplies by canal the first week in May. To-day, under dull private advices from Europe, the market showed weakness, leading to a moderate business for export at $1.58 for new No. 2 spring in store, and $1.65 for amber winter and common white. Corn has declined under liberal receipts by rail, reduced bids from shippers, and an advance in ocean freights. But at each concession buyers took hold freely. The sales of Western mixed at 75c to 76c were very large, and to-day, with better accounts from abroad, there were large sales, including yellow at 77½c, and mixed at 77c, but the close was about 76½c. There are large quantities of corn coming forward, but the wants of buyers seem to be very great. The movement in breadstuffs at this market has been as follows:—

* Estimated.

In the comparative statement of stocks, April 1, 1870, Boston, Montreal, Oswego, Toronto, Philadelphia, and Baltimore were not included.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Owing to the genial weather and the favourable accounts of the growing crops, the grain trade has ruled dull during the past week, and values have tended in favour of buyers. Supplies of English wheat on sale have been limited, but the condition of the samples has been fair. Millers have confined their operations to their immediate wants, and factors have been compelled to submit to a reduction of 1s per quarter to effect sales. This however has been confined for the most part to English samples, which are relatively dearer than foreign. The imports this week have not been extensive, but have consisted principally of wheat, while the exports have been somewhat extensive. Shipments have been resumed from the Baltic and South European ports, though not on any unusual scale owing to the uncertainty attending the course of the French trade; while the grain movement on the United States canals is again becoming active. The estimated number of wheat-laden vessels afloat for all ports to the United Kingdom is 135 against 145 at the corresponding period last year. We give the usual statement of the imports and exports of grain, &c., for the 1st of September to date below:—

	Imports. 1870-71. Cwt.	Exports. 1870-71. Cwt.	Imports. 1869-70. Cwt.	Exports. 1869-70 Cwt.
Wheat	21,000,617	2,559,551	27,858,277	199,423
Barley	5,146,467	78,918	5,435,216	18,153
Oats	4,888,589	1,172,403	6,367,837	79,107
Peas	467,541	15,245	852,126	10,527
Beans	1,187,160	15,863	1,247,816	1,225
Indian corn	5,000,746	5,250	14,028,140	13,004
Flour	3,058,405	1,234,862	1,444,408	14,118

Spring corn has ruled dull. Oats and maize have given way slightly in value; but barley, beans, and peas show no change on the week. Flour has sold at a reduction of 1s per sack.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days only 12 grain and seed-laden vessels have arrived at ports-of-call, viz., 6 wheat, 4 maize, 1 rye, and 1 linseed. The floating grain trade has been dull in tone. Wheat has been slow to sell, and prices even of fine cargoes are 1s 6d to 1s 9d lower on the week. Maize has been in quiet demand at 3d to 6d decline. Barley—Imperfect cargoes difficult to sell; for good cargoes late prices would probably have been paid. Rye dull, and prices tending downwards. The reported sales are as follows:—Wheat—10 arrived cargoes Berdianski, 54s to 55s 6d; Ghirka Odessa, 58s 9d to 59s 6d, Ghirka Nicolaieff, 46s 6d per 492 lbs, Walachian, 47s 3d, Polish Odessa, 51s and 45s 6d; Theodosia, 54s per 480 lbs. Maize—2 arrived cargoes: Odessa, 35s 6d to 35s 10½d per 492 lbs. Barley—1 arrived cargo Theodosia, 27s 6d per 400 lbs. Rye—1 arrived cargo Marianopoli, 40s per 480 lbs. Linseed—Spot steady; to arrive quiet. Arrived 450 tons East India, from Calcutta, 63s 3d to 63s 6d; and a cargo Turkish Ismaili, 63s 6d. On passage, 100 tons East India, from Bombay, at 63s 6d. Shipped or to be shipped, 300 tons East India, from Calcutta, at 67s 6d per 410 lbs. Rapeseed more inquired after at the late decline. Arrived 125 tons middling yellow mixed East India, from Calcutta, 70s, and 1,200 bags inferior ditto, 65s 9d. On passage, 150 tons yellow mixed East India, from Calcutta, 71s 3d; 300 tons ordinary brown, 65s 3d to 65s 6d. Shipped or to be shipped, 400 tons Guzzerat, 71s 9d, and 700 tons ordinary brown, 65s to 65s 3d per 446 lbs. Cotton-seed steady at late rates. On passage, 100 tons Egyptian, from Alexandria, at 9l 1s 3d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market became flat, some descriptions being sold at prices in favour of the buyers. Sales of West India have amounted to 1,623 casks: good qualities at former rates; other kinds at a slight reduction, recent arrivals giving an increased supply. Barbadoes by auction sold at 29s to 33s; grainy, 31s 6d to 36s. Jamaica brown and grey, 28s to 32s per cwt. Grainy Demerara is quiet. Low brown descriptions have been in limited demand, owing to the cessation of speculation. A few floating cargoes of foreign have sold for the United Kingdom at easier rates. Refined has not quite maintained its former position. The landings last week were rather large, and further arrivals have since occurred, but the deliveries keep good, and the stock in London still exhibits a very important deficiency when compared with the previous season. Consumption of beet sugar is being gradually extended.

Mauritius.—A small parcel of fine crystallised yellow, sold at 37s 6d; and some soft brown at 23s to 25s 9d.

Bengal.—240 bags brown Gurpatta were taken in at 26s.

Natal.—1,273 bags chiefly found buyers, the low qualities being cheaper. Brown, 21s to 30s 6d; yellow, 31s to 34s 6d.

Madras.—2,700 bags Jaggery have found buyers at 19s.

Manila.—2,000 bags clayed are reported at 25s, and 1,800 bags unclayed at 22s.

Other Foreign.—By private contract 270 boxes Havana at 35s, and a small parcel of good grocery Porto Rico at 35s.

Floating Cargoes.—One of Cuba is reported at 27s; one of Pernambuco in bags at 25s; a small cargo of Porto Rico at 27s 6d; four of Havana No. 10½, 29s; 11½ to 12, 29s 6d to 29s 9d per cwt for the United Kingdom.

Refined.—The market is inactive and dry goods rather lower than on Friday last. Pieces also dull of sale.

MOLASSES.—160 puncheons Antigua have sold at 13s to 14s per cwt.

RUM.—A few sales have been made in Jamaica during the week, chiefly at 3s 6d to 3s 9d per gallon. Other kinds remain inactive. A small quantity pale Leewards sold as low as 1s 6d; Barbice, 1s 8d to 1s 8½d, Demerara 1s 11d per proof gallon.

COCOA.—Supplies have been large, and further arrivals have taken place. At the public sales of colonial there was a good demand. 1,160 bags Trinidad chiefly sold at previous rates: grey and ordinary, 55s 6d to 60s; good ordinary to good, 61s to 78s; and fine, 80s to 110s. One lot very fine, 128s. 1,277 bags Grenada mostly found buyers at former prices: from 46s 6d to 56s; good to fine red, 58s 6d to 67s per cwt.

COFFEE.—The sale of the Netherlands Trading Company, held on Wednesday, went rather dearer, but the result is in no way calculated to affect this market, which has been freely supplied. At the public sales of plantation Ceylon, 2,395 casks 383 barrels 1,734 bags all sold, and went at steady quotations, as follows: low middling to middling, 61s to 69s; good middling to fine, 70s to 85s 6d; grey, 58s to 71s. No further business reported in native. 104 casks 192 barrels 148 bags Jamaica sold steadily: pale, 50s to 59s; small berry, and low middling to middling colory, 61s to 72s. 31 cases 161 bags Courtallam, &c., realised 60s 6d to 65s 6d. 125 bags Manila, chiefly damaged, 53s to 56s; one lot sound at 56s. 750 bales and half-bales Mocha, part sold at 89s to 94s 6d, for mixed palish to fair quality. 1,801 bags Guatamala chiefly found buyers, at 56s to 66s 6d. A few lots colory, 69s to 71s. 172 bags Costa Rica sold at 57s to 62s 6d. 3,744 bags Rio were chiefly taken in. 591 bags Bontyne bought in at 60s for the sound. Two floating cargoes of Rio are reported at 49s 6d to 49s 9d for a near port, and one at 49s 9d and 50s 9d per cwt for the Mediterranean. The arrivals having increased the stock is nearly equal to the one at same date in 1870, but the deliveries continue to maintain the improvement lately noticed.

TEA.—The market has been inactive, with rather a limited business privately. Public sales are declared for Tuesday next, meanwhile the trade restrict their operations. During the past fortnight a steady business has been done in Indian. For the auctions of the 25th instant 7,661 packages were printed, of these about 3,700 were disposed of previously at fair rates. Not more than 700 packages were sold in the room, the trade only selecting teas of really strong and good quality. Darjeeling kinds are in less demand, and prices tend in favour of buyers, while all inferior descriptions show a decline of fully 1d per lb. Pekoes are still difficult of sale, only the finest grades being at all inquired for. Medium Pekoe Souchongs and broken Teas are not much wanted, but the lower grades are scarce.

RICE.—At the public sales this week 10,318 bags Madras were taken in at 10s 6d. 1,364 bags Bengal chiefly sold: Ballam, 9s 6d; middling white, 10s 6d to 11s. Privately white Bengal has sold at 10s 9d to 11s 3d; Askoolie, 10s; Madras, 10s; Necrancie Arracan, 9s 6d to 10s. 200 tons Bengal are reported to arrive at 10s 6d ex quay. Some parcels Askoolie at 10s ex quay, and 1,000 tons Necrancie Arracan and Rangoon at 10s 4½d per cwt, for the continent.

IMPORTS and DELIVERIES of RICE to April 22, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports.....tons	28450	9450	26200	16900
Deliveries	40520	17850	19150	17270
Stock	41050	41050	39700	16200

SAGO is dull. 247 bags small medium part sold at 18s 6d.

TAPIOCA.—342 bags Singapore were partly disposed of at 2d to 2¼d. 1,831 bags Penang tapioca flour were bought in at 1⅞d to 2d per lb.

BLACK PEPPER.—A few sales have been made in Penang by private contract at 4⅞d cash, and 5d with prompt; Singapore, 5¼d to 5⅜d. The market is now firm. 1,366 bags Singapore were offered by auction, and the damaged portion sold at easier rates, the sound being taken in. Present stock about 1,400 tons, against 1,220 last year, 1,780 in 1869, 2,220 in 1868, and 3,960 in 1867 at the corresponding date.

WHITE PEPPER.—320 bags Singapore by auction sold at easier rates from 6¼d to 6⅜d per lb.

OTHER SPICES.—A large quantity of pimento was brought forward at the sales yesterday, viz, 4,818 bags, when about two-thirds sold at easier rates, from 1⅜d to 2d. 120 bags Zanzibar cloves were taken in above the value. 30 cases mace from Amsterdam withdrawn. Some small packages West India sold at 2s 6d to 3s 6d. 10 cases Penang nutmegs partly found buyers: 81's at 2s 6d, and some small packages of West India, 1s 10d to 2s 2d. 64 packages cinnamon partly sold on about former terms. 355 bags chips were chiefly taken in. A few lots good sold at 4d per lb. 210 boxes cassia buds withdrawn. 25 cases Cochin ginger were chiefly bought in. 192 barrels Jamaica sold steadily, including a portion of the new crop: low to ordinary, 35s to 42s; middling to good bold, 43s to 93s.

SALTPETRE.—The market is firmer. 640 bags Bengal, by auction, were taken in above the value. A few parcels have changed hands privately; refraction 6⅜, 27s 6d; 6½, 27s 9d; 4 to 4¼, 29s to 29s 6d. 90 tons sold afloat at 26s 6d per cwt usual terms.

IMPORTS and DELIVERIES of SALTPETRE to April 22, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported.....tons	3790	2510	1550	2100
Total delivered	3600	5200	3050	3870
Stock	2580	2130	2680	6350

Deliveries last week, 318 tons.

INDIGO continues steady. The quantity of East India to be offered in the next sales on the 8th proximo, will amount to 13,147 chests.

COCHINEAL.—The market has been quiet since the last public sales. The stock of Teneriffe now amounts to 12,540 serons, &c., against an average stock of 7,720 tons at same date in the four previous years.

OTHER DRYSALTERY GOODS.—Transactions have been unimportant. A few sales of cutch are reported at 19s to 20s; fine 22s. Gambier has been quiet, with sales at 15s 9d to 15s 10½d ex ship. Turmeric has been quiet. Bengal nominally as last quoted. A parcel of Madras by auction was sold at 20s per cwt.

SHELLAC.—The sales have been small at about previous rates, including 100 chests by auction at 102s 6d to 110s per cwt for native orange.

METALS.—Prices have in some cases shown a slight decline during the week, and the markets are rather quiet. Scotch pig iron is lower, but a steady business has been done, closing at 54s 9d cash. Rails are in demand at last week's prices, and a period of great activity is confidently expected. English lead barely supports its former value. Tin plates are in good demand. Spelter has been sold at a reduction upon last week's rates. Silesian, 17l 5s to 17l 10s ex ship. A steady business in English tin. Straits has fallen 10s, and a few sales have been effected, most recently at 126l 10s to 127l. Banca, 128l 10s to 129l. The contracts made in copper have not altered general quotations. Chili, &c., selling at 64l 10s to 65l 10s per ton.

JUTE.—The trade have suspended operations, as they are well supplied with further liberal arrivals in Dundee, where manufactured goods are also taken less readily than of late. A few sales have been made here for arrival at about former prices, and the market is quiet. Several public sales are declared for the ensuing week.

HEMP.—Manila quiet, and only small sales have been made from recent arrivals. 5,175 bales by auction were chiefly taken in. A few lots white selling at 60l to 66l 5s, and Boluzan at 49l 10s. The current qualities of roping hemp meet a limited inquiry. 209 bales Coconada part sold at 18l 10s per ton.

LINSEED is steady. Calcutta 63s 3d to 63s 6d, to arrive 62s. Bombay 64s, ditto afloat 63s. Black Sea spring and summer shipment about 61s 6d per quarter.

OIL.—Olive remains dull. Sales of sperm are reported at 83l. Cod, 35l to 35l 10s. Pale seal, 37l to 37l 10s per ton. There has been an improved demand for linseed oil at 31l 10s, closing at 32l on the spot. English crown rape firmer at 43l to 43l 5s, and about 5s more for the last four months. No change in refined, which is quoted 45l to 45l 10s. Foreign, 47l to 48l. Palm has been dull. Fine Lagos, 37l 10s. A steady business passing in cocoa nut: Ceylon, 40l 5s to 40l 10s; buyers for arrival at 41l. Cochin continues scarce, especially fine: prices range from 46l to 49l per ton.

TURPENTINE.—American spirits firmer at 36s. French 34s 6d per cwt.

PETROLEUM is quiet. American refined, 1s 4½d; last four months, 1s 5¾d per lb.

TALLOW.—At about the decline reported upon foreign last week, the business has been rather small. The chief causes of depression are the expected abundance of home tallow, and the very large quantity of Australian to come forward. Petersburg, 42s 6d; June, 42s 9d to 43s; October to December, 44s 6d to 44s 9d per cwt.

PARTICULARS OF TALLOW—Monday, April 24, 1871.

POSTSCRIPT.

SUGAR.—The market is quiet. At the public sales the various parcels of Barbadoes and crystalised chiefly sold at about former rates; also part of 1,672 bags Natal. 1,600 casks 141 barrels graining Guatemala were taken in. Sales of West India 532 casks; for the week, 2,145 casks. A floating cargo of Havana sold for the United Kingdom: No. 11½ to 12, at 29s 9d.

COFFEE.—The sales of plantation Ceylon, comprising 791 casks 196 barrels and bags, went off at easier rates for common qualities, and at the previous value for common and grey. 136 cases 2,871 bags East India part sold, including good to fine Mysore, at 77s to 85s. 73 casks 24 barrels and bags ordinary Jamaica sold at previous quotations. 413 bags Guatemala, at 55s to 62s 6d.

RUM.—A sale of Mauritius reported at 1s 5d per proof gallon.

TEA.—The small sale of Congou and Mogune green held to-day went off without material change in prices.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market has been very quiet and lower rates are accepted of 6d to 1s per cwt. In Dutch crushed the tendency has been downwards, with sales at 9d to 1s below last week.

TOBACCO.—The North American tobacco market has not presented any new feature during the past week, and prices continue without any alteration.

LEATHER.—The business of the past week has been considerable, and although confined with respect to sole leather chiefly to the lighter descriptions, makes a full average total.

METALS.—Mostly a quiet week, but a small business doing in copper, which has kept prices steady. In tin the demand has been small. Lead is firm, and in steady demand. Spelter has changed hands at lower rates. Tin plates are well maintained.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	45	0
Fat by ditto	2	1
Yellow Russian ditto	44	0
Melted stuff	32	0
Rough stuff	16	0
Greaves	19	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, April 24.—The total imports of foreign stock into London last week amounted to 14,733 head. In the corresponding week in 1870, we received 5,953; in 1869, 12,632; in 1868, 5,194; and in 1867, 11,630 head.

An increased amount of animation has been apparent in the cattle trade to-day. Stock has come less freely to hand, and as the demand has been in a tolerably healthy state, prices have improved. As regards beasts, the arrivals from our own districts have been on a moderate scale; but very few foreigners have been present. Sales have progressed steadily, and prices have risen 2d per 8 lbs; for the best Scots and crosses 5s 6d to 5s 8d per 8 lbs has been paid. Only moderate supplies of sheep have been on offer. The trade has been firm, and prices have risen 2d per 8 lbs. The best Downs and half-breds have realised 5s 10d to 6s per 8 lbs, clipped. Lambs have sold slowly at from 6s 6d to 8s per 8 lbs. Calves have been in moderate request, at previous prices. Pigs have been purchased quietly, at about late rates. About 740 beasts and 11,500 sheep are at the waterside. In future, German stock will be allowed to pass to the market; but it must be slaughtered within ten days.

SUPPLIES ON SALE.

	April 25, 1870.	April 24, 1871.
Beasts	3,166	2,490
Sheep and lambs	27,165	16,800
Calves	196	170
Pigs	130	170

METROPOLITAN MEAT MARKET.

Per 8 lbs by the carcase.

	s	d		s	d		s	d		s	d
Inferior beef	3	4	to	4	0	Inferior mutton	3	8	to	4	6
Middling ditto	4	0		4	4	Middling ditto	4	8		5	4
Prime large ditto	4	6		4	10	Prime ditto	5	4		5	8
Prime small ditto	4	10		5	2	Large pork	3	4		4	4
Veal	5	0		5	4	Small pork	4	4		5	0

Lamb, 6s 8d to 8s 6d.

POTATO MARKETS.

Borough and Spitalfields, Friday, April 28.—The markets are well supplied with potatoes. The trade has been quiet, at about late rates. Englis., shaws, 60s to 80s; ditto regents, 50s to 80s; Scotch regents, 55s to 85s; rocks, 50s to 75s per ton.

HOP MARKET.

Borough, Friday, April 28.—A slight improvement has been noticeable in the hop market. Business in all quarters has been transacted rather more freely, and the tendency of prices has been favorable. Mid and East Kents, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112s; olds, 15s to 30s per cwt.

LIVERPOOL MARKETS.

Wool.

(From our own Correspondent.)

Friday, April 28.—Our market continues very firm, although transactions in wool of every description are limited. The stock in sale-rooms held here on the 25th and 27th inst. have gone off with considerable spirit, at fully late sale rates. Of 4,700 bales offered, 2,600 bales were sold, the remainder being withdrawn, chiefly on account of being limited above their comparative value.

Corn

(From our own Correspondent.)

Friday, April 28.—There was a small arrival coastwise at this market to-day. Wheat was very dull, at a decline of 2d per cental. Maize, 6d cheaper. Barley cannot quit. Beans, 6d to 9d cheaper, and in good request. Peas steady at 6s. Oats had a small show of sale at previous rates.

Wakefield, Friday, April 28.—The wheat trade ruled dull at this market to-day, and prices were to be quoted cheaper than last Friday. Barley firm at late rates, and oats fully as dear.

The Gazette.

BANKRUPTS.

Tuesday, April 25.

William Kemp, Salisbury terrace, Kilburn, butcher.
James Foster, George Booth, and Joseph Booth, Charlesworth, Derbyshire, cotton-spinners.
Charles Francis Butler, Windsor, lieutenant in the army.
William Hall, Hartlepool, wine merchant.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For private houses, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN.

Is extensively used for all kinds of

OUT-DOOR WORK.

It is especially applicable to

WOOD, IRON, BRICK, STONE, AND COMPO.

CHARLES LEWIS GRUNEISEN, Sec.

Prospectuses, explanatory of Investment, Land, and Building Departments, free of charge.

OMAHA BRIDGE 8 PER CENT. BONDS,

Issued by

THE UNION PACIFIC RAILROAD COMPANY,

Secured by Mortgage specially authorised by Act of Congress of the United States,

For £500,000 Sterling, or 2,500,000 dols Gold.

The bonds (the principal and interest of which are payable clear of all taxes in the United States) are to bearer, each representing £200 sterling, or 1,000 dols gold, with half-yearly interest coupons attached, each coupon being for £8 5s 9d sterling, or 40 dols gold.

The interest runs from 1st April, 1871, and is payable half-yearly on 1st October and 1st April at the option of the holder, in London at the London and San Francisco Bank (Limited), and in New York at the Office of Messrs Dabney, Morgan, and Co.

The bonds will be paid off by annual drawings by an accumulative sinking fund within twenty-five years at par, with a premium of 10 per cent. on the nominal value, viz., at the rate of £220 sterling, or 1,100 dols gold per bond.

The repayment of the drawn bonds will, at the option of the holders, be made in London or in New York.

The bonds are issued by the Union Pacific Railroad Company, under the special authority of the Congress of the United States, for the purpose of completing the communication, now separated by the Missouri river, between the important railway lines at present terminating at Council Bluffs on its eastern, and Omaha on its western, side, and representing an aggregate capital of not less than 150,000,000 dols.

By Act of Congress the bridge and its approaches are declared to be a National Post Road, by which it is placed under the exclusive jurisdiction of the Federal Government, without the power of interference by any municipal or State authority.

In addition to the security afforded by the tolls of the bridge and its approaches, which will be specially pledged for the benefit of the bondholders, a direct mortgage of the bridge and its approaches will be made to Trustees to secure the payment of the principal and interest of the bonds.

The form of the bond is appended, and the draft mortgage deed may be inspected at the Office of the London and San Francisco Bank (Limited), 22 Old Broad street, E.C.

The London and San Francisco Bank (Limited) offer for public subscription the above bonds, at £188 per £200 bond, payable by instalments as under:—

£10 on application.
£40 „ allotment.
£40 „ 1st June, 1871.
£40 „ 1st July, 1871.
£40 „ 1st August, 1871.
£18 „ 1st September, 1871.

Allottees may pay the full amount in advance upon allotment or on either of the above dates, and upon such payments discount at the rate of 4 per cent. per annum will be allowed.

The records of the Ferry Company show that there were transferred across the river at Omaha by ferry boat during the past year 32,972 railway cars, capacity 12 tons each, and 14,250 waggons.

The completion of the work will result at once in a direct cash saving to the Railway Company (exclusive of the revenues to be derived by it from ordinary traffic), as the cost of ferriage upon present traffic exceeds the interest charge upon the line and bridge.

The work upon the line is about one-third done. Upon the bridge proper nine of the eleven piers required are above high water, the two remaining piers are going forward rapidly. The entire work, so far, has been done more rapidly than was anticipated. There is no reason to apprehend that the line and bridge will not be opened for traffic at the date contracted for, which is 1st January, 1872.

To ensure permanency all the piers are placed upon the solid rock, and the superstructure is composed wholly of iron.

The following are the Trustees under the mortgage:—
John Edgar Thomson, Esq., President of the Pennsylvania Railway Company, Philadelphia;
J. Pierpont Morgan, Esq., of Messrs Dabney, Morgan, and Co., Bankers, New York;
Elisha Atkins, Esq., Boston.

By the terms of the mortgage, the Trustees are required to fix the tolls to be charged upon traffic, at rates that shall at all times be sufficient to meet the requirements of the bonds.

The proceeds of the bonds are to be received by the Trustees, who are required to hold in their possession at all times, a sufficient sum to ensure the completion of the work ready for traffic, and to meet all interest that may accrue during the construction thereof.

Applications for allotments must be made in the annexed form, but no application will be entertained unless accompanied by a deposit of £5 per cent. on the nominal amount of the bonds applied for.

In case default is made in payment on allotment, or of any of the instalments on the days named, the allotment will be liable to be cancelled, and the amounts then already paid forfeited. In cases in which no allotment is made, the amount deposited will be returned to the applicant, without deduction. Upon payment of the allotment money, scrip certificates to bearer will be issued to the subscribers, which will be exchanged for the definitive bonds as soon as possible after payment of the whole amount of the subscription.

22 Old Broad street, April, 1871.

No.——

SPECIAL OMAHA BRIDGE 8 PER CENT. FIRST MORTGAGE BONDS of the UNION PACIFIC RAILROAD COMPANY.

FORM OF APPLICATION.

To London and San Francisco Bank (Limited).

Gentlemen,—Having paid to you the sum of £ I hereby request that you will allot me £200 (1,000 dols) bonds of the above-named Company, and I hereby agree to accept such bonds, or any smaller number that may be allotted to me, and to pay the further sums due thereon according to the terms of the Prospectus issued by you.—I am, Gentlemen, your obedient servant,

Signature .....
Address in full.....
Date .....1871.

OMAHA BRIDGE 8 PER CENT. BONDS.

The SUBSCRIPTION LIST for the above Bonds will CLOSE on MONDAY, 1st May, at Two o'clock for London applications, and on TUESDAY morning for application from the country.—For London and San Francisco Bank (Limited),

JAS. M. STRECTEN, Secretary.

28th April, 1871.

THE ALLT-Y-CRIB SILVER-LEAD MINING COMPANY (Limited).

(To be incorporated under the Companies Acts, 1862 and 1867.)

Capital, £36,000, in 36,000 shares of £1 each. Deposit, 10s per share on Application, and 10s on Allotment.

PROSPECTUS.

This Company is formed for the purchase of, and extending the workings of, the celebrated Allt-y-Crib Lead Mines, situate in the village of Talybond, in the County of Cardigan, seven miles from Aberystwith. These mines have been worked for about two years under a "Tack Note" and agreement for twenty-one years' lease on demand, at a Royalty of one-fourteenth.

The sett is about one mile in length, and more than half a mile in width.

The rich Champion Lode of the district, as shown on the ordnance map, runs east and west through the entire estate, and is visible on surface for many hundred fathoms in length. There are also other parallel loads opened and proved to be of great value.

An Adit Level has been driven half a mile in length from the foot of the mountain, commencing close to the dressing floors. It has already intersected the Champion Lode, and when driven further, it will intersect the other parallel loads at a depth of about forty fathoms, thus opening several mines at one cost.

From a shallow adit a shaft has been sunk 22 fathoms upon the underlay of the Champion Lode, carrying with it a good course of ore, now worth 2½ tons of lead to the fathom, and constantly improving, and should it continue, of which there is every appearance, until it unites with the deep adit, there will be from 40 to 50 fathoms of backs proved by many hundred fathoms in length.

A steam engine has been fixed in the shallow adit to carry on the operations in this part of the Mine. Below the deep adit a shaft has been sunk some few fathoms, where the lead was found to be two feet thick; it is proposed to erect an engine and continue this shaft. The South Lode on this sett is also proved to be of great value. It unites with the central lodes on the north-west side of the mountain, and the early miners evidently raised large quantities of lead from merely surface scratchings. It is the opinion of experienced and practical miners that it only requires the necessary appliances to make this Mine equal to any in Wales.

All necessary buildings, powerful water-wheel, stamping and crushing machines, are completed and in work.

The local advantages of this Mine can hardly be equalled. It is only three miles from a station on the Cambrian Railway, a river runs by the washing-floors, and there is ample accommodation on the spot for the workmen.

It is proposed to take the Mine over from 31st March, 1871. In its present undeveloped state, the production from the various levels being driven may be estimated at from five or ten tons of ore per week. As soon as the shaft, now being sunk in the Champion Lode, is connected with the deep adit level, the production may be calculated at twenty tons per week. In about four months' time this communication will be effected. As the Mine becomes further developed, the yield will increase in proportion.

The ore sold during the present workings has averaged £12 per ton.

The proprietors have agreed to accept the sum of £26,000 (£8,000 in cash, and the remaining £18,000 in fully paid-up shares), leaving £10,000 as capital, which the Directors feel assured will be sufficient to make it not only a self-paying Mine, but an investment equal to any in Wales.

Prospectuses, with full particulars and reports, may be had on application to the Brokers and the Secretary.

I also give notice, that for purposes of convenience the Transfer Books will be Closed from the 29th instant to the 3rd proximo.

WILLIAM RODGIE, Liquidator.

Bombay, 24th March, 1871.

GERMAN BANK OF LONDON (Limited).

DIRECTORS.

George Albrecht, Bremen.
Edward Henry Green, London.
Carl Klotz, Frankfort-on-the-Main.
Victor Freiherr Von Magnus, Berlin.
Julius May, Frankfort-on-the-Main.
Adolph Von Rath, Cologne.
Charles Ferdinand Rodewald, London.
Frederick Rodewald, London.
Thomas Seidar, London.
Rudolph Sulzbach, Frankfort-on-the-Main.
L. Joseph Speyer, Frankfort-on-the-Main.

MANAGING DIRECTOR—Otto Nestle.

ASSISTANT MANAGER—Leopold Bonn.

AUDITOR—George Thomas Brooking.

BANKERS—The London Joint Stock Bank, London.

The capital of the German Bank of London (Limited) is £2,000,000, divided into 200,000 shares of £10 each, of which 60,000 shares, representing a capital of £600,000, have been issued, subscribed for, and allotted, and are intended to be fully paid up within six months.

The Bank is established in London, and has no branches on the continent or abroad. It is now prepared to open business, to negotiate approved securities, and generally to attend to transactions appertaining to foreign banking business.

Bartholomew House, Bartholomew lane, London, E.C., April, 1871.

ANGLO-AUSTRIAN BANK.

Notice is hereby given, that the Seventh Ordinary General Meeting of the Shareholders of the Anglo-Austrian Bank will be held at Vienna, on Wednesday, the 31st day of May next.

The following are the subjects to be considered by the meeting:—

1. The report of the Directors.
2. The report of the Auditors as to the accounts for the year ending 31st December, 1870.
3. A declaration of dividend for the year ending 31st December, 1870.
4. The election of five Directors, and eventually of substitutes (according to Articles 25, 26, and 30 of the Statutes).

Shareholders who desire to be present at the meeting must, in accordance with the Statutes, deposit their provisional shares between the 1st and 17th May next at one of the undermentioned places:

In London, at the Offices of the Anglo-Austrian Bank
In Vienna, at the Anglo-Austrian Bank.
In Berlin, with Messrs Mendelssohn and Co.
In Frankfort-on-the-Maine, at the Austrian German Bank.

Lists containing the numbers numerically arranged and signed must be handed in with the provisional shares, stating the name and address of the depositor—in London and Vienna in duplicate; in the other places above mentioned, in triplicate. One of these lists receipted will be returned to the depositor. In London and Vienna he will, at the same time, receive a voucher for his admission to the general meeting.

In the other places specified the voucher will be given on presentation of the receipted list of provisional shares, between the 10th and 23rd May next.

After the meeting the deposited provisional shares will be returned in exchange for the receipted lists.

A shareholder may be represented at the meeting by any other shareholder entitled to vote, and forms of proxy, to be filled up if desired, will be found endorsed on the back of the voucher for admission.

Dated Vienna, 23rd April, 1871.—By order of the General Council of the Anglo-Austrian Bank.

BANK OF NEW ZEALAND.

Bankers to the General Government of New Zealand, the Provincial Governments of Auckland, Wellington, Otago, &c.

This Bank grants Drafts on any of the above-named places and transacts every description of Banking business connected with New Zealand, on the most favourable terms.

The London Office receives deposits at interest for fixed periods, on terms which may be learned on application.

F. LARKWORTHY, Managing Director.

No. 50 Old Broad street, London, E.C., Jan., 1871.

THE STANDARD LIFE ASSURANCE COMPANY.

Established 1825. *Constituted by Special Acts of Parliament.*

ANNUAL REPORT, 1871.

The FORTY-FIFTH ANNUAL GENERAL MEETING of the Standard Life Assurance Company, was held at Edinburgh, on Thursday, the 20th April, 1871,

H. MAXWELL INGLIS, ESQ., P.C.S., in the Chair.

The Manager submitted to the Meeting the Annual Report by the Directors as to the progress of the business. He also submitted—

The Annual Report on the books and accounts by the Auditor of the Company, certifying that he had found the whole accounts accurately stated and properly vouched.

Balance Sheet of the Company's affairs, certified by the Auditor and three of the Directors, in accordance with the Acts of Parliament constituting the Company.

A general and comparative statement explanatory of the progress of the business from 1825 to 1870.

The following results were communicated in the Report:—	£	s	d
Amount proposed for assurance during the year 1870 (2,383 proposals)	1,198,689	3	10
Amount of assurances accepted during the year 1870 (1,936 Policies)	1,181,399	3	10
Annual Premiums on New Policies	42,725	14	8
Claims by Death during the year, exclusive of Bonus Additions	333,605	16	4
The Subsisting Assurances at 15th November, 1870, amounted to	16,691,088	19	2
(Of which £970,269 1s was re-assured with other offices.)			

The Auditor's Report was as follows:—

"Having from time to time during the year examined the books and transactions at the Company's Head Offices in Edinburgh, from 15th November, 1869, to 15th November, 1870, I have to report that the whole continue to be distinctly and accurately stated and vouched.

"The chief matters embraced in the Audit were—an examination of the entries in the Cash Books and Journals, and a comparison of these with the relative Vouchers, including the Bank of Scotland and Royal Bank Pass Books, the books in which the remittances from the agents of the Company at home and abroad are recorded; the examination of the accounts rendered by the agents, and tracing the remittances from them into the Cash and Remittance Books; the examination of discharges of emerged and surrendered policies and bonuses, the vouchers of loans made during the year, and tracing the interests due upon existing loans into the Cash Books and Journals.

"Separate Audits of the books kept at the London and Dublin Offices are made annually by Officials from the Head Office; but the Accounts and Vouchers of the London and Dublin Offices as rendered quarterly are laid before the Auditor in Edinburgh.

"The Policy Reconcilements giving effect to the alterations during the year in the different Classes of Assurance, the combined results shewing the amount of Policies in force, and the corresponding Premiums have also been examined by me and found correct.

"The Balance Sheets of the Principal Ledgers, as at 15th November, 1870, have been examined, and the entries therein compared with the Accounts in the Ledgers and found to agree, and the Balance Sheets have been certified by me accordingly."

Humbly reported by
CHARLES PEARSON, Chartered Accountant, Auditor.

Edinburgh, 14th April, 1871.

The Chairman requested particular attention to the Report submitted by the Directors, which was then read, and from which the following is an extract:—

"On the present occasion the Board of Directors have not only to give an account of their proceedings during the last financial year of the Company's progress, but during the quinquennial period, which closed on the 15th November, 1870.

"The Directors have now much satisfaction in reporting that each year of the quinquennial period has been attended by that steady and satisfactory progress which has for so long a period marked the operations of the Company. They did indeed, at one time, contemplate that their advancement might be checked: first, by the monetary disturbances in 1866, and latterly by the financial difficulties of various English Assurance Offices, which had given rise to distrust and doubt; but it will be observed from the following table, showing the business transacted during the five years, that the Company has pursued the calm and even tenor of its way, without being in any degree affected by these disturbing elements.

"NEW ASSURANCES EFFECTED from 15th November, 1865, to 15th November, 1870:—

	£	s	d
"To 15th November, 1866	1,190,281	11	2
— — 1867	1,127,520	10	0
— — 1868	1,104,264	19	6
— — 1869	1,110,347	2	9
— — 1870	1,181,309	3	10
"Total in five years	5,713,813	7	3

"Giving an annual average of new business during the period of £1,142,762 15s 5d, the first and last years of the period being above the average.

"While the Directors direct attention to these results, as indicative of the industry with which the business has been pursued, they would also claim credit for the exercise of a sound discretion in the selection of lives, the proposals made to the Company during the period referred to, and from which these assurances were selected, amounting to no less than £7,151,170 16s 5d, contained in 11,221 proposals, of which 9,190 were accepted, represented by the total of £5,713,813 7s 3d shown above.

"The Company has thus, it must be admitted, been eminently successful in obtaining new business, evincing the esteem in which it is held by the public; but a report of this nature would be very incomplete were prominence not given to the exits as well as the entrances. Death has claimed its usual percentage of the living, and the Company has fulfilled the object of its institution by meeting with promptness the claims which were thus made upon its funds.

"The deaths during the quinquennial period gave rise to the following claims:—

Claims.	Sums Assured. £	s	d	Bonus Additions. £	s	d
1866	314,376	3	10	48,693	4	8
1867	308,561	13	6	46,190	13	0
1868	315,070	15	6	46,598	17	1
1869	322,117	11	8	36,649	10	10
1870	333,605	16	4	42,343	16	1
	1,591,732	0	10	220,476	1	8

"In transacting all this business, the Directors have, to the best of their ability discharged the responsible duties devolved on them. It can well be imagined that in the acquisition of so much new business, in the dealings with so many accumulated transactions, and in the settlement of such a large amount of claims, questions of importance, requiring the exercise of care, judgment, discretion, and liberality, have presented themselves, and probably the best guage of the success which has attended the management in these respects is that so little has been heard of the Company as it pursued its way. The Directors may at another time refer to the advanced position which this Company has always taken up in liberalising the conditions of the Assurance Contract which has greatly facilitated all these proceedings, but at present they will confine themselves to the simple duty of reporting progress.

"The most important matter which has presented itself in connection with Life Assurance generally during the last five years, is the passing of an Act in last Session of Parliament, regulating Assurance Companies in various ways, and requiring certain annual and periodical returns. The Company have complied with the Act by furnishing on the present occasion two Schedules, one designed a Revenue Account, and the other a Balance Sheet. Both of these documents, which have to be delivered to the Board of Trade, are now submitted, and copies may be obtained at the Office. Other returns more particularly connected with the investigation of the Company's affairs also require to be made periodically in the same way, and will be prepared in due time. The Directors hope the object of Parliament in requiring these Returns, namely, to afford a more efficient check upon the progress and position of Companies doing Life Assurance business, will be fully realised; but the machinery seems to some extent cumbrous and inartistic. The trouble which these Returns will give in an institution of the extent of the Standard cannot be over-stated, but nevertheless this Company will comply with the Act to the fullest extent.

"The Directors have only further on this occasion to refer to the Investigation with reference to the Eighth Division of Profits, now in progress. They are happy to state that the laborious calculations necessary to ascertain the Company's position, have very nearly been completed, but the results have not yet been placed before them by the Actuary, so that they can make no statement on the subject, but they are glad to have it in their power to state that a few weeks hence the whole will be reported in the most complete manner. These remarks apply to the actuarial results, which show the liabilities of the Company. The investigation of the other side of the account, namely, the Assets, has already been completed, and a most satisfactory report made by a Committee of Directors, who have examined each security and each document constituting it.

"Before concluding, the Directors would fail in their duty to the Company and to themselves were they to omit to mention in their report, and to ask you to join them in recording on their minutes, the expression of deep regret at the loss which all interested in the Institution, as well as many beyond it, have sustained since last meeting in the lamented death of Mr George Moir. His long-continued interest in the Standard, and the valuable services he rendered to it, should be indelibly marked in its records. Those who were associated with him in the Direction know how much his wise counsel and prudent advice have benefited the Institution, while his ready and willing co-operation materially advanced its progress. To adequately fill the vacant chair will be impossible, as accomplishments such as his are rarely found combined with so much practical good sense and business talent.

"The Company have also, within the same period, sustained the loss of a kind friend and supporter in the person of Sir James Y. Simpson, Bart., the learned physician of world-wide fame. The Directors regret on many and various grounds the early death of so great a man."

The Report was unanimously approved of, and, after the election of new Directors and a vote of thanks to the office-bearers, the meeting separated.

By order of the Directors,
WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, General Secretary for England.

London	82 King William street, E.C.; and 3 Pall Mall East, S.W.
Edinburgh	3 and 5 George street (Head Office).

TEMPORARY OFFICES—ST CLEMENT'S HOUSE, 27 CLEMENT'S LANE, E.C.

ABRIDGED PROSPECTUS.

The great change which has been effected in the conduct of mercantile business, consequent upon the opening of the Suez Canal, affords numerous and varied calls for the establishment of a well-organised Marine Insurance Company.

The trade with the East is now carried to a very considerable extent through the Suez Canal, and it is generally admitted that steamers adapted for the conveyance of very large cargoes will in future be, almost exclusively, employed in the trade. The value of the cargoes of such steamers will so greatly exceed those of sailing vessels, that, without affecting the interests of existing Institutions, there will remain ample field for the operations of this Company.

It is well known that Marine Insurance, when properly conducted, has always been extremely profitable. **The first step of the Directors will be to secure the assistance as Underwriter of a gentleman of ample experience and extensive connections, to whom the management of the Company's business may be safely entrusted.**

During each year it is proposed to pay the shareholders half-yearly, upon their paid-up capital, interest at the rate of 5 per cent. per annum, and as soon as practicable, after the expiration of each year, a profit and loss account will be made up, showing the results of the business, and particulars being made for all outstanding risks.

One of the profits will be paid an additional 5 per cent. on the sum paid on account, making with the interest to be paid, as explained in the next paragraph, 10 per cent. to the shareholders.

Before any further division of profits takes place amongst the shareholders, one-fourth, say 25 per cent., of the residue, will be rateably divided amongst those insurers out of whose business profits have been made during the year.

The following statement shows the progress of some of the Marine Insurance Companies recently established :—

British and Foreign Marine (£2 paid originally, to which £2 have been added out of profits, making)	£4 paid...Price	£8	0 0
Commercial Union	5 „ ... „	9	0 0
London Provincial Marine	2 „ ... „	3	0 0
Ocean Marine	5 „ ... „	18	10 0
Thames and Mersey	2 „ ... „	5	15 0
Thetis	5 „ ... „	9	0 0
Union Marine	5 „ ... „	9	10 0
Universal Marine	5 „ ... „	11	5 0

Full Prospectuses, with Forms of Application for shares may be had at the Temporary Offices of the Company, 27 Clement's lane, E.C., and at the Bankers' and Solicitors'.

Should no Allotment of Shares be made, the deposit money will be returned in full to the Applicant.

April 20th, 1871.

TO BE ISSUED AT £92.

TRUSTEES.

The Right Hon. LORD WESTBURY.
LORD EUSTACE CECIL, M.P.
GEORGE WODEHOUSE CURRIE, Esq.
G. M. W. SANDFORD, Esq.
PHILIP ROSE, Esq.

The success of the above Trust, which was formed in May, 1868, having called for an extension of this mode of investment, it has been determined to offer for public subscription a further issue to the extent of £1,000,000.

The principle of the Trust, which is now well understood, is to give to the Investor of moderate means the same advantages as the large capitalist, in diminishing the risk of investing in Foreign and Colonial Government Stocks by spreading the investment over a number of different stocks, and reserving a portion of the extra interest and the amounts received in redemption as a sinking fund to pay off the original capital; and, in addition, to give to each subscriber a *pro ratâ* participation in the ultimate reversion in these different stocks, which will remain when the return of the original capital has by these means been accomplished.

A capitalist who twenty or thirty years ago had invested, say £1,000,000, in ten or twelve such stocks, prudently selected, would, on the above plan, not only have received a high rate of interest, but by this time have had nearly the whole of his original capital returned by the action of the drawings and sinking fund, and still have held a great part of his stocks for nothing.

The results of the Foreign and Colonial Government Trust have been as follows:—

The investors in the original issue have received 7 per cent. per annum for the last three years, and 370 certificates have been drawn and paid off with £15 per £100 bonus; and the 6 per cent. certificates, which were issued at £85, are now quoted about £101, or at £16 premium.

The second issue was made in March, 1870, in 5 per cent certificates, issued at 80, and therefore bearing interest at the rate of 6¼ per cent. per annum, and it now stands about £90, or at £10 premium.

By a judicious selection of Foreign Stocks of a character similar to those held for the first two issues, which the Trustees with their experience of the other issues are now better able to make, the present issue can be made at the price of 92 for a 6 per cent. certificate, yielding the investor upwards of £6½ per cent. per annum, with the additional advantages of the drawings and reversion, thus making the price of the present issue much cheaper than the market price of either of the two previous issues.

In other respects this issue, though forming a distinct and separate Trust, will be precisely similar in character to the former issues. The Trustees and management will be the same; the Stocks will be of a similar though somewhat extended class, viz., Stocks or obligations of Foreign or Colonial Governments, States, or Municipalities, or the shares and obligations of Foreign Railways or other undertakings having the guarantee of a Foreign or Provincial Government or Municipal Authority; and no more than one-tenth of the amount subscribed will be invested in any one Stock or security. The prices and amounts of each Stock purchased will be specified in the schedule to the Trust Deed, which will be signed by the Trustees as soon as the Stocks are delivered.

For each £92 of the total amount subscribed will be issued a certificate of £100 with coupons attached, bearing £6 per cent. interest, payable at the banking-house of Messrs Glyn, Mills, Currie, and Co., half-yearly, on the 15th of April and the 15th of October, the first half-yearly coupon falling due on the 15th of October next.

The annual receipts by the Trustees will be first applied, after deducting the limited amount of expenses, in paying the interest upon the certificates. The excess will be applied as a sinking fund in repaying the certificates at par by annual drawings, to be made in presence of a Notary Public.

The Trust of the third issue will last for twenty-five years, at the expiration of which time it is estimated that a large proportion of the certificates will in all probability have been paid off, and that a considerable amount of Stocks will still remain for distribution as a reversion; accordingly the Trust will be wound up as soon as all the certificates have been drawn, or at the end of twenty-five years, whichever shall first happen, the remaining Stocks being then sold, and any certificates not previously drawn being first paid off, after which the balance will form the reversion to be distributed *pro ratâ*.

In addition to the interest coupons, a coupon, representing the share accruing to the Certificate-holder in the above reversion, will be attached to each certificate. This coupon of reversion will be retained by the holder when his certificate is drawn, and entitle him to a *pro ratâ* division of the ultimate reversion.

The advantages of the investment may be summed up as follows:—

1. Interest at £6 10s 5d per cent. on the amount subscribed.
2. A bonus of £8 per cent. by the repayment of capital at par.
3. A reversion, eventually divisible among the holders of the Coupons of Reversion.

If from any circumstances the dividends and drawings received in any year should be insufficient to pay the full amount of interest on the certificates, the deficiency will form a first charge upon the subsequent receipts, subject only to the annual expenses.

In order to fix the amount of preliminary expenses, a contract has been entered into by which every expense is guaranteed, including advertisements, ad valorem and other stamps, legal and all other expenses, and the cost of purchasing the stocks, at a commission of £1½ per cent. on the nominal amount of stocks purchased.

The expenses of management of the Trust are limited to a sum not exceeding £2,500 per annum. No other expenses can be undertaken without the assent of the Certificate-holders' Committee.

As soon as possible after the subscription has been closed, a General Meeting of the Certificate-holders will be convened for the purpose of appointing a Committee in terms of the Trust Deed.

If the subscriptions do not amount to £500,000, or in cases where no allotment is made, the deposits will be returned without deduction, and where the certificates allotted are less than the number applied for, the surplus deposits will be credited towards the allotment.

Application to be made in the annexed form, and payments as follows:—

	£
On application	10
On allotment	20
15th June	62
	92

Subscribers may anticipate their payments on the days when any of the instalments fall due, being allowed a discount at the rate of £4 per cent. per annum.

The certificates with interest Coupons, and also the Coupons of reversion attached, will be issued immediately after payment of the final instalment.

A draft of the Trust Deed, together with forms of the certificates and the contract as to the expenses, may be seen at the Offices of the Foreign and Colonial Government Trust, No. 6 Victoria street, Westminster, and prospectus and forms of application may be obtained of W. B. Rose, Esq., Secretary, and of Messrs Baxter, Rose, Norton, and Co., Solicitors, at the same address, and of Messrs Glyn, Mills, Currie, and Co., Bankers, 67 Lombard street, where all subscriptions must be paid.

April 26th, 1871.

FOREIGN AND COLONIAL GOVERNMENT TRUST.

(THIRD ISSUE.)

To the Trustees of the Fund (care of Messrs Baxter, Rose, Norton, and Co., 6 Victoria street, Westminster, London).

Having paid to Messrs Glyn and Co., to the account of the Foreign and Colonial Government Trust (Third Issue), the sum of £ as a deposit on certificates of £100 each in the said Trust, upon the terms of the prospectus dated 26th April, 1871, I request you to allot to me that number of certificates, and I engage to pay the further instalments upon that or any lesser number that you may allot to me as the same shall become due, in default of which my previous payments will be liable to forfeiture.

A Supplement, *containing the Reports of the Joint Stock Banks of the United Kingdom, similar to that published on the 15th of October, 1870, will be published by the* Economist *on the 20th of May.*

To Advertisers.—*To insure insertion for this important number, advertisements should be sent not later than midday, Friday, the 19th inst.*

On April 29 was Published, No. IV., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for April, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies, New Companies and New Capital. Prices made up to April 26.

Advertisements for next Number, to be published on May 27, must be sent to insure insertion on or before May 25.

OFFICE—346 Strand.

THE MONEY MARKET.

The valuable comparative returns of the Clearing-house, which we publish elsewhere, show a great increase in the business of the country. The Clearing-house year begins on April 30, when four years ago, at the instance of Sir John Lubbock, the returns were first published; and the aggregate clearing for the year ending April 30, 1871, is greater than for the year ending—

	£	
April 30, 1870,	by 297,841,000,	or 8 per cent.
— 1869,	by 484,425,000,	or 14 —
— 1868,	by 761,053,000,	or 23 —

So great an increase of trade might well be thought likely to augment the value of money; yet, as is well known, the value of money was hardly ever lower. And the wonder is greater, because our imports show a great increase—a very large amount of valuable commodities having been diverted from the continent to this country. Not only are we doing a large business, but we are holding a larger stock than formerly. Why, then, has not the value of money risen or even tended to rise? The reply is that three causes have combined to prevent it.

First,—not only have goods been transmitted to this country which would otherwise have gone to France, but money from France has been sent here also for safe custody. Mr Lowe held out to us, as a future ideal state to be obtained by increased military defences, that England should be thought the most secure place for wealth and capital in the world. But this reputation we already enjoy. A very large amount of foreign capital is now in London, and it might be justly said that by transmitting it foreigners are enabling us to do the business which ordinarily they would do, and hold the goods which in more usual circumstances they would have held. This is no doubt the principal cause why the value of money continues so very low.

Secondly,—what under other circumstances would have been a cause of great importance, the great fall in the value of cotton has rendered it possible to carry on our largest industry with much less capital than formerly. The price of cotton has fallen as follows:—

	Price, April 28, 1871.		Price, April 29, 1869.		Price, April, 1868.
	d		d		d
Upland—Ordinary	6	.....	11¼	.....	...
Middling	7¼	.....	11⅝	.....	12⅜
Mobile—Ordinary	6	.....	11¼	.....	...
Middling	7 1/16	.....	12	.....	12¾
New Orleans—Ordinary	6	.....	11⅜	.....	...
Middling	7½	.....	12⅝	.....	12⅞
Pernambuco—Fair	7⅜	.....	12¼	.....	12⅞
Good	8	.....	12¾	.....	13⅛
Surat—Fair	5⅛	.....	9¼	.....	10⅜
Dhollerah—Fair	5	.....	10	.....	10⅛
Good	6¼	.....	10¼	.....	...

—a diminution all round, as compared with the prices two or three years since, of from 40 to 50 per cent. And this has affected also the competing sorts of clothing. A much less capital is now required to clothe mankind than was needed three or even two years ago, and in consequence the clothing trade—the most necessary and important trade after the food trade—makes much less demand than formerly on the money market.

Thirdly,—America is sending us now bullion to an extent which she has not nearly equalled since 1862. Of course this is the natural course of events. America is a great gold-mining country, and she ought also to be a great gold-exporting country. For some years the peculiar course of events,

both during and after the civil war, interfered with this, but now the trade is returning to its common channel. The figures are—

IMPORTS OF GOLD AND SILVER FROM UNITED STATES.

	Month Ended 31st March.	Three Months Ended 31st March.
	£	£
1869	39,543	553,609
1870	140,357	588,892
1871	1,392,132	2,613,587

There is also an increase in the gold imports from other countries. And this increase in the receipt of gold from America and elsewhere is one main cause of the accumulation of bullion in the Bank of England, and of the consequent reduction in the value of money in Lombard street.

THE ABSOLUTE NECESSITY THAT THE STATE AS A BANKER SHOULD PUBLISH A FREQUENT AND INTELLIGIBLE BANKING ACCOUNT.

As we have been often informed in Parliament this week, the English Government is a great banker. In right of the Savings' Banks, it holds above 50,000,000*l* of other people's money; by means of the Chancery Funds Bill, it is endeavouring to obtain the command of nearly another 60,000,000*l*. And as we last week explained, great good to the nation may be so obtained. The money of the poor in the Savings' Banks, the money of the suitors in the Courts, may be made great use of; and as the nation has undertaken the charge and incurs the responsibility of repaying these funds, it has the right to employ them in the manner most profitable to itself, always providing that it does not impair its own power of performing its duties as a trustee—of repaying the fund in question when called on.

But if the State becomes a great banker, it should, like other great bankers, publish frequent and clear accounts. The Bank of England has not nearly so much of other people's money as the English Government has now. The public and private deposits of the Bank of England together are only 28,000,000*l*; the deposits in Savings' Banks of both kinds are 51,000,000*l*. As the Bank of England publishes weekly accounts, why should not the State bank publish weekly accounts also? The debate of this week shows the great advantage which such a publication would give us. Mr Gladstone told us that the National Debt Commissioners were aiding to disestablish the Irish Church, and were helping Mr Forster to build new schools. Mr Gladstone said that without these banking funds they could hardly have helped the Irish Church, even in a manner tolerably satisfactory, and hinted that without them the borrowing schools would have had to pay a much higher rate of interest. But we should like to see the account of these benevolent loans. We should like to see it proved that they were good banking security. We regard with great fear and apprehension the notion that the State, as a banker, should help religious bodies, and promote philanthropic objects. Any other banker would be ruined if he did so. Still we do not say these loans are wrong — only let us see the banking accounts, and judge how it all stands.

Secondly,—if such an account were published constantly, we should be familiar with the Consols and the terminable annuities held by the State as bankers. Great authorities have this week contended that the terminable annuities, which were once Consols, could not be changed back into Consols without impairing the State's credit as a banker. We own we do not believe this. We believe its banking credit would be as good after as before the change. Consols are more valuable than annuities, and so far are better banking securities. But if the accounts were published weekly, like the accounts of the Bank of England, their meaning and effect would be no more dubious than the accounts of the Bank. They would be discussed and canvassed, and everyone would understand all about them. We should not then have a sudden controversy on the securities in which Government should invest. The public mind would soon have a distinct, reasonable, and proved opinion as to the management of the National Bank, as it has as to the management of other banks. At present everything relating to the "National Debt Commissioners" is to the popular mind a puzzle and, as some one said, a "hocus pocus;" but all dealings with the public money ought to be plain, simple, and well known.

THE STRONG POINT OF THE MINISTRY.

It is quite evident, from the discussions on the Budget, from the division of Thursday, and from the tone of the debate on both Thursday and Monday, that the Government is protected by some influence other than its popularity within the House of Commons. That popularity is indeed for the moment in abeyance. It never was so great within the House as within the constituencies; and now that the Government has made a mistake, or is supposed to have made a mistake, which the constituencies understand, many reluctant supporters feel enfranchised, and mutiny breaks out in all directions. The extreme dislike of a section of the Liberals to the heavy estimates of the year is shared by their electors, and is adroitly turned to use by the very party which has steadily recommended heavier expenditure on military preparations. At the same time, so small is the affection felt for the Cabinet that its own supporters are not unwilling to see it censured; and what with desertions and abstentions, a hostile vote is possible, as far as the temper of the House is concerned, on any evening. Still this hostile vote does not come, and probably will not come; and it is clear that the Government is protected by the difficulty, for the moment the insuperable difficulty, of finding any alternative. Neither of the two parties which oppose it can produce a Ministry, and in this country the condition of overthrowing one Government is ability to produce another. The ultra-Radicals, it is admitted, cannot do this. Although exercising considerable power in the State, they have among them few men who pretend to the rank of Ministers, and no one whom the constituencies would tolerate as Premier. They have no support in the Lords, and none in the upper classes; and they are, for the time at all events, without any man who by sheer ability could enable them to dispense with such support. They have not even a great demagogue, not one man who has ever held superior office, and not one with anything approaching Mr Bright's power over the masses of the people. The country party, still half the House, dreads and detests them, while they have accidentally linked themselves far too exclusively with the Nonconformists.

The ultra-Radicals are out of the question; and though for very different reasons, so are the regular Conservatives. That party has plenty of men competent to administer the State, and at least three, any one of whom the country would accept as head of Her Majesty's Government without any start of surprise. Moreover its apparent weakness in numerical strength, though in one way real, is in another way exceedingly deceptive. Englishmen have many strongly conservative instincts, especially upon those questions of property, which, as many observers think, the present policy of the Cabinet tends to raise. They are very apt when unexcited to be led by their upper classes, and the upper classes are annoyed, or perhaps we should say worried, by many measures of the Administration. A dissolution would not give them a party majority, but it might very well give them a House in which a majority was exceedingly disinclined to turn them out before they had had a fair trial before the country. Sir Robert Peel under the circumstances might, possibly have taken office, but the difficulty of the Conservatives is that they have in the House of Commons no man of that type, no man who, while representing the genuine Conservatism of the country, can head a powerful Ministry against a more powerful Opposition. Mr Gathorne Hardy, though he fulfils the first function, is not equal to the second; nor if he were, could he take the leadership out of the hands of Mr Disraeli. The member for Bucks, by virtue of his oratory, his history and—what is sometimes forgotten—his extraordinary tact in dealing with the House of Commons, is the necessary man of the party, which nevertheless find in him the greatest obstacle in its way. It does not trust him. Many of its representatives still resent his desertion of the suffrage, many more are irritated by his apathy about purchase, and many, including some very prominent statesmen, stand pledged in honour not to serve under his banner. The feeling roughly expressed at the last meeting of the Central Chamber of Agriculture—that after all it is not worth while to overset a Government in order to bring in Mr Disraeli—very diffused, and for the time acts as a shield to a Ministry to whom he would be the inevitable successor. Mr Gladstone, when badgered to death, has only to say he will resign; and his followers, content or annoyed, are compelled to close up their ranks and support him in his place, thus acknowledging

that to him there is no alternative. Nor is there. The Conservative party cannot expel Mr Disraeli, unless they can also deprive him of his seat; and with Mr Disraeli at its head, the Conservative party, in its present condition of opinion, cannot be really strong.

There remains of course the chance that a third party, composed of all Conservatives but Mr Disraeli, and of a great many old Whigs, may take the helm; and no doubt such a party might be formed under Lord Derby, so as to include a great many competent statesmen. It would be very gladly welcomed by the upper classes, and might display very considerable administrative resource, but it would almost to a certainty be deficient in following. It could not carry the boroughs, and it would always be ruinously weak upon those semi-ecclesiastical questions which in this country influence so many votes. It would incur the unbending hostility of the Nonconformists, would be disliked and distrusted by the mass of voters, and would have constantly to irritate its true supporters by giving way to the Radicals upon questions of principle. It could only be a tolerated Government, and the country is as yet far from so angry with the Ministry as to be willing to put up with an interregnum. It prefers to hope that Mr Gladstone will be induced to go the way which it desires, or rather to avoid the course of which, in some half-conscious irritable way, it is inclined to think that it disapproves. As Mr Gladstone will probably take the hint and suspend action for a time in many directions, there is, we are sure, little danger that he will as yet be overthrown, though much that his hands may be too fettered for the good of the country.

THE BUSINESS OF THE HOUSE OF COMMONS.

We want two, three, or four Houses to get through the work of this one House of Commons. That is the conclusion of Sir Erskine May, the able and experienced Clerk of the House, a man who knows its ways, and its capacities, and its wants perhaps better than any one living, and we cannot but think there is a measure of practical meaning in his suggestion. The business of the House has enormously increased of late years. It attends much more sedulously to many more questions, it takes more interest in them, it discusses them more carefully, and in all ways it consumes more time. At the same time it has not obtained, and it cannot obtain, much more time to consume. All suggestions to that end may be set down as impracticable. The House, dependent as it is on officials, and lawyers, and men of business for information, cannot establish a regular system of morning sittings, which neither officials, nor lawyers, nor men of business could possibly attend. Neither will it abolish the Wednesday and Saturday holidays. Members want to dine out and attend to matters outside the business of Government; and it is most expedient that they should mix with society not directly political, and feel the pressure of other ideas and less peremptory interests. Members of Congress say that at Washington they grow stupified with politics. The notion that the House might sit on Sundays to discuss ecclesiastical affairs only is of course, in a country like this, only a forced joke. And the suggestion that it should always meet for an autumn Session, though it has found some favour with the Committee appointed to consider the question, is little likely to be accepted by the House in general. Ministers do not like it. When the House is sitting they are very severely worked, more severely than professional men in full practice,—that is to say, they are engaged in severe mental labour from 11 a.m. till 2 a.m. of the following day—fifteen hours, with only the briefest intervals for food and rest. Six months in the year of that kind of toil is quite enough for men who cannot be young, or unusually active, or unusually able-bodied, and whose daily work subjects them to daily and most pungent criticism. They will never willingly increase it by six weeks of extra attendance in the House; nor will the squires, who want to be hunting; nor will the professional men who want to be earning money; nor will the business men, who want to be attending to their own affairs down in their own localities. No change of such importance could be passed in spite of all these classes; and if it were passed, it would greatly increase the influence of the candidates, already too numerous, who are politicians and nothing else, whose business is to be politicians, and who would be willing to sit all the year if that would increase their influence or their security.

More time cannot be obtained, and we greatly doubt if business can be greatly decreased. Giving up work means in the House of Commons giving up power, and no representative body ever voluntarily surrenders power. It would be possible, there is no doubt, to limit the opportunities of debate, which are at present excessive, and the introduction of oral instead of written notices of motion—an empty form, which wastes half-an-hour a day—might be abandoned; but the change would only give more members more time to make more speeches, and the general progress of business would not be advanced. To any form of *la clôture* the House is invincibly opposed, and it is extremely doubtful if that system, unless pressed to a point fatal to free debate, tends greatly to limit oratory. Its result is rather, in many places, to tempt people to speak who otherwise would be silent, who have very little to say, and who say that little rather to their constituencies than the House. Of course if the House were prepared for exceedingly radical changes, great reductions of business might be effected; but then it is not prepared. Whole departments of business might be transferred to the Lords—all Indian business, for example; and the private Bill legislation might be transferred to a special Joint Commission, or even to a Ministry; but members, not without reason, would be afraid of propositions so novel, so sweeping, and so likely to lead either to corruption, or to the suspicion that corruption had become powerful—a suspicion very nearly as injurious to a State as the reality. There is, we fear, but little hope of a great reduction in a mass of business which, as civilisation develops, must of necessity become heavier and heavier, and as democracy advances, must interest more members of the Legislature, seats depending more and more upon the apparent activity of their occupants.

There remains Sir Erskine May's suggestion, that the House of Commons should multiply itself by a recurrence to an ancient system of Grand Committees. Every one familiar with the proceedings of the House is aware that a great amount of its business is not transacted by the members as a body at all, but by those members who are interested in the business on the carpet, or who have special knowledge of its details. These members do the work, and the remainder either take their information from them, or interfere only when their constituencies, or the Government, or some political interests are affected. Sir Erskine May proposes to recognise this division of labour, which is most convenient, as it stops ill-informed people from speaking, and to carry out a system which he thus describes:—"If the Committee thought fit to "entertain the proposition, in any way, all the machinery "would be considered in detail. It occurred to me that the "best way of appointing those Committees, supposing there "were, say, six of them, would be to divide the House into six "panels of about 110 members each, and that this division "should be made by a Committee, like the General Committee "of Elections, and a report made to the House. The principal "divisions should be according to the nature of the subjects; "for instance, Bills with regard to trade would be referred to "a Committee constituted in great measure of members for "mercantile and manufacturing constituencies, and legal Bills "to a Committee mainly composed of lawyers and other gentle-"men who took an interest in cognate subjects." The Committee would discuss as a Committee of the whole House does, and when it had discussed, and as it were licked the proposal into shape, the resulting Bill or resolution would be submitted to the whole body for a single debate. Any member could guard the influence of his constituency by moving an amendment on the Report, and any important matter of detail could be improved in the same way. We should, in fact, for most of the actual work of Government, have six Houses of Commons, yet the single House would have ultimately an undivided and supreme control. The French Assembly is not controlled, though its action is greatly affected, by the influence of the Bureaux. That this change would enormously facilitate the despatch of business is we think clear, almost without argument—it is the method adopted with variations in most free Legislatures; and at present only three serious difficulties occur to us. Firstly, The change would make our Government rather too departmental. Ministers could not sit in six Committees at once, and the work would of course be divided; while members could only rise to be Ministers in the Committees which they habitually addressed. The departmental work would be better done,

but the general work might possibly be done worse. 2ndly. A great deal of Parliamentary work would be left unreported. Sir Erskine May provides that reporters may attend the Committees, and believes they would attend when the debates were of any interest. That is sound, but it is unfortunately the uninteresting debates which need publicity the most, because in them corruption is most possible, and no journal could or would attempt to report six Parliaments. Defective reporting is such an evil already that we believe Government will ultimately be driven to publish a *Moniteur* or *Congressional Globe*, containing nothing but shorthand reports, and even that would never reach the community as the condensed reports in the daily newspapers do. 3rd. We should anticipate some danger to the public interest in the discussion of those questions upon which public opinion or policy and the interest or knowledge of any class conflict, as for example on the question of Free Trade, or to take a smaller illustrations on legislation for the Cattle Plague. The country could hardly trust the Landlords' Committee to legislate on that, and if it did not in some degree trust it, the use of the Committee would become small, perhaps even it would be an embarrassment. There are, however, objections to every suggestion of improvement, while there is this to be said of Sir Erskine May's, that it would secure the end the House is desirous of securing. It would facilitate greatly the transaction of public business—and very few of the other suggestions offered to the Committee would.

THE WESTMEATH BILL.

The measure introduced by Lord Kimberley on Tuesday, to remedy the terrorism which has been shown to be prevalent in Westmeath, certainly does not go beyond what is reasonable in the way of preventive measures; and in some respects might be thought, if not exactly too mild, too much hampered by conditions which may impair the efficiency of its working, without really protecting any endangered liberty. The Government have taken power to suspend the Habeas Corpus Act in Westmeath, and in certain districts of Meath and of King's County, at the discretion of the Lord-Lieutenant, who is to give notice in the *Dublin Gazette* of the districts within which it is to be suspended, and this power is to last for two years. Beyond this the Government have taken power to apprehend in any part of Ireland, and detain without obtaining a committal, anyone suspected of any violent crime or of connivance at it who is known to have been "resident" in these prescribed districts at the time a crime was committed, or known to have been there resident at any time since the 1st of January, 1871, and anyone suspected to have been in the locality where the crime was committed at the time of its committal, or anyone suspected to be a member of the Ribbon Society, or of aiding it, and who has at any time since January 1, 1871, been a resident in any of the prescribed districts. This power covers the means by which the Irish Ribbonmen usually escape justice. For, on the one hand, suspected Ribbonmen fly after the commission of any crime into distant parts of Ireland; and, on the other hand, the violent crimes hatched by the Ribbon Society are very often actually committed by strangers summoned by correspondence from distant parts of Ireland expressly in order to commit them, and who are really unknown on the scene of the crime. Under the present Act, either resident Ribbonmen who have fled to other districts can be apprehended and detained without being committed for trial, or strangers from other parts of Ireland suspected of being present at the scene of a crime in any prescribed district, may be apprehended, even though they have not been residents in the neighbourhood. So that if the authorities really know, as they usually do—through information which cannot be produced, because it is only given on condition that it shall not be publicly demanded—who the delinquents are, in case of any violent crime, they can certainly arrest and detain them in prison for the whole period appointed by the Act, without the production of sworn evidence against them. We think with Lord Cairns that the requirements with regard to evidence of *residence* in prescribed districts are needlessly hampering, and that while you are taking strong powers you had much better take them so that no petty legal difficulties will arise in putting them into execution.

But a far more important question was, in fact, raised by Lord Salisbury, who hinted pretty distinctly that he would have taken power not only to arrest and detain without evidence for as long as the Act is to endure, but to pass sentence and execute the sentence passed, even though its period should extend beyond the time prescribed by the Act. And of course there is a good deal to be said from this view if you look only to the complete crushing of the Ribbon conspiracy in Westmeath and the adjoining counties. What the Government have done is practically to take power to suspend the action of the conspiracy for two years. Many of the witnesses believed that this would be sufficient—first, on the ground that a two years' break in it would accustom the people of Westmeath and the border counties to orderly and peaceable ways, and to break the spell of the Ribbonmen over their imaginations; next, on the ground that this very considerable interruption of their sway would encourage the oozing out of producible evidence against them on which it would be possible to try and convict them by the ordinary criminal law. On the other hand, it must be admitted that if these hopes fail the release of the Ribbonmen at the end of two years may lead to the resumption of their present bad influence, and the collapse of all the provisional security to be established by the Act.

Still, we think the Government have acted perfectly wisely in not taking the tremendous and almost unexampled step suggested by Lord Salisbury of empowering the Lord-Lieutenant to pass final sentence on offenders who have had none of the advantages of a public trial at all. There are things even more important than the successful crushing of the Westmeath conspiracy,—for example, that the Irish people should not again be led to suspect the Government of cheating them into provisions fatal to all sense of liberty and self-respect in Ireland. Suppose one Irishman who was really innocent of this conspiracy and really popular in Ireland were wrongfully condemned to a life imprisonment under this act, a bitterer feeling might, and perhaps ought to be, roused in Ireland than any which the legislation of recent years has been directed to allay. The detention for two years of suspected persons, who are to be treated as "untried prisoners," might be resented in case of any mistake; but it would certainly not excite the deep and lasting resentment of a criminal sentence, passed without confronting the prisoner with the evidence against him, or giving him the advantage of a public trial. It is extremely doubtful whether such a remedy as Lord Salisbury hints at might not be worse than the disease. We must not forget that, as we pointed out in our last article, there is a good deal of evidence to show that Ribbonism is greatly on the wane in Ireland, even without any exceptional preventive measures, and that even in Westmeath it is far less active than it was from ten to twenty years ago, though it may have recovered a certain amount of activity in the last three years. There is no such violent necessity for an immediate remedy as would excuse any measure likely to excite new and legitimate political resentment in the rest of Ireland.

We hardly know why the Government have not taken power to arrest suspected Ribbonmen, who can be proved to have been recently in the prescribed districts, even in England or Scotland. We are told that on occasion of Acts like the one now before Parliament, the most dangerous characters in Ireland fly to Hull, Newcastle, Birmingham, or London, and thence direct their operations till the tyranny be overpast. If this be so, there does not seem to be any sound reason why they should not be arrested in other parts of the United Kingdom as well as in Ireland.

BUSINESS NOTES.

The Legal Tender Decisions in America.—We must defer to another week our comments on the telegram from New York, to the effect that the Supreme Court of the United States has upset its former decision, and now declares that the Acts of Congress fixing paper as a legal tender, not only as respects new contracts, but as respects contracts made previously, were constitutional. Such a decision is obviously a most important one, enlarging as it does the powers of Congress in currency matters as hitherto understood, and affecting at present the question of the return to specie payments. We should prefer having the opinions of the judges in full before us before remarking on the issues involved. In the meantime, we can only deplore, as we did by anticipation, the unfortunate means by which the decision has been arrived at.

The Supreme Court is now in this position, that a judgment given a twelvemonth ago is set at nought mainly by the votes of newly-appointed judges, who are suspected of having been appointed for their leanings on this particular question. Even apart from this great aggravation, however, there is scandal enough in the judgment. A Court of final appeal, the moment it goes back on its own judgments, clearly unsettles the whole foundations of law. There is no longer a final authority anywhere, and though the temptation to give contradictory judgments may only be yielded to by the Court in great matters, yet the security of the whole law is shaken, and the mischief in these great matters may be immense. After this precedent the Executive in the United States will be sure to think no judgment final which thwarts its policy: appointments will be made for political ends, and the judges will be assailed by party pleadings, to which they will have no proper answer. The mischief in the United States will be especially great, on account of the singularly high powers reserved to the Supreme Court by the Constitution, and the limited powers of all the Legislatures. There is nothing to modify the opinions of the Supreme Court except the cumbrous instrument of a constitutional amendment.

The Oldham Lock-out.—No sooner is Lancashire once more fairly prosperous than we hear of strikes and lock-outs. The workmen, as they are perfectly justified in doing, combine to sell their labour as dearly as they can to employers who are making large profits, building new mills, and competing for hands. But, as usual, the instrument of combination is used extravagantly, and matters are pushed to extremities—which are very serious indeed to the workmen—in disputes which to outsiders are utterly trivial compared with the employment at good wages which the workmen risk. The cause of the difficulty at Oldham is simply about "one hour" per week. The workmen asked a reduction of two hours from their weekly period of labour, and the employers, after some demur, agreed to give one—the lock-out being entirely occasioned by the perseverance of the workmen in their demand for the reduction of the other hour. Now whatever be the merits of the dispute—and we should not be surprised if the workmen carry their point in the present state of the trade—it certainly seems foolish in the extreme for them to risk their living entirely for the sake of getting the hour. It is obviously a wrong method. A week or two's idleness will cost them a great deal, while there is always a risk of their idleness continuing longer, and the reduced hour will after all be at the mercy of the first slackness in the trade which may occur. All the while it is quite certain that if the circumstances of the trade justify an advance of wages, the employers will be compelled to yield without a strike. With many new mills starting, competition would infallibly raise the terms which employers are willing to give.

Co-operative Manufacture.—The dispute between the operatives and masters at Oldham, which we notice above, appears to have arisen from an impression among the men as to the large profits which the masters are now making, derived mainly from what is known as to the co-operative mills. We fear the knowledge is being perniciously used; but it is inevitable that as co-operation spreads the workmen, as a class, will be able to use in their negotiations with employers a knowledge which they did not before possess, and we can only hope that with experience they will both know more and use their knowledge more wisely. Anyone can see however how tempting to workmen will be the knowledge of a state of profits like the following, submitted by a correspondent of the *Manchester Examiner*:—

Wages paid to whole of work-people at Sun Mill, compared with Profits since 1866.

Three Months Ending.	Wages. £	Profit. £
March, 1867	2,871	...
June, —	2,817	2,564
Sept., —	2,508	1,312
Dec., —	3,095	1,404
March, 1868	3,207	3,745
June, —	3,226	3,037
Sept., —	3,856	804
Dec., —	3,507	547
March, 1869	3,879	555
June, —	3,592	1,405
Sept., —	3,570	1,080
Dec., —	3,625	2,472
March, 1870	3,532	2,322
June, —	3,475	3,513
Sept., —	4,213	4,064
Dec., —	3,869	3,814
March, 1871	3,597	3,730
Total	57,160	36,297

This is for a company which has a share capital of 50,000*l* and a loan capital of 47,000*l*, and shows that while profits have been earned in every quarter since 1866, except the first, the whole profit earned since that year, or in four years' time, is 72 per cent. upon the capital, the present annual rate is 30 per cent., and the amount of profit earned is equal to the whole amount of wages paid the workmen. From such knowledge as this therefore the workmen make the inference that for every shilling they earn the capitalist pockets a shilling, and they would like a larger share. The opposite considerations as to years of loss—this particular co-operative society it is stated had 15,000*l* against it in 1865—are not likely to strike the workmen, nor the fact that while some companies have profited others have lost more, one or two special cases of profit producing an exaggerated notion, nor the point as to whether anything but very large profits in some years will tempt capital into so speculative a trade. This knowledge however they ought also to learn in the long run, and co-operative societies may assist in teaching them.

The Progress of National Expenditure in the United Kingdom.—In the course of the Budget debate on Monday, one or two interesting remarks were made by Mr Stansfeld incidentally on a subject of no small historical importance. Contrary to the general impression about a rapid increase in our national expenditure and burdens, the fact is that the increase has been very small during the last twenty years. As regards only what is socially the most interesting part of our national expenditure—that on civil government—the increase is excedingly small indeed. "There had already," said Mr Stansfeld, "been laid on the table, and would shortly "be distributed, a return drawn up by an extremely able ac- "countant—Mr Mills, of the Treasury—which would show "that from 1853-4, a year so often taken as indicating the "economy which preceded the Crimean war, down to 1868-9, "the increase of expenditure for civil government, whether "charged to the Consolidated Fund or to the Civil Service "Estimates, was less than 3,000,000*l*." And as regards the increase of the whole expenditure, Mr Stansfeld stated in another part of his speech—"The real increase in the expen- "diture of the country in 1870-1 as compared with 1853-4, "making allowance in respect of transfers, miscellaneous "revenue, and so forth, was 5,500,000*l*." The return to which Mr Stansfeld refers will be a very important one, but it is curiously confirmed and anticipated by some of the figures furnished by Mr Goschen in his recent report. In order to state the proportion of Imperial taxation on real property to the entire taxation at various dates, Mr Goschen inquired with some minuteness what the amounts of revenue that could strictly be distinguished as taxation had been. The result is the following series of figures, which we extract from the Appendix to the Report* :—

	£
Imperial Taxation of the United Kingdom in 1826	55,825,000
— — 1843	54,208,000
— — 1851	54,485,000
— — 1861-62	65,234,000
— — 1868-69	65,394,000

—so that not only as compared with the year before the Crimean war, which is the year Mr Stansfeld selects, but as compared with a period of thirty years before that, the whole increase in the amount levied by taxation is exactly 10,000,000*l*. Considering that the wealth of the country has far more than doubled in the interval, and that the population has greatly increased, the result is singularly creditable to the management of our national finances. As Mr Goschen points out in his report, the corresponding fact in the history of the various European countries from which he had information is the very opposite. In France the increase of Imperial taxation between 1836 and 1867 was from 33,772,000*l* to 60,160,000*l*, or 26,388,000*l*; and in Belgium, Holland, and Prussia, where the total amounts dealt with are smaller, the increase is 69, 81, and 70 per cent. respectively, as compared with an increase of 17 per cent. in the United Kingdom. One conclusion from these figures may,

* Table XIII., Part III. Appendix A.

we think, be very safely drawn. To speak in the language of 1826 or 1843, of the "crushing taxation" of the country at the present time, when in fact the taxation has hardly increased at all, and the tax-paying capacity has been multiplied, is surely most inappropriate—all the more if we reflect how much more scientifically the smaller proportionate burden is now adjusted.

CLEARING-HOUSE STATISTICS.—The fourth year since the publication of the figures of the Clearing-house having now been completed, Sir John Lubbock has caused to be made up as usual an analysis of the statistics of the year as compared with previous years. It is as follows:—

	Total for the Year.	On 4ths of the Month.	On Stock-Exchange Account Days.	On Consols Settling Days.
	£	£	£	£
1867-1868	3,257,411,000	147,113,000	444,443,000	132,293,000
1868-1869	3,534,039,000	161,861,000	550,622,000	142,270,000
1869-1870	3,720,623,000	168,523,000	594,763,000	148,822,000
1870-1871	4,018,464,000	186,517,000	635,946,000	169,141,000

The total amount of bills, checks, &c., paid at the Clearing House during the year ended the 30th April, 1871, shows, therefore, an increase of 297,841,000*l* over 1870, and of 761,053,000*l* over 1868. The amounts passing through on the 4ths of the month for 1871 have amounted to 186,517,000*l*, showing an increase of 17,994,000*l* over 1870. The payments on Stock-Exchange account days form a sum of 635,946,000*l*, being an increase of 41,183,000*l* over 1870. The payments on Consols account days for the same period have amounted to 169,141,000*l*, giving an increase of 20,319,000*l* over 1870.

The increase in 1870-71 is thus as large in amount as in any previous year, and the business increase is proportionately large. In connection with this return, we may again notice the remarkable advance of the *recent* Clearing-house figures over those of the corresponding period of last year. In the beginning of 1871, as we noticed at the time, there was no increase—rather a falling off; but now the whole increase since the 4th of January, 1871, is 118,000,000*l*, or 9 per cent., which is about the average annual increase. The figures of last week, which we give elsewhere, are very remarkable—the increase being 16,744,000*l*, or about 19 per cent., caused by a regular increase of from 4,000,000*l* to 5,000,000*l* on each day of the week, except the last, when there is a slight decrease owing to the comparison being with a Consols settling day last year.

LIABILITY OF DISCHARGED BANKRUPTS FOR CALLS IN LIMITED COMPANIES—CONTRADICTORY JUDGMENTS.—The Court of Chancery and the Court of Exchequer appear this week to have given contradictory decisions in cases involving identical issues as to the liability of a discharged bankrupt for calls in a company of which he had been a member. The Chancery case was that of the Land Credit Company of Ireland (Limited)—McEwen's case—the question arising through an an attempt to include McEwen in the B list of contributories. It was pleaded, however, that though he had been a shareholder, yet the winding-up order was made before his bankruptcy, and that he was freed from all liability by his discharge under the bankruptcy. To this view the Lords Justices of Appeal adhered, remarking that a winding-up order "is the commencement of legal proceedings, in the course of which it "necessarily becomes the duty of the Court to determine the "liability of every alleged contributory of the company, and "the amount of such liability." They therefore dismissed the summons of the official liquidator, holding that his only claim was against the trustees of the bankrupt. So far, the Court of Chancery. The Exchequer case was that of the City Discount Company (Limited) *v.* Lloyd, in which also the claim was by an official liquidator for calls, the only difference being that the winding-up order was made during the currency of the bankruptcy and not before it, though the calls in question had been made shortly after the bankruptcy. Here the Court of Exchequer has decided that the bankrupt's discharge under the bankruptcy does not exonerate him, holding that the debt was not provable in bankruptcy. Such are the decisions, and their principles appear to us clearly inconsistent. The inconsistency perhaps arises through the original error as to the provability of such debts in bankruptcy; but in the one case as in the other, the liability was a contingent one at the date of the bankruptcy, and ought to have been considered equally provable.

THE PRINCIPALS OF DEFAULTING BROKERS.—By their decisions this week, in the cases of Duncan *v.* Hill, Duncan *v.* Benson, and Price *v.* Weston, which were all cases involving the settlement of accounts between brokers and their principals, the Court of Exchequer have made an important application of the doctrine that the rules of the Stock Exchange are imported into all contracts made there. In the first case, the largest in amount, the defendant had a balance of 1,689*l* against him on the 13th of last July, and wished his account to be closed; but this not having been done, the balance was increased to 4,000*l* on the 15th July, and finally to 6,032*l* at the time when the brokers were declared defaulters. It was contended for him that the contract was really between him and his broker only, and that the transactions having been closed without instructions from the principal he was not responsible. In the other two cases the facts for the defendants were even stronger, the broker having there received the amounts required for contango. The Court have however held distinctly that the rules of the Stock Exchange apply to these contracts between brokers and principals, and that the closing of the transactions having been ordered in accordance with these rules, the principals must pay accordingly. The law laid down in a former case has thus been confirmed, and it is certainly of no small importance to those who have speculative dealings on the Stock Exchange in difficult times.

POSTAGE BETWEEN ENGLAND AND AMERICA.—Mr Seely is to be congratulated on the partial success he has obtained in promoting his proposal for a postage rate of 1d between England and the United States, and also between England and English-speaking colonies. He did not succeed, it is true, in carrying the precise notion he proposed; but the assurance of Mr Gladstone that he considered the matter most important, and his assent to a modified resolution recommending the Government to enter into communication with the United States on the subject of a reduction of the rates of postage, are no small successes for the friends of postal reform. The case, as put by Mr Seely, is really a very strong one. The extension of facilities of intercourse between emigrants of all classes and their friends at home, and generally between all English-speaking countries, is in the highest degree desirable. Not only, it may be hoped, will good feeling and mutual knowledge be promoted, so as to make war more and more difficult between them; but as a matter of political education it is important that the members of any political community should share in wider interests than those which are exclusively their own, and it will be a pity if the facility for this education furnished by the co-existence of so many independent communities, all speaking the English language, and naturally connected closely by ties of kinship as well as business, is not fully taken advantage of. The political plea for increasing the facilities of intercourse among these nations, even at some cost, is thus a very strong one; and Mr Seely showed that the cost of his proposal, as compared with the existing arrangement, will be very small. Even assuming that there would be no increased correspondence, he said the cost for cheaper postage to and from the United States alone would be 31,700*l*, and for the colonies, 40,463*l*—making together 72,163*l*, which is surely a small price to pay for so many advantages, and would in all probability be only a temporary loss. The reply of the department that a loss is already incurred, to which the new arrangement suggested by Mr Seely would make an addition, is sufficiently met by the double rejoinder—(1) that if the postal service with America is to be kept up, though it does not pay, there is no use doing the thing by halves—the additional loss does not signify especially as the new advantages proposed to be gained are not less important than the old; and (2) that while the proposed additional loss will only be temporary, it is possible to work the service more economically, so that it may soon be established on a sound footing, with the prospect of a rapid increase in its receipts. If ever there was a Post Office service, where an exact balance between receipts and expenditure in that particular branch should not be too closely exacted, this service between England and English-speaking communities is one; and as there is a certainty of introducing greater economy in a year or two, and the new arrangement will supply a more progressive business, there is no use in delaying reform.

CHANCERY FUNDS BILL—*Erratum.*—In our last week's article on the Chancery Funds Bill, the intended saving of interest to the State on the 60,000,000*l* of Chancery money was unfortunately misprinted. It was stated to be 1½ per

cent., but the figure, as was obvious from the context, was 1¼ per cent., giving an accumulating annuity of 750,000*l* (not 725,000*l*, as printed) for the reduction of the Debt.

ON THE PRESENT STATE OF THE MONEY MARKET AND ITS PROBABLE FUTURE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—Many articles, some of them of great ability, have appeared in the newspapers on the subject which I now propose to discuss from a point of view, which has not, so far as I have remarked, obtained that attention which its importance deserves.

We have been told of the immense quantity of unemployed money in the London market, of the low rate of interest prevailing there, and of the difficulty of finding suitable investments as respects a reasonable annual return combined with security. We have been told also of the mode in which the contribution imposed on France can be transferred from London and Paris to Berlin, and of its probable employment when received there. But in most of the observations here referred to, money alone, that is to say, gold and silver coin or bullion, and their representatives, bills of exchange or credits, have been mainly regarded; and little or no attention has been paid to the great truth which underlies the question, and which must be thoroughly examined in its bearing on the subject if we are ever to arrive at a satisfactory result.

Now, interest is not ultimately paid for the use of money, but of capital—for the various commodities and services employed in production. One may imagine a high rate of interest with a great abundance of money, and a low rate of interest with but little of a circulating medium.

The Lancashire spinner who buys cotton does not really pay interest for the money which he borrows on the bill of exchange discounted with a banker, but to the importer of the raw article, which he converts into twist, for the use and wear and tear of his machinery, and for the food, clothing, and lodging which he furnishes to the workmen employed in his mill during the process of manufacture.

Again, the farmer who borrows in the county town a certain sum, required to make up his rent, really furnishes the articles consumed in his landlord's household, or for the means of support for his labourers, and the other requirements of his business. Now, regarding from this point of view the existing state of affairs and the probable future of the money market, what is the conclusion to which we must arrive?

If the principle above enunciated be true, the rate of interest must finally depend upon the demand and supply of capital. It will be high when the demand is great, and the supply small in proportion, and *vice versâ*. Now what has been the course of events during the last 8 months. Never perhaps had so large an amount of capital been dissipated and destroyed in an equal space of time. Never perhaps has unproductive expenditure gone on upon so gigantic a scale. The labour of probably a million of men in the flower of their age has been diverted from the ordinary pursuits of industry, and devoted to the trade of war. Agriculture has been interfered with over a vast extent of country, crops destroyed or requisitioned, roads, bridges, and railroads blown up or injured, manufactures interrupted. Nor is the end yet come. A war with a foreign foe, which may perhaps be renewed, has been succeeded by a civil war in which Frenchmen are arrayed against each other.

I have remarked that the rate of interest depends upon the demand and supply of capital; but it must now be observed that the demand here adverted to is a demand, accompanied with a reasonable assurance, that a lender may receive his stipulated interest with regularity. Without such an assurance, the demand is simply a desire to borrow and to consume—a very different thing.

As long as the war, either foreign or domestic, continues, a demand in our sense can hardly exist, and at any rate can only be responded to by speculators who are willing to buy a few lottery tickets which may turn up great prizes or utter blanks, like the South American Cotton loan.

But let us suppose the war at an end, what will be the condition of the money market?

The demand for capital, comprehending in it the power of giving security more or less satisfactory, will be enormous. 1st. From the Governments, especially of France, whatever shape that may assume; then from individuals, descending from the large proprietor whose chateau has been damaged and tenants ruined, from the mineowner or great manufacturer whose business has been injured or destroyed, to the little shopkeeper who is unable to cover his outstanding debts or replenish his drawers and shelves, to the peasant proprietor who usually, with his few acres already mortgaged, has to replace his little stock of animals and implements, and so maintain his humble household.

Without enlarging upon this picture one must, I think, be convinced that after peace and tranquillity have returned, and a certain amount of security also, the demand for capital will be enormous, and the rate of interest high in consequence. As for the supply no trustworthy idea can be formed: nobody can say how much corn, how many animals, how much clothing, or how many implements are available for the use of the sufferers; but at any rate it may be affirmed, with absolute certainty, that so far as these are represented by the surplus money existing in London, Amsterdam, Hamburg, &c., &c., this surplus, which in London cannot exceed six or seven millions at any one time, would be swept away in a week.

I do not of course mean to deny that the amount of money and its substitutes forming the whole existing mass of loanable accommodation which exists in the money markets of the world has a great temporary influence on the rate of interest. Money, being the standard and measure of value and general instrument of exchange, is usually that which is lent and borrowed in the first instance; but this money is speedily exchanged for that which is really required. The ultimate effect of a large issue of money is not to lower interest, but to raise prices. Much more space than I can venture to claim would be required in order to explain fully the various matters on which I have touched in this letter. I hope, however, that the general line of thought has been sufficiently indicated.

My object has been to show that commodities and services, and not money, are what are now likely to be asked for in the way of loan, and that these must in all probability be dearly paid for. People cannot eat or drink gold and silver or bank notes, nor can these purchase what does not exist.—I am, sir, your obedient servant, N.

SPAIN AND INTERNATIONAL COINAGE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The Spanish Minister of Finance, Don Sigismundo Moret, has lately issued a report setting forth that on grounds of international convenience, Spain should issue gold coins of the value of 25 pesetas or francs, instead of the value of 20 pesetas or francs. He points out that the proposed type of coin is very suitable for Spain, where gold pieces (the Isabel doubloon) of 100 *reales* or 10 *escudos* have been extremely popular. He also remarks that the piece of 25 will be more advantageous in many ways than one of 20 pesetas or francs, as it simplifies accounts, exposes proportionately to value a less surface of coin to abrasion and wear, and diminishes by one-fifth the number of pieces, thus economising time in counting, and saving the country expense in coinage.

The Minister declares himself satisfied that it is sound political economy, as well as desirable, either to discontinue altogether the coinage of 5 peseta pieces in silver, or else to limit their circulation to small transactions; and he looks forward to the expectation that the nations which have signed the Convention of December, 1865, will shortly come to an agreement in this respect.

It is gratifying, from an English point of view, to find that the principles on which we established our single standard of gold, with silver as a subsidiary token coin of limited circulation, are now finding favour in so many foreign countries; and that the important international type of 25 francs, for which numerous banknotes have been issued in France, is much welcomed in Spain and London. In Austria and Hungary, where the Monetary Convention of Paris takes effect from the 1st January of the present year, it will be specially useful as containing exactly 10 florins of 2½ francs. The Spanish Minister truly observes that the gold piece of 25 francs or pesetas will have an important influence on the assimilation of the monetary systems of England, the United States, and other countries. It will, no doubt, as the Chancellor of the Exchequer was one of the first to observe, afford a stimulus to our action in international coinage.

King Amadeus of Spain has lost no time in giving effect to the Minister's recommendation, and by decree of 21st March, has ordered the coinage of gold 25 peseta pieces in substitution for the 20 peseta pieces authorised

by the Republican decree of 19th October, 1868. The diameter of the new coin is 24 millimètres, like that of the French and Austrian pieces of 25 francs, destined to be the same as the 5 dollar, half-eagle, or pound sterling of the future. Its weight is 8·06451 grammes of gold, nine-tenths fine, so that 124 pieces of this coin will weigh exactly 1 kilogramme.

—I am, &c. FREDK. HENDRIKS.

April, 1871.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending April 29 :—

	Receipts of Week Ending April 29.
	£
Customs	406,000
Excise	558,000
Stamps	210,000
Taxes	27,000
Income tax	77,000
Post Office	nil.
Telegraphs	nil.
Crown lands	25,000
Miscellaneous	129,966
Total	1,432,966

The total receipts of the previous week were 1,450,807*l.*

The Exchequer issues of the week on account of expenditure were 1,093,452*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	75,000
Supply services	1,018,452
Telegraph services	nil.
	1,093,452

During the week the cash balances have increased in the Bank of England and decreased in the Bank of Ireland as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on April 22	3,272,796	892,171	4,164,967
— April 29	3,868,130	738,420	4,606,550
Increase	595,334	...	441,583
Decrease	...	153,751	...

The other receipts to date were 113,769*l*, the other payments were 11,700*l.*

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, May 3.

The Minister of Finance of the Commune, a citizen Jourde, issued a few days back a decree which startled the public. It required five of the six great railway companies to pay within forty-eight hours 2,000,000f, for "arrears of taxes due previous to the 18th March" [date of the last revolution], and ordered that from that date the tax on passengers and goods carried in express trains should be levied on the gross receipts at Paris at the rate of one-tenth of the whole; also, that the taxes on shares and bonds, and all the others exacted from railways, with the exception of that on real property, should be paid at the rate of a twentieth of the total due—the said total being assumed to be equivalent to that paid last year; whilst as to the real property tax it was declared due in totality for the buildings and lands situated within the Commune. The 2,000,000f in question are not the whole of the arrears owing, but the decree said that "it was just to take into consideration that the companies had sustained serious losses by the war." Now it may be that the Commune, as a *de facto* Government, has the right to get in arrears of taxes; but it should have remembered that the companies have a set-off against them in the shape of contributions due from the Government on what are called the "new net-works," which they were forced to construct, though certain not to be profitable. With respect to the taxes accruing since the revolution, the Commune, as the *de facto* authority, is probably justified in levying them; but the basis fixed for the levy is perhaps, under existing circumstances, not quite fair. Perhaps, too, it would have been well to declare that if the companies desire a certain delay should be allowed for payment, as in ordinary times to all tax-payers; but instead of that they are required to furnish all that is due from the 18th March to 20th April, and after the latter date to pay every ten days. To be sure the Commune is in sore need of money.

The part of the public hostile to the Commune hoped that the companies would resist the demand for the arrears, and to do so was, there is reason to believe, their first intention. But the Commune would certainly not have hesitated to seize the stations and the rolling stock, and to exercise rigorous measures against the directors and principal officials. Accordingly it was deemed better to pay. The Northern Company began by presenting the 303,000f, the part set down for it in the 2,000,000f; and after two or three days the Eastern followed with 354,000f, the Orleans with 376,000f, the Lyons with 692,000f, the respective sums demanded from them. The Western has not yet contributed the 275,000f exacted from it, but it will have to pay. It is, however, in a different position to the other four, for the reason that they run trains from Paris, whereas its lines in Paris are all closed.

In addition to the five companies here named, there is another great one—the Southern. The Commune has made no mention of it. In the course of the war we were told that the company had, from motives of patriotism, paid in advance the land and other taxes in all the departments through which its lines run. Has it paid also those levied at Paris on shares, bonds, &c.? It is not so much within the power of the Commune as the others are, since it has no station and no rolling-stock at Paris; but it possesses here a fine building in which its central offices are, and that could be seized.

There is a railway round Paris, and within the walls, called the Ceinture, which unites the five great lines, and is their property. At first the Commune said nothing about it, but a decree of the 1st orders it to pay within a week its arrears of taxes, and those that have become due to the 30th April—those accruing after that date to be paid every ten days. What the arrears of this company are we are not told.

The Commune has ordered that fines on employés in public and private administrations for neglect of duty shall cease to be imposed, and that those paid since the 18th March shall be restored. This decree has caused surprise. Discipline must be maintained somehow in all great administrations, and if it be not by fines, it must be by the more rigorous measure of dismissal. Secondly, the Commune has evidently no right to interfere between the employers and employed in private enterprises. The remark having been made that in railway and other great companies fines do not, as the Commune alleged, profit those who levy them, but are paid into funds for the relief of employés and men, a circular issued in its name says that the distribution of such funds is for the most part made arbitrarily, or from personal considerations, and that relief itself is "a direct insult to the dignity of the labourer, and an outrage on his morality."

The curious discussion in the Commune on the Mont de Piété, of which mention was made last week, has not been resumed, and consequently has produced no decree. But a body called "Commission of Labour and Exchanges" has presented a report, in which it recommends the liquidation of that establishment. After giving a history of pawnbroking from the earliest ages (compiled from Guillaumin's *Dictionnaire du Commerce et de la Navigation*), it states that the Mont de Piété of Paris, which is a monopoly, borrows money at 3 per cent. with in addition, certain allowances, and lends on pledges at 12 to 14; that the expense of its administration is scandalous, the salaries of its employés absorbing about 960,000f a-year: that in 1869 its profits were 784,737f, which went to the hospitals; that the amount of its loans is 38,000,000f, and that the pledges it holds as security for these are worth 180,000,000f. The dissolution of the establishment is proposed to be effected by the payment, in bonds redeemable in five years, of the sums it owes; and the restitution on payment, or promise to pay, or gratuitously, according to the situation of the borrower, of the pledges it holds. The Commission does not say who is to support the loss the liquidation will present, but it is of course to be the public. It undertakes that in place of the Mont de Piété "a social organisation, assuring to the workmen guarantees of assistance and support in case of want of work or of sickness," shall be established. But it abstains from indicating what it will be. In the Mont de Piété affair, we have an example of the way in which things are managed in this country. It is manifestly monstrous that a charitable establishment, for such it is considered, should charge 12 or 14 per cent. for loans to poor people, and about 960,000f a-year in salaries for so doing; and yet no statesman, no Parliament, has ever even thought of putting down the iniquity, and of replacing it by a system that would be practically useful to the working men and to the poor, and that would at the same time cost nothing to the public.

The manner in which the Versailles Government has dealt with the question of commercial bills is really deplorable. It has had to remedy its mistakes and omissions therein by making the Assembly adopt a new law, thus conceived: "Commercial bills payable at Paris, or falling due from the 18th March to the tenth day that may follow the re-establishment of postal communication between that city and other parts of France, shall only be exacted after the latter date."

The Versailles Minister of Finance, M. Pouyer-Quertier has submitted to the Assembly a corrected Budget for 1871. It proposes to reduce by 119,915,582f the total of 1,886,900,353f

originally estimated. But in addition there are the extraordinary expenses of the war to provide for, which are estimated at 651,457,559f; also the cost of maintaining German troops, estimated at about 225,625,000f.

According to explanations given by the same Minister in Parliament, Prince Bismarck was in error in stating that France had not kept her engagement with respect to the payment for the maintenance of German troops. An arrangement for delay had been made with the German Commander-in-Chief in France, but as it had not been ratified at Berlin, the first payment due under the original convention had been duly effected, and the second would be made on the 15th May. M. Pouyer-Quertier did not say what the amount paid was, but it it is known that the expense of maintaining the Germans exceeds 2,200,000f per day.

A Bill has been presented by the Versailles Government to the Assembly declaring that the property of the State, of churches, and of commercial companies cannot be sold or sequestrated by "the pretended Commune of Paris," and that any person buying or appropriating the same can be prosecuted under the penal code at any time for the space of ten years. It is not likely that this measure will intimidate the Commune, but it will probably prevent people from buying property that cannot be secreted or removed from the country. In addition to the Bill, the Government has deemed necessary to warn, through the *Official Journal*, people at London not to buy, except from respectable houses, securities of the city of Paris, a number of them having been abstracted from the Hotel de Ville.

A Committee of the Assembly, consisting of sixty members, has commenced an examination into the contracts and purchases for the war, and has called on all persons possessing information on such subjects to give it. The inquiry is to be a searching one. The Government on its part is collecting details of the damage sustained by the public, and by individuals in the provinces invaded by the Prussians. The other departments will have to indemnify them. Before long it will be necessary to provide also for the sufferers from the bombardment of Paris.

A daily newspaper, called the *Messager de Paris*, specially devoted to the Bourse and to financial affairs, and which has been in existence for fifteen years, has had to suspend its publication on account of vexations by the Commune.

The annual meeting of the Southern Railway, fixed for the 29th ult., has had to be postponed, in consequence of a sufficient number of shares not having been deposited.

The Orleans Railway Company announces that measures have been taken for paying in the country from the 2nd the coupons of shares and obligations.

PARIS, May 4.

The Commune has published to-day a detail of its receipts and expenses from 20th March to 30th April, as presented by its Minister of Finance, M. Jourde. It is simple justice to say that there is no example at the Hotel de Ville of accounts being given with such promtitude, and that none were ever so clear. Baron Haussman, in particular, was always a long time in rendering a report of his administration, and when he did it was hard to understand.

	f	c
The receipts of the Commune from 20th March to 30th April are stated to be	26,013,916	70
The expenses	25,138,089	12
So that there remained in hand on 1st May	875,827	58

In the receipts stands first a sum of 4,658,112f 21c found at the Ministry of Finance, but a note says that it "presents a difference with what, according to the accounts, ought to have existed." The next item is 7,750,000f obtained from the Bank of France, next 8,000,000f 10c from octrois. Then follow a string of items of telegraphs, direct taxes 110,192f, customs 230f, markets, tobacco 1,750,710f, stamps, public works, reimbursements from National Guard, &c., &c. In the list there is one of 8,028f for "various seizures and requisitions" and to it figure 1,200f taken in the palace of the Archbishop. Unless gross misrepresentations have been made, the seizures greatly exceed this sum, but the Minister of Finance, we may presume, only accounts for those paid over to him. Under the head of "Railways, decree of 27th April," there is a sum of 32,000f. That is the levy made on the Northern Company, the other companies only paid after the 30th ult. One or two of the items are curious:—"Association of Shoemakers, 775f 50c." Why do shoemakers pay money to the Government and not tailors, or other trades? "Caution money from Mesdames Andrieu, Monteuil, and Finbrunk, 2,050f." But who these ladies are and why they paid, are not stated. "Mayoralty of the 6th district, 17,305f." How is it that the 6th mayoralty of the ninety in Paris alone made a payment? "Stoppage of salaries of employés of the Hotel de Ville for the pension fund, 28f." This sum is so small that the number of employés must be immensely reduced, or that scarcely any of them have been made to contribute.

In the detail of expenses, we find first 1,445,645f 64c for the 20 Municipalities of Paris; next, 20,056,573f for War, and 1,813,318f for the Commissariat. The different ministerial departments have taken little, the highest being that of Foreign Affairs, 112,129f, and the lowest that of Public Instruction, 1,000f. But as the Commune has but limited foreign business, seeing that the Powers have not recognised it, and as it has accepted the charge of educating the people, we might perhaps have expected these figures to be revised. In the list of Ministries, by the way, nothing is put down for Finance—a strange omission; that department being, after War, more important than any other. The Hotel de Ville and Mayoralty of Paris take 91,753f, the Executive Commission 90,675f, the Commission of Safety 235,039f, the Central Committee 15,651f. These are different names for the Government of the Commune, but how the money was employed we are not told. It would have been interesting to know what portion of the total the members of the Commune took in the shape of salaries; for of course they are not serving gratis. There are also items of 197,436f for "general expenses," and 51,910f for "various." These designations are vague, but the amounts are not excessive for forty days of revolutionary government. Finally, there are entries of 44,500f for a "Commission of Barricades," of 20,000f for tailors, and 4,662f for shoemakers. The said Commission has certainly not wasted its money, for it has constructed formidable barricades in numerous places, and has made preparations for blowing up houses and public buildings. But the grant to tailors requires explanation; and it would be desirable to know why the shoemakers, after paying in 775f, should be allowed to take out 4,662f.

In the trade of Paris there is no improvement. Nothing is being done except in what is indispensable for existence. The number of closed shops is even greater than it was. There is little traffic in the streets.

The Bourse keeps open, but the business done is insignificant. The Threes nevertheless have advanced considerably, being to-day 52f 85c, whereas last Thursday they were only 51f 65c. The new loan is 53f 65c, and Italian has risen from 55f 85c to 56f 20c. In the other quotations to-day are—all for cash—Credit Mobilier, 125f; Comptoir d'Escompte, 570f; Orleans Railway, 740f; Eastern, 410f; Lyons, 815f; Western, 495f; Parisian Gas, 738f 75c; Suez Canal, 235f; Peruvian loan, 75f 75c; Ottoman obligations, 1869, 261f 25c.

The Municipal Council of Lyons, disapproving of the measure of the Assembly on commercial bills, has passed a series of resolutions declaring, like the Commune of Paris, that they ought to be paid by instalments but within two years, not then, as proposed by the Commune, and monthly not quarterly. The Lyons Council also expresses the opinion that interest should be allowed for delay, and in that too it differs from Paris.

Correspondence.

THE NASSJO-OSCARSHAMN RAILWAY.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In your paper of last week you made some disparaging comments upon the prospectus of this railway, in connection with what you termed "The Alleged Guarantee of Foreign Governments," and in support of your observations you printed the document communicated by Baron Hochschild, the Envoy of Sweden and Norway.

The statement in the prospectus to which you referred was—"That a free donation of one million Swedish rix dollars (55,000*l*) has been granted by the Government of Sweden to the company as a contribution by the State towards the construction of a line of such importance to the interests of the country."

To this Baron Hochschild is represented to reply that—"This contribution, which can be claimed only after the completion, survey, and final approbation of the line, was in 1869 voted by the Riksdag, and sanctioned by the Government not merely on account of the importance of the line, but also in order to provide work for the population of those parts of Sweden which, owing to the failure of crops in 1868, was then in distress, and had no means of getting employment."

There can be no doubt, therefore, that the contribution was promised. That the contribution was intended to be substantial is further clear from the fact that it was granted in order to "provide work for the population of the distressed parts of Sweden." That the grant was intended to be of a practical character is clear, for until the sanction of the Government, the directors of the Nassjo-Oscarshamn Railway discounted the promise to pay, and, with the further sanction of the Government, transferred to the bankers in Stockholm, by whom the promise was discounted, the whole of their right and interest in the contribution. It surely cannot be contended in the face of these facts that the company was not fully justified in stating that the Government of Sweden had granted a free donation of 55,000*l* towards the construction of

the line, and it was to this contribution, and to this only, to which reference was made in the prospectus.

The other portions of Baron Hochschild's letter are limited to matters not referred to in the prospectus, and do not call for any explanation on my part. The estimates of traffic are those of the Government itself, and as Baron Hochschild considers it unnecessary to express any opinion upon them, it may be presumed that they are correct.

It is matter of regret that the Government of Sweden should inadvertently, as I have no doubt was the case, lent the weight of its good name and high authority to efforts made, perhaps, by disappointed financiers, to injure in the eyes of the investing public the property of what the official communication itself describes as an important line of railway.

—Your obedient servant, ALBERT RICARDO.

11 Angel court, Throgmorton street.

[We made no comments whatever of our own upon the Nassjo-Oscarshamn Railway. We merely reprinted a communication from the Swedish Envoy, which had already appeared in the *Times*. Having done so, however, we think it only fair to let our correspondent be heard on the other side.—EDITOR ECONOMIST.]

COMMERCIAL AND MISCELLANEOUS NEWS.

The new company organised in Philadelphia for the establishment of a line of steamers between that port and Liverpool has got all its capital subscribed and all its bonds taken, and has gone into operation under the management of the Pennsylvania Railroad, Herman J. Lombeart, a vice-president of that road, being the president of the steamship company. Four steamers are either to be built or bought, and voyages begun as soon as possible.

The United States' Naval Register shows that at the present time the navy consists of 99 wooden vessels, 51 ironclad vessels, and 29 tugs, the chief part of them being laid up in ordinary at the various navy-yards. The vessels in active service are on duty in five fleets, and are 40 in number, to wit, the North Atlantic fleet, 10; South Atlantic, three; European, eight; Pacific and Asiatic, seven; Darien survey, three; and the others on their way to or returning from the various fleets. The naval officers on the active list are one admiral, one vice-admiral, 12 rear-admirals, two commodores, 50 captains, 89 commanders, 178 lieutenant-commanders, 141 lieutenants, 151 masters, 69 ensigns, 69 midshipmen, 80 surgeons, 32 passed assistant-surgeons, 80 paymasters, 32 passed assistant-paymasters, 34 chief engineers, 94 first assistants, 84 second assistants, and 23 chaplains. There are on the retired list 20 rear-admirals, 52 commodores, 23 captains, 14 commanders, and a number of officers of lower grades. In the marine corps there are 102 officers.

The expenditure proposed for "public works ordinary" in India, in the financial year 1871-72, amounts to 2,365,000*l*. Last year it was four millions, but 1½ million has now been transferred to provincial management, and there ha vealso been some further retrenchments. The 2½ millions remaining under the general control of the Government of India, consists of 1,012,500*l* military, 150,700*l* civil buildings, 115,900*l* roads and communications, 454,900*l* agricultural, 605,400*l* establishment and plant, and 25,600*l* miscellaneous public improvements. The grant for military buildings includes the completion of the new doubled-storied barracks commenced. The year's expenditure on "public works extraordinary" is estimated at 3,626,000*l*, to be provided for from borrowed funds. The item includes irrigation works in the Punjaub, in the North-Western Provinces, Oude, Behar, and Rajpootana. Sir R. Temple, making these statements in his Budget speech, adds that the gauge question having been at length settled at 3ft 3in, or one metre, we may hope soon to see a vigorous commencement with the State railway works, some of which are urgently needed to cheapen the supply of salt for the people.

The following is extracted from the Indian Military Budget, which was presented by Major-General Norman, Military Member of the Council:—"For the coming year 1871-72, the estimated military expenditure in India is 12,410,000*l*, and the receipts 805,000*l*; leaving a net estimated expenditure of 11,605,000*l*—a smaller expenditure than that of last year, and, therefore, the smallest since the Mutiny, although a new charge of 60,000*l* is inserted for the cost in India of the overland transports. The expenditure in England is estimated at three millions five hundred and seventy-four thousand pounds, and the receipts at fourteen thousand pounds, making a total net military expenditure in India and England of fifteen millions one hundred and sixty-five thousand pounds, being 231,000*l* less than the revised estimate for 1870-71. The items of expenditure in India for the coming year 1871-72, as compared with the Budget estimate for 1870-71, are as follows:—Army and garrison staff, 496,916*l*, a decrease of 2,660*l*; administrative staff, 211,925*l*, an increase of 1,145*l*; regimental pay, allowances, and charges, 6,481,992*l*, a decrease of 111,000*l*; commissariat establishment, supplies, and services, 2,212,912*l*, a decrease of 55,635*l*; stud and re-mount establishment, supplies, and services, 216,471*l*, a decrease of 20,745*l*; clothing establishment and supplies, 113,264*l*, an increase of 9,926*l*; barrack establishment and supplies, 377,591*l*, an increase of 10,169*l*; administration of martial law, 45,685*l*, a decrease of 784*l*; medical establishments, supplies, and services, 460,150*l*, a decrease of 2,869*l*. Ordnance establishment—Supplies and camp equipage, 502,528*l*, an increase of 29,831*l*; ecclesiastical, 21,830*l*, an increase of 439*l*; education, 36,960*l*, a decrease of 2,641*l*; sea transport charges, 194,750*l*, an increase of 60,520*l*; Volunteer corps, 12,503*l*, an increase of 2,636*l*; miscellaneous services, 377,081*l*, an increase of 430*l*; rewards for military services, 116,540*l*, a decrease of 1,067*l*; retired officers in India, 13,290*l*, a decrease of 1,835*l*; military pensioners, 585,147*l*, a decrease of 4,467*l*; widows' pensions and compassionate allowances, 18,646*l*, an increase of 7,517*l*; superannuation pensions, 18,489*l*, a decrease of 451*l*. Home charges for Her Majesty's regiments serving in India, 698,000*l*, an increase of 38,000*l*. Furlough allowances of Indian officers, 450,000*l*, an increase of 66,000*l*; passages of officers and troops, 93,500*l*, an increase of 16,500*l*; overland transport service, 320,000*l*, an increase of 100,000*l*; miscellaneous, 19,000*l*, a decrease of 10,000*l*; stores for India, 824,720*l*, an increase of 39,676*l*. To the Imperial Government on account of retired pay of troops serving or having served in India, 224,000*l*, an increase of 10,500*l*; retired pay of Indian officers, including colonels' allowances, 750,000*l*, the same as last year. Lord Clive's Fund pensions, 129.800*l*, a decrease of 200*l*; charge to India for cost of absorption of supernumerary ensigns, 48,000*l*, a special charge; gratuities to officers of late Indian regiments on retiring, 17,000*l*, an increase of 11,000*l*. If to this we add the liberal pension list of the native army, amounting to more than half a million sterling annually, we form some idea of what various items go to swell the military expenditure of India. The force we have maintained during 1870-71 has been:—6,545 British officers, 60,425 British non-commissioned officers and private soldiers, 122,122 native soldiers, 14,187 Government horses, with 424 field guns, and the estimated force for 1871-72 is 6,436 officers, 60,445 British soldiers, 121,981 native soldiers, 13,253 Government horses, with 394 field guns. In stating the number of guns I exclude the 16 mortars of heavy field batteries, which I see in some returns are included as field guns. We anticipate some reduction in the native army, though the particulars of this have not yet been received from the Secretary of State. But I am decidedly of opinion that we have now reduced our European farce to the very lowest safe strength."

The return of outrages reported to the Constabulary Office in Ireland by the constabulary, not including the Dublin police district, shows that the total number exceeded 20,000 in the disastrous year 1847, but then fell rapidly, and was 10,639 in 1850, and 3,531 in 1860. In 1866 it was as low as 1,964, and in 1867 2,021; in 1868, under the excitement of a general election it rose to 2,548; in 1869 it further increased to 3,153, and in 1870 it was 4,351. Only once in the last 16 years—viz., in 1862—has it been so high as that. The fluctuation has been chiefly due to the crime of sheep and cattle stealing; the number of these two offences reported was no less than 10,044 in 1847, 4,800 in 1850, 426 in 1860, 230 in 1870. In 1847 more than 15,000 head were stolen; in 1870 only 819. Other offences also show great fluctuation. In 1870 there were 876 instances in which threatening notices or letters were sent—a number that has not been equalled since 1847; there were also 222 cases of intimidation otherwise. The increase in both classes was in the earlier months of the year, and so also was the year's increase of unlawful oaths to 336, and of levying contributions to 153. At that time armed men visited the houses of farmers at night, and swore them to pay no higher rent than the Government valuation; and there was strong reason to believe that the tenants encouraged these proceedings, considering their rents too high. The number of homicides in Ireland in 1870 was 26, and of cases of manslaughter 51. The two numbers make the same total as in 1869. The cases of firing at the person were 34, being nine fewer than in 1869. There were 252 assaults endangering life, and 352 aggravated assaults; both of them larger numbers than for several years past. The same may be said of the 247 cases of incendiary fire, and 290 of injury to property. 1,329 of the outrages reported in the year are distinguished as being agrarian—a number unequalled for 20 years past; in 1865, 1866, 1867, and 1868 the number was below 200, but in 1869 it rose to 767. The list of agrarian outrages in 1860 includes five of the homicides, two cases of manslaughter, 11 of firing at the person, nine assaults endangering life, 21 aggravated assaults, 38 incendiary fires, 15 cases of killing or maiming cattle, 151 of levying contributions, 48 demand of money, 323 of administering unlawful oaths, 624 of intimidation, 36 of injury to property, ten of attacking houses, 21 of firing into dwellings. Of the 1,329 agrarian outrages in 1870 no less than 1,050 occurred in the first quarter of the year. But the Peace Preservation Act passed on the 4th of April. By the side of these numbers the outrages reported in the first quarter of 1871 may at first sight appear small; but they are 758, and 119 were agrarian. There were 174 cases of intimidation, levying contributions, and administering unlawful oaths. In Westmeath the number of agrarian outrages reported in the first quarter of 1871 was 26—viz., 25 cases of intimidation and one of firing at the person; but Westmeath has not a sixtieth part of the population of Ireland.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fourth week of April, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children	Adults.	Children under 16	4th week April, 1871.	Corresp'nding Total in 1870.
West district	5,384	7,647	5,400	18,431	20,064
North district	6,970	11,311	8,688	26,969	28,502

— —	1868	34,902	101,263	136,215

Vagrants relieved in the Metropolis on the last day of the fourth week of April, 1871.

Men.	Women.	Children under 16.	Total.
855	275	77	1,207

In the first quarter of the year 1871 2,876,430 tons of shipping entered the ports of the United Kingdom with cargoes from foreign countries and British possessions abroad, and 3,725,201 tons cleared

outwards with cargoes for such destinations; both quantities show an increase as compared with those of the corresponding quarter of the previous year. Of the entries inwards 2,480,020 tons came from foreign countries, and 396,410 tons from British possessions: and of the clearances outwards 3,055,285 tons cleared for foreign countries, and 669,916 tons for British possessions; and all these quantities show an increase over those of the preceding year. The entries from the United States increased to the large quantity of 685,053 tons, and the clearances for the United States to 573,982 tons. The return of the nationality of the vessels shows British tonnage of 2,097,500 tons entered inwards, and 2,759,650 tons cleared, both quantities presenting an increase this year. The United States' tonnage increased, their entries inwards to our ports advancing from 143,536 tons in the first quarter of 1870 to 207,310 tons in the first quarter of 1871, and the clearances outward from 168,058 tons to 197,874 tons. German tonnage shows a decline in the entries from 139,925 tons to 78,053 tons, and in the clearances from 191,708 tons to 161,752 tons. In all the above numbers repeated voyages are included.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 3rd day of May, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	37,836,705	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	22,836,705
		Silver bullion	...
	37,836,705		37,836,705

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	12,958,741
Rest	3,120,972	Other securities	19,932,767
Public deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and dividend accounts	8,575,606	Notes	12,994,125
Other deposits	19,717,590	Gold and silver coin	661,515
Seven-day and other bills	579,980		
	46,547,148		46,547,148

GEO. FORBES, Chief Cashier.

Dated the 4th May, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result:—

Liabilities.	£	Assets.	£
Circulation, including Bank post bills	25,422,560	Securities	33,338,508
Public deposits	8,575,606	Coin and bullion	23,498,220
Private deposits	19,717,590		
	53,715,756		56,836,728

The balance of Assets above Liabilities being 3,120,972*l.* as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.		Decrease.
	£		£
Circulation, including Bank post bills	712,434		...
Public deposits	...		152,504
Other deposits	51,033		...
Government securities	20,192		...
Other securities	16,679		...
Reserve	599,000		...
Rest	...		7,402
Coin	...		120,000

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending May 3, 1871.		Week ending April 26, 1871.		Week ending May 4, 1870.
	£		£		£
Thursday	12,924,000		12,681,000		9,878,000
Friday	31,462,000		13,000,000		27,732,000
Saturday	16,858,000		14,000,000		12,791,000
Monday	18,717,000		13,000,000		9,910,000
Tuesday	18,307,000		14,881,000		11,029,000
Wednesday	16,283,000		12,870,000		13,541,000
Total	108,051,000		79,432,000		84,907,000

JOHN C. PODDOCK, Deputy Inspector.

Bankers' Clearing-house, May 4, 1871.

The total since the 4th of January, 1871, is 1,437,368,000*l.*, compared with 1,318,441,000*l* for the corresponding period last year, showing an increase of 118,927,000*l.*

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding dates with the present week.	May 8, 1861.	May 6, 1868.	May 5, 1869.	May 4, 1870.	May 3, 1871.
Circulation, including bank post bills	£ 20,810,857	£ 24,927,015	£ 24,457,824	£ 24,303,558	£ 25,422,560

— Hamburg (3 months)	13 8 8⅛	13 10 10⅛	13 12⅛ 13⅛	13 10⅛ 10⅞	13 10½ 11⅛
Clearing-house returns	...	61,595,000	79,889,000	89,307,000	108,051,000

In 1861, the Bank, notwithstanding a great increase in their discounts for the week, refrained from raising the rate. It was expected that sooner or later there would be a renewed demand for bullion for America on account of the war, but the demand had not yet become perceptible at the Bank.

In 1868, the rather improved demand for money which had been noticed the previous week continued, but the reserve of the Bank was not affected. The perplexities of the minority Government of Mr Disraeli were causing a great deal of confusion.

In 1869, the Bank rate was raised from 4 to 4½ per cent., the demand being caused to some extent by foreign commitments, but partly also by greater business activity in the country. The Irish Church Bill was progressing through the House of Commons.

In 1870, there was a good demand for money in consequence of augmented trade, but no great advance in the rate was expected, in consequence of the great accumulation of money both here and on the continent. The vote on the Imperial plebiscite in France was just about being taken.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 7,070,737*l.*; in 1868, an excess of 970,641*l.*; in 1869, a deficiency of 1,654,595*l.*; and in 1870, a deficiency of 2,853,775*l.* In 1871, there is a deficiency of 215,177*l.*

DISCOUNT AND MONEY MARKET.—The very moderate improvement in the demand for money, which we noticed at the close of last week, has continued, and the quotations of last Friday are maintained; but it will be understood that this improvement is only by comparison with the immediately preceding week, and that there is still a great accumulation of money, with no immediate prospect of the supply being materially diminished. To-day there is a moderate demand, both in the open market and at the Bank.

During the week the bullion in the Bank, which was increased in the previous week by 428,000*l.*, has received another large addition, amounting to 596,600*l.*—an increase of over 1,000,000*l* in a fortnight. The total bullion in the Bank has now reached the unusually large total of 23,498,000*l.* The principal other changes in the Bank account for the week are an increase of 724,000*l* in the circulation, a decrease of 152,000*l.* in the public deposits, and a decrease of 120,000*l.* in the reserve—the remaining changes being quite insignificant. The proportion of reserve to the banking liabilities thus remains much what it was last week.

We subjoin our usual quotations for mercantile paper having various periods to run:—

Bank bills—2 and 3 months	2½	per cent.
Do 4 —	2½	per cent.
Do 6 —	2⅝ 3	per cent
Trade bills—2 and 3 months	2½ 2¾	per cent.
Do 4 —	2⅝ 3	per cent.
Do 6 —	3 3½	per cent.

The allowance for deposits at the joint stock banks an discount houses is as follows:—

Joint Stock Banks at call ..... 1½ per cent.

Discount houses at call	1⅛ per cent.
Do with seven days' notice	1⅜ per cent.
Do fourteen days	1¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	2½	6*	2¼	...
Vienna	5	5	5	5
Berlin	4	4	3½	3¼ ½
Frankfort	3½	3½	3	3
Amsterdam	3½	3½	3½	3 ¼
Turin	5	5	5	5
Brussels	2½	4	2½	3¼ ½
Madrid	5	5	5	5
Hamburg	...	...	3	3¼
St Petersburg	6	6	4½	6

* Nominal.

THE STOCK MARKETS.—The week has been comparatively a broken one on account of the occurrence of the usual holiday on the 1st of May. Not only was Monday a blank day, but on Saturday in anticipation there was less business done, and on Tuesday there was also a good deal of depression on account of the limitation of business. During the remainder of the week, however, there has been a fair amount of activity, and the course of business has been much the same as it was during the two previous weeks. English Government and foreign stocks have again advanced, though the advance in foreign stocks is much less than it was the week previous, and English railways, by comparison, have been weak, a rather serious fall which occurred on Saturday and Tuesday being barely recovered from subsequently except in one or two instances. In the miscellaneous market the dealings have been comparatively limited, though the tendency is upwards. The markets are thus still being acted upon by the extraordinary abundance of money, which is especially felt, as will be observed, in Consols. In the foreign market the same influence is felt, while the weakness in English railways is produced by the fact that the effect of cheap money was first felt in this department, and there is now a reaction. The markets are thus in rather a dangerous condition, since the termination of the difficulty between Paris and Versailles can hardly now be avoided or even very long postponed, and the restoration of order in France would ere long put an end to the main cause which sustains prices. Still, the triumph of Versailles, though it is apparently sure enough, may be an affair of weeks, and there is no apprehension in the markets of immediate difficulties.

ENGLISH GOVERNMENT SECURITIES.—The rise in this department has been steady during the week, till on Thursday an advance of ⅜ in dealings for money was established, and the price for the new June account was about ½ above the closing price of last week, which was the same both for money and the May account. To-day there has again been a good market, and the closing quotation for the June account is 93⅝ ¾, the money price being the same.

The price which Consols have reached this week is the highest of the year, and if the present suspense and accumulation of money continue a week or two longer, possibly a higher point may be momentarily touched. There is nevertheless a bear account still open, the belief being that the present level of prices is not very stable, depending on the delay in the pacification of France, and that it is likely, when the change comes, it will be very rapid, owing to the large quantities of foreign money in Lombard street.

Subjoined is a list of the highest and lowest prices of Consols every day :—

	CONSOLS.				
	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	93	93¼	93⅛	93¼	par to 5s pm
Monday	Holiday.				
Tuesday	93¼	93⅜	93⅜	93⅜	par to 5s pm
Wednesday	93¼	93⅜	93⅜	93⅜	par to 5s pm
Thursday	93⅜	93⅝	93⅜	93⅜	par to 5s pm
Friday	93½	93⅝	93⅜	93⅝	par to 5s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	93⅛ ¼	93⅜ ¼	+ ¼
Ditto account	93⅛ ¼	93⅜ ¼	+ ¼
Reduced 3 %	91⅛ ⅛	91⅜ ¼	+ ¼
New 3 %	91⅛ ⅛	91⅜ ¼	+ ¼
Bank Stock, last dividend 4½ %	236 8	236 8	... ...
India Stock, 10½ %, red. at 200 Apl. 30, 1874	206 8	206 8	... ...
Ditto 5 %, red. at par, July 5, 1880	111¼ 12½	111¼ 12½	... ...

EXCHEQUER BILLS.—1s to 5s prem.

COLONIAL GOVERNMENT SECURITIES.—As our usual table last week showed, there had been a general advance in this description of securities, and the advance has been maintained and continued this week. With the present abundance of money seeking investment, such securities are likely to be sought after, as they are less liable than speculative foreign stocks to rapid depreciation. The following shows the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	106 7	106½ 7½	+ ½
Ditto 5 %	99 100	100 1	+ 1
New Zealand 5 % Consolidated Bonds	96 7	97 8	+ 1
New South Wales 5 % Bonds, 1888 to 1896	99½ 100½	100 1	+ ½
Nova Scotia 6 % Bonds, 1875	103½ 4½	103½ 4½	... ...
Queensland Government 6 % Bonds, 1884-5	109 10	110 11	+ 1
Victoria 6 %	110 11	110 11	... ...
Ditto New 5 %	102 3	103 4	+ 1

FOREIGN GOVERNMENT SECURITIES.—The changes in this market, as we have remarked, are not very considerable, though the advance of last week is generally maintained and improved upon. This is especially the case in Argentine, Brazilian, Egyptian, Peruvian, Italian, and Russian. Turkish stocks, however, which took the lead with Egyptian last week, are slightly weaker, though there is no material fall for the week on Friday's quotations. To-day there has been no material change in the market compared with the last few days.

An improvement has taken place during the week in French National Defence loan upon the favourable news from Versailles; also in French Rentes, which from being 51½ ⅝ last week, advanced to 52¼, the price to-day, however, being a shade weaker.

The new Argentine loan still maintains its good position; the quotation of 2⅜ ⅝ being very steadily maintained during the week, only a little less than the high closing price of last week.

It is stated in the market that there is comparatively little mere speculation, a large part of the advance being due to the absorption of foreign securities—an absorption which is still in progress, so that a farther advance is counted upon. The signs are thus increasing that the impatience of the public at a low return on investments is getting beyond bounds, and we should fear some great disappointments when events take a turn, as they must do before very long.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Argentine 6 %	93⅜ 4	94 ½	+ ½
Brazilian 5 % 1865	92½ ¾	93⅜ 4	+ 1⅛

The third issue of the Foreign and Colonial Government Trust is quoted 1 to 1½ pm.

The following important notification appears in to-night's *Gazette* :—

Board of Trade, Whitehall, May 4, 1871.

The Right Honourable the Lords of the Committee of Privy Council for Trade have received from the Secretary of State for Foreign Affairs an extract from the French *Journal Officiel*, in which it is stated that attempts have been made in London to dispose of securities im-

properly withdrawn from the Hotel de Ville at Paris, and that as it will always be possible for the true proprietors to re-sell such securities, every precaution should be taken by purchasers to assure themselves of the origin of bonds which may be offered to them, and only to accept them from well-known and respectable houses.

The following has been received from Mr Hyde Clark, the secretary to the Council of Foreign Bondholders :—

Since the publication of the pamphlet containing the correspondence with the Minister of Finance relative to the salt mines, the committee of the New Grenada bondholders has been awaiting the issue of the negotiations. Although these are not complete, their progress has been satisfactory. The letters of the committee have elicited from the President a declaration in his message to Congress, that it is the duty and interest of the Republic to maintain its contract with the creditors, and to make no change without mutual consent. The Government still urges that modifications are necessary in the arrangements to relieve the Treasury from the heavy pressure upon it. It is satisfactory to observe that a proposition to abolish the charge of the bondholders on the Customs, and to substitute what is called the minimum rate of 60,000*l* per annum, was energetically and successfully resisted by the Minister of Finance, and refused by a large majority. The committee are still in negotiation with the Government on the agency arrangements, and on these the Finance Minister has shown a disposition to comply with the representations of the committee. Mr Fonblanque, lately in this country, was sent by the committee on a special mission to Bogota, to co-operate with Mr O'Leary, the agent there, and was well received by the President and Ministers.

English Railways.—There was a very marked fall early in the week, caused by a continuance of the sales for realisations. Brighton, South-Eastern, and Chatham and Dover stocks were especially heavy, there being very unfavourable traffic returns; but the depression was also general, extending to Caledonian, Great Eastern, London and South-Western, and Metropolitan. On Wednesday and Thursday, however, on the publication of very favourable traffic returns for the leading lines, there was a general rally, though the depression of the early part of the week was hardly recovered from, except in the case of Great Western, Lancashire and Yorkshire, and Midland. The most remarkable change, however, was in Metropolitan District, which showed on Thursday an improvement of 1¼ for the week. To-day there has been renewed depression in several of the stocks, Midland and Great Northern having been pressed for sale with the circulation of rumours about an aggravation of the coal traffic competition. Caledonian, North-Eastern, South-Eastern, and Brighton also participated in the depression. In Great Western stock, however, there have been renewed purchases, and the price is now higher, at 91¼ ½, than it was recently before the present reaction commenced.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
Caledonian	90¾ 1	.....	89¾ ½	–	1¼
Great Eastern	43¼ ½	.....	42¼ ½	–	1
Great Northern	124½ 5½	.....	124 5	–	½
Ditto A	135 ½	.....	134½ 5	–	½

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending April 29 to 758,146*l*, being an increase of 42,235*l* over the corresponding week of last year. The aggregate receipts of the half-year to date are now 11,201,004*l*, being an increase of 617,003*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 9,974*l*; North-Eastern, 8,892*l*; Midland, 6,821*l*; Great Western, 5,240*l*; and Lancashire and Yorkshire, 4,747*l*. On the other hand, South-Eastern have declined 2,660*l*; Brighton, 631*l*; and Chatham, and Dover, 513*l*. The following shows the details of the increase or decrease in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

A correspondent of the *Daily News* writes as follows :—

Sir,—As a shareholder in the Lemberg-Czernowitz Railway, I beg to invite attention to the extraordinary course taken by that company with reference to the coupon due the 1st instant. The shares are always quoted as "Guaranteed 7 per Cent.," which is not literally correct. The Austrian Government guarantees a certain revenue, which, upon the present capital, is equivalent to 7 per cent., and I believe the shareholders have hitherto been paid at that rate. We are now told, however, that upon the coupon just due, representing fourteen shillings per share, ten shillings only will be paid. The explanation (as far as any can be obtained) is that the company was to be exempt from income tax up to 1869; that it has not since paid any, but is now called up to pay two years' tax at 12 per cent. per annum. Are incomes, or certain classes of incomes, in Austria taxed 12 per cent.? Do tax collectors in that country neglect collecting from public companies? Do public companies there neglect to pay legitimate imposts, or to provide for their payment by deductions from dividends, as tax and dividend fall due? These questions imply comparisons with English practice, and, perhaps, indicate the narrow views of

A Puzzled Shareholder.

London, May 3.

American Securities.—Mail advices from New York state that the subscriptions to the new Funding loan in the United States amount to 60,000,000 dols, most of which appears to have been taken by the National Banks. Abroad the loan has been unfavourably received, though the *Times'* New York correspondent announces a subscription of 10,000,000 dols, through the American Minister at St Petersburg. Five-Twenty bonds are slightly lower owing to realisations, but the tone of the market is good. The leading changes for the week are :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90¼ ½	.....	90¼	–
Ditto 1865 Issue	89¼ ½	.....	89¼ ½	... ...
Ditto 1867 Issue	92¼ ½	.....	92¼ ½	– ½
Ditto 5 % 10/40 Bonds, exchange 4/6	89¼ ½	.....	89¼ ½	... ...
Atlantic and Great Western Consol. Bonds	42¼ ¾	.....	42¼ ½	– ¼
Erie Shares	19¾ ½	.....	21 ½	+ 1¼
Illinois Central Shares	110¾ 11¼	.....	110¾ 11¼	... ...
Massachussets 5 % Sterling Bonds, 1900	93 5	.....	93 5	... ...
Panama General Mortgage 7 % Bonds, 1897	91 3	.....	91 3	... ...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	92¼ ¾	.....	92¼ ¾	... ...
Virginia 6 % Bonds	57¼ ¾	.....	57 ¾	– ½

A good effect is produced by an announcement on behalf of the Erie Shareholders' Protection Committee of the receipt of a telegram, announcing that the demurrer put in by the

Erie directors to the committee's bill of complaint has been overruled, and the directors have been ordered to file their answer in thirty days. The Erie ring have also been ordered to exhibit the "books," and a telegram to-day announces that this will be done. This may lead to a compromise with the English shareholders. The quotation of Erie shares, it will be observed, has greatly advanced, there being an improvement of 1¼ to-day on the receipt of better prices from New York.

JOINT STOCK BANKS.—There has been more activity in this department, especially towards the close of the week, and the general tendency of values has been towards improvement. Alliance, Ionian, and London and Brazilian shares have advanced 1; Colonial, 2; South Australian, London Joint Stock, London and Westminster, Standard of South Africa, and Union of Australia, ½. The adverse movements have been a decline of 1 in Anglo-Austrian and Australasia, and of ¼ in Imperial Ottoman.

TELEGRAPHS.—A fair average business has been concluded in this department, though the movements in the quotations have been less important than for some time past. A reduction of 2 has taken place in Anglo-Mediterranean; but Anglo-American has advanced 1; Great Northern, ½; Indo-European and Reuter's, ¼; and French Cable shares, ⅛. Hooper's Telegraph Works show a rise of 1 on the week; otherwise there is no change to notice in the value of Construction shares.

MINES.—The market for British mining shares has ruled quiet, but some important changes have taken place in the quotations. Devon Great Consols are nominally 5 higher on the week; Wheal Chiverton have advanced 2; Tankerville, 1; and South Condurrow, ½. On the other hand, South Wheal Frances have declined 3; Tincroft, 1; and East Wheal Grenville, ½. The leading feature in the foreign market is a reduction of 4 on Eberhardts; while United Mexican are ½, and Copiapo ½ lower. Cape Copper Mining shares have risen 1 on the week.

MISCELLANEOUS.—The movements in this department have all been favourable, and the dealings have been somewhat numerous. Credit shares a slight recovery, London Financial being ½, and Credit Foncier about ⅛ better. Boston (U.S.) Sterling loan, City of London Real Property, and General Steam Navigation have advanced 1; Italian Irrigation, 2; and Hudson's Bay shares, ½.

Mr S. Endicott Peabody, of Boston, U.S.A., has become a partner of the firm of J. S. Morgan and Co.

The Realm Marine Insurance Company, the prospectus of which was lately issued, has now commenced business at new premises.

EXCHANGES.—There is no material change from last week. The American exchange is still high, and gold continues to be received in large quantities.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The influx of gold to the Bank continues on a large scale, the amount sent in during the past week being 819,000*l*: all immediate arrivals will also be purchased by that establishment, as any demand for the continent must depend upon the re-establishment of order in Paris. The Shannon has brought 28,600*l* from the West Indies; Cimbria has brought 24,000*l* from New York; Cuba has brought 140,000*l* from New York; Wyoming has brought 140,000*l* from New York; Parthia has brought 60,000*l* from New York; Rhein has brought 108,000*l* from New York; City of Brussels has brought 110,000*l* from New York; Bonita has brought 6,000*l* from the Brazils; Magellan has brought 20,000*l* from the Brazils; Otago has brought 23,000*l* from New Zealand—total, 659,600*l*. Sovereigns, to the value of 40,000*l*, have been taken for transmission to the Cape and Brazils.

Silver.—The market has remained steady at our quotations of last week, the demand being chiefly for Holland. The Shannon has brought 31,900*l* from the West Indies, and we have received about 75,000*l* from New York by the various steamers lately arrived. The Nile has taken 6,895*l* to the West Indies.

Mexican dollars.—The price for the old coinage is now slightly higher, and the quantity on the market is very small. We have received about 52,000*l* during the past few days from New Orleans and New York, and this amount has been taken for the East. The Bangalore has taken 240,000*l* to China and the Straits.

Exchange on India for banks drafts at 60 days' sight is 1s 10⅝d per rupee. The India Council drafts were allotted yesterday; the minimum, as before, was 1s 10¼d per rupee. Applications on Calcutta and Madras, at 1s 10½d, received 5 per cent., and on Bombay at the same rate, 45 per cent. The amounts allotted were, to Calcutta, 296,000*l*, to Bombay, 100,000*l*; and to Madras, 4,000*l*.

India Government loan notes.—We quote 4 per Cents., 92 ¼ to 92¾; 5 per Cents., 99¾ to 100; and 5½ per Cents., 107¼ to 107¾.

Quotations for bullion.—Gold—Bar gold, 77s 8¾d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 8d to 74s per oz; United States gold coin, 76s 3d per oz. Silver—Bar silver, 5s 0 1/16d to 5s 0¼d per oz std; ditto containing 5 grains gold, 5s 0⅜d to 5s 0 1/16d per oz std; Mexican dollars, 4s 10¾d to 4s 11⅛d per oz, last price.

The sum of 53,000*l* in gold was sent into the Bank of England to-day.

The *Gazette* return states that the imports of the precious metals into the United Kingdom during the week ended May 3 amounted to—gold, 800,385*l*; silver, 224,970*l*. The exports were—gold, 42,097*l*; silver, 457,887*l*.

FAILURES AND EMBARRASSMENTS.—The following circular has been issued by Messrs Forshaw and Hawkins, solicitors, of Liverpool.

"12 Sweeting street, Liverpool, April 27, 1871.

"We are sorry to have to announce to you that Messrs James Baines, Taylor, and Co., of Liverpool, and their London house, Messrs T. M. Mackay, Son, and Co., find it necessary to suspend payment. You will receive an official notice of the intended meeting of creditors, to be held at the London Tavern, Bishopgate street, London, on Thursday, the 18th proximo, at 12 o'clock; and as it is the interest of the creditors that a resolution should be come to at the meeting in question, we propose that the whole of the debtor's estate should be vested in trustees, and realised and divided among the creditors; and that Mr John Young, of the firm of Turquand, Young, and Co., the well-known accountants, should be appointed one of the trustees to act conjointly with a committee, or a second trustee, as the meeting may decide, should they deem either desirable.—We are, your obedient servants,

"H. FORSHAW and HAWKINS."

Bedford and Northampton Railway, extraordinary, 2 Westminster chambers.

FRIDAY, May 12.

South African Mortgage and Investment, extraordinary.

SETTLING DAYS.

Ticket Days—May 11th and 30th.
Account Days—May 12th and 31st.

NOTICES AND REPORTS.

STOCKS.

Chilian 5 per Cent., 1870.—Bonds representing 10,400*l* have been drawn for repayment on the 1st July.

Consols, &c.—Notice has been given by the Bank of England that on Friday, the 2nd of June, Consols, New 5*l* per Cents., New 3*l* 10s per Cents., New 2*l* 10s per Cents., Annuities for terms of years, and India 5 per Cents., will be transferable without the dividend due on the 5th July next; also that the transfer books of East India stock will shut on Friday, the 9th of June, and open on Thursday, the 6th of July.

Danish 3 per Cent. Loan, 1825.—Bonds to the nominal amount of 82,500*l* were purchased on the 21st ult., and cancelled.

Honduras 10 per Cent., 1870.—Bonds representing 50,000*l* were drawn on the 29th ult. for redemption at par on the 1st July.

Swedish Provincial Mortgage Loan.—Bonds representing 5,000*l* will be paid off at par on the 1st June.

Tasmanian 6 per Cent. New Loan for 52,800l. — The Bank of New South Wales and the Consolidated Bank are inviting tenders till the 11th instant for this new loan. Interest accrues from the 1st July next, and the principal is repayable at par in 1898. 10 per cent. is payable on application, and the balance on the 30th June.

RAILWAY COMPANIES.

Great Luxembourg Railway — New Ordinary Shares.—The directors are offering 25,000 new ordinary shares of 20*l* each, and for which tenders are invited until the 10th instant. 1*l* per share is required on application, a further payment on allotment, reducing the amount unpaid to 10*l* per share, 2*l* on the 10th August, 2*l* on the 10th of November, and the balance will be called up as wanted.

Royal Sardinian.—The first section, about 17 miles, from Cagliari to Villasor is now in operation.

Smyrna and Cassaba.—The profits for the half-year amounted to 8,288*l*, against 19,465*l* for the corresponding period of 1869. The traffic has suffered from the diminution in the general export trade of Smyrna. After providing for the dividend on the preference shares, and the dividend on the ordinary shares at the rate of 1½ per cent. declared at the previous meeting, there is an available balance of 4,120*l*, out of which a dividend at the rate of 1½ per cent. per annum was declared on the ordinary shares, leaving 646*l*.

Southern Railways of Ireland.—Capital, 231,000*l* in shares, and 77,000*l* in debentures. The share capital is divided into 23,100 deferred and 23,100 preferred shares, all of 5*l* each. Messrs Read, Wood, and Haynes are inviting subscriptions for 16,500 of the preferred shares, having a priority of 6 per cent in dividend, which is secured during construction by an investment in Canada. The line which will connect Thurles with Clonmel is already under construction, and a branch to the Leix-Castle uncultivated coal-fields of Slieveardagh is expected to be very productive. The Great Southern and Western of Ireland Company will work the line at between 50 per cent. and 45 per cent. gross receipts.

West Flanders.—Available balance, 2,231*l*, out of which a dividend of 5s 9d per share has been announced; surplus, 1,115*l*.

BANKS.

Anglo-Egyptian, Limited.—The directors announce the payment of 1*l* per share.

London and South African.—After deducting 6,000*l* for losses, there remained 8,602*l*. At the meeting a dividend was declared of 8s per share, in addition to the interim payment of 7s in November last, leaving 568*l* to be carried forward. The proposed reduction of the capital from 500,000*l* to 400,000*l* has been carried out.

ASSURANCE COMPANIES.

Equitable Life.—The accounts showed that 245 new policies had been issued during the year 1870, assuring 257,310*l*, and yielding in premiums 8,395*l* per annum. The claims paid during the same term amounted to 214,535*l*, and the additions to those claims by way of bonus to 239,323*l*, being equal to rather more than 111½ per cent. on the sums originally assured.

Scottish Amicable Life.—New policies for the year 766, assuring 332,616*l*. The new premiums reached 13,180*l*, and the sum of 4,394*l* was received for annuities. The number of deaths during the year was 168, and the net amount of claims, 104,203*l*. The accumulated funds represented 1,413,584*l*, and the annual income, 216,718*l*. A bonus at the rate of 1½ per cent. per annum was announced, in addition to that declared at the septennial investigation.

Sovereign Life Office.—The new premium income for the past year on 364 new polices was 5,447*l*. About one-fourth of the total income, now about 100,000*l*, was added to the accumulated fund.

MISCELLANEOUS COMPANIES.

China Steamship and Labuan Coal, Limited.—A final dividend of 1s in the pound, together with 10d in the pound as interest, has been paid to the creditors by Messrs Harding, Whinney, Gibbons, and Co.

City of Milan Improvements.—The liquidators announce a distribution of 15s per share out of the assets in hand. The remaining funds of the undertaking will be returned to the proprietors as soon as they can be collected and the accounts closed.

Evans' Hotel.—Application was made to-day for a winding-up order, and Mr Daniels was appointed provisional liquidator.

Moyar Coffee.—The crop for 1869-70 realised 13,917*l*. After paying a dividend of 5 per cent., free of tax, in October last, there remains 458*l*.

Public Co-operative Supply Association, Limited. — Capital 20,000*l* in 1*l* shares. Premises in the north-west of London have been secured, and the usual co-operative business will be undertaken.

The Commercial Times.

On April 29, from NORTH AMERICA, per Cimbria—Boston, April 17; Detroit, 15; New York, 18, Philadelphia, 17, San Francisco, 11.

On April 29, from WEST COAST OF AFRICA, per Bonny—Sierra Leone, April 12; Lagos, 1, Sta. Cruz, de Teneriffe, 19, Funchal, Madeira, 21, Cape Coast Castle, 6.

On May 1, from NORTH AMERICA, per Wyoming—Boston, April 18, Chicago, 17, New York, 19, Philadelphia, 18, Hamilton, 16, Kingston, 18, Montreal, 17, Quebec, 15, Toronto 17, Ottawa, 17.

On May 1 from NORTH AMERICA, per City of Baltimore—Fredericton, April 18; St John, 19; Sackville, 18, Bermuda, 13, Halifax 21, Newfoundland, 12, Prince Edward Island, 19.

On May 1 from NORTH AMERICA AND NEW ZEALAND, via San Francisco, per Pacific—Boston, April 20, Detroit, 18, New York, 20, Philadelphia 19, San Francisco 14, Honolulu 18, Victoria, B.C., 1, Sydney, Feb 28, Hobart Town, 21, New Zealand, March 7.

On May 2, from NORTH AMERICA per City of Brussels—Boston, April 21, Chicago, 20, New York, 22, Philadelphia, 21, San Francisco, 15, Nassau, 17, Halifax 18.

On May 3 from NORTH AMERICA, per Nestorian—Boston, April 22, Chicago, 19 Detroit, 20, Portland, 22, Hamilton, 20, Kingston, 21, Montreal, 21, Quebec 12, Toronto, 20, Ottawa, 21, St John, 20.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended April 29, 1871:—

	Quantities Sold.	Average Price.
	qrs bush	s d
Wheat	77,067 2	59 7
Barley	8,616 2	36 9
Oats	3,653 0	27 9

COMPARATIVE AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended April 29, 1871, and for the corresponding week in each of the years from 1871 to 1867:—

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was rather more firmness apparent in the grain trade to-day, though the attendance at Mark lane was limited, and the high prices demanded restricted operations within very narrow limits. Wheat sold slowly, at Monday's rates, for both English and foreign descriptions. Flour changed hands quietly, on former terms. Maize and oats tended downwards in value, but no alteration took place in the quotations for beans or peas. This week's imports of foreign and colonial produce into London have amounted to 12,890 qrs of wheat, 12,090 barley, 32,230 oats, 2,000 beans, 470 peas, 2,820 maize, 710 sacks and 6,620 barrels of flour.

At Liverpool and Wakefield this morning a slight recovery took place in the value of wheat, though the sales were limited.

The Liverpool cotton market during the past week has been very quiet, and prices slightly easier until yesterday, when there was a strong demand, and American descriptions advanced $\frac{1}{16}$d to $\frac{1}{8}$d per lb. The total sales for the week are 82,630 bales; of which the trade have taken 54,310 bales; speculators and exporters, 28,320 bales. The imports are 109,021 bales; the actual exports, 12,879 bales; and to-day's stocks is estimated at 994,290 bales. Quotations for American descriptions have advanced $\frac{1}{16}$d per lb, but East Indian have declined $\frac{1}{8}$ per lb, and Bengals remain unchanged since last Friday. To-day the market closes steady. Sales, 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended May 4, 1871:—

	Imported.	Exported.
American bales	92,092	13,152
Brazilian	5,211	419
East Indian	12,806	12,890
Egyptian	1,889	219
Miscellaneous	743	228
Total	112,041	26,908

At New York on the 4th instant, middling Upland cotton was quoted at 15½ cents per lb. Bombay advices to May 1 report the market active, at 168 rupees for fair Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, April 8:—The tone of the cotton market has been quieter, and at the close we can quote prices of some descriptions rather more in favour of buyers, although the scarcity of cotton offering a good selection still enables holders to maintain a much higher scale of prices than the position of the Liverpool market would seem to warrant. A fair share of the week's business has again been done by shippers to the continent, comprising Barsee, Nuggur, and low Oomrawuttee descriptions at prices varying from 165 rs to 176 rs per candy. New Dhollerah has been attracting more attention, and contracts to the extent of about 2,500 candies have been made for delivery in a fortnight to a month, at prices ranging from 181 rs in the early part of the week to 177 rs to 178 rs at the close. For machine-ginned Broach there has been a very active demand here, but business has been checked by the small supplies available, which have enabled dealers to maintain very extreme prices. In native-ginned transactions to a fair extent have also been reported, and with freer supplies coming forward prices have given way about 5 rs per candy during the week. Of the latter, however, it is very difficult to obtain good selection, and for nice parcels full prices are asked. From Tinnevelly we have a telegram dated 6th instant, quoting $6\frac{5}{16}$d per lb.

Export of Cotton from Bombay to April 7.

	1871.	1870.
London bales	6,193	72
Liverpool	171,510	152,294
Total, Great Britain	177,703	152,366
Channel for orders	13,832	2,163
Continent	78,812	65,859
China	17,288	15,304
Grand total	287,635	235,992

Actual exports since last mail left, 55,652 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated April 21:—We have no change whatever to report either in prices or in the general position of the cotton market. Business continues on a very limited scale, but parcels of satisfactory merit in all grades, especially the finer, command extreme values on account of their increasing scarcity. We quote as before:—Fair, 7⅞d to 7¾d per lb, f.o.b.; good fair, 8⅛d to 8¼d per lb, ditto; fully good fair, 8¼d to 8¾d per lb, ditto; Gallin, 9½d to 11¾d per lb, ditto (nominal). Freight about $\frac{5}{16}$d per lb for steam-pressed bales.

Exports.	Gt. Britain. bales.	Continent. bales.	Total. bales.
From April 14 to April 20, 1871	2,747	1,727	4,474
From Nov. 1, 1870, to Apr. 13, 1871	148,315	43,846	192,161
From Nov. 1, 1870, to Apr. 20, 1871	151,062	45,573	196,635
Same period 1869–70	123,254	37,536	160,790
— 1868–69	124,015	41,240	165,255
— 1867–68	143,435	36,949	180,384
— 1866–67	143,736	26,894	170,630
— 1865–66	122,609	25,271	147,880
— 1864–65	173,315	33,705	207,020

The colonial produce markets have ruled dull throughout the week, and the general tendency of values have been in favour of buyers. The demand for sugar has been inactive, and prices shows a reduction of 6d per cwt. Refined goods have sold on lower terms. The market has been well supplied with coffee, and at auction easier rates have been accepted. Rice and rum have been little inquired after. Common qualities of tea have ruled the turn cheaper.

The following report, dated April 4, has been forwarded by Messrs Fryer, Schultz, and Co., of Colombo:—The shipments of the fortnight just elapsed, as regards produce for Europe, show no signs of diminution, and to date we are still slightly in advance of last seasons' shipments of coffee, as may be seen by reference to the statement of distribution of crops, below:

Plantation Coffee.	1871. cwts.	1870. cwts.
To Great Britain	455,845	417,292
Foreign ports	25,107	19,987
Australia and India	10,847	6,591
	491,799	443,870

Native Coffee.	1871. cwts.	1870. cwts.
To Great Britain	56,354	43,270
Foreign ports	14,740	28,542
Australia and India	1,764	1,697
	72,858	73,509

There has been little disposition to operate in plantation parchment during the past fortnight, in consequence of less favourable advices from home; at the same time the quantity remaining on offer is greatly reduced. We hear of very little doing in native coffee, and picked and dried ready for shipment may now be quoted at 45s to 47s, according to quality.

* The stock of sugar in Holland is in first hands only; in all other countries in first and second hands.

The annexed is dated Akyab, March 30:—The supplies of Nakranzan rice, although not so large as they used to be at this time of the season in former years, continued very fair throughout the fortnight under review, and shippers have thereby made good progress in the despatch of their vessels. This could not prevent, however, that when the alarming reports from Rangoon advising a rapid rise of that market became known, buyers showing themselves very anxious to secure rice, leaving no doubt that prices here would soon follow those at the Southern market. The consequence was that the system of sifting, which we mentioned in our last, could not be strictly carried through, and the cost of good three parts shipping quality was thereby enhanced to 54 rs to 55 rs per 100 baskets, 28 lbs per basket, equal to 5s 8d to 5s 9d per cwt free on board. This morning the tone of the market is again calmer, and although the demand remains most active, apparently in excess of requirements for vessels actually loading we do not expect to see rates advance for some time, unless they should again be unfavourably influenced by still higher Rangoon prices. Exports, up to date, to Europe:—1871, 56,955 tons; 1870, 30,943 tons; 1869, 25,200 tons.

Annexed is Messrs Hunt and King's circular:—There has been little animation in the silk market during the past month, and no recovery from the weakness and partial decline in prices commenced on the 5th ultimo. Affairs in France have tended to restrict business as much as possible, while the prevailing general panic precludes buying except for actual requirements in view of the approach of peace. The deliveries progress rapidly. In China silk our quotations are nominally without alteration, the demand having been sufficient to absorb the moderate arrivals, and except the very coarse and inferior sorts all qualities are steady. Canton silk goes but slowly, and the presence of the large proportion of coarse sizes somewhat affects prices. Japan silk, special qualities excepted, is still out of favour. Organzine Mybashi is occasionally sold at a very low rate. From amongst the latest advices and telegrams received we note limited business, high prices, and reduced stocks. The settlements for the season show a falling off of about 4,000 bales compared with 1869 and 1870. From Japan also a less quantity of silks will have been settled at much above our present rates, and the stocks are below the average of the past six years, 7,000 bales being stock 3,000 below. In Bengal silk there is no change. In European silk prices are nominal, with very little business.

PARTICULARS of STOCK, IMPORTS and DELIVERIES of SILK to MAY 1, 1871.

	Imports.	Deliveries.	Stock, May 1.
	bales.	bales.	bales.
China	2,325	3,715	24,000
Japan	688	476	7,497
Bengal	541	461	6,503
Waste	1,565	572	10,021

Messrs T. J. and T. Powell report:—The leather trade of the past month has proved very satisfactory in the existing position of the market. The cessation of the war consumption has by no means suspended all demands for leather and leather articles for the continent; on the contrary, the shipments are still considerable. The home trade continue to purchase sparingly, but the stocks on hand show very little increase, and the change in prices, although generally in favour of the buyer, is slight. Heavy sole leather is the article that has recently presented the least animation, while the lightest English butts have been in active request. Raw goods—There have been no arrivals of salted South American hides, while the imports of other articles do not exceed an average quantity. The public sales at foot comprise nearly all the transactions of the month. All descriptions of hides adapted to sole leather purposes have sold freely, and realised full or slightly advanced rates. East India kips have been brought forward plentifully; the best qualities have supported former prices, but the lower descriptions, of which the bulk has consisted, have again declined ¼d to ½d per lb. The stocks continue moderate.

Messrs Wm. Moran and Co., of Calcutta, writing on April 4, thus refer to the indigo market:—There is no change to report in the prospects of the indigo crop which continue to be as favourable as could be wished from all parts of the country. Planters, in parts of lower Bengal, would be glad of a few showers to enable them to finish their spring cultivation, but to judge from the appearance of the weather here they will probably have had them by this time. The plant is reported to be growing splendidly in Tirhoot, Chumparun, and Chuprah; caterpillars have appeared in one or two concerns, but the damage done by them has been very trifling. Altogether we have seldom known a season open with such uniformly good prospects, and with a continuance of good fortune during manufacture, we may look for a bumper season. Exports of indigo from 1st November, 1870, to 1st April, 1871:—To Great Britain, 16,460 chests; to France, 513; to Trieste, 2,790; to foreign Europe, 250; to America, 2,386; to Gulphs and Levante, 1,731—total, 24,080 chests.

Mr L. Th. van Houten thus reviews the state of the Dutch tin trade during April:—We have no great change to report in our tin market, and prices have remained nearly stationary. The continuance of internal troubles in France tends very materially to contract business in that quarter within narrow limits, and the weakness of the English market has enabled buyers to execute orders there at prices considerably below the parity of our quotations. Notwithstanding this, the delivery of tin has again been very large, together 885 tons, being, to a great extent, parcels which had already been bought before, or in the last Trading Company's public sale on the 30th ult. Banca tin—Some sales took place of 76½ fl in the beginning of the month, but the market remained very quiet, with some business now and then for covering bear sales, and we close without animation at 76 fl sellers. For delivery ex next autumn sale transactions were reported at 73¾ fl. Billiton tin is still very scarce, the greater part of the quantity arrived having been previously disposed of when still afloat. A few parcels were sold at 75 fl ex ship arrived, and 74½ fl was accepted for parcels still afloat. The following statement shows the position of Banca tin in Holland on the 29th April, from the official returns published by the Dutch Trading Company:—

	1871.	1870.	1869.
Import in April ..... slabs	18,043	32,820	8,620

The annexed is dated New York, April 21 :—The volume of trade keeps up to about average proportions, and the general markets present little change. There is very little speculation indulged in in any department, and it is generally conceded that if business is not so active as in some former seasons, it reposes upon a healthy basis, as where there is no over-trading there is less liability of succeeding commercial disaster. The imports, which lately fell off, have again been large, the prevalence of easterly winds the last few days having brought in quite a fleet of vessels from European and more distant ports, as well as from ports less remote. The export trade is rather moderate, but with the period at hand when supplies of domestic produce may be expected to increase, a more active movement of breadstuffs, &c., may be looked for. Gold rose to 111¾ on Thursday, since which time it has vibrated between 111 and 111⅞. The local money market shows an easier undertone, albeit rates remain about the same. This is due to a return to the market of funds lately withdrawn for the purpose, it is believed, of creating artificial stringency to depress stocks. There is every reason for expecting that the market will run in a smooth and easy current until the usual summer demand for moving the new crops.

THE COTTON TRADE.

LIVERPOOL.—MAY 4.

The demand for cotton was active on Friday, but became quiet on Saturday. On Monday a heavy tone prevailed, and prices have since continued in favour of buyers until this day, when there has again been more activity, and the full quotations of last Thursday have been obtained for most descriptions. For Sea Island there has been a fair demand, chiefly for good Florida; prices show no change. In American the middling and better qualities are comparatively scarce and steady; the lower grades have been depressed, with considerable irregularity, but are now firmer, and prices generally show little change. New York advices to the 4th instant quote middling Upland 15½ cents, costing to sell in Liverpool 7 15/16d per lb by steamer. Brazil, owing to its relative cheapness, is beginning to attract attention, and a good business has been transacted, but prices scarcely show any change. Egyptian has been in moderate demand, and, being very freely offered, prices have been in the buyers' favour. East Indian descriptions, especially the medium qualities, have been pressed for sale, and prices generally are ⅛d lower for the week.

In cotton to arrive the transactions have been limited. The latest quotations are:—American, basis of middling, from New Orleans, ship named, not sailed, 7⅜d; Mobile, at sea, not below low middling, 7⅜d; any port, June delivery, not below low middling, 7¼d; low middling, New Orleans, at sea, not below fully ordinary, 7 1/16d; Dhollerah, fair new merchants, Cape, April-May shipment, 5⅜d per lb.

The sales of the week, including forwarded, amount to 82,630 bales, of which 10,800 are on speculation, and 17,520 declared for export, leaving 54,310 bales to the trade.

MAY 5.—The sales to-day will probably amount to about 12,000 bales, with a steady market.

The above figures show :—

	bales.
An increase of import compared with the same date last year of	720,600
An increase of quantity taken for consumption of	118,030
An increase of actual exports of	184,100
An increase of stock of	454,300

In speculation there is a decrease of 65,000 bales. The imports this week have amounted to 109,021 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to April 28) is 230,000 bales, against 180,000 bales last year. The actual exports have been 12,879 bales.

LONDON.—MAY 4.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

There has been a dull irregular market this week, attributable in a great measure to the "lock-out" of the operatives at Oldham; but the tone this afternoon has decidedly improved, and a fair business is reported at full rates.

NEW YORK.—APRIL 21.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, April 21. From the figures thus obtained it appears that the total receipts for the seven days have reached 63,042 bales, against 64,156 bales last week, 67,543 bales the previous week, and 71,744 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,512,692 bales, against 2,529,116 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 983,576 bales. The exports for the week ending this evening reach a total of 80,325 bales, of which 63,805 were to Great Britain, 3,213 to France, and 13,307 to rest of the continent, while the stocks as made up this evening are now 484,643 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending April 21.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	23887	14164	37351	34819	201018	139417

Total	63805	16540	80345	59142	484643	341083
Total since Sept. 1	2357904	573814	2931718	1719178	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 21,183 bales, while the stocks to-night are 143,560 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to April 14, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph:—

RECEIPTS and EXPORTS of COTTON (bales) since Sept. 1, and STOCKS on hand.

We have had a quiet market the past week, but prices have been quite steady, the only change being a decline on Monday of ⅛ in middling and grades above. Almost every traceable influence, however, has been against the market. The planting advices have in the main been good. The receipts have continued to show the same large percentage of increase of previous weeks. Our own spinners have mostly kept out of the market, having considerable stock on hand, and the Liverpool reports have been dull, with the quotations lower. And yet, notwithstanding all these adverse influences, prices have been maintained with an active demand for speculation to-day, and quite a firm undertone apparent at the close. The source of this apparent strength is thus speculative, and may be traced to the fact that holders think that a corner in cotton is probable towards the close of the month when the shorts meet their maturing contracts, and refuse, therefore, to make any concession in price. For future delivery the business has been fair, and prices have been well maintained. To-day the demand was light, and the offerings were also light, and low middling closed to-night at 13½c for April, 13½c for May, 13⅝c for June, and 13¾c for August. The total sales of this description for the week are 36,440 bales, including 440 free on board. For immediate delivery the total sales foot up this week 19,147 bales, including 13,201 for export, 2,725 for consumption, 3,053 for speculation, and 168 in transit. Of the above, 1,971 bales were to arrive. The following are the closing quotations:—

Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Apr. 21, 1871.			Week ending Apr. 21, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	1695	1661	20322	1088	2708	16800
Columbus	347	1206	6025	856	1204	11100
Macon	384	1255	6561	321	659	11780
Montgomery	481	943	3993	486	1196	6945
Selma	537	1535	2979	395	740	4855
Memphis	5011	8712	15384	4018	3959	17893

	9222	16857	61991	8055	11114	75002

These totals show that the interior stocks have decreased during the week 7,535 bales (being now 5,476 bales less than for the same period last year), while the aggregate receipts are 1,167 bales more, and the shipments 5,743 bales more than for the corresponding period of 1870.

The exports of cotton this week from New York show an increase since last week, the total reaching 21,987 bales, against 18,260 bales last week. Below we give our table, showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, April 28.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 57,000 bales, and since the 1st of September, 3,565,000 bales. Shipments to England, 56,000 bales; to France, 10,000 bales; and to the continent, 16,000 bales. Total since the 1st of September, 2,620,000 bales. Stock at all ports, 456,000 bales. Middling Upland, 7¼d. cost and freight, per steamer.

NEW YORK, May 2.—The receipts of cotton at all United States' ports for the last four days have been 25,000 bales. Shipments to England, 15,000 bales; to France, 3,000 bales; and to the continent, 10,000 bales. Middling Upland, 7¼d. cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, May 4.—The past week has again been characterised by extreme inactivity in all departments of business, especially in yarns and goods suitable for our Eastern markets in China and India, as the advices from these places offer no inducement to shippers to give out further orders for Manchester productions. Home trade buyers have also operated very sparingly, and chiefly for small amounts for immediate wants. Indeed both sellers and buyers seem to have agreed to pause in all operations of magnitude—the former owing to a probable scarcity of yarns, of which shirtings are chiefly made, in consequence of the lock-out in the Oldham district, and which has imparted already some firmness to prices, though the value of cotton has receded a little. This lock-out has considerably disturbed business here, but there seems already a prospect of the hands giving in to the propositions of their masters. Meanwhile there is little doing Prices, however, are nominally unchanged during the last few days, though easier than on this day week.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Market continues quiet, and in the absence of business to test prices, Tuesday's quotations are unchanged.

BRADFORD.—The same healthy consumptive demand continues to prevail for most sorts of wool, and prices are extremely firm. Good demi-lustre wethers are still much in favour. Lustre wools are also in fair request. Stocks are comparatively small, and where favourite sorts are scarce a hardening tendency is apparent. Noils and brokes are in tolerably good demand, and prices have an upward tendency. There is little change to notice in the yarn market. The animation recently noticed still prevails in most departments. In the piece market, a steady business continues to be done for various markets, and owing to the upward tendency of the raw material manufacturers are of necessity advancing their prices.

LEEDS.—The cloth markets have presented a quiet appearance, nevertheless a moderate amount of business has been done. The sales effected consisted of a few lots of samples for the fall trade, and a sprinkling of spring fabrics for the execution of orders. Hair lists and Victorias are in moderate request in some instances, but as a whole the transactions are not extensive.

WOLVERHAMPTON.—The business was reported steady. The coalmasters spoke of a fair sale for their commodity, as well for consumption at a distance as at the blast furnaces, the mills and forges, and the foundries in the district. Prices are fully maintained. Transactions keep up in iron-stone. Pigs are not now selling in any considerable degree, but extensive arrivals are coming forward from other districts. Prices of all kinds of pig iron are very firm.

BIRMINGHAM.—In the absence of any large export demand, the iron trade of South Staffordshire improves very slowly. Most of the leading houses are doing a steady business at full list rates, but among the smaller makers business is fitful and precarious, and prices, though somewhat better than last quarter, arestill very irregular. The pig market continues firm, if not active. Native all mine pig is quoted steady at 3*l* 15s to 3*l* 17s 6d for hot blast, 4*l* 10s for cold, and 2*l* 12s 6d for cinder.

DUNDEE.—In flax goods on the spot occasional transactions take place at about former prices, and holders are firm in resisting any further decline, but seem rather disposed to enhance their demands, at present prices in this market are in many instances comparatively lower than those which are current abroad. Jute is dull, in consequence of the recent large arrivals, and as further large quantities are just about due, the market is likely to continue quiet for some time to come. There has been more activity in the yarn market, and considerable sales have been made, both of flax and tow yarns, at steady prices. For linens there has also been rather more demand from some of the foreign markets, and although the home trade, as usual at this season, is comparatively dull, manufacturers of light goods are in general pretty well supplied with orders.

BELFAST.—Flax—Very little was offered in our markets during the week. Demand generally was fair at firm prices. Yarns—Inactivity still exists in this department; business accomplished was of the most limited nature. Linens, brown (handloom)—During the past month the demand was fair for most descriptions of handloom manufacture. Powerloom—The demand for approved makes of roughs was very steady at firm prices; common descriptions, however, were less inquired for. Bleached and finished linens—Home trade is in a healthy condition. Demand was again very steady, and confidence was exhibited by purchasers who appeared in our market. STOCKS and prices but little altered during the week.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—APRIL 21.

The markets for flour and grain the past week have shown weakness and depression. The decline in prices, though pretty general, is not great, but the close was quite unsettled. The receipts of flour show some increase, and under a pressure to sell, both from store and from wharf, prices have gradually yielded until a decline of 10c to 20c per barrel is established for the week. The shipping business has been moderate. Yesterday a line of 3,000 barrels prime extra State was taken for the London market at $6.59 in store, and lots on the wharf sold as low as $6.35. To-day, with a decline of 6d quoted from Liverpool, buyers insisted upon lower prices, but holders refused to give way to any extent on shipping brands, but some of the trade brands could be bought for less money. At the close, however, 1,000 barrels prime extra State sold at $6.40 in store, a decline of 10c from yesterday. Wheat has been taken freely for export till within the past two days. The demand was promptly met, and stocks materially reduced. But since Wednesday, with a slight decline in Liverpool, and a check to the advance in gold, buyers have insisted upon lower rates, and being able to pick up odd lots sufficient to supply their immediate wants, they wholly neglected lines of new spring yesterday. Corn has arrived freely by rail, and being pressed for sale on arrival, prices have ruled weak for some days, although there was some effort to check the decline. The failure of a party operating for a rise, precipitated considerable quantities upon the market, under which prices gave way. Prime mixed closed at 75c for present and next two months' delivery. The receipts of corn at the West have largely increased for the week under review, but a considerable portion thereof is found to be unsound from having lain in canal boats all winter. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Agricultural prospects have not improved during the past week, the over-abundant rains having been followed by cold frosty nights, which have retarded the growth of the wheat plant, and caused a loss of colour on many patches. There has, therefore, been more firmness in prices, though there has been a general disinclination on the part of millers to enter into business at current rates. Purchases have accordingly been confined to immediate wants. Nevertheless, in the leading provincial markets an advance of about 1s per quarter has been established for the late lowest prices. Supplies of English grain on offer here have been small, but the samples have come to hand in good condition. The imports have been on the increase, while the exportation of wheat, barley, and flour continues on a small scale. The number of wheat cargoes now offering off coast has diminished to three or four, but there is more than the average quantity of produce afloat for the United Kingdom for the time of year. Shipments are in active progress abroad, and the export from the Baltic and Black Sea ports promises to be large. On the other hand, it is probable that France will take a large quantity of grain off the market should the existing obstacles to trade be early removed. The demand for flour has ruled quiet, but prices are without material movement.

The spring corn trade has been inactive. Although the stock of oats has been much reduced, prices have again given way, and sales have been slow. Peas have ruled dull, while beans show an occasional decline of 1s per quarter, notwithstanding the somewhat unfavourable reports of the winter-sown crop. Maize and barley have changed hands to a moderate extent on former terms.

Mr. George Dornbusch in these reports the state of the floating grain and seed trade:—During the last eight days only 6 grain laden vessels have arrived at ports-of-call, viz: 5 wheat, 1 maize. The floating grain trade has been very quiet in tone. Wheat, with a restricted choice business, has necessarily been limited, and in some sales lower prices have had to be accepted. In maize little business has been done, and about 6d cheaper. In barley business has been at a stand-still. In rye also no transaction has taken place; quotations are nominal. The reported sales are as follows:—Wheat—11 arrived cargoes Ghirka Odessa, 47s to 52s per 492 lbs; Polish ditto, 49s 3d to 53s per 480 lbs; Berdianski, 53s 6d per 492 lbs, and No 1 spring from New York, 55s per 480 lbs. On passage, 2 cargoes Berdianski, 53s per 492 lbs; Polish Odessa, 54s 6d per 480 lbs. Maize, 1 arrived cargo Odessa, 37s., also a cargo arrived in London, 35s 9d per 492 lbs. Linseed steady on the spot, cheaper for distant delivery. Arrived, 1,700 qrs Oran from Tagarong at 62s per 424 lbs, and 1,000 tons East India, from Calcutta, at 59s per 410 lbs. Shipped or to be shipped, 100 tons East India, from Calcutta, at 61s 6d per 410 lbs. Rapeseed in fair demand at late rates. Arrived, 100 tons ordinary brown, at 65s. Shipped or to be shipped, 100 tons yellow mixed at 71s 6d, and 100 tons ordinary brown at 65s 6d. Shipped or to be shipped, 1,500 tons ordinary brown at 65s, and 600 tons yellow mixed at 71s 9d and 72s. Cottonseed quiet. 400 tons Egyptian, from Alexandria, to be shipped at 71 12s 6d.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There is not any improvement in the demand, and the market has been dull throughout the week, with prices favouring the buyers. Recent arrivals of West India have given a full supply. Refining kinds show about 6d decline. Barbadoes by auction went at 28s 6d to 33s; and grainy, 33s to 34s 6d. Very fine crystallised Demerara, 5s 8d duty, sold chiefly at 36s. Sales to yesterday 1,332 casks. A floating cargo of Trinidad has sold for the United Kingdom at 24s 9d per cwt. Low qualities generally remain dull, and prices tend downward. A few floating cargoes of foreign have sold upon moderate terms. The latest advices from Cuba confirm the deficiency in the crop formerly alluded to. Landings last week were heavy, but the deliveries to maintain the increase so frequently noticed, and the stock in London is much below the usual average. The stock in the Kingdom is 28,000 tons less than last year.

Mauritius.—2,356 bags went at rather lower rates: grainy and crystallised white, 36s 6d to 38s.

Madras.—1,100 bags native have sold at 25s 3d.

Penang.—2,496 bags by auction partly found buyers: soft brown and greyish, 24s to 29s 6d; good soft yellow, 32s to 32s 6d. Privately 2,400 baskets at 18s.

Natal.—627 bags part sold at 31s 6d to 32s 6d for grainy sorts.

Guatemala.—569 bags by auction were taken in. Privately business has been done in grainy sorts at 35s to 36s 6d. 85 casks concrete sold at 25s.

Manila.—5,900 bags are reported: unclayed at 20s, clayed at 24s 6d to 25s per cwt.

Floating Cargoes.—Two floating cargoes of Cuba are reported for the United Kingdom at 25s 9d and 26s 6d; one of Havana, No. 13, at 31s. A cargo of 2,800 baskets Java about No. 19, at 32s 3d. One of Bahia for the continent at 25s per cwt.

Refined.—The market continues inactive, and prices of dry goods have slightly declined.

MOLASSES.—About 300 puncheons West India have found buyers: Trinidad and St Kitt's at 11s to 12s 6d per cwt.

RUM.—A steady business has been transacted in West India at about the decline last quoted. The sales include Demerara at 1s 8d to 1s 9d for puncheons, and 1d to 2d more for smaller packages; pale Barbico, 1s 6½d per gal.; Jamaica, 3s 6d to 4s 6d per gallon.

COCOA.—Common and grey qualities have gone at prices in favour of the buyers, and the sales have been large. 2,700 bags Trinidad partly sold: grey and mixed, 47s to 61s; middling to fine, 62s to 103s. 2,897 bags Grenada about half sold: low to good, 44s to 56s 6d; fine, 60s to 70s 6d. 292 bags other kinds of West India part sold at 46s to 51s for St Lucia. 248 bags Caracas were bought in. Privately Guayaquil has been sold at 46s to 51s per cwt. The stock of West India has been largely increased, being now 17,670 bags. There has been an extended consumption of Ceylon, and the increased quantity received here has been exported to various quarters. The stock is still rather heavy.

COFFEE.—The supplies have again been large, and prices continually in favour of the buyers. Most of the plantation Ceylon has sold: grey and dull quality at a reduction of 1s to 1s 6d; ordery at about last week's quotations. Fine Mysore of the new crop has sold at about the quotations. Baboo, Guatemala, and common Jamaica in general have only partly found buyers. 113 casks 1,375 bags East India mostly sold; good to fine Mysore of the new crop, 80s to 90s; Ceylon, 66s 6d to 83s; native sorts, 54s to 58s. 2,800 bags Java sold; 200 bags plantation Ceylon sold at 82s 6d, a few parcels being taken by low middling to middling, one to two 64; good ordinary to good mild, 63s to 70s; fine, 78s to 80s. 179 bags Mocha sold at 90s to 95s. 165 casks 20 barrels 50 bags Jamaica sold: fine ordinary, 53s to 56s 6d; pulpy low ordinary to ordinary colour, 60s to 70s. 240 bales 187 half-bales Costa Rica part found buyers; ordinary to good, 94s 6d to 107s; low

mixed ungarbled, 81s. 150 bags Natal 59s to 66s. 185 bags washed Santos sold at 62s 6d. 3,138 bags Guatemala part sold at 56s 6d to 71s. Of 3,115 bags Rio, the ordinary qualities were taken in. A portion of the washed sold at 54s to 61s. 322 bags Bahia sold at 48s 6d to 56s 6d. 279 bags La Guayra 56s to 62s 6d. A floating cargo of St Domingo is reported at 51s per cwt for a near port. The export deliveries continue very large, and recent arrivals have not caused any material increase in the stock.

TEA.—The market is rather quiet, but yesterday there was rather more business done in middling to good grades of congou. Public sales were held on Tuesday and Wednesday, the total quantity printed being 17,703 packages. Congous printed with reserved prices were bought in. The teas sold were chiefly the lower grades of red and black leaf congous, with a few parcels of siftings—prices are on the whole in favour of buyers. Siftings and broken leaf realised 3d to 7d per lb; inferior black leaf, 6½d to 7¼d; common, 9¾d per lb. Common green teas sold at very low rates. The next sales of Indian tea are declared for the 9th inst. The stock in the United Kingdom on the 1st inst. was 97,000,000 lbs against 107,500,000 lbs last year.

RICE.—During the week a steady business has been transacted, and prices remain without alteration. 7,506 bags Bengal by auction were only partly disposed of: good white at 11s 9d to 12s. 3,392 bags damaged Rangoon were bought in. By private contract several parcels of white Bengal are reported sold at 10s 3d to 12s 6d. Ballam has sold at 9s 3d to 10s 6d; field Siam at 8s 9d. 500 tons Madras have sold to arrive at 10s, about 18,000 mats Saigon at 8s 10½d ex ship, and 600 Askoolie to arrive at 10s to 10s 3d per cwt ex quay.

IMPORTS and DELIVERIES of RICE to April 29, with STOCKS on hand.

Stock	38670 ...	40390 ...	41340 ...	15660

BLACK PEPPER.—The few sales effected by private contract have been at former rates, including Penang at 4⅞d to 5d; Singapore, 5⅜d. At the public sales, 332 bags of the former part sold at 4⅞d to 5d for low to good. 583 bags Singapore were taken in at high prices. One lot superior sold at 5⅜d. 197 bags Malabar were withdrawn. A parcel of about 25 tons Aleppy now afloat has sold at 5⅞d. A speculative contract has been made for delivery at the end of the year at 4⅜d per lb for Singapore or Penang.

WHITE PEPPER.—There is an improved demand, and the latest sales made in Singapore show fully ⅛d recovery, viz., 7¼d to 7⅜d. 83 bags by auction realised these prices, and 29 bags of indirect import 7⅛d per lb.

OTHER SPICE.—338 cases Cochin ginger chiefly sold upon former terms: good ordinary rough, 44s to 45s; a few lots rather bold and scraped, 75s to 80s per cwt. 559 bags pimento obtained 1¾d to 2d. 105 packages nutmegs were partly sold upon former terms: Penang brown, 120's, 2s 1d; 88's, 2s 3d; 80's, 2s 5d; 75's to 73's, 2s 7d to 2s 8d; 65's 3s 6d. 3 cases Penang mace sold at follows: good bold, 3s 8d to 3s 9d; slight wormy, 3s 6d. 679 bags Zanzibar cloves were taken in at 2⅞d to 3d. 3 cases superior bold Bencoolen sold at 10¼d to 11d. 645 bags ordinary Amboyna withdrawn. 6 casks low sold at 4d. 204 bales Ceylon cinnamon part sold: first sort, 2s 10d to 3s; second sort, 2s 7d to 2s 10d; third sort, 2s 2d to 2s 9d; fourth sort, 1s 11d to 2s per lb. 371 bags chips were bought in. 768 boxes cassia lignea of recent import sold at and after the sale. One lot, pile 1, obtained 121s. The remainder went at a reduction: good, pile 2, 109s to 110s; pile 3, no price given. 600 boxes unworked withdrawn.

SALTPETRE.—A few sales have been effected in Bengal at rather lower rates. Refraction 9¾, 26s 3d, short prompt; 9¼, 26s 9d, usual terms; and 6½ to 5, 27s per cwt, short prompt. There has not been any further business for arrival.

IMPORTS and DELIVERIES of SALTPETRE to April 29, with STOCKS on hand.

Deliveries last week, 290 tons.

INDIGO.—Declarations for the sales, which commence next Tuesday, amount to 13,147 chests. The May sale last year was 6,850 chests.

COCHINEAL.—At the public sales on Wednesday, 981 bags Teneriffe rather more than three-fourths sold at full prices, and there was some improvement in the demand. Silvers, 2s 3d to 2s 5d; blacks, 2s 4d to 2s 8d. 61 bags Honduras and Mexican were bought in.

OTHER DRYSALTERY GOODS.—A quiet tone is prevalent in these markets, and the transactions generally have been of limited extent. Bengal turmeric has sold at 18s to 18s 6d. 73 bales Bengal safflower by auction were taken in. Privately business has been in middling to fine. Cutch and gambier have met little inquiry.

SHELLAC.—At the public sales 295 cases part sold upon barely former terms: reddish to fair orange, 105s to 115s; garnet, 97s 6d per cwt.

MOTHER-O'-PEARL SHELLS.—The parcels by auction this week went at about former rates, including Manila at 7*l* 15s to 8*l*; Bombay at 4*l* to 7*l* 2s 6d. Macassar bought in at 13*l* per cwt.

METALS.—A want of animation is the leading feature in these markets. For tin a further decline has been established, and foreign is still unsettled. The latest sales of Straits were at 124*l* to 125*l*, and afloat at 123*l* to 124*l*. English may be quoted 126*l* to 128*l*. The stock of spelter in the chief ports of the Kingdom was on the 1st inst. 5,100 tons. Market dull, and the prices almost nominal. A good business is reported in Scotch pig iron, and the deliveries are very large when compared with last year. The price has advanced to 56s to 56s 3d cash. No change can be quoted in copper. A few sales have taken place, chiefly in Chili, &c., at last week's prices. No change to notice in lead.

JUTE.—Transactions by private contract have been unimportant. At Dundee trade remains quiet, but owing to the very large consumption going on an early revival of demand is expected. At the public sales yesterday 6,190 bales about one-third part sold at easier rates for common kinds. The range was 18*l* 10s to 25*l* 15s per ton for ordinary to fine. All the better marks obtained about former rates.

MANILA HEMP.—A quiet tone pervades the market, and the transactions privately are limited. The stock on the 1st instant amounted to 2,920 tons, against 1,010 tons last year, and 1,930 tons in 1869 at the same date.

LINSEED continues steady. Calcutta, 63s 6d to 63s 9d; Bombay, 64s. The former to arrive, 61s 6d. A cargo of Black Sea off the coast has sold at 63s per quarter.

OIL.—The price of linseed shows a further slight advance, viz., 32*l* 5s on the spot, and there are buyers for delivery in the next four months at 5s more, but no sellers. English brown rape steady at 43*l* 5s to 43*l* 10s; refined, 45*l* 10s; foreign 46*l* upwards, according to quality. Cocoa-nut remains firm. Cochin, 46*l* to 47*l*; fine, 49*l* to 50*l*; the latter very scarce. Palm dull. Fine Lagos, 47*l* per ton. Fish oils have been neglected. Sperm, 83*l*; pale seal, 37*l* 10s; cod, 35*l* 10s. A cargo of olive sold by auction "without reserve" at 44*l* 10s to 45*l* 10s per tun.

PETROLEUM continues dull. Refined, 1s 4½d; forward deliveries, 1s 5½d to 1s 5⅝d per gallon.

TURPENTINE.—Spirits quiet. American, 36s; French, 35s per cwt.

TALLOW.—Russian has been steady during the week at 6d to 9d recovery on recent depressed quotations, but the supply of Australian declared for sale to day is rather large: Petersburg on the spot 43s 3d to 43s 6d; June, the same; last three months, 45s 3d per cwt.

PARTICULARS OF TALLOW—Monday, May 1, 1871.

POSTSCRIPT.

SUGAR.—The market continues flat. West India is about 6d per cwt cheaper for the week. Sales to-day 260 casks, including Barbadoes by auction at previous quotations, making 1,600 casks for the week. 2 casks 255 bags Natal sold at 30s to 36s. Privately the sales were unimportant.

COFFEE.—862 casks 352 barrels and bags plantation Ceylon by auction sold at about the previous quotations. 691 bags native part sold: good ordinary, 54s; bold, 57s 6d. The sales of other kinds were restricted to small parcels.

SPICES.—No change.

DRYSALTERY GOODS.—426 chests lac dye were bought in. 174 bales Bengal safflower part sold at much lower rates for inferior qualities.

METALS.—Tin sold as low as 124*l* cash.

OILS.—At auction 70 tons colonial sperm were withdrawn. 473 casks palm part sold at 31*l* to 34*l*. 148 casks Ceylon cocoa-nut sold at 39s 6d to 40s 6d per cwt.

TALLOW.—Town was raised to 45s. At the public sales 2,350 packages Australian went 6d to 1s above last Friday's prices. Beef, 37s 6d to 41s 6d; mutton, 41s 6d to 42s 6d. 48 casks South American sheep, 41s 6d to 42s 6d per cwt.

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market is rather easier than last week with more doing at the close. Dutch crushed has been sold at 33s 6d in second hands for parcels shipped to London, at which price there is a good inquiry.

DRY FRUIT.—In currants there is no alteration to report. Demand is a small steady one, and holders are firm, as they might be expected to be in sight of the present condition of stocks. Valencias and Elemes are without alteration in value. Chesmes more inquired for, but all kinds of raisins slow of sale.

ENGLISH WOOLS.—Very firm, and a large business doing.

COLONIAL WOOL.—The public sales progress steadily at full rates; attendance good, competition brisk.

FLAX.—Market firm.

HEMP.—Market very dull, and but little business done this week.

SEEDS.—The seed trade continues firm for all descriptions.

TOBACCO.—We have no alteration to report in our market for North American tobacco. Sales effected have comprised but small lots for immediate requirements. Prices are without alteration. In other growths there has been a moderate amount of business done; prices of suitable qualities have a tendency to advance.

METALS.—The transactions of the week have been limited. Copper is very quiet indeed, and is obtainable rather under last week's rates. Iron is steady. Tin is inactive, and prices have again become rather easier. Spelter is well maintained, although in but small demand. Lead is firm. Tin plates continue to meet a ready sale.

METROPOLITAN CATTLE MARKET.

MONDAY, May 1.—The total imports of foreign stock into London last week amounted to 16,297 head. In the corresponding week in 1870, we received 8,262; in 1869, 15,988; in 1868, 4,999; and in 1867, 12,019 head.

The cattle trade to-day has been characterised by quietness, and prices have had a drooping tendency. The show of stock has been much more extensive, owing to the German animals being allowed to pass to the market. As regards beasts, the arrivals from our own grazing districts were on a moderate scale, and some prime animals were noticed in the supply. The condition of the foreign stock, also, was on the whole satisfactory, and about 160 Oporto and about 400 Gothenburg beasts have been disposed of, at very fair prices. Generally speaking, however, the demand has lacked activity, and prices have had a drooping tendency. The extreme quotation for the best Scots and crosses has been 5s 8d, but this has been quite exceptional, 5s 6d per 8 lbs being the general top figure. The market has been fairly supplied with sheep. The trade has been without feature, sales progressing slowly at about late rates. The best Downs and half-breds have realised 5s 10d to 6s per 8 lbs. About 1,200 Belgian sheep have been detained at the waterside. Lambs have changed hands quietly, at previous quotations. Calves have been dull, and the demand for pigs has been inactive.

SUPPLIES ON SALE.

	May 2, 1870.	May 1, 1871.

Veal	5	0	5	4	Small pork	4	8	5	4

Lamb, 7s 0d to 8s 0d.

HOP MARKET.

BOROUGH, Friday, May 5.—There has been a fair amount of animation in the hop market, and prices have been well maintained, more particularly of fine qualities:—Mid and East Kents, 40s to 140s; Weald of Kent, 40s to 75s; Sussex, 35s to 70s; Farnham and country, 75s to 112; olds, 15s to 50s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, May 5.—Large supplies have been on offer. With a slow trade, prices have ruled as under:—English regents, 50s to 90s; Scotch regents, 50s to 80s; rocks, 45s to 65s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 5.—The inquiry continues active, and all useful kinds meet with ready sale on arrival at full rates. On Wednesday next public sales will be held here with 1,700 bales Peru and Lima, about 700 bales River Plate, and a few hundred bales sundry kinds, all of recent importation.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, May 5.—There has been an average attendance at this market to-day, and wheat was in good consumption, at 1d to 2d advance. Flour was quiet; Indian corn 9d dearer; barley unchanged; beans, 38s to 39s; new, 40s 6d to 41s. Little business was passing in peas, but oats and oatmeal fully sustained the rates of last Tuesday.

WAKEFIELD, Friday, May 5.—On Tuesday at Leeds there appeared a disposition to resist further decline, but since then a firmer feeling has gained ground, with a determination on the part of the growers of wheat to keep their samples rather than take lower rates. To-day the trade shows more tone at the market, and although no great extent of business has taken place, last Friday's rates are fully maintained. Very little barley offering. Other articles quite as dear.

The Gazette.

BANKRUPTS.

TUESDAY, May 2.

Thomas Elsom Cornell, Hart street, Mark lane, wine broker.
Charles George Crawford and William Cruickshank, Leadenhall street, East India merchants.
Henry James Elliott, Kentish town road, corn merchant.
James William Martin, East Dulwich, builder.
Samuel Asquith, Cleckheaton, Yorkshire, fishmonger.
William Balle, Exeter, printer.
John Brandt, Manchester, merchant.
William Walter Douglas, Colchester, lieutenant in the army.
Charles William England, Kingston-upon-Hull, oil merchant.
John Keast Hayle, Cornwall, slate warehouseman.
Charles Cullen Mercer, Teignmouth, builder.
John Northall and Stephen Smart, Netherton, Worcestershire, gas tube manufacturers.
John Pearse, Torquay, builder.
Watson Robinson, Blyth, Northumberland, newspaper proprietor.
Hence Shaw Birkenhead, [illegible]
William George Tratt, Gravesend, tobacconist.
James Wills Stockwell, Devonshire, machinist.

THE GAZETTE OF LAST NIGHT.

BANKRUPTS.

Frederick Chadwick, Selwood terrace, Fulham road, Brompton, surveyor and builder.
Thomas Stenning, Tynemouth, miller and baker.
John Parrott, 82 Dunning-street, Everton, Liverpool, master mariner.
Thomas Carter, Leverage Hall Aspenden, Buntingford, farmer.
Elizabeth Fountain, Scarborough, innkeeper.
Squire Hardy Bradford, wool dealer and manufacturer.
Albert Vye Worcham, grocer and provision merchant.
William Harper, Alexandra buildings, Russell street, Plymouth, [illegible] undertaker, contractor and coal merchant.
James Bowler, Alton, grocer, ironmonger and general store dealer.

SCOTCH SEQUESTRATIONS.

Thomas Blair Wightman, Glasgow, carpenter and joiner.
John Grant, New street, Stonehouse, and Oswald street, Bridgeton, Glasgow, grocer and spirit dealer.
Alexander Wilson, Aberdeen, ironmonger.
William Morrison, Portobello, grocer.
John Findlay, Union street, Aberdeen, jeweller.
Donald Simpson, Dounreay, Reay, farmer.
William Orr, Carruckan, &c, Edinburgh, dairyman.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident:—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN.

Is extensively used for all kinds of

OUT-DOOR WORK.

EDUCATION.—"ONE YEAR'S Good Schooling" at the Engineering and Commercial College, Harrow, close to the station.—A few ANNUAL VACANCIES.—Parents anxious to give their boys, before they put them into any business, a year's sterling instruction in a highly recommended boarding school, of limited number, near town, to be perfected (even if backward in penmanship, commercial and private correspondence, arithmetic, bookkeeping (or mathematics and drawing), French conversationally, and gentlemanly manners, are invited to address the Principal, who is assisted by efficient and hard-working masters. Younger boys, to be prepared for public schools, the professions, and competitive examinations, are received for a longer period. Dry playground, with a gymnasium and a splendid enclosed field close to the house, which latter is replete in all its appointments. Highest references as to liberal board, kind treatment, excellent health, and first-class progress of the pupils. Eight first-class masters are engaged to secure the success of the pupils. Terms—Full course under 12, 35 guineas; under 14, and 40 guineas per annum; under 16 years of age. Fee for laundress, fee for books and stationery, and for the use of drawing, reading, singing and brass band and gymnasium. Fee per quarter are the only extras. Established 1857. Address to VELLERE, Harrow.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful to its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular can be had and the Truss (which cannot fail to be forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.
Mr WHITE, 228 Piccadilly, London.
Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 6d. Post-office orders to be made payable to John White, Piccadilly.
NEW PATENT
ELASTIC STOCKINGS, KNEE CAPS, &c. for VARICOSE VEINS and all cases of WEAKNESS and SWELLING in the LEGS, ANKLES, and FEET. They are porous, light in texture, and inexpensive, and can be washed without losing their shape, and are drawn on like an ordinary stocking. Price [illegible] and [illegible] each. Postage 6d. Directions for measurement and prices sent on application to
HIGGS, 314 Strand, and 75 Piccadilly, London.

ENDOWED SCHOOLS COMMISSION.

At an influential public meeting, held on Friday, the 21st April, 1871, at the Mansion House, London,

The Right Hon. the Lord Mayor in the Chair,

Resolutions were unanimously passed condemning the proposed extinction of Emanuel Hospital and other Endowed School Charities, upon the principle that "there shall be no gratuitous education, except as the reward of merit"; and a Committee was appointed to give effect to such resolutions.

At a meeting of that Committee, held on the 28th April,

The Right Hon. the Lord Mayor in the Chair,

it was resolved—

"That this Committee protests against the principle of the transfer (unless under very exceptional circumstances) of educational and charitable endowments, given for the benefit of the poor, to purposes connected with the education of the middle classes, or the diversion of endowments given for the benefit of one locality to another."

Trustees of School Charities and others agreeing with the principles of this resolution are requested to communicate with "The Secretary, School Trusts Defence Committee, Mansion House, London."

MEMBERS are informed that a SET of the TIMES NEWSPAPER from 1785 to 1844 is now placed in the Reading Room for Consultation.

INDIA OFFICE, 1st May, 1871.

THE SECRETARY OF STATE FOR

India in Council hereby gives notice, that the Government of India have informed him that it is their intention to issue the following Notification in India on the 1st May, 1871.

FINANCIAL DEPARTMENT.

1st May, 1871.

NOTIFICATION.

With reference to the Notification, No. 3,288, dated 16th December, 1869, the Governor-General in Council is pleased to grant to holders of the 30 lacs of debentures, payable on the 4th July, 1871, the option of having those debentures inscribed as a loan to the Government of India on the following terms:—

1. Promissory notes will be issued for sums of rs 500, and for sums above that amount in even hundreds. The notes will be payable to order, and interest thereon will be paid half-yearly on the 4th January and 4th July in each year.
2. Interest will be paid on this loan at the rate of four-and-a-half per cent. per annum, during the first ten years of currency and thenceforward, viz., from the 4th July, 1881, inclusive, at the rate of four per cent. per annum.
3. The notes will be issued in a form similar to that employed for the notes of the four per cent. loan of 1st May, 1865.
4. No part of the loan now announced will be paid off before the 4th July, 1881, nor without a previous notice of three months, to be issued at any time after the 3rd April, 1881.
5. Applications in writing from persons who may desire to transfer the amount of their debentures into the new loan may be made to the Secretaries and Treasurers of the Banks of Bengal, Madras, or Bombay, or to the officers in charge of any treasury at which the interest on the present debentures is payable.
6. His Grace the Secretary of State for India will be requested to allow similar transfers of any of the debentures held in England.
7. No applications for transfer will be received after the 4th July next.

Applications in writing from holders in this country of the debentures referred to in the above Notification, for their transfer into the new loan, will be received at the India Department, Bank of England, up to the 31st instant. M. E. GRANT DUFF.

TASMANIAN GOVERNMENT

LOAN FOR £52,800.

IN SIX PER CENT. DEBENTURES.

Authorised by the Tasmanian Parliament under the Act 31 Victoria, No. 9, assented to 11th October, 1867, to consolidate certain Debentures of the Colony of Tasmania, and secured upon the Public Revenues of the Colony.

The Bank of New South Wales and the Consolidated Bank (Limited), as Agents for the Tasmanian Government, have been instructed to negotiate the said Loan for £52,800.

The Loan will be issued in Debentures of £500 and £100 each, bearing interest at 6 per cent. per annum from the 1st of July next, and the Coupons of the said Loan are payable upon the 1st of January and 1st of July in each year, at the Consolidated Bank (Limited), where also the principal will be payable on the 1st day of July in the year 1898.

Copies of the Act with the Debentures and Coupons can be seen at the Bank of New South Wales and the Consolidated Bank (Limited).

Tenders in the form annexed will be received at the Bank of New South Wales, No. 64 Old Broad street, up to Two o'clock on Thursday, the 11th instant, where and when they will be opened in the presence of the Agents, and of such of the applicants as may attend.

The Debentures will be allotted to the highest bidders, provided the prices offered are not below the minimum price, which will be fixed by the Directors of the two Banks, and placed on the table in a sealed envelope previously to the opening of the Tenders, but will only be opened if the whole amount has not been tendered for at and above the minimum.

Tenders at a price including a fraction of a shilling other than sixpence will not be preferentially accepted, and should the equivalent Tenders exceed the amount of the Debentures to be allotted, a pro rata distribution will be made.

Payment of the Debentures will be required as follows:—

10 per cent. on application, and

The balance on the 30th June next, when the Debentures will be delivered.

Forms of Tender may be obtained at the Bank of New South Wales and the Consolidated Bank (Limited).

BANK OF NEW SOUTH WALES,
64 Old Broad street, E.C.
CONSOLIDATED BANK (Limited),
52 Threadneedle street, E.C.

4th May, 1871.

FORM OF TENDER.

To the Directors of the Bank of New South Wales, and Consolidated Bank (Limited).

Gentlemen,— hereby Tender for £* Debentures of the Tasmanian Government, according to the annexed notice of the 4th instant, on which enclose the required deposit of £* , and undertake to pay £* for every £100 in debentures, and to accept the same or any less amount that may be allotted to , and to pay the balance in conformity with the terms of the said notice.

Name .....
Address .....
Date .....May, 1871.

* The amount also in words.

OXYGENATED WATER HOLDS IN

Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative drought, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for invalids. Price 4s per dozen half-pints.

Laboratory, 36 Long Acre, and all Druggists.

SOCIETE ITALIENNE POUR LE CHEMINS DE FER MERIDIONAUX.

Par délibération du Conseil d'Administration, l'Assemblée Générale Ordinaire des Actionnaires, conformément à l'Article 29 des Statuts de la Société, est convoquée pour Samedi, 10 Juin prochain, à midi, au siège de la Société à Florence, Via Renaj, 17.

ORDRE DU JOUR.

1°. Rapport du Conseil d'Administration.
2°. Compte rendu de la gestion pour 1870, bilan présomptif de 1871, et délibération sur le dividende.
3°. Renouvelement du Conseil d'Administration, d'après l'Article 41 des Statuts de la Société.
4°. Election de trois Réviseurs des comptes et de deux suppléants.
5°. Faculté au Conseil d'Administration du recevoir en dépôt les obligations et les bons de la Société.
6°. Proposition pour la construction d'un bassin de ravoub dans le port de Brindisi.
7°. Augmentation du capital social.
8°. Modifications à l'Article 52 des Statuts, paragraphe 4ème, lettre B.

Le dépôt des titres, suivant l'Article 22 des Statuts, pourra s'effectuer depuis le 27 jusqu'au soir du 31 Mai prochain:—

à Florence, à la Caisse Centrale de la Société.
à Naples, à la Caisse Succursale de l'Exploitation.
à Turin, à la Société Générale de Crédit Mobilier Italien.
à Milan, chez M. Jules Belinzaghi.
à Gênes, à la Caisse Générale.
à Livourne, chez MM. M. A. Bastogi et Fils.
à Londres, chez MM. Baring Brothers et Cie.

Les formalités a remplir pour le dépôt des titres susdits ont été annoncées par la Gazzetta Ufficiale del Regno d'Italia, No. 118, du 29 courant, et MM. les Actionnaires pouvront en prendre connaissance chez les Banquiers susdits, ainsi qu'au siège de la Société à Florence.

Florence, le 30 Avril, 1871.

GREAT LUXEMBOURG COMPANY.

ISSUE OF 25,000 ORDINARY SHARES "TO BEARER" OF £20 EACH.

In accordance with the resolution of the Half-yearly General Meeting of this Company on the 25th instant, the Directors now offer 25,000 of the unissued Ordinary Shares of the Company of £20 each. TENDERS stating the price per fully paid-up share and the number of shares desired, in the form annexed, in sealed envelopes, marked "Tenders for Shares," are to be sent to Mr F. Horncastle, the Secretary of the Company, 6 Great Winchester street buildings, E.C., on or before Five o'clock on WEDNESDAY, the 10th May next, enclosing a banker's receipt for the deposit of £1 per share, which will be returned if no allotment be made.

Deposits can be paid to the bankers of the Company, the London and County Bank, 21 Lombard street: or to the North-Western Bank, Liverpool; Messrs Cunliffes, Brooks, and Co., Manchester; and the National Bank of Scotland, London office, Edinburgh, Glasgow, and branches in Scotland.

The shares will be allotted to the highest bidders, provided the prices offered are not below the minimum price to be fixed by the Board previous to the opening of the tenders.

The remaining payments on the shares so allotted will be as follows, viz:—

A further payment on allotment of such sum as will reduce the amount unpaid to £10 per share.

A call of £2 per share on the 10th August, 1871,

A second call of £2 per share on the 10th November, 1871.

No subsequent calls will exceed £2 per share, which will be made at the discretion of the Directors at intervals of not less than three months, with one month's notice by advertisements.

The shares on which all due calls have been paid will be entitled to a pro rata proportion of dividends.

Interest at the rate of 7 per cent. per annum will be charged on all calls in arrear.

Persons desirous of paying up all calls in full must tender on a special form provided for that purpose. Dividends on these shares will begin to accrue from the date of payment.

Forms of tender can be obtained at the Offices of the Company.—By order,

F. HORNCASTLE, Secretary.

Great Luxembourg Company, 6 Great Winchester street buildings, London, E.C., April 29, 1871.

FORM OF TENDER FOR ORDINARY SHARES OF £20 EACH.

No.—

To the Directors of the Great Luxembourg Company.

Gentlemen,— hereby tender for Ordinary Shares of this Company, according to the annexed Notice of the Twenty-ninth of April last, at the price of £ per share, on which enclose the bankers' receipt for the required deposit of £ and undertake to accept the same or any less number that may be allotted to , and to pay the further sum of £1 per share on allotment, and all further calls when required on the shares so allotted, in conformity with the terms of the said Notice.

Name in full.....
Address .....
Usual signature .....
Date .....May, 1871.

GREAT LUXEMBOURG COMPANY.

Receipt for Deposit on New Ordinary Shares of £20 each.

No.—

Received of on account of the Directors of the Great Luxembourg Company, Brussels, the sum of Pounds, being the deposit of £1 per share on an application for New Ordinary Shares of said Company of £20 each.

For the London and County Bank,

....

21 Lombard street, London. 1871.

THE FRENCH INDEMNITY AND THE ENGLISH MONEY MARKET.

An impression has become general that in the money market we need not for the present think much of the "French "Indemnity," and of the consequent cash movements which it involves. But probably that impression is erroneous. A period is now again when our market may really be affected materially by it. By the revised treaty, 20,000,000*l* of the indemnity is to be paid within a month after the taking of Paris by the Versailles Government, and every sign indicates that this capture cannot near be long delayed. The Commune is gradually getting weaker and more divided; M. Thiers and his Government are gradually getting stronger and gaining strength as against the *Commune* and in favour of French unity, if not for other purposes and against other enemies. Almost as soon as Paris is finally taken M. Thiers will make a payment to Germany. It will be advantageous to French credit not to let the whole sum be unpaid till the very last hour.

The first instalment of the indemnity may not indeed be taken in coin or bullion. Count Bismarck has said with reference to the army arrears that he will be content "with "the inexhaustible produce of the printing press"—that is, with banknotes, and probably, too, he will take part of the indemnity in notes. But it seems to be thought that on this account the payment will be unimportant to us. There will be no loan, it is said, in England, and none to which the English will subscribe; so why should we care? But this is a mistake. The issue of notes of the Bank of France in large quantities will affect this market very much. Let us remember what these notes are. They are not convertible notes, which anyone that presents them at the Bank can obtain coin for. If they were, the bullion reserve in the Bank of France would be the primary source of payment; and it would be only through that reserve that other banks and money markets could be affected. But these notes are *in*convertible; they are in fact drafts payable by the Bank at some uncertain time in future. If therefore the German Government takes these drafts in large quantities and above what can be used in Germany, it must sell them if it wants to use them. The German Government is particularly sure to want to part with these notes: it is not likely to keep itself "the price of blood" —the ransom of France, which some future French Government might like not to pay if it was strong enough to refuse. It will like to pass on the tainted notes to an innocent third party, and will wish to invest them in interest-bearing securities. In consequence, many of them, soon after the issue, will be on sale in London, and will be bought in London. The credit of the Bank of France has always been so good that large numbers of its notes will easily be disposed of in Lombard street. And the effect will be a tendency, greater or less, to a rise in the value of money, because we shall have disposed of part of our present funds by what is in fact a loan, though in form a very unusual one, to a foreign and borrowing country.

Even if the indemnity, or part of it, be taken not in bullion or banknotes but in *rentes*, that indemnity will still have a considerable effect here. These *rentes* are very tempting commodities to speculative buyers, and there is a great deal of money at present only too ready to aid speculative buyers in any operation that is likely to be successful, and which enables them to give security.

THE AMERICAN TREATY.

THE American treaty, of which we have at last what we may fairly accept as an official text, is one to which exception is very likely to be taken by the sticklers for the letter of the old international law, and to which exception is certain to be taken by politicians of the type of Mr Roebuck, who have made it their object to snub America, and to disappoint her pretensions in every way. But so far as we are able to judge of its provisions, it seems to us a wise and cautious treaty, which, though it enlarges the international obligations of neutrals in time of war,—the strictly *international* obligations, we mean, as distinguished from those municipal obligations which England and most other nations have assumed because they feared to assert fully their theoretic international rights,—does not really enlarge the scope of those practical duties which "good comity" entitles a belligerent nation to expect from a friendly nation which keeps out of the quarrel. In short, our view is that the principles which the treaty accepts were already, though not principles of admitted international obligation, the principles which practically governed all sincere neutrals in their relations with belligerents, and that it is just as well to formulate these principles and agree to recognise them reciprocally in all our relations with the United States,—and indeed with every other maritime Power which will accede to them,—for the future. It may be thought that in agreeing to be bound in relation to the past by obligations which we had not then recognised, even though in our own home legislation we had tried to enforce them upon ourselves, we are making too much concession to the United States. But for those who look at the dispute as practical statesmen, nothing can be clearer than that we should have endeavoured to enforce on the United States, had the case been ours, precisely the kind of principles by which the United States wish to judge us; and that, on the whole, it is very reasonable, and for our own advantage, that neutrals should be bound by those rules. "A neutral "Government is bound to use due diligence to prevent the "fitting out, arming, or equipping within its jurisdiction of any "vessel which it has reasonable grounds to believe is intended to "cruise or carry on war with a Power with which it is at peace, "and also to use like diligence to prevent the departure from its "jurisdiction of any vessel intended to cruise or carry on war "as above, such vessel having been specially adapted, in whole "or in part, within such jurisdiction to warlike use." Well, it is quite true, as the British Government asserts, that these were not principles of international law "in force at the time the "claims came into existence;" but if they were not more or less recognised as the right principles of action, the arrest of the celebrated Rams by the voluntary act of the Government was a most unjustifiable proceeding. The simple fact is that we acted long ago, so far as we could, on the principles which we now formally accept for the future; and the only result of refusing to allow our past policy to be internationally judged by those principles, would be that we should have seemed to the United States to have been taking shelter under a legal distinction, almost a legal quibble, from the legitimate consequences of principles virtually admitted by ourselves, and often more or less enforced by us upon others. It was far manlier and wiser to agree at once to have our conduct in relation to the escape of the cruisers measured by the principles which we ourselves admitted as at the foundation of our municipal law in the Foreign Enlistment Act. And we are quite sure that England and America, in accepting for the future the reciprocal international obligation to use "due diligence" to prevent the escape of such cruisers, have taken a very long step towards cordial relations, and what is more, taken a very considerable precaution against the danger of having our own commerce swept from the sea, whenever we may be next at war, by similar cruisers issuing from American ports.

The conditions proposed for the assessment of the damages (if any) payable by us for want of due diligence in relation to the Alabama and her consorts, seem perfectly equitable. Commissioners named by the President, the Queen, the King of Italy, the President of the Swiss Confederation, and the Emperor of Brazil, will be as fair a tribunal as we could wish for. No doubt we shall have to pay for the damages caused by the *Alabama* herself, against the escape of which it will be hard to show that we used "due "diligence," and for the ships destroyed by which accordingly we shall probably be required to give compensation. There is, however, no sign of any intention on the part of the United States to claim damages for any *indirect* mischief done to their commerce—*e.g.*, the loss of profit by shipowers, in consequence of the alarm caused by the Alabama and her consorts,—and we feel little doubt that the United States have virtually agreed to give up all claims of that kind, for which there could really be no proper measure, and which might therefore be swelled to an indefinite extent. On the whole, though the arrangement proposed will almost certainly issue in the payment of a considerable sum of money by Great Britain, we regard the treaty with satisfaction, and shall consider the fine as anything but wasted if it brings about a hearty understanding with the United States, and imposes on maritime neutrals the necessity of making stricter provisions for the arrest of such cruisers as the Alabama and her consorts in future.

THE "WAR OFFICE SCANDAL."

A PARAGRAPH, with this agreeable heading, has lately "run" round the public press, and has attracted the greatest attention because it related to persons in high office, of long standing and great trust in the public departments. The entire facts are now published in the appendix to the last report of the Commissioners on Public Accounts, by whose investigations the "scandal" was detected; and the result is that, though no definite bad intention can be imputed to the accused persons—though they did not mean to take any public money to which they had no right—yet that they nevertheless did take such money—that they ought not to have taken it, and that they have now been compelled to refund it. There was no real dishonesty in the transaction, but there was a culpable inattention to the provisions of the law, and a general stupidity, which is never much to be honoured, and is peculiarly little honourable when in the end it comes to increase the incomes of the stupid persons.

In its essence the matter is very simple. It appears that by the Income Tax Act a certain allowance, or "poundage," is made to "assessors" and "clerks" who are to do the work, and these assessors and clerks are to be appointed by the Commissioners (who are to adjudicate gratis), and to receive the poundage. In the War Office, up to 1863 this rule was regularly observed, and no one received an allowance or poundage, except those entitled to it by law; the Commissioners especially worked for nothing.

But an unexpected difficulty intervened. The money to which the poundage computed by the Act came amounted to considerably more than could decently be spent in paying for the work done. "We did, indeed," says Sir W. Brown, "appoint as many people as we *possibly could* to do the duty, "and we spread it over a considerably greater number of as- "sessors than were really absolutely necessary to perform the "duty." But even on this strange system of appointing as many functionaries "as possible" to discharge a duty, the appropriated stipend was too much. By 1863 a fund exceeding 2,000*l* had accrued, and the question arose how it was to be disposed of. The Income Tax Commissioners and the War Office wrote to the Inland Revenue, and received from them a direction to "distribute it in their discretion among "the parties to whom the Commissioners may consider to be "*entitled* thereto, in such proportion as they may deem "necessary for the services rendered." And we suppose the "Inland Revenue" intended that the sum appropriated by law for certain work should be given to those who really had done that work, however excessive that sum might be in proportion to such a work. This was clearly the right course. For the past, those who had performed the work ought to have had the advantage of the needless liberality of Parliament, and for the future care should have been taken to reduce that liberality within limits, and to pay no more for this work than the usual rate and that paid for other similar work.

Such, however, was not the opinion of the "Commissioners "of Income Duty for the War Office." They distributed the accumulated fund not among the clerks who had done the work, but among certain other clerks who had not done it. They thought themselves justified in using it in aid of wages, "as a charitable grant" to the junior clerks of the War Office—altogether without regard to the consideration whether those clerks had performed the service for which Parliament had voted, and to which it had appropriated this fund. Being directed by the "Inland Revenue" to divide the fund among

those "entitled" to it, the Commissioners thought themselves justified in giving it to persons plainly not entitled.

This course as to the past certainly was not exceedingly wise, but their plan for the future was even worse. Sir W. Brown is asked—"And the Commissioners never felt it to be "part of their duty to intimate to the Board of Inland "Revenue that the amount of poundage was very much "greater than the exigencies of the service required?—No; "because we considered that the same rule was applied to all "the public departments."

So that because Parliament has voted too much money for a service common to all the departments, no one department is to remonstrate and say that it is too much.

But so far, though we may question the wisdom of the Commissioners for Income Duty in the War Office, there is plainly not any ground for an imputation on their honour. They gave public money to persons not entitled to it, but they took none of it, and derived no benefit from it themselves. Unfortunately, they afterwards ceased to be so prudent. Between 1863 and 1868 there were no payments from the "poundage "fund" except for the actual remuneration of work done; and in consequence, in 1868, a considerable surplus again accumulated, and therefore, finding this sum of money without an owner, the Commissioners took it themselves.

"1593. What were the sums in excess of what were paid "to clerks and assessors in the years from 1863 to 1868?—"We found that there was in 1868 an accumulation of about "1,500*l.* which had taken place between 1863 and 1868.

"1594. That was in five years?—Yes, that was in five "years; it was 300*l.* a year, we may say.

"1595. There were three Commissioners?—There were "three existing Commissioners; two had retired, but were still "living.

"1596. That would be about 100*l.* a year each?—We "divided 80*l.* each."

The only excuse the Commissioners have for appropriating the money to their own use was that they understood that the Treasury had sanctioned a similar practice in the Commissioners of another office, and had permitted those Commissioners to derive a benefit from a like poundage. But even so, the Commissioners were bound to apply to the Treasury for leave themselves to take the money.

Sir W. Brown says that "the Treasury exercised a discre-"tion as to the intention of the Act of Parliament. The "Treasury, being the highest financial department of the "Crown, overruled the Act." We confess we do not believe that the Treasury has any authority to overrule Acts of Parliament, and we do not believe that it claims to have. But Sir W. Brown and his brother Commissioners never applied to the Treasury on the subject; if they had, they would have been guiltless, though the Treasury might have been to blame. They thought they were following the decision of the Treasury in an analogous case; and though they were paying themselves, and acting contrary to an Act of Parliament, they never thought of asking leave.

Everyone will agree with the Commissioners of Public Accounts in saying that there was "grave impropriety" in this entire transaction. Intentional dishonesty certainly there was not: the Commissioners of Income Duty for the War Office are far too respectable to take a sixpence to which they did not think they were entitled. But the adjacent species of impropriety there unquestionably was; the Commissioners were far too ready to think they were entitled to take public money which was in their charge, which belonged to others, and which palpably they were not entitled to take.

MR SMITH'S PROPOSAL FOR IMPROVING POOR LAW ADMINISTRATION.

Many years since we heard a statesman, then obscure but now very well known, give a rather remarkable answer. He had been asked why, with his great business capacity, he did not devote himself to the reform of the Poor Law system, and his answer was—"Because, if I once touched that subject, I could never do anything else. It would fill me." We suspect it is a feeling of this kind—a sense of the dreadful magnitude of the inquiry—which at this moment makes both the Government and independent members so reluctant to vote for an application like that made by Mr W. H. Smith on Friday week, for a Committee of Inquiry into the working of the Metropolitan Poor Laws. In a speech of quite remarkable power, indeed almost unanswerable, the member for Westminster exposed the evils now being produced by the administration of the Poor Law within the Metropolitan district. He showed, by unimpeachable figures, that within that area, now occupied by one-ninth of the whole population of the United Kingdom, every seventh man was in receipt of relief from the Union; that the cost of such relief amounted to 1,466,000*l.*, or 9s 1d per head of the population—equal, if London pays a fifth of the income tax, to an income tax of 6d in the pound; that the cost had increased 84 per cent. in ten years; that all evidence tended to prove the growing demoralisation of the people upon the subject of alms; and that the system was creating an army of hereditary paupers, more costly and more dangerous than any army of fighting men. Such a speech, exposing any other evil of similar magnitude, would have excited the attention of the whole country; but so hopeless are the majority of men of dealing satisfactorily with pauperism, so afraid are they of a labour which seems without limit, that they will scarcely even read statements about it; and Mr Smith's speech, which drew commendation from both sides of the House, is already forgotten, and the inquiry for which he moved was refused without a division.

The difficulty, in fact, is one sufficiently appalling. It may be stated broadly that all the economic abuses of the Poor Law, and almost all its evil social results, arise from the custom of allowing outdoor relief. Indoor relief does not matter, except to the rate-payer and the philanthropist. There may be waste within the doors of the Union House, or there may be oppression, but there is no encouragement in indoor relief to the pauperisation of the people. "The house" at the best of times is not a pleasant place. It is a mark of degradation to be there; there is an absence of certain comforts, such as silence, privacy, liberty, and tobacco; families are separated, and there is a discreditable uniform to be worn. Very few persons not bred in a Union enter the House from choice, and immense classes of the poor resist an order to go there with a pertinacity which is one of the difficulties of the Legislature. Unfortunately there is no such resistance to the receipt of outdoor relief. The people conceive that they have a right to it: it is all pure gain, and they press and scramble for it in a way which makes the dole a source of endless demoralisation. Persons who could obtain work constantly demand relief in preference; while the most grotesque stories are afloat among overseers of personations, double reliefs, and other elaborate frauds, which the neighbours rather admire as successful bargainings with an enemy than condemn as shameless swindles. The relief gradually comes to be looked on not only as a legal right, which it is, but as a moral right, which it is not; and is used by its recipients to supplement their wages exactly as it was under the old law. Couples actually marry upon the belief that if they have many children the rates will, in some way or other, provide for their subsistence. The evil, great everywhere, is at its maximum in London; for in the counties it is kept down by the local knowledge of the guardians. They know the applicants, their history, and their means; and they have, in most instances, a direct interest in driving them to work. In London the crowd of applicants is too vast for local knowledge to be of any avail. Neither guardians nor overseers know the poor, and if they did they could make no adequate inquiry into applications which sometimes rise, as Mr Smith showed, to 200, all to be decided in a single hour. The only alternatives are to refuse relief *en masse*, which is illegal and would be cruel; or to grant as little as possible to everybody, thereby rewarding half of them, it may be, for an attempt to plunder public funds.

This, the utter impossibility of individual inquiry, through the existing machinery, is the main source of the failures in the administration of the Poor Law within the Metropolis; and Mr Smith suggests that it should be met by utilising local knowledge, through a much greater subdivision of the guardians' function. He would, in fact, employ a vast number of deputy-guardians, as is done in Prussia, where the right to relief is denied, but where "in Berlin the relief of the poor "was administered by a committee of the Town Council, "which likewise administered the affairs of all the hospitals "and all the charities in the various parts of the city. Under "this committee were 110 district committees, each consisting "of six or seven persons, and these sub-committees ad-"minister what is analogous to our system of outdoor relief.

"All applications for relief were carefully considered and "sifted by the district committees, and there were only two "classes of persons who constantly received outdoor relief— "namely, the infirm or aged, and widows with more than one "child. There was no system for rendering assistance to "able-bodied persons. On the other hand, there was what "was called an extraordinary system of relief, under which "medical advice, food, clothing, and money were given to "persons in destitute circumstances. No one was, however, "relieved from the necessity of finding some means of sup- "porting himself, and assistance was given only to persons "who had been stricken down by some misfortune. The total "population of Berlin was about 700,000, and the whole "number of persons relieved in 1868 was 38,000, the entire "cost of relief, inclusive of hospital relief, being 168,000*l*." He recommended, or rather hoped, that the Committee for which he applied would recommend a similar system here. That it would greatly reduce the number of applicants and of frauds he had no doubt; and neither have we, our doubt being whether in a city like this it would be possible to form an adequate number of sub-committees; whether we should not be driven to choose between an immense increase in the number of overseers, and a "liberal," that is, a wasteful, administration of the law. The former alternative, however, would be a minor evil, for if wisely controlled, an enormous number of overseers need not be a great addition to the charges upon the rates. It is a peculiarity of London, as of all other great cities, that while work occupying the whole day is very dear, work which can be done at odd times is very cheap. An extra five pounds a year is very much valued by very respectable persons, and we cannot but think that one of the medium parishes might try Mr Smith's plan with very great advantage. A parish of 25,000 persons contains usually 5,000 houses; and supposing the Union to appoint a deputy-overseer to each 100 houses and give each 5*l* a year, merely to examine such applications as were made to him for out-door relief, the expense would only be 250*l* a year. Most respectable men would apply for the post, which would not involve great trouble, and would convey a certain authority; and if they did their duty the amount saved to the parish might exceed their cost ten times over, while the master evil of the Poor Law, as administered in towns—its tendency to make outdoor relief a matter of course—would be indefinitely reduced. Of course the guardians would retain their full right of refusal, while their regular overseers, instead of making useless attempts to examine cases for which they have scarcely a minute each, would confine themselves to the perfectly practicable task of guiding and watching the deputies in immediate contact with the poor. The example of the Post Office shows what a large amount of aid very cheap work will bring to a Government department, and we can at present see no reason why this experiment should not be tried. It could very easily be abandoned, and it would not disorganise any part of the existing machinery. If Mr Smith is a guardian himself, we recommend him to push his proposal at his own Board, for once armed with the results of an experiment, his case, already unanswerable in logic, could not possibly be rejected by a House of Commons elected by every householder who pays rates.

BOARD OF TRADE RETURNS.

THE Trade and Navigation Accounts for April have been issued, and we give below a comparison of the figures for this and the two previous years. As our readers are aware, the comparison is necessarily defective—more particularly as regards the import trade—on account of the alteration in the mode of collecting the statistics. Subject to this correction, we find that the declared value of the imports for the four months ended April 30 was 105,059,846*l*, against a computed real value of 84,962,227*l* in 1870, and 77,838,468*l* in 1869. In April only the values were 29,584,942*l*, 28,199,545*l*, and 20,952,970*l* respectively.

The value of the exports of British and Irish produce and manufactures for the four months was declared at—

	£
In 1871	63,279,857
1870	63,014,244
1869	58,428,080

—and in April only at—

	£
In 1871	16,848,442
1870	17,335,470
1869	15,624,470

The following comparison shows the increase or decrease in the imports of the principal articles of foreign and colonial produce during the four months ended April, 1871, as compared with the corresponding period last year (subject to the necessary correction on account of the errors existing in the returns as stated above):—

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Coffee	705,261	1,430,998	725,737	...
Wheat	4,377,112	5,814,486	1,437,374	...
Flour	1,037,300	1,292,719	255,419	...
Cotton	20,405,112	25,308,120	4,903,008	...
Flax	902,631	779,085	...	123,546
Hemp	267,618	556,443	288,825	...
Jute	1,032,462	1,388,201	345,739	...
Salt	2,938,574	2,472,841	...	465,733
Sugar	3,916,274	4,509,295	582,921	...
Tallow	704,923	1,057,867	342,944	...
Tea	4,315,061	4,606,334	281,273	...
Tobacco	469,208	929,852	460,644	...
Wine	1,552,606	2,271,756	719,150	...

The values of exports for the four months compare as follows:—

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Beer and ale	781,185	743,478	...	37,707
Coals	1,660,236	1,657,621	...	2,615
Copper	1,056,672	736,946	...	319,736
Cotton yarn	4,876,900	4,366,840	...	510,060
Manufactures	18,170,056	17,484,512	...	685,544
Earthenware	550,517	463,175	...	87,342
Haberdashery	1,558,452	1,845,097	286,645	...
Hardware and cutlery	1,195,870	1,016,105	...	179,765
Iron and steel	7,040,586	6,446,272	...	594,314
Linen and jute	935,480	821,228	...	114,252
Linen and jute manufactures	2,635,743	2,594,576	...	41,167
Silk manufactures	407,269	687,987	280,718	...
Woollen and worsted manufactures	7,463,729	7,444,382	...	19,347

The following are the totals of wine imported and entered for home consumption respectively in the three months ended April 30, 1870 and 1871:—

IMPORTS.

	Quantities 1870. gals.	Quantities 1871. gals.	Value 1870. £	Value 1871. £
Red wine	2,377,496	2,837,309	610,728	885,025
White wine	2,959,657	3,253,392	941,878	1,386,731
Total of wine	5,337,153	6,090,701	1,552,606	2,271,756

ENTERED FOR HOME CONSUMPTION.

		1870. gals.	1871. gals.
From France	Red	856,656	1,064,275
	White	370,469	163,432
From Portugal		924,639	1,048,032
From Spain	Red	268,865	279,745
	White	1,830,155	1,956,644
Other countries		509,868	702,490
Total	Of wine	4,760,652	5,214,618
	Red	2,093,969	2,433,263
	White	2,666,683	2,781,355

The following is an account of the quantities of certain principal articles of imported merchandise (subject to duties of Customs) remaining in the bonded warehouses of the United Kingdom on the 30th April, 1871, compared with the quantities in warehouses on the 30th April, 1870:—

	1870.	1871.
Cocoa lbs	5,735,600	9,686,831
Coffee	49,727,937	63,733,715
Fruit—Currants cwts	269,207	192,583
Raisins	98,484	69,750
Spirits—Rum proof gallons	*5,236,034	*5,964,211
Brandy	*8,517,411	*13,107,777
Sugar—Refined and candy cwts	242,663	84,431
Unrefined	2,150,900	2,086,502
Molasses	210,522	178,546
Tea lbs	106,310,122	96,668,406
Tobacco—Unmanufactured	52,564,724	47,197,716
Manufactured and Snuff	1,977,850	2,949,980
Wine—From France gals	1,126,824	1,544,249
Portugal	4,038,831	4,291,107
Spain	7,319,550	7,521,671
Other countries	946,769	1,097,516
Total of wine	*13,431,974	*14,454,543

* Including the stock in the Excise warehouses of spirits and wines received under bond from the Customs warehouses, under Act 32 and 33 Vic., c 103.

BUSINESS NOTES.

THE SINKING FUND AND DEFICIENCY BILLS.—The third report of the Committee of Public Accounts contains a good deal of evidence on a subject which we discussed in our issue of the 4th February—the application of the actual surpluses of revenue over expenditure appropriated to the reduction of the debt, not to the reduction of the funded debt, but to the repayment of Deficiency Bills. A good deal of misapprehension, as we pointed out, had occurred at that time in consequence of Mr Lowe, having a surplus to dispose of, using it to repay Deficiency Bills instead of buying in Consols or other stocks as was expected of him after the *Gazette* notice of the existing surplus and its intended application. The evidence amply confirms our view of the procedure. It takes place under an Act of Parliament which contains two contradictory clauses, and is based upon

a mode of calculating the surplus which was never very intelligible, and is exceedingly inconvenient after the reforms of Mr Lowe, by which a disproportionate part of the revenue is collected in the last quarter of the year. As was shown by several witnesses, it would now be possible to calculate a large surplus at the end of a particular quarter, one-fourth of which must be applied to the reduction of the debt, although there may be a deficiency in every other quarter of the financial year. The whole subject is most intricate, and we need not enter for the present on the general question which we before discussed; but there is one practical conclusion which there should be no delay in adopting. As the surpluses are in practice applicable to Deficiency Bills, the *Gazette* notices that a certain sum is to be applied to the reduction of the debt are simply delusive. They are designed to give notice to the public that a portion of the debt in their hands is to be bought in and cancelled, but the notice misleads when the surplus is used to repay some debt which is not held by the public at all. A short Act providing that the *Gazette* should say nothing at all, or should really specify how much of the surplus is to be applied to the funded debt, is immediately required.

Trustees and Debenture Stocks.—A short but rather important Act is now passing through Parliament, enabling trustees who have authority to invest in railway debentures to invest in debenture stocks instead. The enacting clause is to the following effect:—

> A power for trustees to invest trust funds in the mortgages or bonds of a railway company or of any other description of company shall, unless the contrary is expressed in the instrument creating the power, be deemed to include a power to invest such funds in the debenture stock of a railway company or such other company as aforesaid, and an investment of trust funds in debenture stock may be made accordingly.

The change thus made appears to us a very serious one indeed. There is a material difference between debentures and debenture stocks, which has sometimes at least induced testators knowingly to authorise the investment of certain funds in debentures only, and not in debenture stocks. In the one case the testator attached importance to the safety of the entire capital lent by his executors when they put it out at interest, and distrusted the stocks because of the market fluctuations which might endanger a portion of the capital. While we point out however the grave nature of the change made by the Act, we do not wish to dispute its propriety. It has in fact come to be necessary for the simple reason that debentures will soon be a commodity hardly to be got at all, debenture stocks, as it is well known, becoming rapidly substituted for the debenture bonds of all our principal railways. If trustees are to have the choice of a first charge upon railways among the securities permitted to them, they must receive permission to invest in debenture stocks; and as the extensive substitution of debenture stocks for debentures was not foreseen when many wills now being executed were made, there is some occasion for the Legislature to adapt the wills of testators to the altered circumstances. It must at least be granted that the security of debenture stocks will be of the best character, and that the fluctuations of the market are not likely to be extreme. They will not be so marketable a stock as Consols, on account of the comparatively smaller quantity of each particular stock, but they will in return be less exposed to speculative influences and the consequent fluctuations, while the security of the intetest will be practically perfect.

The Price of Consols.—Mr Cracroft, whose business publications we have frequently had occasion to notice, has just composed an interesting statistical diagram as to the price of Consols for a long series of years—viz., between 1789 and 1870.* Diagrams are sometimes not very simple, but the present one is clearness itself. The facts are shown in parallel columns, which indicate to the eye the highest and lowest price touched in each year, and permit an instantaneous comparison of one year with another, while the diagram is also constructed to show the figure of the debt in each year, and for a certain period the yearly average of the Bank rate of interest. Subjoined is a note of the principal events of each year, especially such events as might be supposed likely to affect the funds. The diagram thus compiled is an interesting commentary on English history for the period in question. For instance, the falling price after the outbreak of the Revolutionary wars with France—from 97 in March, 1792, to 47¼ in 1797, and 47¼ in 1798—tells clearly enough the story of the huge burden of the war in which we had embarked, and the peril into which it had brought us. Equally instructive is the comparatively rapid rise to 79 in 1802, when peace had been agreed to, and the fall to 50¼ in the following year, when war had been again proclaimed—a low price being maintained down to 1815. Subsequently, of course, the table shows how the credit of England steadily improved until in 1844 the high level of 101¼ was reached—since which date, with the exception of the short period of Crimean war, the price has fluctuated mainly from the conditions of business—the times of great business or financial activity, or of panic, tending to reduce the price, while a low rate of discount and abundant money keep up the figure. Thus in 1865 the variations of price were between 86¾ and 91½, but after a fall to 84 in the panic of 1866 the figure of 96¼ was reached in 1867—the 2 per cent. period—and has since remained at a high level, the lowest figure even in the panic year of 1870 being 88½ and the highest 94½. There are many other interesting facts which the diagram shows clearly to the eye, but the few we have stated may perhaps suffice as specimens of the kind of information furnished. It appears from a note subjoined that the highest price which Consols ever touched was in 1737, when the price was 107, and as the lowest price was 47¼ in 1798, the extreme variation of the stock has thus been rather less than 60 per 100*l* stock. Since 1831 the lowest price has been 78¾ in 1847, and the highest price having been 102 in 1852, the extreme fluctuation of the last forty years has been rather less than 24 per 100*l* stock.

* Cracroft's Consol Diagram. Effingham Wilson, Royal Exchange.

The Perils of Stockbrokers.—The suit of Macbryde *v.* Eykyn, decided this week by Vice-Chancellor Malins, brings out a danger to stockbrokers in the ordinary course of their business, about which they cannot be too careful. It was a suit by Mrs Macbryde, through her nearest friend, to recover from the defendant, Mr Roger Eykyn, M.P., a stockbroker, the value of 10,200*l* Spanish Passive Bonds, and of two sums of 400*l* and 250*l* which had been lost in speculations on the Stock Exchange, transacted by Mr Eykyn on behalf of the plaintiff's husband. The allegation was that the securities and money which the husband from time to time handed to Mr Eykyn were trust property belonging to the plaintiff as *cestui qui* trust, and that the defendant had notice of the trust, sufficient notice at least to put him upon inquiry. In the result, Vice-Chancellor Malins decided for the defendant, the evidence as described by the Judge certainly refuting the notion that the defendant had notice. The trustees of the settlement were dead; the property, as there was no children and the wife had a power of appointment, really belonged to her absolutely, with the exception of the restraint upon anticipation; and all parties concerned with whom Mr Eykyn had dealings treated the property as absolutely the wife's, while it was not proved that Mr Eykyn knew who was the real owner, much less that it was trust money. But as the law is clear that notice of trust would have made the defendant a participator in the breach of trust, and therefore liable to replace the money, and even such notice as ought to have put him off his guard would have been sufficient, it is easy to see how, in the multitude of transactions a broker might be fixed with notice, though he had no moral responsibility. It is not possible for him to inquire of many different customers whether they are legitimately entitled to dispose of the securities to bearer which they bring to him. Knowing the disposition of the public to speculate, he must know that the improper use of securities by trustees is sometimes not unlikely; but he has no means of testing the truth, though suspicious circumstances may occasionally be talked of in the office without being known to him. Equity Judges, however, according to differences of tastes and temper, may fix him with notice of trust on very slight grounds. In the present case the Vice-Chancellor was very emphatic in rejecting the defendant's liability; but he was obliged to oppose an argument to the effect that the mere knowledge of the property being the wife's was sufficient to put the defendant upon inquiry, and this argument is an illustration of the kind of reasoning which will have an uncertain effect upon Equity Judges. Brokers, therefore, should not slight the danger which is thus hung over them, and would act wisely as a rule in avoiding confidential communications from their clients respecting the ulterior motives of the transactions in which they are em-

ployed. The more communications are restricted to what is necessary the safer they will be.

THE ACCOUNTS OF THE PARIS COMMUNE.—Our Paris correspondent last week gave a very clear statement of the account which the Finance Minister of the Commune, M. Jourde, presented at the beginning of the month. The account however is rather a curiosity in French finance, and on the mere ground of historical interest, as one of the most singular documents in a singular period of French history, it appears to be worth reprinting in full. The following is the account :—

RECEIPTS.	£	£
Found on 4th April in cupboards Nos. 1 and 2, principal desk, and various cash boxes	28,853	
Found on 7th April in the "reserre," in bills, gold, and silver	155,183	
Do. a box containing in thalers a sum of	1,513	
Do. on 19th, a small gold cash box	480	
Do. do., a sum of gold	40	
Copper coin in cellar, not included in the figure of 11,400*l* found on 4th April	20	
Miscellaneous sums found from time to time, after searches	53	
Balance of subscriptions in favour of victims of bombardment	181	
Total	186,324	
Debited to central Treasury by credit of the ex-central Treasury of the finances		186,324
RECEIPTS OF THE VARIOUS ADMINISTRATIONS AND COMMUNAL ESTABLISHMENTS.		
From Bank of France		310,000
From Direction of Telegraphs (including 20*l* from the sale of old paper)		2,020
Communal octroi—payments		338,680
Direct taxes (from principal Treasury)		4,428
Customs—payment by Révillon		1,320
Markets—payments by the market delegates, &c.	£20,784	
— Do by delegate for the "depotoir"	83	
		20,867
Manufacture of Tobacco—payments of the depot managers		70,388
Service of Public Works—payments by Duvivier		239
Registration and Stamps—payment by the director		22,400
Association of Shoemakers—payment by Durand, delegate		31
Municipal Treasury of Hotel de Ville—miscellaneous receipts		51,379
Reimbursements by the National Guard—according to detail at the various Treasuries		19,234
Mairie of 6th Arrondissement—payment by secretary		692
Superannuation Treasury of the employés at Hotel de Ville—retained upon appointments		1
Caution money—Madame Audrieu	£40	
— — Manteuil	40	
— — Finbruke	2	
		82
Produce of various seizures and requisitions—at the Archbishopric (money)	52	
Community of Villers	10	
Money found with the Brothers Dosmont and Demore (according to procès-verbal)	296	
		358
Railways—payment in execution of the decree of 27th April		12,120
Produce of "passe de sacs"		14
		1,040,557

PAYMENTS.	£
There has been paid from the 10th March to 30th April, inclusive—To the diverse municipalities	57,826
Delegation of war	802,263
Intendance	72,533
Delegation of the interior	4,149
— marine	1,170
— justice	220
— commerce	2,000
— education	40
— foreign affairs	4,485
Central Committee	626
Commission of labour and exchange	...
Hotel de Ville and Paris Mairie	3,670
Executive Commission	3,627
Commission of safety	9,401
Commission of money and medals	3.0
Domains of the Seine	837
Telegraphic service	2,004
Ambulance service	400
Registration and stamps	331
Bridges and roadways	1,101
Military hospitals	7,300
Governor of the Tuileries	240
— of the Hotel de Ville	200
Foreign assistance (assistance exterieure)	4,207
Metallurgical association	20
Legion of firemen	3.998
National library	1,200
Official journal	125
Manufactory of tobacco	3,677
Control of railways	80
Commission of barricades	1,780
National printing office	4,000
Direction of posts	200
Direct taxes	92
Association of tailors	800
— of shoemakers	186
General expenses	7,897
Miscellaneous	2,077
	1,005,524
Balance	35,033
	1,040,557

THE DIVERSION OF FRENCH TRADE TO ENGLAND.—From the account which we give elsewhere of the Board of Trade tables an interesting confirmation of the fact which we have several times mentioned, viz., the use now made of England as a depot for goods and produce on account of the troubles of France. On the 30th of April we had the following stocks in our bonded warehouses as compared with the same date last year :—

	1871.	1870.	Increase.
Brandy.....gals	13,107,777 ...	8,517,411 ...	4,590,366
Wine—from France ..... „	1,544,249 ...	1,126,824 ...	417,425
Coffee.....lbs	63,733,715 ...	49,727,937 ...	14,005,778
Cocoa..... „	9,686,831 ...	5,735,600 ...	3,951,231

The increase is not in all articles, there being a diminution in the stocks of tea, tobacco, and sugar; but the articles specified are either largely produced and consumed in France, or articles which are there largely imported for consumption. The increase in the stock of brandy now held here—more than 50 per cent. upon the stock at the same date last year—is very striking.

DIVIDEND WARRANTS ON GOVERNMENT STOCKS.—The system which Mr Lowe has introduced of paying the dividends on Government stocks by means of warrants sent through the post is being imitated in the stocks of the Indian Government. A short Bill has just been introduced into Parliament by Mr Grant Duff, authorising the banks of England and Ireland to extend the system to East India stocks. The Bill has only one clause, as follows :—"The power given to the said banks, "as above recited, to make arrangements for payment of "dividends on stock by sending warrants through the post is "hereby extended to the payment of dividends on India Five "per cent. stock, and India Four per cent. stock; such arrange- "ments being in this case made with the sanction of the Sec- "retary of State for India in Council instead of the Treasury; "and where a holder of such stock desires to have his dividend "warrants sent him by post, he shall make his request as in "the said Act provided, but in a form approved by the Bank "and the Secretary of State for India in Council; and the "other provisions of sections twenty and twenty-one of the said "Act shall apply to warrants sent by post in accordance with "the provisions of this Act."

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, May 11.

The horrible civil war, which for the last six weeks has raged around this capital, is evidently drawing to a close. The Commune, which began fighting against great odds, has sustained serious military disasters, and what is still more fatal for it, is distracted by discord. It has committed many foolish acts, and the last one is perhaps the most foolish of all. It has this day decreed the demolition of the house of M. Thiers, and the confiscation of the goods it contains, because he has bombarded Paris, and, in a proclamation, called on the Parisians to revolt against the Commune. In smashing the houses of rich people in order to subdue insurgent working men, M. Thiers may have displayed senile stupidity; but in razing his residence, does not the Commune do the same? Unlike his victims, he will suffer nothing in purse, since he will certainly get himself amply reimbursed, and the destruction of his bricks and mortar will be a mere sentimental affliction, from which he will soon recover.

The approaching overthrow of the Commune will be followed by the establishment of Order. What is called order in these parts is of questionable merit in a political point of view, at least in English eyes, since it is terrorism pure and simple. But it will, we may expect, give extraordinary activity to Bourse speculation, and to commercial enterprise of all kinds. As regards the Stock Exchange, in fact, people count on a revival of the splendid days of the early part of the Empire, in which men without a penny were able to realise fortunes,—at, it is true, the expense of that part of the community who

possessed more money than wit, and in which capitalists without difficulty added largely to their stores.

From Versailles we hear that the negotiations for the conclusion of peace with Prussia have, under the energetic intervention of Prince Bismarck, been brought to a conclusion, or nearly so; and that the conclusion is, as was to be expected, what he thought fit to impose. But we have as yet no authentic account of the details. It is said indeed that Prussia has consented to take part, and a large part too, of the five milliards in indemnity in Government stock; but seeing that *rentes* are liable to be profoundly affected by revolutions, and that political convulsions seem likely to be even more frequent in the future than in the past, it is difficult to believe that Prussia has not insisted on having solid metal. It is said further that France has failed in an attempt to shift to the ceded territory of Alsace and Lorraine part of the indemnity due; also to get anything for the portions of the Eastern Railways comprised therein. As regards the latter, the French argument, it appears, was that they are private property, inasmuch as they belong to a company of shareholders; but Bismarck held that as the Government contributed to the expense of making them, and was interested to a certain extent in the working of them, they must be treated like ordinary roads, for which nothing could be asked. It is likewise said that the German Minister has insisted on having a treaty of commerce, which will admit the manufactured products of Alsace into France on easy terms. On this point the resistance of the French was *fil* or rather strong; and that is easy to believe, the chief men in the Government being rabid Protectionists. Of one of these men, M. Pouyer-Quertier, it was said long ago that, though as a patriot he mourned over the loss of Alsace, as a cotton spinner he rejoiced at it, for the reason that she would have to pay duties that would free him from vexatious competition. But what can be done in a tariff question against such a negotiator as Bismarck when France is prostrate?

We further hear from Versailles that notwithstanding the gravity of its position, the French Government is beset by English, Dutch, and even German capitalists offering to raise for it any amount of money it may require, at a rate of about 6 per cent., commission included. But what is said is vague; and, besides, everyone can see that the moment has not yet come for treating seriously of loans. *On dit* that the Germans have suggested that France would do well to pawn her tobacco monopoly, as Italy has done, or her Customs, like Turkey and Tunis. Her statesmen, however, will doubtless consider that her credit, in spite of her disasters, is too good to need such humiliating expedients.

The Assembly has passed a Bill, which declares that suspension of payment by traders from 10th July, 1870, to the 30th September, 1871, shall not be designated bankruptcy (*faillite*), and shall not incur the consequences thereof, provided the Tribunal of Commerce approves of the arrangements made by the debtors with their creditors.

In the accounts of the Commune to the 30th April, published last week, no mention is made of the obligations of the City of Paris. Under existing circumstances, the payment of the arrears of interest on them, and the redemption of those indicated to be paid off, could not perhaps be reasonably expected; but as the Commune takes all the revenues of the City it can get, it would have done well to remember that the latter is a debtor, and to give a promise that as soon as possible its liabilities shall be met. Such a promise would have given tranquillity to a considerable number of deserving people, whose little fortunes were invested in municipal securities.

The Bourse has been better attended, and there has been some activity in dealings. The Threes, which last Thursday were 52f 85c, closed to-day at 53f 35c, and the Italian has risen from 56f 20c to 57f 10c. The other quotations of to-day are Credit Foncier, 933f 75c; Credit Moblier, 125f; Northern Railway, 930f; Lyons, 825f; Western, 490f: Austrian, 861f 25c; Suez Canal, 235f; Parisian Gas, 750f; Peruvian loan, 78f.

The withdrawals from the Savings' Bank of Paris continue to exceed the deposits. In the week ending the 8th the former amounted to 40,880f, the latter to 4,435f.

The annual meeting of the South Austria and Upper Italy Railway fixed for the 2nd has had to be postponed to the 25th.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and May 6, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To May 6, 1871.		Same time last year.	
Balances in the Bank, April, 1871—	£	£	£	£	£
Bank of England	...	5,672,917		7,693,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,666,648
REVENUE.					
Customs	20,150,000	1,777,000		2,600,000	
Excise	22,150,000	2,221,000		2,070,000	
Stamps	7,750,000	1,001,000		955,000	
Taxes	2,000,000	147,000		150,000	
Property Tax	8,250,000	663,000		587,000	
Post Office	4,400,000	...		400,000	
Telegraph service	700,000	...		50,000	
Crown Lands	270,000	25,000		...	
Miscellaneous	1,150,000	291,920		244,765	
Revenue	72,315,000		6,805,920		6,348,765
OTHER RECEIPTS.					
Advances under various Acts repaid		293,895		368,597	
Sale of Exchequer Bonds		...		...	
Sale of Exchequer Bills		...		...

Advances under various Acts	53,011			97,240	
Expenses of fortifications	...			...	
Exchequer Bonds and Bills &c. paid off	...			...	
Surplus income to reduce Debt	400,000			63,746	
			453,011		160,986
Balances on May 6th, 1871—					
Bank of England	3,980,330			6,051,555	
Bank of Ireland	870,220			816,431	
			4,850,550		6,867,987
Totals			13,297,250		15,324,010

The following are the Receipts on account of Revenue during the week ending May 6 :—

	Receipts of Week Ending May 6.
	£
Customs	350,000
Excise	326,000
Stamps	191,000
Taxes	15,000
Income tax	66,000
Post Office	nil.
Telegraphs	nil
Crown lands	nil
Miscellaneous	nil.
Total	948,000

The total receipts of the previous week were 1,432,366*l*.

The Exchequer issues of the week on account of expenditure were 580,530*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	nil.
Supply services	580,530
Telegraph services	nil.
	580,530

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on April 29	3,808,130	738,420	4,606,550
— May 6	3,980,330	870,220	4,850,550
Increase	121,200	111,800	273,000

The other receipts to date were 76,300*l*, the other payments were 210,791*l*.

COMMERCIAL AND MISCELLANEOUS NEWS.

Board of Trade accounts of the commerce of Austria for the past year show that the total value of the grain shipments from that country was 5,040,000*l*, against 7,600,000*l* in 1869, and 10,300,000*l* in 1868.

A War Office return shows that in the 30 years, 1841-70, sums amounting to 1,712,829*l* were received by the Government from the sale of commissions, and placed to the credit of the Reserve Fund. In 1841-49 the fund was employed to cancel half-pay commissions; in 1850-54 to buy up such commissions and also the commissions of officers placed on the seconded list, owing to the reductions in 1850-51; since 1855 the fund has been applied chiefly to buy up the commissions of supernumerary and half-pay officers, to reduce cavalry prices, and to reform the Corps of Gentlemen-at Arms and Yeomen of the Guard. Four officers of the Yeomen of the Guard and 27 of the Military Train received compensation from this fund on retirement from the service.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the fifth week of April, 1871, and of the corresponding week in 1870 :—

	Paupers.				
	Indoor.	Outdoor.		Total.	Corresp'nding Total in 1870.
	Adults and Children	Adults.	Children under 16	5th week April, 1871.	
West district	5,254	7,642	5,358	18,254	19,544
North district	6,942	11,283	8,689	26,914	28,047
Central district	6,595	7,231	5,684	19,510	21,209
East district	6,947	10,360	9,091	26,398	31,505
South district	8,425	17,259	15,151	40,835	41,998
Total of the Metropolis	34,163	53,775	43,973	131,911	142,303

TOTAL PAUPERISM OF METROPOLIS.—Population in 1861, 2,802,000.

	Number of Paupers.		
	Indoor.	Outdoor.	Total.
Fifth week of April, 1871	34,163	97,748	131,911
— — 1870	34,606	107,697	142,303
— — 1869	34,607	103,824	138,431
— — 1868	34,455	102,917	137,372

Vagrants relieved in the Metropolis on the last day of the fifth week of April, 1871.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 10th day of May, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	37,647,570	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	22,647,570
		Silver bullion	...
	37,647,570		37,647,570

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	12,958,741
Rest	3,126,745	Other securities	18,737,200
Public deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and dividend accounts	8,412,501	Notes	13,205,055
		Gold and silver coin	669,241
Other deposits	18,889,023		
Seven-day and other bills	588,968		
	45,570,237		45,570,237

GEO. FORBES, Chief Cashier.

Dated the 11th May, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

LIABILITIES.	£	ASSETS.	£
Circulation (including Bank post bills)	25,031,483	Securities	32,142,941
Public deposits	8,412,501	Coin and bullion	23,316,811
Private deposits	18,889,023		
	52,333,007		55,459,752

The balance of Assets above Liabilities being 3,126,745*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.	Decrease.
	£	£
Circulation	...	391,077
Public deposits	...	163,105
Other deposits	...	828,567
Government securities	...	...
Other securities	...	1,195,567
Bullion	...	181,409
Rest	5,778	...
Reserve	218,656	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending May 10, 1871.	Week ending May 3, 1871.	Week ending May 11, 1870.
	£	£	£
Thursday	16,023,000	13,224,000	11,762,000
Friday	15,152,000	31,162,000	10,543,000
Saturday	13,805,000	16,553,000	11,802,000
Monday	12,115,000	13,717,000	9,359,000
Tuesday	12,487,000	15,107.000	9,945,000
Wednesday	13,843,000	16,288,000	10,730,000
Total	83,425,000	106,051,000	64,141,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, May 11, 1871.

The total since the 4th of January, 1871, is 1,520,793,000*l*, compared with 1,382,582,000*l* for the corresponding period last year, showing an increase of 138,211,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week.	May 15, 1861.	May 13, 1868.	May 12, 1869.	May 11, 1870.	May 10, 1871.
Circulation, including bank post bills	£ 20,703,809	£ 24,463,569	£ 24,087,157	£ 23,840,149	£ 25,031,483
Public deposits	6,725,187	5,774,277	5,680,834	8,881,433	8,412,501
Other deposits	11,591,539	20,061,034	17,465,098	16,338,966	18,889,023
Government securities	10,180,938	13,277,696	14,070,798	12,931,695	12,958,741
Other securities	19,796,757	19,390,487	19,303,841	19,018,333	18,737,200
Reserve of notes & coin	6,814,656	11,312,958	7,943,419	11,337,155	13,874,296
Coin and bullion	12,382,446	20,291,388	16,563,389	19,781,900	23,316,811
Bank rate of discount	6 %	2 %	4½ %	3 %	2½ %
Price of Consols	91¾	94½	92¾	94¼	93¼
Average price of wheat	55s 0d	74s 7d	44s 4d	43s 3d	58s 11d
Exchange on Paris (short)	25 32½ 40	25 15 25	25 22½ 32½	25 20 27½	...
— Amsterdam ditto	11 18 19	11 17¾ 17¾	12 2½ 2¾	11 17¾ 18¼	11 19¼ 19¾
— Hamburg (3 months)	13 9 9½	13 9¾ 10¼	13 12¾ 13½	13 10 10½	13 10¾ 11½
Clearing-house return	...	55,644,000	59,776,000	64,141,000	83,425,000

In 1861, the Bank rate was raised from 5 to 6 per cent. The drain of gold to the United States, which had caused a rise in the rate early in the year, had recommenced.

In 1868, the period of 2 per cent. continued. The Irish Railway Commission had just made its report, recommending the purchase of the Irish railways by the State.

In 1869, the Bank's position had not materially improved after the advance of the rate the previous week, but a farther advance was not considered necessary, though the rates for money were still firm.

In 1870, money was easy in the open market, but at fractionally better rates than those of the previous week. The requirements from the Northern iron districts and from Lancashire were increasing.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 8,205,218*l*; in 1868, an excess of 670,547*l*; in 1869, a deficiency of 1,838,743*l*; and in 1870, a deficiency of 2,679,367*l*. In 1871, there is an excess of 151,823*l*.

DISCOUNT AND MONEY MARKET.—The demand and rates for money are without material change from last week. The quotation for two and three months' bank bills is still 2¾, the best short paper under two months being 2¼, and there is only a moderate business doing. The fortnightly settlement on the Stock Exchange has absorbed some of the supply, but loans were obtained on easy terms, and without any pressure on the banks and discount houses. To-day there has been no change from the character of the business during the week, and both at the banks and in the open market there is only a moderate demand.

So far as we can judge the accumulation of money appears to be increasing, and there is also comparatively little apprehension of any immediate change in the circumstances which cause that accumulation. The suspense has been so protracted that people are beginning to forget the very peculiar and temporary causes which produce it. In reality, however, there is no small cause for carefulness, as the suspense in France may possibly terminate very soon, though France may only be restored slowly to that degree of credit which it would have had but for the Paris insurrection.

Early in the week there was a large withdrawal of gold, 400,000*l*, for South America, said to be a remittance on

account of the Argentine loan; but the withdrawal, though large, is counterbalanced by the constant arrivals of bullion, the decrease of bullion on balance for the week being only 181,409*l*. Bullion still continues to arrive, especially from America, and as the exchange is now 110¼ the current seems likely to continue. The principal other changes in the Bank account for the week are a decrease of 828,000*l* in private deposits, a decrease of 1,195,567 in private securities, and a decrease of 391,077*l* in circulation. The reserve has increased by 218,656*l*; and is now 13,874,296*l*, against 27,890,492*l* of banking liabilities—a proportion of almost 50 per cent.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months				2⅜	per cent.
Do	4	—		2⅜	per cent.
Do	6	—		2½	3 per cent.
Trade bills—3 months				2½	per cent.
Do	4	—		2½	3 per cent.
Do	6	—		3¼	3½ per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks at call	1½ per cent.
Discount houses at call	1⅝ per cent.
Do with seven days' notice	1½ per cent.
Do fourteen days	1¾ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	2½	6*	2¼	...
Vienna	5	5	5	5
Berlin	4	4	3½	3½ ½
Frankfort	3½	3½	3	3
Amsterdam	3½	3½	3½	3 ¼
Turin	5	5	5	5
Brussels	2½	4	2½	3½ ½
Madrid	5	5	5	5
Hamburg	...	...	3	3¼
St Petersburg	6	7	5	6

* Nominal.

THE STOCK MARKETS.—Business this week has been very active, the movement in an upward direction having again become very strong, except in English Government stocks, which have been rather flat. The upward movement, as will be seen, has been most conspicuous in English railways, which have made a fresh start after the reaction of the previous fortnight or three weeks; but it has also extended to foreign stocks and miscellaneous securities. In English railways the impetus has partly been given by the run upon one or two lines, especially the Great Western, which is undoubtedly most favourably situated as regards prospects; but the great abundance of money and the suspense of the civil war in France are the most powerful causes of the rise. The weakness in English Government securities, on the other hand, appears in part to be due to fresh apprehensions respecting the termination of the civil war in France; but the high price, as we pointed out last week, could not be very stable. The reaction, however, if the suspense in France continues, may be only momentary. The condition of the markets naturally favours new undertakings, and this week there have been a good many applications to the public. Of these the principal are still foreign loans—the two leading issues this week being a guaranteed Argentine railway for 700,000*l*, and a loan of 500,000*l* for a new applicant—Costa Rica—the reception of which, it having been applied for several times over, and risen before the allotment to a premium of 4½ 5, is strongly indicative of the state of the market. The success of this week's, as well as of the previous issues, should the suspense in France continue, bids fair to bring out a host of new ventures.

With regard to the critical element, however, the suspense in France, the probabilities appear to be increasing that the collapse of the Commune may really come very soon. The progress of the Versailles army is slow, and the final crisis has been so often promised that it is no longer believed in; but the Versailles army has really been getting much stronger as compared with the Commune, it has the means of receiving unlimited reinforcements, and now the definite conclusion of a peace with Germany will probably facilitate an understanding by which the insurgents will be deprived of the open communications which they have hitherto enjoyed. Paris, in the event of a close investment, cannot be victualled for long; and whatever misfortunes may occur meanwhile to the unfortunate city, the early triumph of the Assembly seems assured.

ENGLISH GOVERNMENT SECURITIES.—The market, as we have stated, has been rather flat this week, but nothing beyond what may be accounted for by the natural reaction from the high figure to which the quotation has been carried. The movements were a rise of ⅛ on Saturday above the closing price of Friday, a relapse of ¼ on Monday, a recovery of ⅛ on Tuesday to Friday's closing price, a fall of ⅛ from this point on Wednesday, and a subsequent recovery of ⅛ on Thursday. To-day the market has again been flat, and the closing price is 93⅜, ⅛, or ¼ under the closing price of last Friday. The reaction has been accompanied by a variety of reports. The state of the market, however, and the justifiable expectation of a termination of the anarchy in France sufficiently account for the fluctuations. As we stated last week, a bear account is still open, and the least occasions are taken advantage of to cause fluctuations.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93¼	93⅜	93⅜	93⅜	par to 5s pm
Monday	93⅛	93⅜	93⅛	93⅜	par to 5s pm
Tuesday	93⅛	93⅛	93⅛	93⅜	par to 5s pm
Wednesday	93⅛	93¼	93⅛	93⅜	par to 5s pm
Thursday	93⅛	93⅛	93⅛	93⅛	1s to 5s pm
Friday	93⅛	93⅛	93⅛	93⅛	1s to 6s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	93⅜ ⅛	93⅛ ⅛	— ¼
Ditto account	93⅜ ⅛	93⅛ ⅛	— ¼
Reduced 3 %	91⅛ ⅛	91⅛ ⅛	— ¼
New 3 %	91⅛ ⅛	91⅛ ⅛	— ¼
Bank Stock, last dividend 4½ %	236 8	...	... ...
India Stock, 10½ %, red. at 200 Apl. 30, 1874	206 8	206 8	... ...
Ditto 5 %, red. at par, July 5, 1880	111⅛ 12½	111⅛ 12½	... ...

EXCHEQUER BILLS.—1s to 6s prem.

COLONIAL GOVERNMENT SECURITIES.—The following shows the changes for the week :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	106½ 7½	106½ 7½	... ...

FOREIGN GOVERNMMENT SECURITIES.—The market has been buoyant this week, the closing prices of last week being well maintained, and there being an advance for the week, as will be seen, in a great many different stocks. Brazilian, Egyptian, Italian, Russian, Turkish, and Spanish, have all advanced—the improvement in the two latter cases being very considerable. Turkish stocks are still being subjected to the influences which we have before described. With regard to Spanish, it is now stated that the arrangements for a new loan, which will have the effect of securing the dividends for a considerable period, are complete, and a rapid advance is confidently expected. Spanish stocks have now been very low for a very long time, and there is room for a large advance, as soon as it begins to be apparent that the finances are getting into order, and that the Government has reasonable prospects of stability. To-day the market has been good, especially in Spanish and Turkish stock, and prices generally close firm.

The fluctuations in French securities have not been great, and the tendency to improvement, the reports from Paris and Versailles growing more and more favourable to the success of the Assembly, and the definite conclusion of the Treaty of Peace with Germany being taken to imply that the chances of an imminent rupture with Germany are very much diminished. The new Argentine loan has been flatter this week, the closing quotation being 1⅞ to 2¼ pm.

We notice below, in our usual Notices and Reports, the issue of a 6 per cent. loan of 500,000*l* for Costa Rica, one of the Central American States. The loan has been received with marked favour, partly through public confidence in the agents, and partly because of the circulation of the most favourable statements as to the credit of the State, which is said to possess the merit of paying off a former debt, and to have large resources. The price of issue was 72, but the issue went at once to a premium on the report of numerous applications the first day, and farther advanced to 4½ 5 on the second day of issue, remaining steady afterwards at that figure.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS.—The market in this department has been buoyant almost all through the week. Great Western advanced rapidly from 91¼ ½, which was the closing price of last Friday, to 96⅛ ⅜ on Wednesday, though that figure was not quite maintained. In Metropolitan and Metropolitan District stocks, London, Chatham, and Dover Preference, and Caledonian there was likewise a marked advance, and the buoyancy extended to London and North-Western, Great Northern, London and Brighton, Lancashire and Yorkshire, Sheffield, North-Eastern, and South-Eastern. Later in the week there was a good deal of depression caused by sales for realisation, but the tone to-day has been better, Great Western, Metropolitan, and Metropolitan District having especially recovered—in the latter two cases to the highest point of the week. During the week there has likewise been an active demand for Debenture stocks, which have advanced. As will be seen from the usual figures we subjoin, the traffic returns on the leading lines again show a very large increase, and the most hopeful views are taken of the prospects of the principal lines. In some cases, however, as in Metropolitan stocks, the advance would not appear to be due to any marked increase of traffic, and the reports are renewed as to the likelihood of an amalgamation or working agreement between that company and the District. The same reports likewise affect advantageously the District stock, in which the amount of traffic, great as the present increase is, is yet so low that the opening of the Cannon street station must double it in order to leave even a small surplus for the preference stock. It is stated that in most cases there is a considerable absorption of stock by investors, and the contangoes were lighter than at the previous settlement.

We notice below the issue of a prospectus of the Whitby, Redcar, and Middlesborough Union Railway—capital, 200,000*l*—a company formed to extend the Yorkshire coast line, and supplement the system of the North-Eastern company by whom the new line will be worked. The issue is in 20,000 10*l* shares, at the price of 6*l* 17s 6d per share.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	89½ ⅜	.....	92½ ⅜	+ 3
Great Eastern	42⅜ ⅛	.....	42⅝ ¼	+ ¼

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending May 6 to 762,229*l*, being an increase of 50,255*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 11,963,233*l*, being an increase of 667,259*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 9,793*l*; North-Eastern, 9,420*l*; Great Western, 8,941*l*; Midland, 6,187*l*; and Lancashire and Yorkshire, 4,254*l*. The Great Eastern only shows a decrease of 1,922*l*. The following shows the details in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

Great Western of Canada	16⅜ ½	.....	16⅝ ⅜	+ ⅛
Madras 5 %	105½ 6	.....	105½ 6	... ...

As we notice below, subscriptions have been invited this week for 46,500 shares, out of a total of 48,000, of 20*l* each, constituting the capital of the East Argentine Railway (Limited). The company is to construct 181 miles of line, and the Argentine Government guarantees 7 per cent. on the capital expended to the extent of 10,000*l* per mile.

Advices from Java state that the traffic upon 109 miles of the Dutch Indian Railway recently opened, yielded a net profit last year of 228,000fl. The number of passengers conveyed over the line in April last was 27,000, against 17,000 in the previous month.

AMERICAN SECURITIES.—The market has ruled dull for United States' bonds, and, though the changes on the week are not important, the tone is dull at the close. Erie shares and Illinois Central Railway have given way; while State bonds generally have been dull. The annexed shows the result of the week's operations upon the quotations :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	90 5/16 7/16	.....	90⅜ ½	+ 1/16
Ditto 1865 Issue	90⅜ ½	.....	90 11/16 15/16	... ...
Ditto 1867 Issue	92¼ ½	.....	92 7/16 9/16	... ...
Ditto 5 % 10/40 Bonds, exchange 4/6	89⅜ ⅝	.....	89⅜ ⅝	... ...

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Atlantic and Great Western Consol. Bonds	42⅜ ⅜	42⅝ ⅜	+ ¼

Massachusetts 5 % Sterling Bonds, 1900	93 ⅝	91⅝ 2½	− 2¼
Pennsylvania General Mortgage 7 % Bonds 1897	91 ⅜	80 4	− 9
Pennsylvania Gen. Mort. 6 % Bonds, 1910	92⅝ 3¼	92⅛ 3¼	... ...
Virginia 6 % Bonds	57 8	56 7	− 1

JOINT STOCK BANKS.—The movements in this department have not been numerous, but prices have shown firmness throughout the week. Alliance and New Zealand shares have advanced ½; Egypt, 1; and Imperial Ottoman, ¼. On the other hand a reaction of ½ has taken place in Anglo-Austrian shares.

TELEGRAPHS.—There has been an active demand for telegraph shares, resulting in an important upward movement in the quotations. Anglo-American shares show a rise of 6; French Cables and Anglo-Mediterranean of 1; British Indian Extension, ½; China Submarine, Falmouth and Gibraltar, and British Indian Submarine, ¾; Great Northern, China and Japan Extension, ⅛. Silvers Telegraph Works shares have advanced ½; but Telegraph Constructions have declined to a similar extent.

With regard to the rise in the shares of the Atlantic Cable Company, it appears that lately there has not only been an absorption of telegraph shares, but the prospects of the Atlantic cable in particular are taking a good turn. The receipts of the single cable working are large enough to yield a good dividend, and it is now considered certain that the two old cables will be immediately repaired, so that the present dangerous condition in which the communication depends on a single cable will soon be got over.

MINING SHARES.—The leading feature in the market for British mines is the upward movement in New Seton shares, which show a rise of 25 on the week. Devon Great Consols have advanced 5; Providence and Margaret, Uny Lelant, 2; West Chiverton, 1; Caegyon and Hingston Downs, ½. Tincroft shares have given way 1; and South Condurrow, ½. In the foreign market there has been a continued demand for Eberhardts, which closed at a rise of 5 on the week; Sweetland Creeks show an improvement of ½; and United Mexican of ½. St John del Rey shares are 1 lower.

MISCELLANEOUS.—A fair business has been transacted in miscellaneous securities, and the tone of the market has been firm throughout the week. London General Omnibus and Royal Mail Steam have advanced 4; Canal Cavour 6 per Cent. bonds and Roumanian Bridges annuities, 2; General Steam Navigation, Fore street Warehouse, Liebig's Extract of Meat, and Rhymney Iron, 1; Anglo-Austrian Bondholders' Committee's Certificates, and City Offices, ½; North Metropolitan Tramways, ½; Rio City Improvement shares have declined ½ on the week.

EXCHANGES.—Bills upon Antwerp have been rather more in demand this week. The quotation from New York is now 110¼, a rather high figure, at which a continuance of the present current of bullion to this country may be expected.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

"Gold.—There has been a large withdrawal of sovereigns from the Bank, 422,000*l* having been sent away in connection with the Argentine loan. There is however no demand for bar gold for export, and about 50,000*l* has been sent in since the 4th inst. The Westphalia has brought 40,000*l* from New York; the Rhine has brought 21,000*l* from New York; the Minnesota has brought 120,000*l* from New York; the Hermes has brought 100,000*l* from New York; the City of London has brought 500,000*l* from New York; the Deutschland has brought 100,000*l* from New York; the M'Gregor Laird has brought 5,000*l* from Africa—total, 616,000*l*. The Cygnet has taken 50,000*l* in sovereigns to Malta.

"Silver.—The Nyanza has brought 173,400*l*, and the Serpedon 97,000 from India, and the Colonel Lamson 16,000*l* from New York. The demand continues very limited at the quotations mentioned below.

"Mexican Dollars.—We have received about 20,000 from New York and the Pacific. The demand for the old coinage is good, and the price has slightly improved to-day to 59½d per oz. The new coinage remains at 59¼ per oz.

"Exchange on India for bankers' drafts at 60 days sight is 1s 10⅛d per rupee.

"Indian Government Loan notes are firmer to-day, we quote the 4 per Cents. 92½ to 92¾; the 5 per Cents. 100 to 100⅛, and the 5½ per Cents. 107½ to 107¾.

"Quotations for bullion.—Gold.—Bar gold, 77s 10½d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 9d to 74s per oz; United States gold coin, 73s 9d per oz. Silver.—Bar silver, 5s 0¼d to 5s 0⅜d per oz std; ditto containing 5 grains gold, 5s 0⅜d to 5s 0½d per oz std; Mexican dollars, 4s 10½d to 4s 11½d per oz.

The sum of 20,000*l* in bar gold was sent into the Bank of England to-day.

The *Gazette* return states that the imports of the precious metals into the United Kingdom during the week ended May 10 amounted to—gold, 314,055*l*; silver, 299,936*l*. The exports were—gold, 314,969*l*; silver, 603,995*l*.

NOTE CIRCULATION OF THE UNITED KINGDOM.—We give this week the returns made by the issuing banks of the average amount of notes in circulation in April. The following is a summary of our more detailed statement:—

	Fixed Issue. £	Average Circulation. £	Compared with Fixed Issue. £
Bank of England	...	24,778,188	...
Private banks	3,985,263	2,784,277	− 1,200,986
Joint stock banks	2,738,640	2,466,064	− 272,576
Scotch banks	2,749,271	5,055,107	+ 2,305,836
Irish banks	6,354,494	7,480,146	+ 1,125,652
Total		42,563,782

NOTICES AND REPORTS.

STOCKS.

Costa Rica 6 per Cent. Loan for 500,000l.—Messrs Bischoffsheim and Goldschmidt have brought out a loan for the Republic of Costa Rica, for the construction of roads, piers, and works of utility; and it is stated that the State has never contracted any other public loan. The amount required, 500,000*l* nominal, has been readily subscribed here, at the issue price of 72 per cent., payable by instalments until the 1st November. The interest is payable in London on the 1st May and 1st Nov. A 2 per cent. sinking fund will be applied to the redemption of bonds at par by half-yearly drawings, to take place on the 1st April and 1st October, the first drawing being fixed for the 1st October next. Instalments may be prepaid under discount, at the rate of 5 per cent. per annum, and the bonds to bearer are issued in sums of 1,000*l*, 500*l*, and 100 each. The loan is secured on the general property and revenues of the Republic, but specially on the Customs' dues.

Turkish 4 per Cent. Guaranteed Loan.—Bonds, representing 80,100*l*, have been drawn for redemption on the 1st August.

Tenders—New Six per Cent. Loan.—The tenders were opened on the 11th instant, when the whole 52,800*l* was placed at and above 105*l* 11s 6d.

RAILWAY COMPANIES.

Buenos Ayres Great Southern.—The report states that the gross receipts for 1870 amounted to 133,878*l*, and that after providing for the interim dividend and debenture charges, 3,101*l* remains. The directors recommend the payment of a dividend at the rate of 9 per cent. per annum, free of income tax, leaving 3,101*l* to be carried forward. The increase in the receipts of the line for the twelve months was 9.28 per cent.

East Argentine Railway, Limited.—Capital, 960,000*l*, in 48,000 shares of 20*l* each, 46,500 shares now offered for subscription. The company is formed to construct a railway from Concordia, through the provinces of Entre Rios and Corrientes to Monte Caseros near the Brazilian frontier. The line will be 181 miles in length, upon which an Argentine guarantee of 7 per cent. is given to the extent of 10,000*l* of capital per mile. The Public Works Construction Company have contracted to construct the first section of 96 miles, and to stock the same for the 10,000*l* per mile mentioned, and to pay interest during construction at the rate of 7 per cent. The land is handed over to the company free of cost, and the country is becoming rapidly developed. Argentine railways are, it may be remarked, doing prosperously, and one company is paying a good excess dividend. The issue price of the shares is 18*l* per share.

Whitby, Redcar, and Middlesborough Union Railway.—Capital, 250,000*l*, in 10*l* shares, with borrowing powers 83,300*l*. A issue of 20,000 shares is now being made at the price of 6*l* 17s 6d per share, payable over a period of eleven months. The line is 16 miles in length, and will extend from Whitby to Loftshouse, running through the great Cleveland Ironstone district, and in fact forming a link in the Yorkshire coast-line, which will be worked by the North-Eastern. This line will be worked by the North-Eastern at 50 per cent.; and in addition to a seaside and fish traffic, the carriage of minerals is expected to contribute largely to the revenue. Good dividends are looked for, and the shares may hereafter be converted into preferred and deferred shares.

BANKS.

National Provincial of England.—The net profit for the year, after paying a 10 per cent. bonus on salaries, was 246,750*l*. Dividends equal to 21 per cent. for the year were declared at the meeting, and a balance of 40,000*l* was carried forward, in addition to the reserve.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Scottish Australian Investment.—The report notifies a continued improvement in the general properties of the company, and recommends a dividend for the half-year at the rate of 4 per cent. per annum, which will absorb 6,000*l*, and leave, after an appropriation of 1,000*l* to reserve (thus raised to 16,000*l*), a balance of 1,474*l*.

Trust and Agency of Australasia.—The revenue account for the year shows a balance of 11,312*l* and the directors recommend a dividend of 1s and a bonus of 2s per share, making, with the interim payment in November last, a total distribution for the year of 4s, or 20 per cent., and leaving 3,812*l* to be carried forward.

ASSURANCE COMPANIES.

Albert Life Assurance.—The reconstruction, as provided by the Arbitration Act, 1871, will be carried out forthwith. Lord Cairns is arbitrator.

Metropolitan Life Assurance.—Gross income 191,232*l*, policies in force 4,195,441*l*, assurance fund, 1,321,000*l*.

Universal Life Assurance.—At the annual meeting the new policies in the past year were stated to have amounted to 282,700*l*, producing in premiums 13,639*l*. The gross income is 179,510*l*, and the accumulated fund, 872,728*l*.

MISCELLANEOUS COMPANIES.

Anglo-American Telegraph.—An interim dividend of 2 per cent. for the current quarter is announced.

Eastern Assam Tea.—The out-turn for last season was 94,240 lbs, showing some excess over the estimate. It was hoped that the revenue would more than cover the expenditure The 1871 crop is expected to yield over 1,300 maunds.

Heaton's Steel and Iron, Limited.—Mr W. J. White has been appointed official liquidator.

Liebig's Extract of Meat.—The annual report states the profit at 72,420*l*, out of which it is proposed to pay interest at 6, and a bonus of 2 per cent., both free of income tax. After carrying 18,000*l* to reserve, 2,719*l* remains.

Limmer Asphalte Paving, Limited.—Capital, 100,000*l*, in 2*l* shares. First issue, 15,000 shares, of which 4,000 will be taken by the vendors. Mr M. Cohen's contract for the exclusive import into the United Kingdom for 21 years of Limmer Asphalte will be purchased. This asphalte has been successfully used in paving streets both in London and on the continent, and obtained gold medals in 1851 and 1862.

Natal Plantations.—A satisfactory net profit is looked for at the conclusion of the season 1870-71.

Oriental Hotels, Limited.—The liquidator, having sold the Cairo Hotel to the Viceroy of Egypt, has given notice that he is prepared to pay off the Six per Cent. Debentures in full, and 16s in the pound of the Twelve per Cent. Debentures secured on the property, together with arrears of interest. Application for payment is to be made at the offices of Messrs. Cooper Brothers and Co., on the 15th inst.

Phosphate Sewage, Limited.—Capital, 200,000*l*, in 10*l* shares. First issue, 120,000*l*, in 12,000 shares, of which 3,500 are taken by the vendors, and a further portion have been privately subscribed. The company is formed to acquire and utilise the patents of Messrs Forbes and Price, taken out in Great Britain, France, Belgium, and other countries, for the defecation and utilisation of sewage, which, being mixed with phosphate of alumina, becomes inodorous, and deposits a valuable manure. This phosphate of alumina is found in large quantities in the Island of Alto Vela, San Domingo, upon which Messrs Peter Lawson and Son have expended 39,000*l* in the erection of works, piers, &c., besides obtaining the exclusive concession. The process has already been tried on an extensive scale, and found to answer well; and it is intended to grant licences to towns supplying the phosphate, and charging a royalty.

Professional and General Co-operative Society, Limited.—Capital, 10,000*l*, in 20,000 shares of 10s each—nearly 7,000 shares already taken up. Commodious premises in New Oxford street have been secured for the conduct of a co-operative stores business, and Dr Hassall's services have been retained as analyst to the establishment. Special arrangements will be made to meet the wants of country customers.

Public Co-operative Supply Association, Limited.—Capital, 20,000*l*, in 1*l* shares, fully paid up on application. The company is formed to enable the public generally to profit by the principle of co-operative societies, which have hitherto been of an exclusive character. The prospectus states that "the shareholders will be entitled to a participation in the profits, while the trading benefits of the association will in justification of its title be open to the public generally without entrance fee, annual subscription, or restriction of any kind." The company takes over the goodwill of a co-operative association which has 800 customers on its books.

MINING COMPANIES.

Devon Great Consols.—A dividend of 4*l* per share is notified.

Gobbet Tin Mining, Limited.—Capital, 15,000*l*, in 3,000 shares, of 5*l* each. The extensive mines are situated on Dartmoor, and are held at a royalty of $\frac{1}{24}$th under the Duchy of Cornwall for a further period of eighteen years. The present proprietors have expended 4,000*l* on the works, and sell the property for want of further capital. A profit of 4,800*l* per annum, or over more, is expected. The purchase price is 7,000*l*, of which 5,000*l* is in shares. A champion lode of diamond tin has also been discovered on the property.

Pinto Silver Mining, Limited.—Capital, 130,000*l*, in 5*l* shares; divided into 8,000 vendor's shares, and 18,000 20 per cent participating preference shares. First issue, 10,000 preference shares. The object of this new undertaking is to purchase and work the "Maryland," "Top," "Delaware," and "Tunnell" mines situated in the Pinto district of Nevada, U.S. Many very wealthy mines are in the neighbourhood; and the whole covers an extensive area, conveniently situated for mining operations. The Maryland mine has been explored, and numerous large assays show a high percentage of silver, and sales already effected indicate a profit of 1,000*l* per month. It is intended to erect reduction works immediately, when profits of 6,000*l* a month, or above are looked for. The purchase price is 100,000*l*, of which 40,000*l* is in deferred shares, and no money is to be paid to the vendor until the mine has been thoroughly examined by the directors.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was continued firmness in the grain trade at Mark lane to-day, though the transactions were on a somewhat limited scale. English and foreign wheat sold at the extreme rates of Monday last, owing to a revived export demand. Country flour advanced about 6d per sack, while American qualities were fully as dear. All spring corn ruled steady in value and demand, with the exception of Russian oats, which were pressed for sale at a decline of 1s per quarter. This week's imports of foreign and colonial produce into London have amounted to 11,170 quarters of wheat, 7,210 barley, 50,310 oats, 570 beans, 200 peas, 2,180 maize, 410 sacks and 3,290 barrels of flour.

At Liverpool and Wakefield this morning a fair business was transacted in oats at a further improvement in the quotations.

The Liverpool cotton market has been steady during the past week, and a fair business has been done at very firm prices, especially for American descriptions. The total sales are 78,300 bales, of which the trade have taken 54,680 bales; speculators and exporters, 23,620 bales. The imports for the week are 48,305 bales; the actual exports, 22,087 bales; and to-day's stock is estimated at 966,100 bales. Quotations for American descriptions have advanced $\frac{1}{16}$d per lb, but East Indian and Bengals are unchanged since last Friday. To-day the market closes steady. Sales, 12,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended May 11, 1871:—

	Imported.	Exported.
American bales	32,518	11,100
Brazilian	6,081	1,039
East Indian	13,116	11,038
Egyptian	...	747
Miscellaneous	1,476	554
Total	53,191	24,478

At New York, on May 11, middling Upland cotton was quoted at 15½c per lb.

We extract the following from Messrs Wm. Nicol and Co.'s circular, dated Bombay, April 15:—Telegraphic advices to hand during the week have reported a continuation of dulness in the cotton markets, and prices generally would appear to have ruled about $\frac{1}{16}$d per lb lower than the previous week's currencies. Here there has been a moderate but steady inquiry for Dhollerah, Broach, and Oomrawuttee descriptions, at prices which exhibit but little change from those noted in our last quotation list. Arrivals of cotton suitable for selection are still sufficiently scanty to admit of dealers exacting very full rates, and the stubborn attitude which up-country holders continue to preserve tends to give material support to local sellers. Still, however, the tendency on the spot has been towards easier prices, and generally a concession of 3 rs to 5 rs per candy has to be noted. The total transactions of the week amount to about 7,500 candies, of which nearly one-half consists of Dhollerah descriptions. Broach, machine and native-ginned, occupies the next place, and the remainder is made up of Oomrawuttee, Barsee, Khandeish, &c. New Dhollerah is now arriving on the green, but the quality is far from satisfactory, being dirty, short, and harsh in staple, and generally of a woolly appearance, with considerable stain. Later arrivals will, it is expected, show much improvement. Compared with last year's early parcels the new crop is very poor indeed. Machine-ginned Broach is coming to hand freely, and native Broach is also to be obtained in moderate quantities, but both require the utmost nicety in selection, as short-stapled and stained admixtures prevail in the former grades, while in the Churkad there is a considerable amount of water packing and sand adulteration, which quite spoil an otherwise beautiful cotton. Oomrawuttee has lately shown considerable improvement in quality. New sawginned is coming forward in small quantities, but we regret to notice that it is much cut in staple, and the fibre appears to want the hardiness of former seasons. A few docras of Compta and Vingorla have also arrived on the green, and the average of these is very passable. From Tinnevelly we have a telegram, dated 13th inst., quoting 6$\frac{1}{16}$d per lb.

Actual exports since last mail left, 41,615 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated April 28:—We can do little more than again repeat quotations for cotton, which have scarcely varied at all throughout the present month. To-day, however, our market shows a decidedly firmer aspect, and it is difficult to buy at quoted rates:—Fair, 7¾d to 7¾d per lb, f.o.b.; good fair, 8¼d to 8¼d, ditto; fully good fair, 8¼d to 8¾d, ditto; Gallin, 9¼d to 11¼d per lb, ditto (nominal). Freight, 1/16d per lb for steam-pressed bales.

— 1864–65.....	176,949	.....	33,966	.....	210,915

The colonial produce markets have shown more animation, and sugar, owing to the prospect of deficient supply, has improved in value, particularly as regards low descriptions. Coffee has been in fair request at full rates for the better qualities; inferior parcels have sold on easier terms. A steady business has been transacted in rice at fully previous currencies. Rum and other spirits have sold quietly.

From Rangoon, to April 3, we learn:—Shortly after issue of our last report prices of Natsain rice commenced to rise rapidly, till they reached on the 24th and 25th ult. the high figure of 150 rs to 154 rs per 100 baskets, 5 to 6 parts Natsain quality. This rapid rise was the consequence of a very pressing demand for our staple for shipment to Europe, shippers being anxious to despatch their vessels then in port in March still. The tonnage loading rice for Europe is now reduced to about 13,000 tons burden, the demand for rice has therefore considerably abated; but as supplies are small, prices have been maintained as above quoted, which is equal to 6s 4d to 6s 5¾d per cwt, free on board. As the demand is expected to continue moderate during the present month, shippers will probably be able to reduce prices somewhat; but we do not look for a material decline, as about half of our crop has been already exported, and holders of grain will therefore hold back before submitting to low prices. Exports of rice to Europe from 1st January up to date have been exceptionally large; the same compare as follows with those during the same period of other seasons:—1871, 102,409 tons; 1870, 75,788; 1869, 71,213; 1868, 28,877; 1867, 33,248; 1866, 40,163; 1865, 13,330; 1864, 21,510 tons.

Mr Helmuth Schwartze reports as follows:—There is no change in the tone of the wool market. The demand remains brisk, and current prices are fully maintained. A solitary exception to this rule exists in the case of lambs' wool, which is perceptibly cheaper than at the beginning of the series. But even here there is no abatement in the inquiry, and the decline appears rather as a reaction from the former excessive rates—the more natural, as the supply of lambs is always plentiful at this season. For superior combing wools, both from Port Phillip and Sydney, there are rather less competitors in the market than a fortnight ago, but the prices show very little change, and remain on the whole satisfactory to growers. Medium to good Australian fleece, and all scoured descriptions, are quite as high as at any period during this series, and the same may be said of Capes, the demand for which continues unabated. Whether the exceptional inquiry for army clothing will long outlast the war, and continue after the extraordinary activity that has prevailed in this branch of industry for the last six months, is perhaps doubtful; but at present there are no signs of any falling off in this direction, and the position of Cape and all similar wools may accordingly be expected to remain firm for some time to come. As there are only about 40,000 bales more to be offered in these sales, the full maintenance of the present rates to the end of the series appears assured. From all sides the reports on the condition of the woollen industry are very satisfactory. The manufacturers are fully employed, and loth to extend their engagements at the prices existing for goods at present. The stocks are moderate, and everything points to a brisk business in the immediate future.

Annexed is Messrs William Moran and Co's indigo report, dated Calcutta, April 11:—The rain that fell in Calcutta last week does not appear to have extended far into the interior, and we continue to receive complaints from most of the Lower Bengal districts of rain being wanted to freshen up the standing plant and enable planters to fill up their empty lands. The show of plant in Eastern Bengal is said to be very fine, and manufacturing will probably commence rather earlier than usual. The advices from Tirhoot, Chumparun, and Chuprah are generally favourable. From Benares and the North-West provinces there is nothing of interest to report. Exports of indigo from 1st November, 1870, to 6th April, 1871:—To Great Britain, 16,475 chests; to France, 513; to Trieste, 2,790; to foreign Europe, 250; to America, 2,340; to Gulphs and Levante, 1,733—total, 24,101 chests.

The annexed is dated New York, April 28:—Trade remains dull in most departments, and the markets present no new features, though the condition of commercial affairs, it may be remarked, is such that very few commodities not actually wanted for consumption afford a fair profit to sellers. Buyers, as a general remark, are indisposed to anticipate their wants, notwithstanding the inducements held out in the shape of low prices. The resumption of canal navigation has imparted an impetus to the movement of produce from the West to the seaboard, and with increasing stocks, prices of breadstuffs have been subjected to a substantial decline, facilitated by unsatisfactory cable advices. Local monetary affairs remain in an easy condition, under the return of currency from the interior, and the release of coin by the Treasury. The banks are putting out temporary loans at 5 to 6 per cent. on stock collateral, and no embarrassment is anywhere observed. Discounts remain 6 to 7 per cent. for short prime mercantile paper. Government bonds are firm at home and abroad. The success of the new Five per Cents. seems to be assured, but a considerable portion of the issues will have to be taken by the banks in exchange for the old bonds held as security for their bill circulation of three hundred millions, in addition to the four hundred millions of legal tender note promises, which are so popular in the West. Gold has varied but little, and the market has been devoid of excitement.

THE COTTON TRADE.

LIVERPOOL.—MAY 11.

The cotton market continues freely supplied, but there has been a fair demand throughout the week, and prices on the whole have shown a great steadiness. To-day the business has been on a more extended scale, with a hardening tendency. Sea Island has been only in limited demand, and is without change in price. American is still in general request, and the quotations of the current qualities are slightly advanced. New York advices to the 11th instant quote middling Upland 15½ cents, costing to sell in Liverpool, 8⅛d per lb, by steamer. In Brazil the business has again been large, but there is no change from the quotations of last week. Egyptian has been in fair request, without alteration in prices. East Indian descriptions continue freely offered, and most qualities are difficult of sale, the general tendency of prices having been in favour of buyers.

In cotton to arrive the business has been small. The latest quotations are :—American, basis of middling, from New Orleans, not below good ordinary, May delivery, $7\frac{9}{16}$d; ship named, not below strict good ordinary, 7⅝d; Savannah, not below good ordinary, April shipment, 7⅞d; bales, from any port, April shipment, 7⅞d; Broach, good fair machine ginned, Cape, ship named, $6\frac{7}{16}$d; April-May shipment, 6¾d; fair new merchants, Cape, ship named, 5¾d; Dhollerah, fair new merchants, Cape, ship named, $5\frac{13}{16}$d; April-May shipment, 5¾d; Oomrawuttee, fair new merchants, Cape, April-May shipment, 5¾d per lb.

The sales of the week, including forwarded, amount to 78,300 bales, of which 10,190 are on speculation, and 13,430 declared for export, leaving 54,680 bales to the trade.

MAY 12th.—The sales to-day will probably amount to about 12,000 bales. The market without change.

	bales.
An increase of import compared with the same date last year of	713,150
An increase of quantity taken for consumption of	114,220
An increase of actual exports of	195,680
An increase of stock of	439,200

In speculation there is a decrease of 71,640 bales. The imports this week have amounted to 48,305 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to May 5) is 240,000 bales, against 180,000 bales last year. The actual exports have been 22,087 bales.

* Pickings.

LONDON.—MAY 11.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association :—

The market has been steady during the week, and closes this evening with an improved demand, at very full prices. Coconadas have been inquired for and show an advance. For arrival the business has been small.

NEW YORK.—APRIL 28.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, April 28. From the figures thus obtained it appears that the total receipts for the seven days have reached 56,686 bales, against 63,042 bales last week, 64,156 bales the previous week, and 67,543 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,570,759 bales, against 2,579,497 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 991,262 bales. The exports for the week ending this evening reach a total of 81,822 bales, of which 55,432 were to Great Britain, 9,898 to France, and 16,492 to rest of the continent, while the stocks as made up this evening are now 453,718 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending April 28.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	27542	19256	46798	23077	171019	136170

New York	12865	696	13561	9148	93000	52000
Other ports	2670	453	3932	810	23000	18000
Total	55432	27930	81822	35335	453718	346223
Total since Sept. 1	2717842	609229	3327071	1735978	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 46,487 bales, while the stocks to-night are 107,495 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to April 21, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph :—

The past week the market has been very irregular and unsettled, and during some of the times the speculators have held almost entire control, compelling the shorts to accept their own terms. This was especially so on Tuesday, when middling advanced to 15c, against 14¼c last Friday. The state of the market, however, is well described by the statement of the fact that the usual difference between grades was entirely disregarded, all grades being equally available in settlement of contracts, middling Texas bringing no higher prices than middling Uplands, and the same was true with regard to low middling, while ordinary has remained all the week at 10½c, being ¼c off from last Friday. But these efforts to "squeeze" the shorts resulted in bringing out rather larger offerings, and causing some increase in arrivals at this port, so that on Wednesday the supply was rather in excess of the wants, and the position was not sustained, prices being reduced all around ¼c, except for ordinary. Thursday the market still continued unsettled, and values were again about ¼c easier, the high prices drawing out a great many lots on which the owners deemed it advisable to realise. To-day there has been no change. The improvement at Liverpool has had a tendency to increase the shipping inquiry, while the demand to supply maturing contracts has been sufficiently active to absorb the offerings. For future delivery there has been great activity, and the same influence operating to advance the quotations for spot cotton has carried up the price for April to 15c for low middling, while for all the later months there has been a decidedly cautious tendency manifested, induced by the losses which the short interest has incurred during the week. Low middling closed to-night at 14½c for April, 14½c for May, 14½c for June, and 14½c for August. The total sales of this description for the week are 68,900 bales, including those free on board. For immediate delivery the total sales foot up this week 19,964 bales, including 6,553 for export, 2,519 for consumption, 8,440 for speculation, and 2,452 in transit. Of the above, 1,225 bales were to arrive. The following are the closing quotations :—

—*New York Commercial and Financial Chronicle.*

NEW YORK, May 5.—According to Messrs Moffat,

Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 52,000 bales, and since the 1st of September, 3,620,000 bales. Shipments to England, 42,000 bales; to France, 7,000 bales; and to the continent, 22,000 bales. Total since the 1st of September, 2,690,000 bales. Stock at all ports, 429,000 bales. Middling Upland, 7⅛d, cost and freight, per steamer.

NEW YORK, May 9.—The receipts of cotton at all United States' ports for the last four days have been 23,000 bales. Shipments to England, 23,000 bales; to France, 2,000 bales; and to the continent, 19,000 bales. Middling Upland, 7 1/16d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS

MANCHESTER, MAY 11.—Our market in all its branches of trade has remained very quiet during the week. The prevailing feature is an indisposition on the part of buyers to renew their contracts at present values; hence the actual business transacted has been very limited. The latest advices from our large Eastern markets are still unfavourable; yet we hear of some rather large purchases in common makes of 39-in shirtings at 8s 7½d. In other classes of goods for that quarter little has been done, and yarns share in the dulness. The home trade demand for cloth is less active, as the season is now too far advanced. Home trade yarns are only in moderate request, and hardly firm in price. The Oldham lock-out has terminated without influencing our market in any way, owing to its short duration. The market closes very tame, and prices slightly easier.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—There is no change in our market since Tuesday, and prices offering are generally too low for producers to accept, the day's business is consequently limited.

BRADFORD.—A fair amount of wool is changing hands. Stocks are light, and with the consumptive demand and the difficulty of replacing, staplers are enabled to obtain higher prices. Nearly all descriptions of wool are in request, good wethers and hogs having the preference. Noils and brokes are in active demand, and prices are advancing. The worsted yarn market is tolerably active, though in some departments there is a rather quieter feeling. The piece market is active. A good business is doing, and prices are stiff.

BIRMINGHAM.—Orders have been coming in more freely, and although the state of the trade generally can scarcely be termed satisfactory, many of the larger works are better employed now than they have been since last autumn. The pig iron market continues quite as firm as last reported, and arrangements are in progress for increasing the local production of this class of iron.

BELFAST.—Flax—Our provincial markets were during the past week very sparingly supplied. A fair demand prevailed at steady figures. Yarns—Though no activity was apparent in demand a healthier tone seemed to pervade the market, and the business accomplished was slightly in excess of the previous week's transactions. Handloom linens (brown)—For good makes of linen handkerchiefs and light linens for bleaching, demand was again active, at full rates. Powerloom—Demand steady for good makes of roughs. For heavy linens and light linens for bleaching the demand was of a fair moderate nature; no change in prices.

NOTTINGHAM.—The lace trade, generally speaking, continues healthy. In the silk department there is a steady demand for spotted nets and warps, while hair nets are finishing to a fair extent. The market for the raw material is quiet, but good qualities maintain their value. Lace yarns sell steadily at previous quotations.

WOLVERHAMPTON.—Most branches of trade in this district have continued steady. Prices of iron continue low, and without much profit where makers have to buy all their materials.

DUNDEE.—Our flax market for spot goods continues without much animation, and with only a limited business doing. Stocks are still much reduced, and holders require full prices, which, however, consumers only grant for such quantities as they require for the supply of immediate wants, pending the arrival of supplies from the Baltic. For linen goods the demand is not very active, but manufacturers are generally pretty well employed. There is rather more doing in some descriptions of jute goods, and prices are very steady, with rather an upward tendency.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK.—APRIL 28.

The market has been very depressed during the past week, except some of the coarser stuffs. The receipts of flour show little increase, but there are large quantities on the way, and receivers have shown a disposition to press sales from the wharf, making concessions in prices in order to do so. Each decline brought in buyers for export, but their operations have not been sufficient to check the declining tendency, and the closing quotations are the lowest in several months. The decline has been most marked in the lower grades from spring wheat; several lines of these, which had been held by speculators, were forced upon the market by parties controlling them, in order to secure advances. In this way 3,000 barrels good old extra State sold yesterday at $6 in store, being taken for London, but new extras could not be bought under $6.25 to $6.35. To-day foreign accounts were dull at 3d decline, and shipping extras closed flat at $6 to $6.25, with a considerable pressure to sell the medium trade brands. Wheat has met with a sharp fall. Liverpool quotations have been lower, and shipping orders limited, even at reduced prices. The shipments Eastward from the Western markets have been quite free, both by water and rail, and we soon shall have large supplies here, and receivers feel quite uncertain as to how the market will stand up under the load; therefore, although stocks in store are small, they have shown a disposition to close out to the last parcel. Some decline in ocean freights stimulated exports a little, but on the whole the movement of the week has been moderate. To-day's market opened with a sale of No. 1 spring at $1.47 in store, and closed with small sales of No. 2 for early arrival at $1.45 afloat, but this grade was offered at $1.40 for all May. Amber winter sold at $1.51 afloat. Corn has been without especial variation for sound qualities, but a considerable portion of the receipts have been out of condition, and sold at lower and irregular prices. Yesterday large lines of "soft" Western mixed sold at 70c to 72c afloat, while strictly sound samples were worth 75c. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

An improved tone has prevailed in the corn trade during the week, and the tendency of prices for wheat has been upwards. In the local country markets the supplies on offer have been limited, and as the stocks in farmers' hands have been greatly diminished, dry parcels have been taken off readily, at an advance of 1s per quarter. The arrivals of English wheat for the Mark lane market have been limited, but the samples have come to hand in fair condition. Although the inquiry has not been brisk, factors have been very firm in their demands, and an occasional improvement of 1s per quarter has been realised on clean white wheats. The advance, however, has not been general, and we do not alter the quotations. Foreign wheat has sold freely at fully late rates. The imports have been on the increase, and shipments have been resumed with some activity, both in the European and American ports. The estimated number of wheat-laden vessels on passage from all quarters to the United Kingdom is 140, against 160 at the corresponding period last year. The accounts received of the growing wheat crops—though still satisfactory—are scarcely so favourable as they have recently been. Too much moisture has fallen, and there is some danger of the plant running to straw at the expense of the ear; while the cold nights have thinned the plant, especially on light soils. A short spell of genial weather, however, would probably remedy any defects that have made their appearance so far.

The spring corn trade has ruled dull, but prices have been supported, except for Russian oats, the supply of which has been in excess of the demand, and which have been pressed for sale at a decline of 1s per quarter. Flour has moved in sympathy with the wheat market, and country marks may be quoted 6d per sack higher.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 9 grain and seed-laden vessels have arrived at ports-of-call, viz.:—3 wheat, 3 maize, 1 barley, 1 locust beans, and 1 palm kernels. The floating grain trade has, for want of a sufficient number of cargoes offering off the coast, been quiet. Wheat—A steamer cargo has been sold at fully late rates, and later an advance of 1s to 2s has been asked. Maize—A cargo was sold early in the week at 1s advance, and later a cargo from Saffi was sold at 35s per 480 lbs. Barley—Only one cargo, somewhat out of condition, has been offered at 27s per 400 lbs. Rye has been more inquired after, but no business has been reported. The reported sales are as follows:—Wheat—2 arrived cargoes: Ghirka Odessa, 52s 3d per 492 lbs; red winter from New York, 55s 7½d per 480 lbs. On passage, 1 cargo new coast Ghirka Taganrog, at 53s per 492 lbs. To be shipped, 1 cargo Ghirka Odessa, 52s per 492 lbs. Maize—2 arrived cargoes: Odessa, 36s per 492 lbs; and a small cargo Barbary from Saffi, 35s per 480 lbs. On passage, 3 cargoes: Old Foxanian, 34s 9d; Galatz, 34s per 492 lbs; Ibrail, 34s per 480 lbs. Linseed unaltered. Arrived in London 200 tons East Indian Calcutta, at 65s, and 180 tons Patna, 64s 6d. Rapeseed, after declining 6d to 1s, has recovered 1s to 1s 6d, and closes steady at the advance. Arrived in London 250 tons middling yellow mixed, 70s; and 100 tons ordinary brown, 65s. On passage, 100 tons yellow mixed Calcutta, at 71s 10½d. Shipped or to be shipped, about 1,000 tons ordinary brown Calcutta, 64s to 65s per 416 lbs. Cotton-seed steady at late prices. 600 tons now shipping sold at 10 5s; and 1,000 tons November-December shipment at 7l 12s 6d per ton, f.o.b., Alexandria.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The tone of the market has much improved, and the demand has become more general. Prices of West Indian have latterly risen about 6d per cwt. The importers being sellers, a rather large business was done to yesterday, viz., 3,125 casks. Barbadoes by auction, 28s 6d to 35s 6d. Crystallised Berbice, 36s 6d, hogsheads; 37s to 37s 6d in bags, for fine qualities. The latter went slightly dearer. Low brown sorts attract more attention. Several parcels of Manila, Jaggery, &c., have changed hands during the week. The sale of the Netherlands Trading Company fixed for the 23rd inst. will contain 59,600 bags Java. According to official returns, the duty payments on sugar for the United Kingdom, in four months, were 190,850 tons raw, against 157,630 tons last year; and refined, 18,120 tons, against 13,240 tons. The stock in London on the 6th inst. was 69,250 tons, against 78,380 tons last year, and 69,200 tons in the previous one.

Mauritius.—At auction 384 bags brown were chiefly taken in.

Bengal.—558 bags were sold at 26s for brown Gurpatta, and 23s 6d for Dumma.

Natal.—366 bags grainy realised 32s 6d to 36s 6d.

Penang.—296 baskets were taken in at 20s for brown, and 22s for soft yellow date kind.

Jaggery.—About 8,000 bags are reported at 18s 6d to 19s 6d, according to quality.

Manila.—About 45,000 to 50,000 bags unclayed have sold at 20s 4d to 20s 6d. Ilo Ilo, &c., 22s.

Floating Cargoes.—Three of Cuba have sold for the United Kingdom at 26s to 26s 9d; two of Porto Rico at 27s.

Refined.—The market is without alteration to report, a moderate business being transacted in dry goods and pieces. Several contracts have been made in Dutch loaves and crushed for this market. The former at 34s to 34s 9d; sales of the latter at 32s 10½d to 33s per cwt. f.o.b.

MOLASSES.—No sales reported in West India. 320 barrels American treacle by auction sold at 15s 6d to 16s per cwt.

RUM.—There is a want of animation in the market, but the few sales made have not affected quotations. Pale West India, 1s 6d; good St Kitt's, 1s 9d to 1s 10d; Demerara, 1s 9d to 1s 10d proof. Jamaica has sold at 3s 6d per gallon.

COCOA.—The stock has been further increased by the heavy landings of colonial, the total amounting to 41,810 bags, against 28,211 bags last year at the same date. Fine Guayaquil has sold privately at 53s. The sales this week have passed off flatly. 545 bags Grenada part sold at lower rates; ordinary to fair, 45s to 52s; good to fine, 54s 6d to 64s. 775 bags Trinidad were only about one-third part disposed of, the quotations ranging from 55s to 93s per cwt.

COFFEE.—There was some irregularity in prices of plantation Ceylon until yesterday, when a decided improvement in the demand occurred, and many marks realised rather over valuations. Native has met with some inquiry at the reduction of last week. Other kinds are steady. The deliveries continue large. Present stock, 18,220 tons, against 19,170 tons last year, and 13,070 tons in 1869. At the public sales, 1,074 casks 211 barrels 1,195 bags plantation Ceylon sold, the latest quotations being as follows, low middling to middling ordinary, 60s to 66s; good middling to fine, 68s to 82s; pale and grey, 57s to 63s 6d; bold, 64s to 71s. 1,538 bags native partly found buyers, as follows: very good ordinary, 54s 6d; bold, 57s 6d; a few lots French kind at 53s. 74 casks at 52s to 55s for ordinary to bold. 384 half-bales Mocha were bought in. 419 bags East India sold at 61s to 65s 6d for Wynaad. 82 casks Tellicherry at 61s to 67s. 422 bags Singapore were disposed of as follows: picked Bally, 52s 6d; Bantyne, 57s 6d to 58s. 2,170 bags Rio were about one third part sold at 47s 6d to 53s. 286 bags washed Rio were partly disposed of at 50s to 53s for grey. By private contract, business has been done in native Ceylon at 53s to 55s 6d. Afloat, 1,000

bags St Domingo sold for the continent at 50s, and one of Bahia at about 46s per cwt.

RICE.—There has been a fair demand, and generally at full prices. By private contract, about 30,000 bags soft grain have sold, including Rangoon, at 9s 3d to 9s 6d; Necrancie Arracan, 9s 7½d. A parcel of fine Ballam at 10s 9d, ex quay, and 500 tons good to fine white at 11s 6d to 12s 6d; Madras, 9s 6d to 9s 9d; Askoolie, 10s 3d ex quay. A floating cargo of Rangoon of the new crop is reported at 11s. By auction, 1,365 bags Dacca were taken in at 10s to 10s 6d per cwt. The export deliveries have been more than double those of last year, and the stock is now moderate.

IMPORTS and DELIVERIES of RICE to May 6, with STOCKS on hand.

TEA.—The market is still devoid of animation. 1,169 packages congou sold by auction without reserve, chiefly at 10d to 1s per lb. Farther sales are declared for to-day. By private contract the business has been moderate in extent, chiefly in fair grades of congou. Indian tea has sold more freely, especially qualities with strength, but inferior sorts remain depressed. 9,000 packages were declared for the auctions this week. 4,000 sold previously to the sale, and the remainder chiefly bought in, but since part sold at rather lower prices.

SAGO.—260 bags small grain were taken in at 16s per cwt.

TAPIOCA.—354 bags Singapore were sold at 2d per lb, being again cheaper.

BLACK PEPPER.—Sales have been rather limited, but prices remain about the same as last quoted. Privately Penang of good quality obtains 5d. At auction 1,879 bags Singapore were chiefly bought in. Some few lots of good quality realised 5¼d per lb. There have been further arrivals.

WHITE PEPPER.—During the last two days there has been some speculative business. Singapore sold as high as 7⅞d, and that price is now refused. At auction on Wednesday 568 bags part sold at 6½d to 7⅝d for common to good quality. 137 bags Penang sold cheaply at 7¼d to 7⅜d per lb.

OTHER SPICES.—At the public sales on Wednesday 5 cases limed nutmegs from Amsterdam sold at 1s 11d to 2s 1d. 267 bags wild, in the shell, were bought in at 4d. 17 cases mace were principally withdrawn. 20 bales Zanzibar cloves were bought in at 2⅞d. Of 1,377 bags pimento several parcels were taken in above the former value. The remainder sold at 1¾d to 2d for low to good. 40 bags cinnamon bark sold at 1¾d to 2d. 188 boxes China cinnamon were taken in, except two lots which sold at 1s to 1s 0½d per lb for good flavour. 100 boxes Cassia buds part sold at 6*l* 10s. 227 barrels Jamaica ginger were disposed of on former terms, ranging from 36s to 77s for ordinary to good. 171 cases Cochin part found buyers: good ordinary rough, 44s; middling, part scraped, 56s to 60s per cwt. The bold chiefly taken in.

SALTPETRE.—The market has become quiet. A few parcels have sold on the spot at easier rates: Bengal, refraction 13½ to 8¼, 25s 9d to 26s 3d per cwt. 40 tons to arrive at 26s 3d, usual conditions. The deliveries are large.

IMPORTS and DELIVERIES of SALTPETRE to May 6, with STOCKS on hand.

Deliveries last week, 394 tons.

INDIGO. — The quarterly sales this week opened flatly, but subsequently went rather better for desirable qualities. 13,147 chests were declared. A large quantity was withdrawn or bought in. 3,263 chests had sold to this afternoon. There has been again a fair demand for the middling descriptions of Bengal at about the last sales rates, whilst the consuming and ordinary sorts sell with much irregularity, at from the last February prices to 4d decline. A few marks of Kurpah of European manufacture sold with spirit at from the last sales rates to 3d advance, but ordinary and low sorts are neglected even at 3d to 4d decline. Dry leaf Madras has sold at last February prices for the better qualities, and 4d per lb decline for the ordinary sorts.

DRYSALTERY GOODS.—Cutch of good quality is steady, but the sales have been limited. Present quotation, 20s to 21s. A few sales of gambier are reported on former terms. 100 tons sold at 16s 1½d, all faults. Bengal turmeric, 18s 6d to 19s per cwt, with limited transactions. 341 bales Bengal safflower were chiefly bought in. Privately business doing in low and fine qualities.

METALS.—These markets have shown the same want of animation as for some time past, and prices have occasionally declined. Straits tin was at one time sold as low as 123*l*, but afterwards experienced a reaction, the latest sales being at 124*l* to 125*l*. Business done afloat at 123*l* to 124*l*. English tin may be quoted 126*l* to 128*l*. Prices of copper have been rather irregular, ranging from 63*l* 10s to 65*l* for Chili, and rather more for the best qualities. Scotch pig iron has met with a good demand up to 56s 6d cash. The deliveries are large. Rails and other manufactured iron support quotations. A few sales of Silesian spelter are reported at 17*l* 12s 6d to 18*l* 5s per ton for common to special brands, and the market is steady. Lead is quiet at last week's quotations. English, 18*l* 5s to 18*l* 15s per ton.

JUTE.—There is not yet any general revival of trade demand, but the market is steady. Supplies in Dundee keep very large, and manufactured goods meet more inquiry. The few sales effected in this market have not had any influence upon prices. A large business has been done afloat chiefly at 20*l* 10s to 24*l* per ton.

HEMP.—At auction 124 bales Sunn and 108 bales Coconada were bought in. A limited inquiry prevails for Manila by private contract Petersburg clean quiet at 33*l* to 33*l* 10s; to arrive 1*l* 10s per ton, under these quotations.

LINSEED.—The market is quiet, but prices maintained. Calcutta, 63s to 63s 6d; afloat, 61s; Bombay to arrive, 62s; Black Sea, 61s. The quantity afloat is now moderate.

OILS.—Olive has been dull. A cargo of Gioya off the coast has sold at 44*l*. Colonial sperm has sold at 82*l*. Common fish oils dull. Pale seal, 37*l* 10s to 38*l*; new to arrive, 34*l* per tun. Linseed oil steady, at 32*l* 5s; next four months, 33*l*. Cochin cocoa-nut keeps scarce, at 46*l* to 50*l*. Ceylon offers more freely, at 40*l* 5s on the spot, and 41*l* for arrival. Palm steady. Fine Lagos, 37*l*. In the early part of the week a large business was done in English brown rape as low as 42*l* on the spot. The latest price is 42*l* 5s and 42*l* 10s last four months. Foreign refined, 46*l* to 47*l*; English, 44*l* 5s to 44*l* 10s per ton.

PETROLEUM quiet. American refined, 1s 4½d to 1s 5d. Business done in the last four months at 1s 5⅜d per lb.

TALLOW.—A further recovery in prices occurred during the early part of the week, with a good demand from the trade. The market is now quiet and rather weaker. Petersburg, 43s 9d to 44s; June, 43s 9d to 44s; October to December, 45s 6d per cwt. A very large quantity of Australian is declared for public sale this day.

POSTSCRIPT.

SUGAR.—The market is firm, and 6d to 1s dearer than on Friday last. Barbadoes at the public sales obtained full rates, and crystallised Demerara went rather dearer, viz., 35s 6d to 37s. Sales of West India, 1,621 casks, making 5,100 for the week; 350 bags Egyptian. Privately 3,200 bags Jaggery sold chiefly at 19s to 19s 6d. 7,000 bags Manila at 21s to 21s 6d for Taal; and clayed at 23s 6d.

COFFEE.—685 casks 64 barrels 319 bags plantation Ceylon by auction obtained full prices, and went off with fair spirit at full rates. 499 bags Costa Rica of the new crop sold at 70s per cwt.

RICE.—At auction 3,937 bags Madras part sold at 9s 6d; 3,250 bags Rangoon bought in at 9s 9d. Privately 100 tons white Bengal near at hand sold at 11s 6d per cwt.

SAFFLOWER.—38 bales Bengal part sold at 7*l* to 12*l* 10s per cwt.

GAMBIER.—730 bales pressed cubes part sold at 17s 6d per cwt.

METALS.—Straits per steamer has sold at 127*l* per ton.

OILS.—At auction 851 casks cocoa-nut part sold at 39s 9d to 43s 6d: Sydney, 35s 6d to 39s. 155 casks inferior palm part sold at 38s per cwt.

TALLOW.—At auction 3,042 casks Australian nearly all sold, prices being 3d to 6d lower: sheep, 41s to 42s 6d; beef, 37s 6d to 40s 9d per cwt.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that from limited arrivals oranges from Spain and Portugal have advanced in price. Sicily lemons, from stock being reduced, improved in value. Barcelona and black Spanish nuts in fair demand. West India cocoa-nuts have a brisk sale. Arrivals of new Lisbon potatoes are large, and prevents improvement in price.

DRY FRUIT.—At public sale this week, chief attention was paid to the damaged parcels offered. There is no material alteration to quote in value of any article. The market is very steady although business is quiet.

COLONIAL WOOL.—The public sales continue well attended, and competition is brisk. Prices very firm and in some cases higher, particularly for Cape wool.

FLAX.—Market steady.

HEMP.—Market for Russian very dull, and but few sales this week. Manila steady, on receipt of better advices from New York; good quality scarce and full prices paid.

SILK.—Market depressed, but little business doing.

SEEDS.—Very little business passing in seeds at about late rates.

TOBACCO.—There has been rather more inquiry for North American tobacco, but the sales effected have been but trifling. Prices for most descriptions continue firm. In other growths there has been a good business done; those descriptions suited for cutting, and termed substitutes, have met a ready sale at slightly reduced prices.

LEATHER AND HIDES.—There has been scarcely any change in the character of the leather market during the past week. The supply of fresh goods at Leadenhall on Tuesday was of moderate extent, and prices in general were stationary. There was again an active demand for light English butts, good English shoulders, calfskins of middle and heavy weights, and English and Spanish horse hides.

METALS.—The business of the week has been small. Copper has changed hands very slowly, and at rather easier prices. Tin having been depressed at the beginning is firmer at the close of the week, although no very great deal has been selling. Spelter and lead are steady. Tin plates are in good request.

METROPOLITAN CATTLE MARKET.

MONDAY, May 8.—The total imports of foreign stock into London last week amounted to 19,800 head. In the corresponding week in 1870, we received 7,570; in 1869, 14,855; in 1868, 18,716; and in 1867, 13,381 head.

In the cattle trade to-day only a moderate amount of activity was apparent. The supplies of stock have been good, and equal to requirements, whilst on the whole the quality has been satisfactory. With sheep the market has been fairly supplied. From our own grazing districts the receipts have been on a moderate scale, and the condition has been good. The foreign supply included some 270 Oporto beasts, in addition to upwards of 700 German and 200 Dutch. The trade has been dull, and prices have given way 2d per 8 lbs. The best Scots and crosses have sold at 5s 4d, and on a few occasions at 5s 6d per 8 lbs. The show of sheep has been good. Sales have progressed steadily at enhanced rates. The best Downs and half-breds have sold at 6s 2d, and occasionally at 6s 4d per 8 lbs. For lambs there has been a moderate inquiry at from 7s to 8s per 8 lbs. Calves have sold slowly, and the demand for pigs has been inactive.

SUPPLIES ON SALE.

Lamb, 7s 6d to 8s 6d.

HOP MARKET.

Borough, Friday, May 12.—This market has been characterised by a fair amount of steadiness. Business has been transacted on a more general scale, and for all descriptions the prices have been revised. Mid and East Kents, 2/ to 7/; Weald of Kents, 2/ to 3/ 15s; Sussex, 1/ 15s to 3/ 5s. Farnham and country, 3/ 15s to 5/ 12s; and olds, 15s to 1/ 10s per cwt.

POTATO MARKETS.

Borough and Spitalfields, Friday, May 12.—Full average supplies of potatoes have been on sale. The trade has been quiet, at our quotations. English Regents, 50s to 80s; Scotch Regents, 50s to 80s; and Rocks, 40s to 60s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT)

Friday, May 12.—At the public sales held here on the 10th instant, 1,546 bales were sold. Peru 194 bales Alpaca, 505 bales River Plate, 40 bales Montevideo, and 464 bales sundry kinds were offered and disposed of at full rates. River Plate wools continue a shade advance. The next series of East India wool sales will commence on the 23rd inst.

CORN.

(FROM OUR OWN CORRESPONDENT)

Friday, May 12.—At this market to-day wheat opened quiet, and prices are easier 1d to 2d per cental. Flour without change. Indian corn was very scarce, at an advance of 6d over Tuesday's rates. Barley, 4s to 4s 6d; beans, 37s 6d to 39s; peas, 45s; oats, 3s 9d to 4s; oatmeal, 3os to 31s.

Wakefield, Friday, May 12.—The weather continues cold. The crops are backward, and not favourably spoken of, besides which a serious prospect is again opening in the Antwerp and France, at advancing prices. The small stocks of wheat on the coasts of this country and the Baltic are likely soon to be exhausted. The wheat trade, therefore, remains somewhat unsettled, and with a fair inquiry, both red and white wheats are 1s dearer at this moment to-day.

The Gazette.

Tuesday, May 9.

BANKRUPTS.

Walter Shedden, Coleman street, City, tailor.

John Trott, Gibson square, Islington, and Metropolitan Meat Market, City, contractor for provisions.

James Norris Allison, Wellington, Shropshire, mercer.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN HILL, September 14, 1850.

Where they practise their peculiar system of DENTISTRY.

Messrs. GABRIEL'S ONYX-ENAMEL STOPPING is composed of mineral white and fine as the purest ivory. This beautiful preparation restores front teeth at once in a most perfect manner. Sufficient to stop six Teeth. Price 5s.

Messrs. GABRIEL'S ODONTALGIQUE ELIXIR is a concentrated Vegetable Fluid of great preservative properties. It gives instantaneous relief to toothache, arrests the progress of tartar and all impurities of the mouth, sweetens the breath, and for preserving the teeth in a healthy condition. Price 2s.

Messrs. GABRIEL'S ODONTALGIQUE TOOTH PASTE for Cleansing and Improving the Teeth, imparts a delightful coolness to the mouth and gives a pleasant sensation to the gums. Price 1s 6d.

A visit to season on the teeth may be had upon application free of charge.

FOR GENTLEMEN.—H. J. NICOLL'S SPRING OVERCOATS, of waterproof Tweed Cloths, 20s.; do., with Silk lapels, 24s.; of waterproof Melton cloths, 42s.; of waterproof Cheviot cloths, with silk facings, 52s 6d.

H. J. NICOLL'S SPRING CHEVIOT TROUSERS, 14s.; do., Negligé Suits, 42s.

FOR LEVEES AND DRAWING ROOMS.—H. J. NICOLL'S SUPER CLOTH SUITS with each appointments, complete, £20 5s; also Deputy-Lieutenants' Uniforms, of the finest and richest description, £36. Estimates supplied for naval and military uniforms.

FOR BOYS.—H. J. NICOLL'S KNICKERBOCKER SUITS, from 21s. Morning Suits from 25s.; Evening Dress Suits, from 35s., Highland suits, from 15s., Spring Overcoats in tweed cloths, from 14s., in Melton cloths, from 21s.

FOR LADIES.—H. J. NICOLL'S RIDING HABITS, in various coloured tweed, melton, and superfine cloths, from £3 3s to £8 8s; Paletots, from 6½ 6d., hats, with lace falls, 21s.; waterproof Tweed Cloaks, from 21s.; do. Costumes, from 63s.

SERVANTS' LIVERIES — THE best, at moderate prices.

H. J. NICOLL, MERCHANT Clothier to the Queen, the Royal Family, and the Courts of Europe, Army, Navy, and Civil Outfitter, 114 116, 118, 120 Regent street, and 22 Cornhill, London; 10 Mosley street, Manchester; 50 Bold street, Liverpool; and 39 New street, Birmingham.

COUGHS, COLDS, PAINS IN THE Chest, Shortness of Breath, Phlegm.—Two of Dr Locock's wafers give immediate relief, and nothing else gives such a sound refreshing night's rest, while in rheumatic and nervous pains they act like a charm. To singers and public speakers they are invaluable for clearing and strengthening the voice. They have a pleasant taste. In 1½d, 2s 9d, 4s 6d, and 11s per box. Sold by all medicine vendors. CAUTION.—Every box of the genuine medicine has the words "Dr Locock's wafers" in white letters on a red ground in the Government stamp outside, without which none are genuine.

HOLLOWAY'S OINTMENT AND PILLS.—Disfigurement removed.—From accelerated action of the heart in spring, combined with variable temperatures many of the affections of the skin are now prevalent, such as boils, carbuncles, pimples, blotches and many more annoying cutaneous disorders. In treating such complaints "cosmetics" are worse than useless, the only rational mode of cure consists in subduing the local disease whilst the impurities producing it are being expelled from the blood and glandular system. Holloway's ointment ensures the former objects, while his pills promote most perfect digestion of blood, glands, alimentary, and vital organs. The ointment being first expended, a few pills complete the cure. Quinine benefits digestion and accumulation, whereby the complexion assumes a wholesome clearness and transparency.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had and the Truss will be forwarded by post, on the circumference of the body two inches below the hips, being sent to the Manufacturer.

MR. WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 6d. Umbilical ditto, 42s and 52s 6d; postage, 1s 6d. Post-office orders to be made payable to John White, Post-office, Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c. for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 5s 6d, 10s and 14s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

Toned paper, demy 8vo, 48 pages, 1s; cloth, gold lettered, 2s.

ON THE USES OF BIOGRAPHY. With Illustrative Notes from Recent Public Occurrences and Opinions, in England and on the Continent, on Social, Commercial, and Political Questions of the Day.

By J. B. BROWN,

Author of "Views of Canada and the Colonists," and of the Article "Canada" in the "Encyclopædia Britannica."

"The sincere convictions of any man, if openly expressed, may be of value as actors in the problem."—Mr J. A. Froude, Address at St Andrew's, March 17th.

CONTENTS.

Note to the Rev. A. G. Hellicar.—Events now hourly occurring forcibly illustrate the subject.—Not one tinge of party politics throughout. One must be of no party to speak usefully on such subjects.

Interesting nature of the subject.—Times such as ours abounding more in dreamy and crotchety men than in great characters.—Advantages in studying such characters, and having less to do with debasing influences of the day.—The usefulness and fascinating charms of Biography.—Plutarch's reason for writing the lives of great men.—His life of Themistocles.—How it may have influenced great Statesmen.—How Pericles excelled all other orators.—Cicero and Demosthenes: the influence their lives have had on Orators and Statesmen.

May England never fall into the hands of those who mistake licence for liberty, and rough-shod Democracy and Socialism for true, safe, and enlightened freedom and progress.

The importance of the quality of courage in Statesmen.—On Truth; "each age fighting with its own falsehoods."—On Greatness, Courage, Openness of Mind and Soul and Sympathy.—How men "fear public opinion as they did in former times the Star Chamber."

Events on the Continent, where all was as it were yesterday only plea and holiday, now all carnage, &c.—How much is great courage have done—moral courage.—Respectful expression of sympathy for the Empress Eugenie.—May we not here breathe one word of respectful sympathy, &c.

How full of interest every record of the distinguished men of our own country.—The glorious name of John Milton; Lord Macaulay's famous eulogy of "John Milton, the poet, the statesman, the glory of English literature, the Champion and the Martyr of English liberty."

Only opening the subject: great names crowd the imagination fittingly to illustrate the uses of Biography.

NOTES.

"Movable Morals."—Sir E. Lytton Bulwer's Life of Lord Palmerston.—The Quality of Courage.—The Love of Her Majesty's Ship "Captain."—"English Republican Agitators."—These times of no insignificant portent, and to thought-ful mind of not a little anxiety.—Times of "Limited Liability," and not a little limited principle.—The Emperor Napoleon: Our once great, powerful, and friendly ally.—Lord Chief Baron Kelly's Address to the Magistrates of London.—French View of Recent Events, including the result of the Russian Conference.—The Empress Eugenie.—forsaking at times the gayest court in the world to soothe and to succour, &c.

London: Longmans and Co., Paternoster row, and all booksellers; also at Messrs W. H. Smith and Son's principal bookstalls.

ITALIAN COMPANY OF SOUTHERN RAILWAYS.

SECRETARY (pro tem.)—Mr Henry B. T. Powell.

TEMPORARY OFFICES—48 Lombury, London.

The Company is formed for the purpose of constructing and working a railway in the Argentine Republic from the city of Concordia to the city of Mercedes, near the Brazilian frontier, a distance of about 181 miles, under concessions granted by the Government of the Argentine Republic.

The principal terms of the concessions are—

1. The grant of the railway in perpetuity.

2. The Government guarantee interest at 7 per cent. per annum for the term of 30 years upon a fixed cost of £20,000 per mile of railway opened for traffic, payment by the Government under the guarantee to be reduced out of subsequent surplus profits above 7 per cent., with interest.

3. The railway is divided into two sections. The first section, from Concordia to Monte Caseros, about 95 miles in length, is to be commenced as soon as possible, and to be completed within three years from the commencement of the works. The concession authorises an extension of about 15 miles in length from Concordia to a point further down river, but which it is not now proposed to construct. The Company have the right to construct the second section viz., from Monte Caseros to Mercedes, about 86 miles in length, as soon as the first section has attained 40 per cent on its cost.

4. The whole of the land required for the railway and stations and works is given free of cost.

5. The property of the railway is exempt from all duties or taxes during the term of the guarantee.

A contract has been entered into with the Public Works Construction Company (Limited) for the construction and equipment of the first section of the line, including stations, workshops, and rolling stock, for the sum of £12,000 per mile. The Contract is to engage to pay the amount of the discount of £2 per share on the first instalments on all the shares now offered for subscription, and the consideration to be now paid for the concession, and other expenses, and a sum of £20,000 to cover the expenses of the formation of the Company, and to administer it until the completion and opening of the line.

The Contractors also engage, under the terms of the contract, to pay during construction such amounts as, with working profits, will make up interest at the rate of £7 per cent. per annum on the Company's share capital, including the discounts from time to time paid on it.

The contract provides additionally for the construction of the remainder of the railway on equivalent terms, but that section is not to be begun until required by the Company.

The provinces of Entre Rios and Corrientes through which this railway will run are amongst the most fertile of the Argentine Republic, and are rapidly increasing. It is calculated that the passenger traffic and a large portion of the goods traffic will be secured to the railway from the first day it is opened, and that the revenue of the railway will be considerably increased by the produce of the Entre Rios and Banda Oriental Provinces which, for a distance of about 40 miles, where the navigation of the River Uruguay is difficult, and in some places impracticable, pass over the railway.

The produce now passing down the second river from the first has been much underrated, and, coming from the richest districts of the Republic, the traffic will, in a few years be in excess of the guaranteed amount.

The Buenos Ayres Great Southern Railway yields a revenue of £8 per cent., the dividends from which are expected to receive further increase. Its 4,500 shares are quoted at £32.

The Great Western of Buenos Ayres and the Central Argentine Railway are also making satisfactory progress.

The Argentine Government have always shown the greatest willingness for the success of the Railway Companies, and the good faith in which they are supported by the Government of the Republic on the spot is shown by the quotations of the Bonds of the Republic on the Stock Exchange.

Copies of the Memorandum and Articles of Association, and of the contract between the Company and the Public Works Construction Company (Limited), and the Concession, can be inspected at the offices of the Solicitors to the Company.

The contract for the construction of the railway, transfer of concessions, and purchase of the Argentine Company will be submitted for the approval of the Argentine Government.

Until such approval is given by the Argentine Government the works will not be commenced, nor any part of the capital be expended.

Applications for shares should be made in the form annexed to the prospectus, and sent to the Company's bankers, Messrs Glyn, Mills, Currie, and Co.

The deposit will be returned in full if no allotment is made to the applicant. If an allotment is made the deposit of £1 per share will be applied towards the amount payable on the shares allotted.

The deposits and subsequent payments will be liable to forfeiture if any instalment or call be not duly met.

The following is a Copy of the Memorandum of Association:—

1. The name of the Company is The East Argentine Railway Company (Limited).

2. The registered office of the Company is to be in England.

3. The objects for which the Company is established are—

(A) The construction and the working of a railway in the Argentine Republic from the city of Concordia, or a point below Hervideno, on the river Uruguay, in the province of Entre Rios, to the city of Mercedes, in the province of Corrientes, and all or any branch or extension railways in connection therewith authorised by a concession dated the 12th August, 1869, granted by the Government of the Argentine Republic, and a supplemental concession dated the 20th September, 1869, and in respect whereof the said Government have granted decrees dated 27th July, 1870, and 22nd October, 1870; and all or any modifications of those works and all such further works as may be authorised by those concessions, or by any concession or decree of the said Government, supplemental to or extending the said concession or authorising the execution of any public works in the said Republic.

(B) The purchase and taking of a transfer or transfers of the concessions above-mentioned, or any of them, or any others for a similar purpose which the Company may decide to accept.

(C) The formation of a Société Anonyme in the Argentine Republic in accordance with the first above-mentioned concession or any modification thereof, and the exchange of all or any of the shares in the Company for shares in such Société Anonyme, when constituted, and the transfer to such Société of all or any of the property, assets, rights, debts, and obligations of the Company.

And the doing of all such things as are incidental or conducive to the attainment of the above objects.

4. The liability of the members is limited.

5. The capital of the Company is £960,000, in 48,000 shares of £20 each.

The following Deeds have been executed or agreed upon:—

10th May, 1871.—Transfer between Don Pablo de Montravel (the Concessionaire) of the one part, and the Company of the other part.

10th May 1871.—Articles of Contract between the Public Works Construction Company (Limited) of the one part, and the Company of the other part.

10th May, 1871.—Contract between the Company of the first part, the Public Works Construction Company (Limited) of the second part, and Samuel Bircham (Trustee) of the third part.

THE PUBLIC CO-OPERATIVE SUPPLY ASSOCIATION (Limited). Capital, £20,000, in £1 shares, fully paid-up on application without further liability. Registered under the Companies' Acts, 1862 and 1867.

ABRIDGED PROSPECTUS.

This Association has for its object the supply of articles of general utility and domestic consumption to householders who are willing to pay ready money for their purchases, on the principal so successfully adopted by the Civil Service Supply Associations in London, and by several Co-operative Societies in the provinces.

Hitherto however, the action of Co-operative Societies has been exclusive in its character, so that the public generally have not been able to participate in the advantages of the system.

In view of this the Public Co-operative Supply Association has been formed. The shareholders will be entitled to a participation in the profits, while the trading benefits of the Association will in justification of its title be open to the public generally without entrance fee, annual subscription, or restriction of any kind.

The Directors have already entered into a contract for the purchase of some remarkably eligible premises on the estate of the Marquis of Camden, in the North-West of London, together with the good will of a co-operative association having on its books upwards of 800 Customers, and comprising features of unusual advantage, and as soon as a sufficient amount has been subscribed no time will be lost in commencing the business of the Association. It is further intended to open depôts in different parts of the Metropolis, and elsewhere. With an inflexible regard to the proper principles of financial administration, and a careful selection of thoroughly qualified men for the various offices of the Company, the Directors (who are themselves engaged in commercial pursuits) have no hesitation in predicting for the Company a large and increasing success.

Prospectuses and all further information may be obtained from the Secretary at the Temporary Offices of the Association.

SAUCE.—LEA & PERRINS.

THE "WORCESTERSHIRE."

Pronounced by Connoisseurs,

"THE ONLY GOOD SAUCE."

Improves the appetite, and aids digestion.

BEWARE OF IMITATIONS

And see the names,

LEA & PERRINS, on all bottles and labels.

Agents—CROSSE & BLACKWELL, London, and sold by all Dealers in Sauces throughout the World.

THE PROFESSIONAL AND GENERAL CO-OPERATIVE SOCIETY (Limited), 459, 460, and 461 (New) Oxford street, W.C. (near Mudie's.)

Capital, £10,000, in 20,000 shares of 10s each. The shares to be paid for in full on application, and no further liability will be incurred by shareholders. All moneys will be returned in full where no allotment is made.

The following gentlemen have consented to act as a COMMITTEE OF MANAGEMENT.

Admiral Sir William Wiseman, Bart., K.C.B., Chairman, No. 88 Belgrave road, S.W.

Sir John M'Neil, LL.D., F.R.S., C.E., 17 The Grove, South Kensington.

Major Frank Bolton, 21 Grosvenor Mansions.

W. J. Neale, Esq., Barrister-at-Law, Brook hill, South Devon, and Elm court, Temple.

P. M. Leonard, Esq., Barrister-at-Law, 6 Stone buildings, Lincoln's Inn.

A. E. Taylor, Esq., C.C., Architect, 14 Basinghall street.

BANKERS.

Union Bank of London, Argyll place, Regent street, and its Branches.

SOLICITOR.

R. S. Gregson, Esq., 3 Angel court, Throgmorton street, E.C.

ANALYST—Dr Arthur H. Hassall.

ACCOUNTANTS.

Messrs Chatteris, Nicholls, and Chatteris, Gresham buildings, E.C.

SECRETARY—Mr Marley.

This Society is established for the supply of articles of general use and consumption.

Most commodious premises have been taken in the centre of the Metropolis, situate 459, 460, and 461 New Oxford street, W.C., nearly opposite Mudie's Library.

It is intended to open the following departments, and to add others as the necessities of the shareholders and members may render it expedient:—

Grocery,	Bottled Ales, &c.,	Brushes and Turnery,
Oil and Italian Ware,	Cigars, Tobacco, &c.,	Drugs,
Provisions,	Drapery,	Stationery.
Wines & Spirits,	Hosiery,	

The controversies that have taken place on the subject of co-operative stores have clearly established the fact that consumers availing themselves of the co-operative system obtain an immense advantage both in quality and price.

The two principal co-operative societies in the Metropolis are not only exclusive, but are totally inadequate to meet the requirements of the professional and general public; and this Society is established to meet that want.

Every article supplied will be of the best description at the lowest price. The services of the eminent analyst, Dr Hassall, have been secured by the Society.

The working of the establishment will be conducted at the lowest possible expense consistent with efficiency, and to enable this Society to carry the system of co-operation to its utmost limits, the amount of each share has been fixed at a trifling sum, so that every customer may be a shareholder; in this manner each shareholder will reap the full benefit of any small profits that may arise on his purchases.

The holder of one or more shares will be entitled to participate in all the benefits of the Society without any annual ticket or further payment whatever.

Yearly members may be admitted on payment of 2s 6d per annum, and they will be entitled to purchase goods from the stores and from the traders connected therewith, at the same reduced prices as the shareholders.

Special arrangements will be made to meet the requirements of country customers, and for the delivery of purchases in London and the suburbs.

Charitable institutions, naval and military messes, and clubs will be allowed to purchase at the stores without a share or yearly ticket.

The accounts will be audited twice a year.

No promotion money will be paid.

Applications for shares or annual tickets to be made on the enclosed forms, and forwarded to the Bankers, or to the Secretary, at the Offices of the Company, where prospectuses can be obtained and articles of association inspected.

FORM OF APPLICATION FOR SHARES (TO BE RETAINED BY THE BANKERS).

To the Directors of the Professional and General Co-operative Society (Limited).

Gentlemen,—Having paid to your Bankers, the Union Bank of London, the sum of £ , being the amount of shares in the above Society, I hereby request that that number of shares be allotted to me, and I agree to accept such shares (or any less number), and I hereby authorise you to place my name on the Register of Shareholders in respect of the shares allotted to me.

Name in full.....

Residence.....

Profession or occupation.....

Date.....1871.

Deposits may be forwarded to the Secretary, at the Offices of the Company, or to any of the Branches of the Union Bank of London.

FORM OF APPLICATION FOR ANNUAL TICKET ONLY.

To the Directors of the Professional and General Co-operative Society (Limited).

Gentlemen,—Please place my name on your list of yearly members, and forward me an annual ticket, for which I herewith enclose my subscription, 2s 6d.

Name.....

Profession or occupation.....

Address.....

THE PROFESSIONAL AND GENERAL CO-OPERATIVE SOCIETY (Limited).—Nearly 7,000 shares having been already applied for, the day for Allotment is fixed for 1st June, and the Committee hope to have the Stores Opened for Business by the 25th June.

ABRIDGED PROSPECTUS.

This Company is formed for the purpose of purchasing and working certain Contracts, Rights, and Privileges, which have been granted to Mr Mylius Cohen, for the exclusive employment within and sole right of importing into the United Kingdom, for the term of twenty years from the 18th March, 1871, the celebrated Limmer Asphalte for paving streets, pathways, bridges, &c.

The agreement for purchase includes the contract for the paving of Lombard street, as well as all other contracts which have been entered into by Mr Mylius Cohen, and are now pending. There is no Royalty payable on the asphalte, and the proprietors have undertaken to deliver any quantity of the material that may be required.

The Limmer Asphalte was first introduced into this country last year, and a part of the carriage way of Bermondsey street, S.E. was paved with it in August. As the traffic passing through this street is of a very heavy nature—consisting of railway vans to and from the Bricklayers' Arm Goods Station, and waggons from the neighbouring wharves—it will be seen that this asphalte has been subject to the severest test.

The Commissioners of Sewers for the City of London decided, on the 22nd of February, that Lombard street should be paved with Limmer Asphalte, and this work was begun on the 17th April.

It has also been decided by the Commissioners of Sewers that Moorgate street and Finsbury pavement shall be paved with asphalte, and that a portion of the work shall be given to the Limmer Company.

Prospectuses and all further information may be obtained from the Secretary, at the Temporary Offices of the Company, 2 Gresham buildings, Basinghall street, E.C.

A LITERARY MACHINE.—

The PATENT READING EASEL, for holding your book, will lay down, keep and refer to any page you may require, or turn it over, as easily as if in your hand. Invaluable to invalids and students, and a most useful and elegant gift. Prices, 21s and 31s. Drawings free.—J. [illegible] street, W.

IMPERIAL CONTINENTAL GAS ASSOCIATION.

Incorporated by Act of Parliament.

Notice is hereby given, that the Half-Yearly Ordinary Meeting of the Proprietors of the Imperial Continental Gas Association will be held at the City Terminus Hotel, Cannon street, London, on Tuesday, the 30th instant, at two o'clock in the afternoon precisely, when a Report will be made to the Proprietors, a Dividend declared for the half-year ended the 31st December, 1870, and the usual ordinary business of such meeting transacted. Notice is hereby also given, that the Transfer Books of the Association and the Register of Shareholders will be Closed on Tuesday, the 16th instant, and will remain Closed until after the Half-Yearly Ordinary Meeting on the 30th instant.—By order of the Board of Direction,

ALBERT F. JACKSON, Secretary.

No. 30 Connect's house, Lombard street,
London, 8th May, 1871.

GREAT SOUTHERN OF INDIA RAILWAY COMPANY.

Notice is hereby given, that the Fourteenth Ordinary Annual General Meeting of the Great Southern of India Railway Company will be held within the London Tavern, Bishopsgate street, in the City of London, on Tuesday, the 30th day of May instant, at One o'clock, for the election of Directors, and the usual ordinary business.

The Transfer Books will be Closed from Monday, the 22nd, until Tuesday, the 30th of May, both days inclusive.

Transfers will not be received at the Office while the Books remain Closed.—By order,

HENRY W. NOTMAN, Secretary.

Company's Offices, 2 Leadenhall street,
London, 2nd May, 1871.

LONDON AND NORTH-WESTERN RAILWAY COMPANY.—Conversion of Debentures into Debenture Stock.—Four per Cent. Perpetual Debenture Stock.—The Directors are prepared to receive applications for the Loan of portions of the Company's FOUR PER CENT PERPETUAL DEBENTURE STOCK, to be transferred on the books of the Company in the names of applicants free of all expense.

A commission of ½ (one-half) per cent. is allowed to applicants.

The stock thus raised will be entitled to the same priority against the property and income of the Company as the Debenture Bond deeds, ranking before the Company's stock and share capital, representing nearly forty millions sterling, and will be a first charge on a net income now amounting to upwards of three millions of pounds annually.

Any amount of stock, not being a fraction of a pound, can be subscribed for or transferred.

The stamp duty on transfers of this stock is 2s 6d per cent. on the nominal amount of stock conveyed, a duty considerably less than that payable on the transfer of other stocks and shares.

The Interest will commence from the date when the money is paid to the Company's credit, and will be paid half-yearly on the 15th January and 15th July.

Forms of application may be obtained by letter addressed to the undersigned.

Euston Station. STEPHEN REAY, Secretary.

THIRTY-EIGHTH ANNUAL REPORT OF THE

NATIONAL PROVINCIAL BANK OF ENGLAND.

MAY 11TH, 1871.

CAPITAL.

Subscribed Capital, £2,545,520. (In 10,000 Shares of £100 each, £42 paid.) 55,000 — £20 — £12 — 22,276 — £20 — £2 — Capital Paid-up, £1,125,358.

Reserve Fund, £388,015 8s 5d.

Number of Shareholders, 2,840.

DIRECTORS.

Right Hon. Lord Ernest Augustus Charles Brudenell Bruce, M.P., 7 St George's place, Hyde park corner, S.W.

George Hanbury Field, Esq., 67 Eccleston square.

John Oliver Hanson, Esq., 4 Dorset square.

John Kingston, Esq., 6 Crosby square.

Duncan Macdonald, Esq., Belgrave Mansions, Grosvenor gardens, London, and Weybank Lodge, Guildford, Surrey.

Henry McChlery, Esq., 16 Leadenhall street.

Henry Paull, Esq., 33 Devonshire place, Portland place, W.

Alexander Robertson, Esq., 20 Grafton street, Berkeley square, London, and the College, Elgin, N.B.

John Stewart, Esq., 4 Bank buildings.

Sir James Sibbald David Scott, Bart., 18 Cornwall gardens, Queen's gate.

Richard Blaney Wade, Esq., 13 Seymour street, Portman square, W.

Hon. Eliot Thomas Yorke, 15 Park street, Grosvenor square, W.

EDWARD ATKINSON, Esq., WILLIAM HOLT, Esq., Joint General Managers.

Bishopsgate street, corner of Threadneedle street, London.

SOLICITOR—Charles Norris Wilde, Esq., College hill, London.

RICHARD BLANEY WADE, ESQ., in the Chair.

REPORT.

The Directors now present to the proprietors their thirty-eigth annual report:—

It is with much satisfaction that they refer to the summary of accounts for the past year, and state that the operations of the Bank for that period enable them to recommend that the dividend now to be declared should be the same as for the three previous years, namely, at the rate of four per cent., and a bonus of seven per cent. for the half-year, making, with the dividend paid in July last, twenty-one per cent. per annum. It will be observed from the accounts that a sum of £40,000, which includes £25,000 mentioned in last year's report, is carried forward as undivided profits, and the Directors advise that this amount be kept unappropriated until the working of the new capital be more fully realised. It is not considered necessary on this occasion to increase the reserve fund, which, from the payment of premiums on new shares in July next, will stand at £501,840 8s 5d, an amount which the Directors believe will be very satisfactory to the proprietors.

The Directors also report that the new capital has been very readily subscribed by the shareholders. Out of the 22,500 £20 shares, agreed to be issued at the last annual meeting, only 224 have not been taken up, and have consequently been forfeited. These it is proposed to sell at the market price of the day, and to invest the profit derived therefrom in the names of the Bank's trustees to form a fund, the interest of which should be applied to the relief of distressed widows and orphan children of the officers of the establishment. The nucleus of an independent fund will thus be formed, to which it is contemplated a considerable accession will be eventually made by the surplus arising from the Officers' Guarantee Scheme.

Both the home trade of the country, and the agricultural interests in some districts, have been more prosperous than for some years past, but the value of money in London has been very low, owing to the war on the continent, which caused a large amount of capital to be sent to England for temporary investment. There were ten changes in the Bank of England rate of discount, the average for the year being £3 1s 11d, against £3 3s in 1869. The business of the Bank has continued to increase; about 2,300 additional current accounts have been opened during the year, and it is with much pleasure the Directors submit the following statement of accounts, prepared in the usual form:—

	£	s	d
1870. Jan. 1.—Rest or undivided profits at December 31, 1869, as exhibited at the annual meeting in May, 1870, viz.	352,440	8	5
Bonus eclared and paid in cash in July, 1870	75,600	0	0
Leaving	276,840	8	5
1870. Dec. 31.—Net profits of 1870, after making allowance for bad and doubtful debts, and bonus of 10 per cent. to officers	246,750	0	0
Making	523,590	8	5
Add undivided profits from 1869	25,000	0	0
Total	548,590	8	5
Deduct dividend on Company's stock, paid July, 1870 £43,200 0 0			
Ditto January, 1871 45,000 0 0			
Bonus of 6 per cent., paid January, 1871	64,800	0	0
Undivided profits to next year	40,000	0	0
	193,000	0	0
Leaving	355,590	8	5
Brought forward	355,590	8	5
Out of these profits the directors propose to declare, in addition to the foregoing dividends and bonus paid to proprietors as above stated, a further bonus of 7 per cent. in July next, making a division of profits in 1870 in all 21 per cent. upon the paid-up capital, free of income tax, amounting to	78,750	0	0
	276,840	8	5
Add premium on new shares received up to 21st October, 1870	111,175	0	0
Leaving reserve invested in Government securities	388,015	8	5

The following Directors go out of office by rotation, but being eligible for re-election offer themselves accordingly, viz.:—

JOHN KINGSTON, Esq.
SIR JAMES SIBBALD DAVID SCOTT, Bart.
DUNCAN MACDONALD, Esq.

NATIONAL PROVINCIAL BANK OF ENGLAND.

31st December, 1870.

Dr. Liabilities.	£	s	d
To paid-up capital	1,125,358	0	0
To amount due by the bank on deposits, &c.	15,734,999	7	7
To acceptances	691,087	12	11
To reserve fund, 1st January, 1870 £276,840 8 5			
Addition, premium on new shares 111,175 0 0			
	388,015	8	5
To profit and loss balance	118,750	0	0
	18,058,210	8	11

By cash in hand, at Bank of England and branches, call and short notice	2,666,093	0	7
By Government securities	2,332,615	0	0
By Indian Government and other securities, debentures, &c.	1,900,921	0	0
By bills discounted, loans, &c.	10,803,815	7	4
By freehold premises, &c., in London and country, total amount £433,961 5 4			
Less, at credit of building fund 79,195 4 10			
	354,766	0	6
	18,058,210	8	1

The above report having been read—It was

Resolved unanimously—That the same be adopted and printed for the use of the proprietors.

Resolved unanimously—That John Kingston, Esq., Sir James Sibbald David Scott, Bart., and Duncan Macdonald, Esq., be re-elected Directors of the Company.

Resolved unanimously—That the best thanks of the proprietors be presented to the Directors for the very successful management of the affairs of the Company.

Resolved unanimously—That the best thanks of the proprietors be given to Edward Atkinson, Esq., and William Holt, Esq., the general managers, and to the branch managers, and other officers of the Company for their efficient services.

Resolved unanimously—That the best thanks of the meeting be presented to the Chairman for his able conduct in the chair.

THE GROSS PROFITS OF DIFFERENT BANKS AND THE NET.

In a railway account we are well aware that one of the most important items is the *cost* of earning the profit. We habitually look not only at the gross earnings, but at the proportion of those earnings which is swallowed up in expenses—and the accounts, especially under the present statutory form, are so framed as to enable us to do so. In *banking* accounts we ought to be able to do the same. A most material item to investors in bank shares is the cost at which the dividend is earned. That cost is one of the ingredients necessary to a good judgment upon the nature of the bank's business. But it is remarkable how few banks give it in their published accounts. In our Banking Supplement issued this day, we publish the reports of all the banks for the half-year which we can obtain, but out of the whole number of 95 such banks, there are only 42 which give this necessary and obvious information.

Of course there is one vital element in a bank's accounts which a bank never will give or ought to give. "Bad "debts" are a necessary incident if the bank is doing a proper and extensive business; but it is by no means reasonable that these bad debts should be discussed and talked about. The only effect is to weaken the bank's credit. A hundred people will remember "that something was said," and retain an unfavourable impression, for one who will accurately examine that something, or who is competent to say whether in the particular circumstances the bad debt stated is "legitimate or illegitimate"—is such a one as indicates bad management, or such a one as will certainly happen in the course of years under good management, and the long-continued absence of anything resembling which would tend to show that the bank was not doing so extensive a business, and was not earning as much dividend for its shareholders as it ought. "Bad debts" are necessarily a secret element in bank management, but exactly on that account it is most important that there should be no other secret element. One ingredient in judging of the management being concealed, all the rest certainly ought to be stated.

We give below tables of the *cost* of earning the dividend in those banks which give us it. These tables, unless when it is otherwise stated, are founded on the accounts of the last *half-year* only, which will be found in our Supplement, for study and comparison; and the following conclusions may be deduced from them:—

First. The expenses of banks with many branches are, as might be expected, much heavier than those with only a few, or with a single branch. This is evidently reasonable, because the same staff of clerks and managers is much more efficient when concentrated in a single place than when divided between many branches; but care should be taken not to judge by the number of branches only, without reference to their magnitude. Small branches, where little money is lent, may get on with a very inexpensive staff in comparison with a larger branch, where the real element of difficulty—the lending of money—is greater and more important.

Secondly. Those who carry on business out of England and in the colonies spend in proportion much more than others. And this is very reasonable. English banking has to be carried on everywhere in the world, principally by English managers and English principal clerks; and the exportation of those "managers and clerks" to foreign and often disagreeable climates costs money. No one will go to India and China without expecting a much larger salary than he would do the same work for at home. It would be a fatal error to underpay men extensively trusted with money at a great distance from effectual supervision. Accordingly it will be found that while the average expense of London banks is only 36 per cent. of the gross earnings, the average expense of banks carrying on business abroad is as much as 48 per cent. of those earnings.

Thirdly. The account shows what an exceedingly profitable business a good-established and well-managed bank

possesses in England. Taking the 25 banks in London and the country—

	£
The gross profit is	1,197,744
Expenses	418,815
Net profit	778,929

—so that, taking the whole country, only about 35 per cent. of the gross earnings is expended in the cost of the business. All the rest is applicable for dividend. We doubt if as much can be said for any other business of the same magnitude in England, or for the same business anywhere else in the world.

STATEMENT of the GROSS PROFITS and WORKING EXPENSES of the Undermentioned BANKS, *per* SUPPLEMENT to ECONOMIST of this date.

[In stating the gross profit, the interest paid to customers and rebate on bills not due are in all cases deducted.]

MR LOWE AS CHANCELLOR OF THE EXCHEQUER.

"AN oak," said a great Irish orator, who did not succeed so well as he expected in England, "an oak should not be "transplanted at fifty." And we believe that to be the reason why Mr Lowe—though in many respects he has shown great ability as Finance Minister—upon the whole has not as yet succeeded better than many much stupider men, or as well as his genius deserved. Mr Lowe, before he began his finance studies, had already "invested" so much mind that most men would have had no more left. His career at Oxford was unusually long; he was not a mere student who took high honours. After that he stayed several years as a working tutor, and has described to a Royal Commission how steadily he worked for ten hours a day as a "coach," and how little in consequence he accepts the "romance" of tuition. And the inevitable result has been that Mr Lowe has become a scholar, not only as young students become such, but as men of maturer years, who mean to earn money by it, become so. A certain part of the substance of his mind is embarked in that pursuit, and cannot now be transferred to any other. After leaving Oxford Mr Lowe made himself not only an excellent English lawyer, but an admirable general jurist. He is acquainted not only with the technicalities of English law, but with the structure of other systems of law, and with the principles of scientific jurisprudence. He has studied what Bentham said law "ought" to be, and what Austin said law "must" be. And this too is a very exhausting study, requiring, if the knowledge is really to be acquired as Mr Lowe has acquired it, and retained as he retains it, a great "capital" of mind. No one can wonder that, when on the verge of threescore, he was suddenly made Finance Minister, he should not possess or display so much free and applicable mind as some younger man. Great mind he must always display. But he has not displayed proportionate mind—proportioned, we mean, to the immense abilities which everyone knows he has. After all, there is only room in even the largest head for a certain number of thoughts, and Mr Lowe had crowded his, long before he had tried finance, with many dissimilar and occupying ideas.

It is true that under our Parliamentary system Ministers of as mature an age as Mr Lowe are not unfrequently transferred from post to post, and are placed in charge of offices with whose subjects they have no knowledge. No one supposes that Mr Cardwell knew much of military business before he was made Secretary for War, and yet unquestionably he has pulled the Army Regulation Bill better through Parliament than the planners who contrived it, or the soldiers who will act on it. But these transferable statesmen commonly belong to a different class from Mr Lowe. Like Mr Cardwell, they are trained Parliamentary advocates. They have learned to know the House of Commons, and the way of putting an argument so as to suit the House of Commons, as a long-practised advocate knows the sort of arguments which suit a jury, and the most telling way in which to state them to a jury. Sir R. Peel was once said to know how to "dress up a case for "Parliament" better than anyone else. And in this art there are two secrets, of which Mr Cardwell is an eminent master. The first is always to content yourself with the minimum of general maxims, which will suit your purpose and prove what you want. By so doing you offend as few people as possible, you startle as few people as possible, and you expose yourself to as few retorts as possible And the second secret is to make the whole discussion very uninteresting—to leave an impression that the subject is very dry, that it is very difficult, that the department had attended to the dreary detail of it, and that on the whole it is safer to leave it to the department, and a dangerous responsibility to interfere with the department. The faculty of disheartening adversaries by diffusing on occasion an oppressive atmosphere of businesslike dulness is invaluable to a Parliamentary statesman.

But these arts Mr Lowe does not possess. He cannot help being brilliant. The quality of his mind is to put everything in the most lively, most exciting, and most startling form. He cannot talk that monotonous humdrum which men scarcely listen to, which lulls them to sleep, but which seems to them the "sort of thing you would expect," which they suppose is "all right." And Mr Lowe's mode of using general prin-

ciples not only is not that which a Parliamentary tactician would recommend, but is the very reverse of what he would advise. Mr Lowe always ascends to the widest generalities: the *axiomata media*, as logicians have called them,—the middle principles, in which most minds feel most reality and on which they find it most easy to rest—have no charms for him. He likes to go back to the bone, to the abstract, to the attenuated, and if he left these remote principles in their remote unintelligibility, he would not suffer so much. But he makes the dry bones live. He wraps them in illustrations which Macaulay might envy. And he is all the more effective, because he uses our vernacular tongue. The phrases that "the money market "must take care of itself," and that "it was not the business "of the Treasury to cocker up the Bank of England," will long be remembered, and will longer impair his influence with grave, quiet, and influential persons. Mr Lowe startles those who do not like to be startled, and does not compose those who wish to be composed—those who need a little commonplace to assure them that they are acting on safe principles, that they are not, according to the saying, "lighting the "streets with fireworks."

These defects would be felt in any new office; but besides these, Mr Lowe has one—a physical one—to which he has often himself alluded, and which hampers him beyond expression. In our younger days he would have been cited in books of "entertaining knowledge" as a conspicuous instance of the "pursuit of knowledge under difficulties." Being unable to read books with his own eyes, he knows more about books than almost anyone who has eyes. A wonderful memory, and an intense wish to know the truth, have filled his head with knowledge; but though great powers may compensate for inherent defects, none, not even the greatest, can annihilate those defects. They are ineradicable, and the consequences of them will come back again to lessen every victory, and to enhance every disaster. It is so with Mr Lowe in this case. A man who cannot easily read figures for himself, who cannot manipulate them for himself, who cannot throw them into various shapes, as it were, on trial for himself, cannot be a great financier. Our greatest financiers, Pitt, Peel, and Gladstone, have all of them been men who did not take their figures from others, but who spent a great—almost an excessive—labour on the *minutiæ* of them for themselves. It is from no lack of labour, and no lack of mind, that Mr Lowe does not do this. By physical constitution he is incapable of it.

Something of this is at the bottom of Mr Lowe's occasionally defective dealing with small financial forms, which was the only point that Mr Disraeli made against him on Thursday night. It is hardly possible that a man with such immense disadvantages for business can have his tackle quite as ready and quite as perfect as those who are more fortunate. And Mr Disraeli is scarcely the man who ought to have made the taunt. No one regards these legal forms with more sublime indifference than he does when it suits his office. "Gentlemen of the long robe," he used to say when in office, "will attend to these details;" and he would have deemed it absurd that a Minister, charged with the fate of Cabinets and the policy of measures, should ever consider them. And perhaps he was right; perhaps it would have been absurd. But what is unnecessary for one Minister cannot be incumbent on another similar Minister. It was not for Mr Disraeli, who has scarcely seemed to be able to see details and technicalities (so exclusively did he look on them from the most elevated points of policy), to reproach Mr Lowe with a few trivial, innocuous, and excusable deficiencies in them.
